Indians Maul Moguls; Meet Stamford There Friday Nite

Prattle

By AL HINDS

The newspaper work you have to do to work... you surrounded by it all the time passes swiftly and a look at the calendar reveals just a little over a month left of the year. Friday and Saturday, November 7th and 8th, are the dates for the Stamford Fair. As guest speaker, Bishop Smith W. Copeland of the Methodist Church Texas Coast Conference, Bishop Copeland will address the Stamford group at 3:00 p. m. Saturday, November 8th, at the General Assembly at the Stamford First United Methodist Church.

They came... they saw... and they enjoyed the many activities of the Haskell County Fair here last Thursday, Friday and Saturday. Although it was a little on the warm side during the day, otherwise the weather conditions were ideal. To sum up in a few short words... the fair was a huge success!

When a few minutes earlier the morning is one of the best ways of making the day successful. We all need to tune up our bodies with a few physical or mental daily dozens while getting out our bad dreams of last year out of our systems and making of the great possibilities of what we can accomplish next year.

Many people steal those precious minutes of sleep then break the speed limit on their toast and coffee, and get the day with a handicap mental ulcer.

By rising ten minutes earlier every morning get a head start on the problems of the day. In the course, the battle of life will be dull if there were no problems to combat. But think of the glorious victories we can win if we are prepared to play the game as we take our turn.

Life brings no security... only uncertainties. This is the land of opportunity for those who get on the right foot in the morning and keep going right day.

Teacher: "And when I get high with my sermon, I'll want those of the congregation to contribute \$5 to the mortgage on the church to stand up. In the meantime, you play appropriate music."
Pupil: "What do you mean, appropriate music?"
Teacher: "You play the hymn 'Spangled Banner.'"

ran across this little poem, "The Unknowing," the other day, titled "Look Up!"
I saw a little muddy stream that turned to fairest blue, because the surface caught the gleam of heaven's azure hue.
And so this life, what'er it be, I'll turn to heaven fair, and I will lift my eyes and see the beauty everywhere.

Haskell Fire Insurance Key Rate Increased

By AUSTIN BUREAU

A one-cent increase in the fire insurance key rate for Haskell on Oct. 1 will mean an additional burden to insurance buyers if they buy the same amount of insurance this year as they bought last.

The State Board of Insurance set the key rate at 31 cents, up from the present 30 cents. The state agency arrives at the key rate through a system of charges for fire hazards and credits for fire prevention practices in the city.

Haskell had a total of 36 cents in charges, due to deficiencies in the water works, water supply, elevated tank, water mains, fire department, fire apparatus, fire alarm system and building laws, as well as conflagration hazards in the mercantile and residence districts.

Haskell got five cents in credit for having one 100 gallon booster tank truck, a night watch service, arson reward and firemen's training school, as well as teaching the methods of fire prevention and principles of fire insurance in all public schools. This brought the total key rate down to 31 cents.

Lose 10 Lbs. In 10 Days On New Grapefruit Diet

This is the revolutionary new grapefruit diet that everyone is suddenly talking about. Literally thousands upon thousands of copies have been passed from hand to hand in factories, plants and offices throughout the U. S. and Canada. Word of its success has spread like wildfire, because this is the one diet that really seems to work for most overweight people. A well known Toronto columnist recently praised it to the skies. He reported losing 20 pounds quickly and easily long after he despaired of ever getting down to his wartime weight of 165 pounds. All this without cutting out the occasional beer or rye. If it is followed exactly the average overweight person should lose 10 pounds in 10 days. There will be no weight loss in the first four days. But you will suddenly drop 5 pounds on the 5th day. Thereafter you will lose one pound a day until the 10th day. Then you will lose 1 1/2 pounds every two days until you get down to your proper weight. Best of all there should be no hunger pangs. Now revised and enlarged, this new diet plan lets you stuff yourself with foods that were formerly 'forbidden'. Such as big steaks trimmed with fat, Southern fried chicken, rich gravies, mayonnaise, lobsters swimming in butter, bacon, fats, sausages and scrambled eggs. You can eat until you are full, until you can't possibly eat any more. And still you should lose 10 pounds in the first 10 days, plus 1 1/2 pounds every two days thereafter until your weight is down to normal. The secret behind this new "Quick weight loss" is not generally known. Fat, it has been theorized, does not form fat. Perhaps fat fights fat. And the grapefruit juice in this new diet might act as a catalyst (the "trigger") to start the fat burning process. You stuff yourself on the permitted foods listed in the diet plan, and still lose unsightly fat and excess body fluids. When the fat and bloat are gone you will cease to lose weight, and your weight will remain controlled. A copy of this new and startling successful diet plan can be obtained by sending \$3 to The KANE ASSOCIATES P. O. Box 646 Lincoln, Nebr. 68501

