## Statement on Public School Week IN TEXAS — MARCH 1-6, 1954

from Thos. B. Ramey, Chairman, State Board of Education

From earliest days Texans have recognized the importance of an educated citizenship in the development and progress of our state. In only relatively recent times, however, has our concern for our public schools attained a stage beyond passive acceptance.

Obviously, whatever advancement our schools have made is directly attributed to an enhancement of public interest in them. It is a principle universally recognized that no program designed for the public good can succeed unless it has the confidence and support of the people in general. Accordingly it may be expected that the future progress of public education in Texas will be dependent upon the continued evidence of public interest.

Public schools Week affords an appropriate occasion to encourage our citizens to become more familiar with our school activities and the way in which our schools are operated. Thereby may be stimulated a popular desire that our children should receive the very best public education that is attainable. What the people really and earnestly desire, they usually find a means to obtain.

## A RULE FOR BROTHERHOOD

By Oveta Culp Hobby

Secretary of Health, Education and Welfare  
The one drawback to annual observances of any kind is that of habitude, we tend to become phrasemakers who no longer listen to our own pat phrases.

In all the editorials and speeches which will be made before this week is done, the word "brotherhood" rolls off again and again until it sounds easy.

But brotherhood doesn't come in a package. It is not a commodity to be taken down from the shelf with one hand — it is an accomplishment of soul-searching, prayer and perseverance.

Brotherhood takes self-aware practice.  
The rule of thumb is a simple one: Regard each man and woman as an individual. Not as a Catholic, a Protestant or a Jew. Not as a Negro, Angla-Saxon or Asiatic.

Look at the person — at the character and personality of this human being. Like or dislike that person for his own intrinsic qualities, and refuse to tinge that judgment by the irrelevant fact that he belongs to a different race or religion from your own.

The spontaneous feeling of brotherhood is a mark of human maturity. Many illiterate people have an instinctive recognition of brotherhood which is a thing of the spirit. The American Indians, when they found a white man worthy, could take him into the tribe as a blood brother. The child, left free to appreciate kindness and generosity, sets no artificial boundaries on his love for people.

Others — more highly educated, more aware of self — find the concept of brotherhood as an intellectual process. Unfortunate are those who, in their limitations, can never sense the brotherhood of man.

Brotherhood realized is the ultimate objective of democracy — a free just and harmonious civilization.

## CONSUMERS SET THE VALUES

Many a housewife often wonders why one cut of beef, off the same steer, may cost twice as much as another.

There's nothing mysterious about it, however — and it isn't caused by ominous human connivance. It is the natural and inevitable results of two factors — the physical makeup of that steer, which no one can do anything about, and the law of supply and demand, which is a natural law as old as civilization.

Take, for example, two cuts of beef — a fancy steak and a pot roast. The steak sells at around \$1.00 a pound, and the pot roast, which is equally nutritious, sells for about half that figure. The reason for the disparity in price is easily explained. A 1,000-pound steer provides only about 35 pounds of top-priced steak — while it provides three times as much pot roast. And the steak is generally held in higher esteem than the pot roast.

The upshot is that demand for the steak in relation to supply is very high — while in relation to the pot roast it is much lower. And that is what determines the price we pay. In the free market, in other words, the consumer themselves, acting en masse, set the values. This is true of everything in general use.

"It is government's responsibility in a free society to create an environment in which individual enterprise can work constructively to serve the ends of economic progress

## Wesleyan Service Guild Met Feb. 8 With Mrs. Pirtle

The Wesleyan Service Guild of the First Methodist church met in the home of Mrs. Jim Pirtle Feb. 8 for a regular meeting.

Mrs. Pirtle, the president, held a short business meeting. The group voted to send a cash donation to Vikarabad, India for rural hospital work.

Mrs. Homer Gilbert read the minutes of the previous meeting.

Mrs. Lucille Duvall gave the treasurers report.

The devotional service was given by Mrs. Madel Ellis. The title was "The Master Calls us to Service."

A prayer was offered by Mrs. Earl D. Martin.

The program was presented in a most interesting manner by Mrs. Homer Gilbert. The subject was the Methodist Church helping the Negroes. The theme of the lesson was teaching the negroes a better way of living. They must be helped with information of health, recreation, religious and social living.

Mrs. Gilbert gave the closing prayer.

Mrs. Pirtle, a most gracious hostess, served delicious refreshments to the following members: Mesdames Lucille Duvall, Gertrude Brown, Edith Felgar, O. E. Melton, Homer Gilbert, Gay Groves, Madel Ellis and Earl D. Martin.

The March meeting will be in the home of Mrs. Melton.

