THE JAYTON CHRONICLE

53rd Year - 1st Issue

Jayton, Texas

Thurs. February 26, 1976

Stock Show Starts Friday

The annual Kent County Stock Show will be held on Friday and Saturday, 27-28 February, at the 4-H Barn in Clairemont. Lambs will be judged on Friday afternoon at 6:00 p.m. Market hogs will be judged on Saturday morning at 9:00 a.m., followed by steer judging at 10:00 a.m. Stuart of Roby will judge the show. A barbeque lunch will be served at 1:00 noon on Saturday. Lunch will be served in the barn. Following the presentation of awards at 1:30 p.m., a premium auction of the top 50 percent of each class will be sold.

S/4 L. R. Chunn Assigned to 101st Airborne Division

Ft. Campbell, Ky. (AHTNC) Jan. 23—Army Specialist Four Lewis R. Chunn, son of Mr. and Mrs. Lewis B. Chunn, Jayton, was assigned to the 101st Airborne Division at Ft. Campbell, Ky., Jan. 23. A communications center operator in company A of the division's 501st Signal Battalion, Spec. Chunn served in Vietnam and holds the Army Commendation Medal. He was last stationed at Ft. Richardson, Alaska. The specialist is a 1968 graduate of Girard High School and attended Cisco Junior College.

Why Weight Is Short Course For Home Economists

A shortcourse called "Why Weight" is scheduled for Tuesday, March 2 in the Kent County Community Center at 2:00 p.m. The short course will cover dieting for weight loss, sensible diets and exercise. The program will be conducted by Roberta Stanaland, Kent County Extension Agent and Tina Willmann, Assistant County Extension Agent from Fisher County. The program is sponsored by the Texas Agricultural Extension Service and the Kent County Family Living Committee. Everyone is welcome to attend regardless of race, color, creed or national origin.

Unnecessary Surgery

Patients throughout the United States often trust their lives to surgeons without much question about the necessity of the operation or the competency of the knife-wielder. Perhaps the traditional, often-unquestioning faith in the medical profession now needs reassessment. There are too many careless or incompetent practitioners today, though U.S. surgery standards are still probably the best, and the vast majority of surgeons highly capable. The influx of foreigners and the lure of big money probably worked to lower standards. A study conducted by a major newspaper recently revealed a number of instances of shocking carelessness which cost patients their lives. One surgeon put in a heart valve backwards. The patient died from lack of blood shortly after the operation. Another patient died when an anesthetic was administered not in the bed of the tonsils but in the artery. A patient died when a surgeon removed a kidney because he found a tumor on it—not knowing, because he didn't check, that she only had one kidney. The lesson to be learned from such studies is that one should know his surgeon if possible, and should check several diagnosticians before agreeing to surgery.

Jayton Methodists Plan Homecoming Here Sunday

The Jayton First United Methodist Church is planning a birthday celebration on Feb. 29th at the Community Center in People are asked to bring fruit or vegetable salad also a meat dish. Drinks and bread will be furnished, and the birthday cake will be the dessert, a spokesman said. The chair persons for the event are; January, Lorene Lee; February, Grady Jones; March, Junie Long; April, Jan Montgomery; May, Lena East; June, Barney Murdoch; July, Peggy Neskork; August, Lauda Geeslin; September, Margaret Hall; October, Odessa Jones; November, Minnie Lee Walker; and December, Sue Kelley. Each table or month, are to give a short skit. This will be the program, Feb. 29th.