Unconditional money-back guarantee. If after trying the diet plan you have not lost 7 pounds in the first 7 days, another 6 pounds in the next 7 days, and 1 1/2 pounds every two days thereafter, simply return the diet plan and your \$3 will be refunded promptly and without argument. Tear out this message as a reminder. Decide now to regain the trim attractive figure of your youth, while still enjoying hearty breakfasts, lunches and dinners. Order now before others snap up the limited supply. Adv. 40p

Loretta Lane Will Display Indian Ceremonial Gown At The State Fair

Loretta Lane, daughter of Mr. and Mrs. Jack Lane, of Burleson, and granddaughter of Mrs. J. M. Crawford and Mrs. Noah Lane, of Haskell, will display an Indian ceremonial gown of white cabretta leather, which she made, at the State Fair of Texas in the Women's Pavilion, Junior Division.

When Loretta was 14 years old she designed the gown...cut it from five skins and hand cut the 14-inch fringe used for trim on the sleeves and bottom.

The brown leather collar is made in three sections which are Indian symbols for the hand, eye and thought bar. They symbolize her Camp Fire Girls Indian name Woda-cacha meaning "skillful artist."

Loretta performs the Lord's Prayer in Indian sign language in costume and has performed for many organizations in the Burleson area, as well as "Stairway to the Stars," a talent show for Fort Worth, in Casa Manna,

this spring. She modeled the costume for Tandy Leather Company, a national organization, to be used in their leathercraft catalog.

The Lord's Prayer was taught to her by an Indian friend of Cherokee and Choctaw descent.

Loretta is a member of the National Honor Society, plays clarinet in the Burleson Band, a tri-award winning band, the band ensemble, the high school chorus and sextette. She is secretary-treasurer of the Johnson County 4-H Council, and writes a weekly fashion column for the school paper. She is Guardian for a group of Camp Fire Girls.

Patsy Rodela, Elisa Andrada, Isabel Perez, Gloria Sanchez all of the C. A. P., 4-H club placed 3rd in clothing.

Willie Lee Ervin of the C. A. P., 4-H club also entered a record book.

"In The Greenest of Our Valleys" from the poem "Haunted Palace" by Edgar Allen Poe. Wilson Hurley has captured in colors of rich and varied hues and in light and shadow and perfect perspective a representation of the Republic of Korea which went into action against the North Vietnamese on the 28th day of February, 1969.

The picture shows the Command Post inserted in an open mountain top and in the foreground, a jeep that provides the radio and generator for a ground air liaison controller. He is in direct radio contact with the small airplane in the center of the painting who is the United States Air Force Controller. The different colors of rose, smoke and green have been set up by the Koreans to mark their positions for the main strike to follow by the two Air Force fighter bombers.

One of them turning to the right and the other coming in on target approximately 600 miles an hour. The streak in the background following one of the fighter planes is the result of the terrific speed causing vaporization of the air over the wing. The column of white smoke is coming from the marker rocket of white phosphorus put down by the forward controller plane.

Since a picture is worth a thousand words...do go by, take your time and see this magnificent painting.