### Furniture Fashions

Perhaps you have thought that furniture has reached the utmost in functionalism and practicality. Here is another feature in the world of furniture fashions which is sure to please all homemakers—a cedar-lined drawer in a storage unit.

One entire drawer of this bedroom piece is constructed in cedar with a special lid to insure tight sealing and complete protection. This is a practical place to store wearable woollens. With this unique cedar compartment you can have finger-tip protection for sweaters, blankets, etc.

Chest of drawers shown is part of an entire bedroom grouping constructed in mahogany with contrasting hardware of brass or silver color. Wood is available in three finishes.

### Burkburnett Citizens Invited to Attend Annual T-B Meeting

Miss Margaret Hall, Executive Secretary of the Wichita County Tuberculosis Association extends the citizens of Burkburnett a sincere invitation to attend the Annual meeting of the Association on Monday, February 22, 7:45 P. M., at 909 Burnett Street, in Wichita Falls.

Following the showing of the Association's brand new movie, TWO LIVES, Dr. Edwin Bebb will talk on Chest Surgery.

Dr. Bebb is receiving high acclaim for the outstanding work he is doing in chest surgery. He is also an excellent speaker.

While the tuberculosis problem in Texas is gradually improving, it is still regarded as a definite public health hazard. To combat the crippling effects of tuberculosis in our homes and in our State's economy, every red-blooded Texan is going to have to enroll in the prevention fight.

The best way to defeat this enemy, is for more people to learn about its cause, prevention, treatment and rehabilitation.

My ardent hope is that a great many people of Burkburnett will attend this stimulating meeting.

Sincerely, Margaret Hall

### Your Town Need A Gripe Center?

When the city garbage collector skips your house or the street needs patching or a storm sewer gets clogged, where do you complain?

Maybe you gripe your way around city hall or rely on native ingenuity to run down the right department or ring up your councilman to spin your tale of woe.

But here is a better way — a central city information bureau to answer questions and receive complaints about all the city services and departments.

At least seven cities have such offices already — Cleveland, Ohio, Philadelphia and Pittsburg Pa., Norfolk, Va., Beloit, Wis., and Prattville, Ala.

Philadelphia's gripe center, officially known as the Mayor's Office for Information and Complaints, had 150 visitors and 200 telephone inquiries its first day in business. Now it handles 500 beefs a day.

The system makes prompt service, shows up chronic trouble spots, and saves wear and tear on its citizens. It's an idea worth trying in your town.

### Mesdames Britton and Gilbow Guests Speakers At Electra

The art of dried arrangements and flower show procedure were the subjects discussed Thursday afternoon by Mesdames Tom Britton and A. L. Gilbow before the Dahlia Garden Club of Electra.

Mrs. Britton is a member of the Burkburnett Garden club and Mrs. Gilbow is a member of the Unity Garden club.

### Don't Take Chances With Carbon Monoxide

Automobile exhaust fumes, which contain poisonous carbon monoxide, are a real hazard too often ignored. The tail pipe of the car ahead of you can spill its gases right into the heating and ventilating system of your car. To prevent headaches, drowsiness and more serious effects of carbon monoxide, follow these rules. When driving in traffic close behind other cars, keep air intake ventilators closed whenever possible. When your own heater is operating, always keep a window open an inch or two.

### Band News

The Burkburnett band banquet is to be held March 12 in the school cafeteria. A dance will follow for all of the students of Burkburnett High School.

The band students are selling magazine subscriptions and also tickets to the House of David basketball game in order to raise money for new uniforms. When they get their new uniforms, the old ones will be given to the Jr. High band.

### From Texas Safety Association, Inc.

"A lot of Texas automobile drivers act as if they were driving down the Pennsylvania Turnpike with the whole road to themselves!"

Col. E. B. Tilley of Houston, President of the Texas Safety Association, and Services Advisor for the Gulf Oil Corporation made this comment today as he discussed the need for the current Know and Obey Traffic Laws program sponsored by the Texas Safety Association and the Texas Department of Public Safety.

"Too many of the people driving cars today have practically no sense of responsibility," he said. "They drive as they please and expect everyone else on the road to look out for them. Unless they can be persuaded to change this irresponsible attitude, I see little hope of reducing the present heavy traffic accident toll."

Col. Tilley called upon all citizens to lend their full support to the Know and Obey Traffic Laws program. He asked the cooperation of women's clubs, civic business and fraternal organizations, and churches. He also urged every individual to acquaint himself with local traffic laws and to obey them after he has learned them.

"If every driver and pedestrian would suddenly decide to observe traffic laws and regulations and to practice safe walking and driving rules," Col. Tilley said, "the local traffic picture would change over night. In fact, experts estimate that if such a change in conduct could be accomplished, the annual traffic toll could be reduced 90 percent."