Kent Commissioners Have Busy Day In Monday Meeting

In regular session Monday morning, the Kent County Commissioners Court had a busy day. They voted to raise the fee for the Rest Home Doctor, and also to invest Kent County School Funds. Minutes show the following orders were passed:
ORDER TO PAY BILLS
A motion was made by Sarah Byrd and duly seconded by George Taylor to approve all bills presented before the Court on this date. Vote on this matter was unanimous. Motion carried.
INCREASE DR. TUBB'S FEE
A motion was made by Donnie Carriker and duly seconded by George Taylor to increase Dr. Tubb's fee, as medical consultant to the Kent County Nursing Home, from \$50.00 to \$75.00 per month. Vote on this matter was unanimous. Motion carried.
APPOINTMENT OF PROBATION OFFICER
A motion was made by Sarah Byrd and duly seconded by George Taylor to adopt the resolution on appointment of Gerald McCoy as Probation Officer in Kent County. Vote on this matter was unanimous. Motion carried.
INVEST PERMANENT SCHOOL FUNDS
A motion was made by Donnie Carriker and duly seconded by Sarah Byrd to invest \$10,000.00 Permanent School Funds in State Savings and Loan in Lubbock. Vote on this matter was unanimous. Motion carried.
APPROVE TREASURER'S REPORT
A motion was made by W.H. Parks and duly seconded by Donnie Carriker to approve the Treasurer's Report from Oct. 1, 1975 through Dec. 31, 1975. Vote on this matter was unanimous. Motion carried.

4H Judging Team Enters Beef Contest

A Kent County 4-H Club livestock judging team entered the Wichita Falls Beef Judging Contest on Thursday, February 12. Team members La Rhonda Carriker, Teressia Wright and Ikey Dillashaw judged three classes of steers and two classes of heifers. Over 200 4-H Club and F.F.A. members from Texas and Oklahoma were in the contest.

Jaybirds Lose District Title

The Jayton Jaybirds saw their title hopes go down the drain Tuesday night, as they fell 66-61 to the Motley County Matadors in Spur. The Jaybirds had fought hard all season to make it to the playoffs, and had divided a pair of games with the Matadors in regular season play. Bobby Kelley piled in 19 points to lead the Jaybird attack, and Gene Cleveland made 13, but still they fell behind. So now, the athletic attention will turn to track, and the Jaybirds will start getting ready to host their annual Rolling Plains meet.

West Texas Buffs Post 17-4 Record

West Texas State takes a 17-4 record into what should be the game for the 1976 MVC championship—Wichita State at WT, Feb. 23 in Amarillo. The Buffs whipped North Texas 96-87 in their last outing as Melvin Jones scored 24 and Maurice Cheeks added 23. WT is still ranked in the top 10 in team defense, and are the Valley's best shooting team with a .514 percentage from the field. In MVC play, WT is 6-2, WSU is 7-1.

INTELLIGENCE NEEDS
President Ford has announced a reorganization of the beleaguered U.S. intelligence community which he said strikes a middle ground between the need for first-class intelligence capability and protection of the rights of U.S. citizens.

ON KILL-CASTRO
Sen. Barry Goldwater, a member of the Senate subcommittee which traditionally has monitored the CIA, has disclosed that he learned four years ago of U.S. efforts to kill Cuba's Fidel Castro in the early 1960s.

OFFERS ASSISTANCE
President Ford has offered House Speaker Carl Albert "all services and resources of the executive branch" to find out who leaked segments of the Select House Intelligence Committee's report.

Housekeeping would be ideal if there were really little fairies to do the work.

Girard Home Dem. Club Has Meeting

"Fashion is a form of Art." We are going to examine guidelines for the use of line, size, shape, texture and color in our accessories, began Mrs. Jake Swaringen and Mrs. Jim Wyatt in their demonstration for the regular meeting of the Girard Home Demonstration Club, on Wednesday Feb. 18, at the Community Center.

Emphasis on how accessories should enhance the major structural lines of a garment to create movement, add length or width as desired and tie the costume together most attractively and create the overall look should be studied. A good rule to remember is that "One splash of color is better than several in the same color, which makes for a spotted look." We practiced different ways of tying scarves. "My Favorite Accessory" roll call was answered by nine members, Neta Stephens, Clara Darden, Lois Simpson, Ila Nance, Miriam Sweet, Opal Hodges, Lois Turner, Opal Swaringen and Robbie Wyatt.

The refreshment table, covered with a lovely handmade white linen cloth with an edge of deep white crochet, a crystal vase with a red rose, Cherry Pie and coffee, provided by Mrs. Roy Nance, hostess, was enjoyed by all.

The next meeting will be March 3rd at 2:00 p.m. The subject "Why Make A Will" will be covered. Mrs. Leva Simpson will be hostess. You are invited.