TAX MAN SAM SEZ:

Most folks work for a salary and have their income tax withheld. It's awful easy to forget to include that extra income that you receive from your savings account, dividend on your stock, \$15 for helping Joe Jones, and similar items. It saves a lot of embarrassment, delayed refunds, and problems with your income tax in general, if you keep a simple record of all such income throughout the year. In this way you don't forget to report all of your income and you don't get a letter from Internal Revenue's computer telling you that you forgot to include your dividends from your South African gold mining stock. Keeping your receipts and a record of your deductions as well as your income also pays off in tax reduction dollars.

Meeting Held By C of C Officers And Directors

Officers and directors of the Chamber of Commerce met at 7 a. m., Tuesday, September 30, in the dining room of Felker's Restaurant with president Joe Williams in charge of the business session.

Minutes of last meeting were read by the manager and approved along with the September financial statement.

Manager Rex Felker reported that all bills due on the recent county fair had not been turned in as yet but indications are that the annual event will show a substantial profit over expenditures. All phases of the county fair, under the leadership of A. D. May of Rule as president, received wide acclaim from both local people and visitors.

Dr. T. W. Williams met with the board relative to the county museum and the annual funds necessary for maintenance and general upkeep of the museum and grounds. For the past five years the net proceeds of Hey-Day and Little Miss Hey-Day Pageants were delegated for this purpose. In an agreement made prior to the 1968 annual events staged in August, \$300 of the proceeds were presented to the Historical Association, \$200 set aside in the Haskell National Bank for a "Miss Texas Scholarship" and the balance of \$842 in a savings account toward a municipal auditorium.

Act One— splash-down! Pop in the pool, figure-perfect. Your bra, the Hollywood-Vassarette Bra-Tique that's softly fiber-filled to shape and hold and mold. Boy-shorts with a spandex pantie-brief for lightweight control.

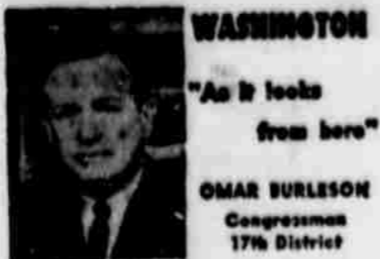

Act Two— games people play! Shuffle off to fun-things in the sun, wearing a groovy, jungle-goddess wrap-skirt. (With a bongo beat). You could work on your tan—or a likely life guard. Or go shopping on shore when a ship docks.

The whole idea's *easy* as pie. Roll up a dunk-and-dry Dacron and cotton splash-down. You can paddle in the pool all day. Then, just dip your duds in the suds—and hang them up, ready to go again, as soon as the sun comes up!

Act Three—very, very dry! The cocktail hour rolls around—and your Dacron/cotton's crisp as a lemon peel. Just hook on a mini-midriff skirt and wind on a gypsy scarf. This chic new "Layered Look" wardrobe is really going places.

WASHINGTON

OMAR BURLISON

WASHINGTON, D. C. — Perhaps there is no such thing as a fair distribution of the Federal tax burden. In fact there are some who feel that there is no such thing as a "just" tax at any level.

During the course of the recent hearings on tax reform, a definite conclusion can be reached that those representing the Treasury Department look at the total revenue losses and gains first, and equity second. Referring to the income tax burden for single persons, a knowledgeable Committee member admitted that a single person is really in a bind but added that the loss of tax revenue probably rules out relief.

What is fair and equitable is subject to opinion. There are approximately 19 million single taxpayers—young people working their way through college, elderly widows trying to make ends meet on meager incomes, school teachers, nurses, telephone operators, secretaries, stenographers, factory workers and thousands of retired people across the country who now pay an average of

about 40 percent more than married couples in the middle income brackets filing joint returns.

Under present law, married couples pay lower taxes than others because the Law enables them to split their income and take advantage of the lower rate. Widows, widowers and certain other single persons

with dependents are taxed at head-of-household rates midway between those for single and married persons.

The reform bill would extend head-of-household treatment to all widows, widowers and those single persons over 35. Widows and widowers with dependent children would be permitted to pay the married rate as if their spouses were still living.

Actually, there is no law that says single people must pay higher income taxes just because they are not married. Congress has never passed, nor does it contemplate passing such a provision because of the Constitutionality question.