Food Sense—Not Nonsense

Winds Blew Free—But Sailors Had No 'C'

Of those who sailed the high seas of old, it rarely could be said, "they never had it so good." Food supplies on voyages were limited and outbreaks of scurvy were common. Scurvy is now known to be caused by lack of vitamin C.

Air Force rings a bell—civil defense, something we are hearing about but what are we doing about it?

Why is modern Civil Defense so necessary for US?

A Russia has a growing stockpile of atomic bombs, guided missiles, germ and gas warfare weapons. Russia has long range bombers, submarines, and saboteurs to deliver these weapons.

but we might not be so lucky next time, so it is essential for everyone to be trained in Civil Defense, so what can we do to be prepared for disaster?

Civil Defense is taking its place in our community too, on each cross roads is a Civil Defense marker pointing to the Friberg-Cooper Methodist church which has been selected as Defense Shelter for OUR community.

## News From The Congress

By FRANK IKARD

Last week, Dr. Cesar Gonzalez, Ambassador from Venezuela, conferred the Order of the Liberator on General Ernest O. Thompson of the Texas Railroad Commission. It is my understanding that the Order of the Liberator is a high Venezuela decoration that is awarded by the Government only to those people who have rendered great public services. General Thompson was recognized for his more than 20 years of service to the cause of conservation of natural resources, principally oil and gas. He is, of course, probably the outstanding authority in the world today on the role that governments can play in an oil and gas conservation program. His views are sought by every oil producing country in the world. It was in recognition of his help attainment in this field that the Government of Venezuela recognized him. The actual presentation was made at the Venezuela Embassy and was attended by practically all of the Texas Delegation in Washington. Everyone was highly pleased that this honor should come to a man who has rendered such a great service to the State of Texas.

It was just a few days ago that President Eisenhower made the first official announcement that the United States had exploded the Hydrogen Bomb on a Pacific Island in the Fall of 1952. Since the President's announcement, Members of Congress have been given further information on the subject. It was my privilege to view films showing the great preparation that was made for the explosion and the actual explosion itself. Information conveyed by these films is still highly classified. There is, however, a recommendation by the Chairman of the Joint Committee on

Atomic Energy to release the picture to the public. Personally I hope this will be done. I can hardly see how it would convey any secrets to our enemies, and it certainly impresses one with the awfulness of the weapon.

Last week I introduced a bill which would raise personal income tax exemptions from \$600 to \$800. This would apply to all individuals paying income taxes and their dependents. The bill also provides additional exemptions for old age and blindness. I am hopeful that this bill will receive favorable consideration by the Committee on Ways and Means and will be approved by the Congress.

The confusion that has developed over the so-called Bricker Amendment, which would outlaw any treaty that is in conflict with our Constitution, still exists. In fact, at the moment, it looks as if things are in a hope less tangle. There have been a number of compromises suggested. It seemed for awhile that the compromise most likely to succeed was that offered by Senator George of Georgia; however, now it seems doubtful that even the Georgia Senator's suggestion will satisfy the objections of the Administration. At this moment, it seems to be impossible to predict just what will happen to Senator Bricker's proposal.

The next few weeks promise to be pretty busy ones here. The house should have its first appropriation bill for consideration this week, and after that, the bills providing for the building of the St. Lawrence Seaway and postal rate increase will quickly follow. Each of these promises to be highly controversial and will be in for a rough time before they are disposed of.

The first ship to have a plane land on deck was the USS Pennsylvania in 1911.

## Texas State Dept. of Health

By Geo. W. Cox, M. D.

Some folks are old at sixty while others are mentally and physically alert at eighty. The number of years one has lived may not be a true index to one's physical condition. Actually, the length of a person's life span is influenced by the condition of his arteries. "Premature hardening of the arteries, often due to avoidable infections, improper diet and possibly worry and strain is to a certain extent preventable," declared Dr. Geo. W. Cox, State Health officer.

Many of the problems connected with the hygiene of old age are due to lowered mental power. Therefore, a cheerful and optimistic attitude toward the aged especially during sickness, is essential to their well being. Old people regard their condition as far less serious when they can be fully dressed and out of bed. When they can be up, the excretory of being overtired, or otherwise not physically fit, a day of rest in bed is advisable. By providing light and easily digested food and applying warmth to the body of an aged patient, he is often tided over a mild threatened illness.

Special attention should also be paid to proper clothing, diet and exercise of the elderly. With it is possible to grow old grace-fully and with a minimum of trouble. Special attention to certain well defined and easily followed principles of personal hygiene, fully. Furthermore it is also possible, in many instances, to retain one's faculties to such an extent as to make old age a pleasure rather than a burden.