Friends, Neighbors Hold Benefit Basketball Game

Friends, neighbors, and even a few strangers showed the true meaning of friendship and love for young Tessa Marie France with a generous response Monday night to a benefit basketball game to help this youngster in her battle for life against leukemia. Tessa is the daughter of Gary and Linda France and the grand-daughter of J.B. and Dorothy Gibson.

The young ladies who faced the court to a 38-34 win in favor of the Paducah team entertained a large crowd. Those who officiated the game, ran the clock, operated the concession stand, and took care of the general direction. All gave graciously of their time and talents.

There was no admission fee; each person paid as they wanted. Amounts from twenty-five cents to fifty dollar donations passed through the gate.

Broken down the figures show: Faculty and Staff Fund of the Jayton-Girard Independent School District 1615.00, Gate Receipts-\$437.25, Concession Stand-\$38.70 for a total of \$1,090.95.

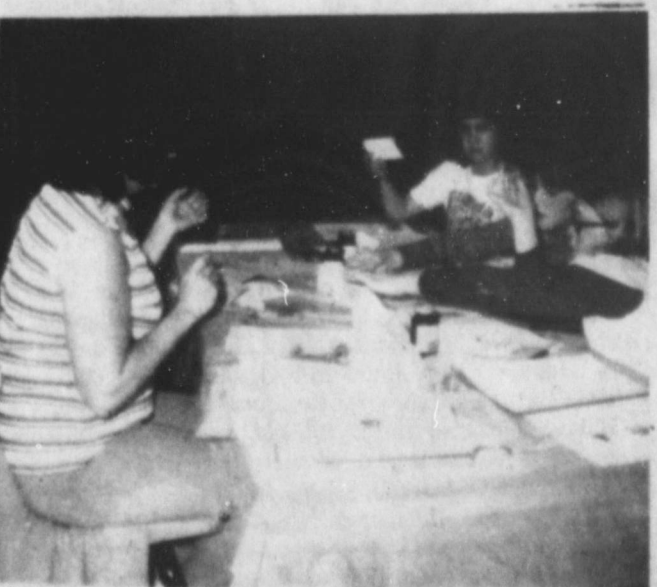

The Jayton Jaybirds Win First Place In Spur Tourney

The Jayton Jaybirds played in the District Tournament Friday and Saturday night at Spur and won first place. Friday night they played Patton Springs. Both teams played a good game, but Jayton defeated them 77-42. The leading scorer was Mark Fincher with 27 points.

After defeating Patton Springs, Friday night, they played Motley Co. Saturday night. This was really a good game. One of those nitty gritty games, but Jayton came out on top, 64-54. The leading scorer was Bobby Kelley with 20 points. Mark Fincher and Deral Cox were following closely behind.

The Jaybirds are on their way to state! Be sure and help support them. See ya at the next game!

County 4H Girls Study Coloring

Judith Fowler is conducting a 4-H Home Environment Project. Members of the project are Vanessa Fowler, Dana Cox, Melissa Cheyne and Kim Partridge.

The girls are studying color and its relation in the home, lines and shapes, texture, design and house construction.

The girls will have six meetings in order to complete the project.

Suicides, homicides, cancer deaths up. Vote allows Gandhi rule to continue.

Favorite Recipes of Opal Richards

Pat Frost's Fresh Apple Cake [No Sugar]

- 1 1/4 cups sifted cake flour
- 2 tsp. baking soda
- 1 tsp. cinnamon
- 1/4 tsp. nutmeg
- 1/2 tsp. salt
- 1/2 cup soft oleo or butter
- 1 tsp. vanilla
- 1 egg
- 1/2 tsp. sweeta (sugar substitute)
- 2 cups. freshly grated apples
- 1/2 cup walnuts or pecans

Mix and sift flour, baking soda, spices and salt. Add butter, vanilla, egg, and sweeta. Beat until well blended. Stir in grated apples and nuts. Grease 8 inch square pan. Bake 375 degrees for 40 to 45 minutes. Cut in squares to serve.

Diet Date Cake

- 1 cup margarine
- 1 Tbsp. Sweet-10
- 2 cups sifted flour
- 1 cup dates, chopped
- 1 1/2 cups diet applesauce
- 2 eggs
- 2 tsp. soda
- 1/4 tsp. cloves
- 1/2 tsp. cinnamon
- 1 cup chopped pecans

Mix all ingredients well. Bake in bundt or loaf pan for 40 to 60 minutes or until done at 350 degrees. This cake keeps well.