If people have to pay higher income taxes because they are single then it would follow they should pay higher property taxes for the same reason.

The present tax treatment of single people came about more than 20 years ago under the community property law. It originally applied for Federal income tax purposes, only to those States having community property laws. At that time only 35 of the 48 States had such a law. Subsequently the law was changed to permit the community property treatment for the other 12 States.

Since the enactment of the Federal income tax in 1913, arguments have persisted as to

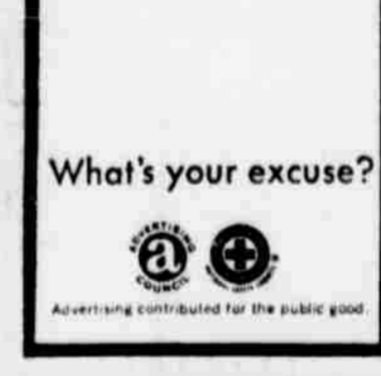

the moral rightness or wrongness of the graduated income tax system. The "ability to pay" has been legally sustained throughout the years but the contention exists that the penalty is placed on those who are able to pay by reason of industry, ability and, possibly, luck. A percentage of taxable income appears to be the only way to apply an income tax. The "blood out of the turnip" still holds, but nothing can erase the moral issue.

There are, however, discrepancies in tax treatment and that of the single person. One of them, perfection in any tax treatment can be the application of the paraphrased adage of "it is as good as it ought to be, but thank goodness it is better than it used to be."

And now, a word about not wearing safety belts.

Pain.

EFFECTS ON THE POOR

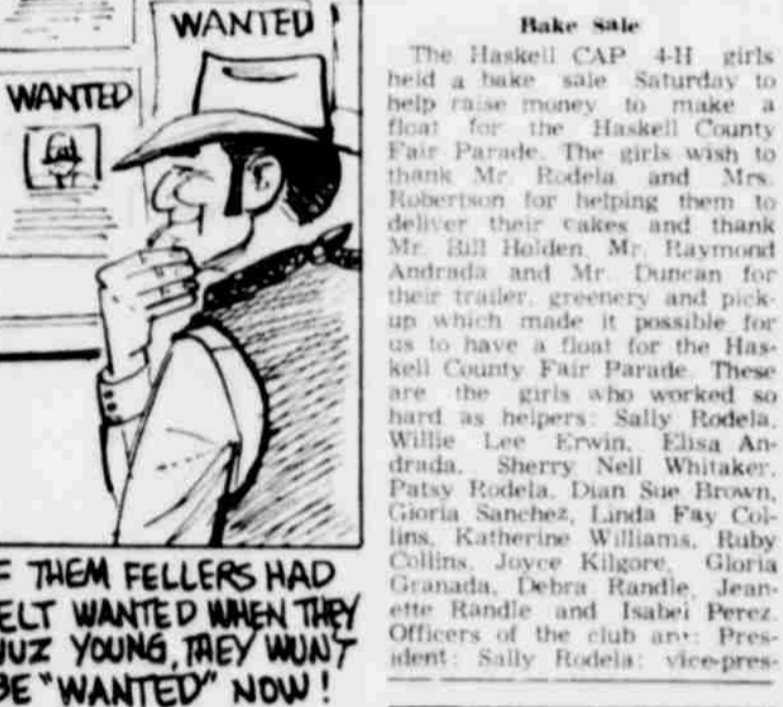

The U. S. Department of Labor is studying the effects on the poor of occupational licensing requirements. More than 1 in 10 of the Nation's workers are in jobs requiring licenses. The Department has a particular interest in seeing that entry into occupations remains reasonably open to the increasing number of young men and women entering the labor market. Preliminary studies show that the maze of occupational licensing requirements is preventing the poor and the disadvantaged from entering a wide variety of work where there are manpower shortages.

LABOR FORCE

According to Department of Labor projections, the labor force will number some 99.9 million workers by 1980, an increase of 17.7 million over the figure in 1968.