Questions and Answers

Q—What's the address of VA headquarters in Washington? I want to send in my application for Korean GI Bill training, and I want quick action.

A—Your application for Korean GI training should not be sent to VA Headquarters in Washington. Instead, it should be sent to your nearest VA Regional Office, which is responsible for acting on it. VA in Washington would only have to return your application to the proper Regional Office anyhow, so time would be lost by mailing it to Washington.

Q—I'm about to finish a correspondence course in accounting under the World War II GI Bill. I have some entitlement left, and I'd like to go to school and take an advanced accounting course. Could I do this?

A—No. Once you complete or discontinue a course under the World War II GI Bill, after the cut-off date for starting, you are not permitted under the law to take another course.

Q—I hold a Korean GI term insurance policy—the kind that doesn't pay dividends. Could I apply for the total disability income provision that would pay

me money in case I'm totally disabled?

A—No. The total disability income provision may not be added to non-participating GI insurance policies—the type that does not pay dividends.

Q—I enrolled in college under the Korean GI Bill for an AB degree in English. After being in class for a few weeks, I've come to the conclusion that I'd be better off if I switched to a BS degree in business administration. Would such a switch count as my one and only change under the Korean GI Bill?

A—The shift from one bachelor's degree to another would not constitute a change of program, provided that no more training time is involved than was originally required to complete the course.

## Fifty Thousand Texans Look To Forest Industries For Jobs

Fifty thousand workers hold steady jobs within the forest industries of Texas, according to Paul Hursey of Trinity, chairman of the Texas Forest Industries Committee. He added that thousands more are employed in allied industries which depend largely upon forest products for their existence.

Through the wise management of our timber resources, thru such programs as the Tree Farm system and the Keep Green movement, Texas can for-

ever enjoy the "boom" which comes from a sustainable yield," the lumberman says. "The lumberman must recognize that we must recognize the fact that the state's forest resources must be managed in a way that will insure continued production. Receipts from the state's forest resources amount to about \$70 million every man, woman and child in Texas.

While Texas leads in Tree Farm units, the committee chairman said for a substantial part of 1954. This can be done with the cooperation of landowners who realize the value of timber. "Texas now has 500,000 acres of timber covering 3,345,770 acres," Hursey said. "I believe at least half a million acres of the program this year." The Texas Tree Farm program is sponsored by the Service, Texas Forestry Commission and East Texas Commerce. It is operationally by all the forest products industries through the Forest Products Institute. Mr. Hursey said that the Texas Forestry Commission is available to industry persons and radio stations without cost. TEXAS FOREST INDUSTRIES COMMITTEES, P. O. Box 100, Trinity, Texas.

THE THUNDERBIRD, a new kind of car combining high performance with the comfort, convenience and safety of a conventional model, has been added to the Ford line. The Thunderbird has a powerful 160 h.p. Y-block V-8 engine and its low, graceful body is of all-steel construction. Equipped with a convertible cloth top which folds completely out of sight behind the rear seat, the Thunderbird can be purchased with a special composition hardtop, making it a complete all-weather car. Its overall height is 51.5 inches—nearly a foot lower than the 1954 Ford sedan—yet it has only slightly less road clearance. Most of its major parts are interchangeable with Ford's regular line of cars. The Thunderbird is scheduled for production by Ford Division next fall.

### Builders Class Meets With Mrs. Keller

The Builders Class of the First Baptist Church met at the home of Mrs. Keller Thursday, Feb. 11th, for a regular business and social meeting. Opening song, "What A Friend We Have in Jesus," followed with prayer by Mrs. Ferguson.

Report was read by the secretary and minutes were approved. After reports from the group captains, Mrs. Keller, our class minister, brought the devotional service from 1st Corinthians, 5th verse. Business session closed with the Lord's Prayer.

For the social hour, Mrs. Hugh Preston honored the class with several readings which were enjoyed by the group.

There were 14 members and one visitor present.

The session closed with prayer by Mrs. Walling.

### Circle No. 2 W.S.C.S Met Monday With Mrs. Hettie Gilbert

Circle No. 2 of the W.S.C.S. met with Mrs. Hettie Gilbert on Monday, February 8th.

Mrs. A. R. Bunstine presided in the absence of Mrs. Scruggs, who has been ill.

After a short business session the meeting was turned over to Mrs. Blake Browning. She presented Mrs. Bowie Danforth who gave a lovely devotional service "Master Calls Us To Service." The hymn, "Jesus Calls Us," was sung.

