By Jean Kinkead, Women's Consultant, The Travelers Insurance Companies Packing For College

Women in the know with college-bound youngsters are encouraging their students to pack

for college with intelligence and forethought. If possible, young people should visit their rooms, measuring windows and beds, floor z and wall space.
A letter of inquiry to the Dean of Admissions

is a must if this visit is impossible. Then, after an exchange of letters with the future roommate, a color scheme can be established and some essential shopping can be done.

Atmosphere of a college room is immensely important to girl students. It is the climate in which she lives. It's home. (Boys tend to be fairly oblivious to their immediate surroundings, provided they have a good reading light and a comfortable bed!) Which treasures should your daughter take to give her room her own imprint? Women in the know suggest seriously consid-ering the following: a small re-production of a favorite print, much-loved tea-set, big book-case and her dearest books, family photographs, a special wallhanging, one beautiful lamp, and a highly-prized little rug.

A small box with a lock should be brought for safeguarding

good jewelry and cash.

Before the youngster leaves for college, it's a good idea to check certain things with one's Travelers agent. Are all belongngs entirely covered for fire and theft away from home? Does the family policy cover the non-resi-dent student in the areas of acci-dent and health? Is there coverage to reimburse the amount of tuition that might have to be forfeited if the student had to withdraw for medical reasons?

FREE ENTERPRISE DAY

The Haskell Free Press is a strong advocate of "Free Enterprise.

Just about every day of the year has been set aside for observance of an event, an institution, or a notable figure in the nation's history. A day of this kind if scheduled on the calendar for October 2 ... an occasion that not one person in a thousand will note or will be aware of. In the catalog of "days," "October 2nd is identified simply as Free Enterprise Day," whose purpose is: "To show appreciation of America's Free Enterprise System, by reminding ourselves of its benefits and pledging its continued support."

We have all heard the term free enterprise, but in this day of super-government, high taxes, crushing public debt and detailed regulation of nearly every human activity, free enterprise has lost much of its meaning. It has ceased to exist in the pure traditional sense and sadly enough because of that, basic liberties have been circumscribed to a far greater extent than most of us realize. In fact, many writers and commentators shy away from the expression "free enterprise," because they feel it has become meaningless.

Free enterprise is far from meaningless. It is inseparable from representative government. Unicially, it is defined by Webster as "an egonomic system in which primary reliance is placed upon private business operating in competitive markets to satisfy consumer demands and to maintain equilibrium in the national economy and in which government action in this respect is restricted to protecting the rights of individuals rather than acting as a directing economic force." Thus, Free Enterprise Duy holds genuine meaning for all of us.
