med up in a statement by R. Henderson Shuffler, director of the Institute. He said: "Most Texans have absorbed the phony myths per-petuated by the popular modern media. They think of early Tex-

feet

ans as a bunch of hell-roaring bumpkins in buckskin who came brawling across the frontier, shoved the Indians and Mexicans out, and settled down to shooting each other at high noon in front of the village saloon.

"They are apt to picture the typical modern Texan as a loudmouth wheeler-dealer in bluejeans and hig hat, who felt into a barrel of oil and came smelling like a millionaire. These are the popular conceptions of Texans in too many parts of the globe and tragically, they are often the conceptions our own children learn and set out to imitate.

"It seems to be about time to tell the truth about Texans, early and date. The truth happens to be just as colorful, just as fascinating and tremend-ously more self-respecting than the myth. We need to use the modern means of communication to tell the truth as effec-tively as we have the myth."

So this Labor Day, drive carefully, put out your campfire, handle firearms with care and use common sense precautions around "the old swimming hole." Above all, remember there will be other holidays and other trips. Don't leave the countryside a no man's land of litter. There are millions of litter receptacles around the country. They are there to help preserve the beauty of the land ... so let's use them.