The topic for the day was "The Work of the Methodist

Church Among Negroes. Ladies taking part on the program were Mesdames A. R. Bunstine, P. A. Wiggins, T. M. Jenson, W. H. Holt, Odie Evans, and Mrs. Blake Browning.

Mrs. Evans dismissed with prayer. Lovely refreshments were served to 14 members by the hostess, Mrs. Gilbert.

### HORSE BLANKET PONCHO

This smart cotton plaid dress is called a "horse blanket poncho," and it's definitely in the running among high-fashion resort clothes. Designed by Baila of Miami, the cotton plaid poncho blouse has a standaway turtle neck collar that opens in the belt. The skirt is flatteringly slim.

### New Dessert Delight

Orange Sherbet is always good, especially when it's home made. Today's recipe suggests this family favorite made with Royal Instant Coconut Cream Pudding and Pie Filling—the new dessert now arriving on grocery and supermarket shelves.

Try this dessert the next time you are looking for something new, easy-to-fix, and utterly delicious. The name is Royal Instant Coconut Cream Pudding and Pie-Filling and it is just now appearing on grocery store and supermarket shelves all over the country. Specially interesting is this new item, for it is the first instant pudding to appear with the coconut flavor.

A true coconut taste it has too! You actually get the fine shreds of coconut in the finished pudding. Make it up according to package directions—add contents to 2 cups of cold milk, and beat with a rotary egg beater until smooth, about 1 minute. Pour into serving dishes and let set 5 minutes, or more, either at room temperature or in the refrigerator. There's no cooking! Only one bowl and a rotary beater to wash. What could be simpler? Suggestions on the package will give you other ideas. There's Coconut Cream Pie, for instance. Just make up the pudding and turn into your baked pie shell. Or, for fancy fare, try this easy Orange Sherbet.

**Orange Sherbet**  
1 cup chilled milk  
1 cup orange juice  
1-1/2 teaspoons grated orange peel  
1 package Royal Instant Coconut Cream Pudding

Measure milk, orange juice and grated orange peel into deep, 1 quart mixing bowl. Empty package contents on top of mixture and beat with rotary egg beater until smooth, about 1 minute. Pour into refrigerator freezing tray and set control for fast freezing. Freeze until mixture is firm (2-3 hours). Turn control back to normal for storage. Makes 1 1/2 pints.

## Great Southern Life Insurance Co. Continues To Grow

1953 was a repeat story in the growth history of the Great Southern Life Insurance Company of Houston. The annual statement of condition, as of December 31, 1953, just released, reflects continued progress, at an accelerated pace, in all departments.

Figures, for size, which seem to capture the reader's attention first, show the company to have achieved, since its organization in 1909: Admitted Assets, \$145,165,548; Surplus and Contingency Reserves, \$8,565,457; Insurance in Force \$638,955,031; Policy Reserves held for the account of its 238,546 policyowners, \$126,688,992.

Gains attributed to 1953 operations were the greatest for any year of the company's history, both in amount and in ratio to the preceding year.

Total value of new life insurance placed in force last year by the 292 Great Southern representatives of the company through out its four states—Texas, Oklahoma, Louisiana and New Mexico—was \$86,564,643, an increase of 19 percent over their 1952 production.

It is significant that 95.4 percent of all applications submitted, by amount, were acceptable for issue as applied for, reflecting sound conscientious underwriting by these Great Southerners in the field.

Payments to living policyowners and beneficiaries reached \$7,680,642, up 12 percent over 1952. Lapses for non-payment of premiums were the lowest ever recorded, amounting to less than 7 percent of the insurance in force during the year.

After giving effect to these reductions in the insurance account, the net gain in insurance in force was \$46,874,569, 5 percent ahead of the increase achieved the preceding year.

The Great Southerners in the field responsible for these gains in their company's life insurance account also established many notable personal records for themselves.

During the production club year ending June 30, 1953, 156 representatives each paid for a quarter of a million or more to

quality for the largest Great Southern Club in history. Of these, 63 made the company's Leader Legion as half million dollar producers, and 7 paid for more than a million. The average paid production of the 156 club members was \$437,492.

Expanding these figures to cover all of the 184 full-time representatives who are earning for themselves retirement income credits under the Great Southern's Agent Benefit Plan, the average annual paid-production becomes \$356,850 per man.

Looking forward to the future, the Great Southern's representatives in the field have embarked on a concerted campaign to bring their company into the billion dollar in force bracket by Nov. 1, 1959, the Fiftieth anniversary of the Great Southern Life Insurance Company.

### Hardin H-D Club Has Regular Meeting

The Hardin Home Demonstration Club met at the home of Mrs. John Enderly February 10, for a regular meeting. The minutes were read and approved. Songs of the Valentine season were sung and the Lord's Prayer repeated in unison. A short program and refreshments were enjoyed by all. There were 20 members, one visitor, Mrs. W. C. Nolan and one new member, Mrs. M. L. Hillis, present.