NUMBER FORTY

Junior Fire Marshals Will Be Busy As Bees During Fire Prevention Week

During National Fire Prevention Week, October 5th through 11th, some 2½ million Junior Fire Marshals in the country will be busy making fire pails in school for their mothers. The fire pails consist of empty one-pound coffee cans brought from home onto which they paste bright red identifying FIRE labels. In addition to the word "Fire," labels carry important fire safety information and provide space for recording emergency phone numbers. The pails are intended to be filled with kitchen shelf baking soda, the recommended grease fire extinguishing agent, capped with the plastic lid and parked within reach of the range, so homeowners can quickly spot their source of soda and dump it on the flames before the fire can spread.

Camp Fire Girls and 4-H youngsters across the nation are also constructing fire pails for use in their own homes for distribution, with the help of their local fire departments, to residents of their pails to make them really gift-worthy. A hole is punched on either side of the can a quarter of an inch down from the top. Three spoons, two corks or a package carrying—handle are strung on a 12-inch length of wire or cord, the ends of which are threaded through the holes in the can and secured.

The purpose of this mass fire pail assembling program is to help cut down on the number of kitchen fires which account for better than 21 percent of all reported fires in the country annually. And this goal can be realized. Following a pilot project in Santa Anna, Calif., in which all 850 students enrolled in the Fremont Elementary School made fire pails and were given graphic demonstrations by members of the fire department on its proper use, a number of potentially serious cooking fires in the area were successfully extinguished with the fire pails.

If you aren't presented with one of these emergency cooking fire extinguishers during National Fire Prevention Week, put one together yourself. For an identifying label use a sheet of paper cut to the size of the can with the word FIRE printed in big bold red letters. Then vow to observe the following cooking cautions and fire extinguishing rules. You'll be protecting your kitchen, your home, perhaps even your life.

- Never leave the kitchen, even if only to answer the phone or doorbell, when frying or broiling foods.
- Never let the heat get too

Agri-Tour Mobile Unit Visits Munday

The Texas Department of Agriculture sent its popular Agri-Tour mobile unit to Munday for the Rolling Plains Economic Forum on September 30, 1969.

This was the second time for the Department's traveling exhibit to appear in the Munday area. The 56 foot-long traveling show was open to the public all day during the forum. Operators are Mr. and Mrs. Rountree who have traveled thousands of miles through the state with the exhibit.

The Agri-Tour is designed to familiarize Texans with the land and fiber products that are raised in the state. Texas agriculture industry combined with the Texas Department of Agriculture in a joint effort to tell the story of the colorful culture to the public through the Agri-Tour. Agriculture Commissioner John C. White said that Texas Agri-Tour is expressed to promote high quality Texas Agricultural Products.

The exhibit features a narrated slide program that tells the story of Texas agriculture. Of special interest are shopper's hints explaining to best select agricultural products to stretch the shopping dollar, and the cooking suggestions showing new ideas for preparing and serving Texas favorites. At the conclusion of the tour, free recipes were available on Texas products, plus Texas favorites.

A SINISTER THREAT

There are certain fundamental laws against fraud, misrepresentation and simple dishonesty. They have been on the books for a long time and have worked well. In addition, there are such organizations as the Better Business Bureau that have done a yeoman's job of publicizing dishonest and deceptive. But, above all is the automatic policing feature of the marketplace as customers give their patronage to the most dependable firms.

Despite these facts of life, there are those who constantly seek to improve upon the marketing mechanism by proposing laws which supposedly act as substitutes for the built-in wisdom of the free market. Many of these proposed laws fail utterly to distinguish between legitimate business and the blue sky operator. Typical of these proposals is a late measure introduced in Congress called the Truth in Trading Stamps Act. It is aimed at one of the oldest forms of business promotion, trading stamps...a form of promotion that U. S. consumers have supported for many generations.

The public is already protected by laws prohibiting deceptive or fraudulent business practices. Trading stamps must keep their long-established reputation for being as good as gold for the redemption of goods as promised, or the public would quickly reject them. Just why trading stamps should be singled out for burdensome new federal regulations in view of such heavy public support is more than a little hard to explain. Redemption of trading stamps permits millions of people to acquire goods that they would not otherwise feel they could afford.