The group voted to have Civil Defense as their project this year, working with the civil defense chairman.

Questions and answers were given on the Constitution of the T.H.D.A. organization and the new by-laws were voted on.

We wish to give a standing invitation to any homemaker who might wish to join our organization. We are connected with the Texas Home Demonstration Association. County agents meet with us to bring us up on the latest in cooking, sewing and all handy craft work.

In working with the 4-H groups we participate in giving scholarships to these boys and girls. We feel that in working with these various groups that our organization helps in building a better community for our families.

Our next meeting will be in the home of Mrs. F. W. Farley, 112 W. College, Feb. 24th. Mrs. Clyde Peed will demonstrate on "How to Prepare Your Flower Beds."

### LoWanna Camp Fire Girls Met With Carolyn Clement

A business meeting and a birthday party was the program for the LoWanna Camp Fire Girls meeting Tuesday afternoon, Feb. 16th. The group met at the home of Carolyn Clement who was eleven years old. The business meeting, presided over by President Jo Ann Hery, was short.

The program was a very instructive talk by the group's counselor, Mrs. Riley, who gave the girls some timely hints on good grooming habits, saying that "cleanliness is still next to Godliness," she advised frequent use of a mild, pure soap as a must for ten and eleven year olds. Mrs. Riley then showed the girls the essential toilet articles needed by their age group. These included a good hair brush, a pure hand and face lotion, soap, junior manicure articles, colorless lip pomade and tooth brush.

Following the program, Carolyn blew out the candles on her cake while the group sang "Happy Birthday".

After birthday refreshments, the gifts were opened. Games were played until the close of the meeting. Marilyn Koebbe and Loretta Brocker were absent.

Every member is invited to bring float, band, riding...

### So This is HOUSEKEEPING

A low bow, an orchid, and apologies to Grandmother! I had been a firm believer in the idea that grandmother was a comparative loafer with not half the demands on her time that plague the modern housewife. It's still true that grandmother's routine was a lot less complex, but I'll have to confess she didn't have today's miraculous unpaid servants to help. My defenses began breaking down when the Stuarts acquired a new automatic washer that practically thinks for itself. Then when a matching Whirlpool dryer arrived, I didn't have a leg to stand on! There's just no getting around the fact that our dryer saves more than a bank; in addition to money, it saves clothes, worry, disposition, time and work! Besides all that, our twin machines are a joy to behold with their beautifully-illuminated guide lite control panels that take all the guesswork out of washing and drying.

On the dryer, for instance, you have at your finger tip the choice of four drying temperatures including the wonderful new "delicate fabric" control. You push a button and presto! the safe, correct drying temperature for any washable material known to man. Another button touch and you've selected a drying time for fluffy-soft, sunshine-fresh and wrinkle-free clothes. Grandmother would have been positively green-eyed at those features alone. But there are even more refinements in this new machine. At any time while the dryer is operating, a light illuminates the interior when the front-loading door is opened and the tumbler and heating element automatically shut off. That's an important safety factor. When the door is closed the dryer begins operating again. Then something that's a real help on a busy day with twenty projects going at once... a cycle tone signals when drying is finished. If grandmother wanted to defend her position (though not much chance of that) she could drag out the old belief that sun-dried clothes smelled cleaner and fresher. She'd even be licked on that score! A built-in ultra-violet lamp not only gives clothes a sweet, fresh-air fragrance but helps destroy common bacteria as well! All the while things are busily going on in the dryer a colored light follows and tells at a glance how drying is progressing as well as what temperature was selected. With all the controls and lights I feel like a pilot at the dashboard of a jet bomber... only a pilot never had it that easy!

### Valentine Dinner Honors Husbands of Study Club Members

Twenty husbands were honor guests at a Valentine Dinner Wednesday night, Feb. 10 at the Town Hall, when the Forum Study club members entertained their husbands. The guests all waited patiently, sitting on the edge of their chairs and chewing the barbed ham arrived. It was about thirty minutes late, followed by Huck McDonnell. Huck seems to be doing fine for he received only minor injuries from the hungry mob as they formed a speedy line by the serving table. Silence followed for several moments while those present enjoyed ham, potato salad, baked beans, macaroni and cheese, rolls, cake, ice cream and coffee. Ellis Gragg proved to be an ideal waiter following a nicker top found under his plate. Following the dinner, the girls quickly donned their square dancing shoes and the music began. The caller made several mistakes and the records had to be started over, but the dancers all did fine. A few slow dances were thrown in as a breather. A catastrophe occurred when tired A. C. Todd leaned on the record table. He says, however that he should have all the records replaced by May, if his job is steady.

After several broken arms and a couple of slight strangle cases, Jack and Mary Frances Northcott have mastered the Dos-i-doe mountain style. Much dancing talent was displayed when Wendell Morrow Jim Whitaker, Harold Knops and Jo Ella Gragg demonstrated their tapping abilities. I think with a little persuasion they might be glad to perform for local groups for a normal fee, the fee most likely to be used for tapping lessons, or should be!

The Valentine theme was carried out throughout the hall. The long tables with red streamers down the middle were banked with red hearts, carnations and tall white candles. A lovely arrangement of red carnations topped with a white cupid was seen on the serving table. The hostesses were Mrs. Wallace Landrum and Mrs. A. G. Crosby. Those present included Messrs and Mesdames Tom Burnett, A. G. Crosby, Bruce Ford, Winston Freeman, Charles Goins, Ellis Gragg, Frank Greer, Wallace Landrum, James Mason, Wendell Morrow, Huck McDonnell, Don Mills, Jack Northcott, B. H. Alexander, B. H. Preston, Jr., Hugh Preston, Jr., Otis Stegall, Lonnie Taylor, A. C. Todd, James Whitaker and Harold Knops. Reporter, Marilyn Knops

Mrs. Elsie Mae Warren and daughter of Dallas were weekend guests of the O. E. Meltons. Mr. and Mrs. Loyd Tucker of Bowie and Mrs. Billy King and daughters of Wichita Falls were also guests for Sunday lucheon.

### From LOOK Magazine's DREAM KITCHEN

Idea to try for a main course— economical, too: open both ends of a can of corned beef hash, and slip out the solid contents. Cut into round slices. Trim processed American cheese slices to fit these circles, and cut a hobgoblin face in each cheese slice. Now warm the hash slices, top each with a cheese face, and serve on toasted hamburger buns—good!

**We Worked On A New Shortcut** to donut making in LOOK's kitchen—and came up with a drop donut as easy to mix as pancakes. This uses biscuit mix—and you'll want to remember the recipe to try: beat two eggs, beat in 1/2 cup of sugar. Add 2 cups of unsifted biscuit mix alternately with 1/2 cup of milk. Add two tablespoons grated orange or lemon rind, for extra food flavor. Drop this from greased teaspoons into hot fat (375°) and fry about two minutes, until golden. Turn and brown other side. Drain, sprinkle with confectioners' sugar, and watch three dozen disappear!

**And When The Gang Crows** Around for something to drink, bring out the cola drinks, or stir quick chocolate or instant coffee into hot milk. For variety, try sweetening milk drinks with maple-blended syrup—a "sundae taste" our Cub Scout calls this.

**WATER PLAN:** Dr. Walter Prescott Webb, famed Texas historian, reports that the great inland canal recommended for carrying water to the Lower Gulf Coast area would increase the region's annual income by five billion dollars.

This is the plan drawn up at my request by the Bureau of Reclamation of the Department of Interior.

In time, says Dr. Webb, the plan must be carried out, because "the logic of facts is so strongly in its favor, and because the need is imperative.

The future of Texas is bound up in a solution of our water problems.

**TEXAS JUDGESHIP:** In the 1953 session, I introduced a bill creating a badly needed additional Federal judgeship for the Eastern District of Texas and making permanent the temporary additional judgeship in the Southern District.

The Provisions of my bill were included in an omnibus bill, on which a House Senate conference committee has reached agreement. This measure is expected to become law in the near future.

**DEFENSE BUDGET:** Committee hearings have started on the military part of the President's budget. The President requested 31 billion dollars for the Department of Defense. He asked about five and one half billions for foreign military aid and other military and international programs. He wants four billion dollars for the Veterans Administration.

Biggest single item in the budget, other than for the Department of Defense, is approximately seven billion dollars for interest on the national debt.

**A FOR YOUR THOUGHTS!**

There's one that buys more than most --and that's the penny you spend for electric service! For instance, you can buy six large rugs for one cent's worth of electricity. And just one penny buys the power to wash three of laundry! Like to sew? You can sew for five hours on one worth of electric power. In fact, every time you pay your electric bill you're paying for a of comfort, work-and-time-saving help, and pleasure. Yes, electric service is a real friend . . . always ready at the flick of a and so low in cost that you must agree: It's the Biggest Bargain in the family budget!

National Educational Week will be observed by our school March 1-6. We are inviting parents to visit with us sometime during that week.

Our saving stamp sales for this week amounted to about \$40.00. Many of our pupils are learning the lesson of thrift in participating in this program.

We are very proud of our basketball team. They have won the eastern half of the district by defeating Olney. On Feb 18th, they will play Wellington at Wellington, and on Feb 23, these teams will play here to determine the winner of the district. In case of a tie the third game will be played at Wellington on Feb. 26th.

# May we remind you?

The gas bills you're now paying are for winter months when a home may use 5 to 10 times as much gas as it does during a summer month. In practically all areas served by Lone Star, January and December had considerably more heating weather than the same two months a year ago.

*And, of course,*

You know Lone Star was one of the last businesses to raise its rate or price for service. Rate was reduced in 1942 so the one raise made last year added very little more to the price charged during depression years. The average year around cost in the average home here is still about 16 cents per day.

**PRUNING**

The pruning of roses, for some reason, is believed to be a very difficult operation and one upon which success or failure with roses depends, says B. T. Haws, County Agent. Actually it is a rather simple procedure. Sharp tools should be used to give clean cuts. A fine-toothed saw is useful on heavy canes, but do not injure the bark. The main purposes of pruning are to improve the appearance of the plants, to remove dead wood, and to control the quantity and quality of flowers produced. If roses are not pruned, they soon grow into a bramble patch and the flowers are small and of poor quality. Sometimes undesired shoots come from the understock. The type of pruning to use and the time it should be done differs with the various classes of roses. Bush roses are pruned in early spring just before growth starts. First the dead wood should be removed; be care ful to cut an inch or so below the dark colored areas. If no buds are left on the live wood, the entire branch or cane should be removed. Next, cut out all weak growth, and any canes or branches growing toward the center of the plant. If two branches cross one another, remove the weaker. Do not leave any stubs, but make the cut close to the cane or point from which it originated. Finally, shape the plant by cutting the strong canes to a uniform height, but leave as much good wood as possible. Cuts made on the cane should be just about a strong outward-facing bud. Strong plants can be pruned to a height of 24 to 30 inches.

**The SNAPSHOT GUILD**

This is a nice picture in black-and-white but just think how exciting it would be to see it projected in full color, many times this size, in your own living room.

**The Truth About Color Slides**

IF YOU haven't tried making color transparencies, you really should. Otherwise, you're going to find yourself way behind the times in your picture taking. Because that's the kind of snapshotting that's growing in popularity by leaps and bounds. And their popularity is well deserved. They are such wonderfully satisfactory pictures. Seeing a favorite person, a familiar scene appear in full color on your screen is really thrilling.

Because color transparencies are so beautiful, many people have the idea that they are difficult to make and very expensive. These people are so very wrong on both scores.

There was a time when the miniature cameras with which color transparencies are made were expensive—but not any more. You can get a good one in the \$30-\$35 price range—and that certainly isn't a high price for a good camera. At first thought you may think the film is expensive, but remember, the price includes processing, and you receive the slides all ready to view. Actually, when you use 36-exposure film, your slides will be costing you only 15 cents apiece.

If the idea of having to take 36 pictures before you can see them doesn't fit into your way of thinking, you can get a 20-exposure roll for the 35mm cameras. And, if you're the kind of snapshotter who likes to take a whole roll of pictures in an afternoon so you can mail it for processing right away, you'll be interested in the miniature cameras which use 828 film. In this size you get 8 color transparencies per roll.

An important thing to remember in making color shots is that for best results you need to be more accurate in your exposure than you do for black-and-white. But you won't find determining the exposure a problem, because there are so many things to help you do it.

Some of the inexpensive miniatures have the basic exposures marked right on the camera in red. The charts that are packed with your film tell you which exposures to use for various types of weather. And, if you want always to have exposure data at your fingertips, you can buy a 25-cent pocket-size guide. These are ingenious little cardboard gadgets that enable you to dial the correct exposure. —John Van Gulder

A simple cutting trick will give you another glamorous way to serve those miniature dime jelly rolls from your grocer's ready department.

Chill jelly rolls and then slice each lengthwise into sixths. Keep the two rounded outside slices for family snacking. Cut four slices in half crosswise, making eight dainty jelly rolls enough for any entertainment occasion. Good, too, for these rolls are made from a cook book recipe.

To serve, arrange on a plate around a small bowl of jelly cream cheese.

**Let's Roll the Drums for Pie**

Let's have a roll on the drums for—CHERRY PIE WITH ALMOND WHIP TOPPING. This February favorite makes its appearance as the best-dressed dessert at parties for patriots.

With this dessert, it's over the top and away as one of the easiest-to-do ideas for the party-going cherry pie. Its topping combines flavors that were meant for each other—almonds and cherries. Perfect club dessert party—teen members purchase from a food shop and homemaker touch-up Whip Topping.