POWER ALKS

by U.S. Senator for Texas JOHN TOWER

CIA Oversight

WASHINGTON—I am deeply concerned that grave harm could inadvertently be done to our nation's security by committees of Congress, irresponsible former members of intelligence agencies, and an overzealous press. When the Senate Select Committee on Intelligence Activities was formed last February, I concurred with the majority that it was necessary for Congress to get to the bottom of charges that the CIA, the FBI and the other U.S. intelligence agencies had abused their authority. If our society is to remain a free and open one, we must compel our intelligence organizations to conduct their activities within the purview of the law. Their activities must be carefully monitored by responsible officials in both the executive and legislative branches of government. The abuses which led to the creation of special investigative committees in the Senate and the House indicate clearly that the CIA and FBI have not been watched closely enough in the past. But many of the activities of a world power necessarily must be conducted in secret. Disclosure of these activities does not benefit the American people, but does benefit America's enemies.

A former Secretary of State who disapproved of secret intelligence operations once said: "Gentlemen do not read each other's mail." But the nations of the world are not all governed by gentlemen. Secretary of State Cordell Hull's disdain for secret intelligence was one of the principal factors that led to the debacle at Pearl Harbor.

The CIA and the National Security Agency (NSA) were formed primarily to make certain there shall never be a nuclear Pearl Harbor.

Theirs is not an easy task. Often it can be accomplished only by methods that would not be sanctioned by Emily Post. But it must be done. And it must be done in secret.

I warned at the outset of the investigations of the special committees of the House and Senate that if we were not vigilant against leaks, and vital secrets were disclosed, our investigations would do the nation more harm than good.

The Senate Select Committee has conducted its investigation in what I think has been a responsible manner, but I am dismayed over the irresponsible behavior of the members and staff of the House Intelligence Committee.

No national secret that has been given to the House Intelligence Committee has remained a secret for long. Classified information did not just leak from that committee, it came pouring out.

Deliberate leaks to the national news media and parliamentary maneuvers designed to avoid hard decisions by the legislative branch have led many in America to question the competence of Congress as a partner in national security affairs.

Jackson-Carter?

A political pattern might be emerging in the Democratic nomination scramble—involving Hubert Humphrey, Henry Jackson and Jimmy Carter. It might be unfair at this stage to discount Birch Bayh, Morris Udall and others. But nevertheless indications are that:

Hubert Humphrey is the veteran liberal more and more Democrats are turning to—because they don't like other candidates. (Organized labor, for example, is behind Humphrey.) But Humphrey, who talks at the speed of sound and who has two answers for every problem, or more, is a former defeated nominee, further handicapped by his reputation as a big spender, one who hasn't been able to pay his campaign debts. He would probably lose a national election, carrying that stigma in today's economic climate.

Henry Jackson is also acceptable to most liberals, is widely recognized as competent and hasn't lost a presidential race. He and Jimmy Carter are trusted by the moderates who fear idealistic, extreme excursions to the left. Since Jackson is the senior, and was formerly supported by Carter, if the Georgian fails to win the nomination, his delegates thrown to Jackson could produce a Jackson-Carter ticket.

Of course, Carter is a new face now attracting much attention, and delegates. His people say he will win, and he might. If he doesn't, many Democrats think their strongest ticket might be Jackson-Carter.

TEXAS 1876

February 23 - March 1, 1876

YOUNG COUNTY Sheriff Dick Kirk was instantly killed Monday morning at Belknap by Buffalo Bill. Kirk attempted to arrest Bill, drawing his pistol. At the same time, Bill picked up a needle gun. They fired together. Bill missed the sheriff, but was himself shot in the breast. Buffalo Bill fired a second shot, after falling, shooting Kirk through the head. Buffalo Bill escaped, but was traced some distance by the blood, and it is thought he was fatally wounded.

LAMAR COUNTY — As much as 5,000 yards, or about a mile and three fourths of track is being laid per day on the Trans Continental branch of the Texas and Pacific Railroad between Brookston and Paris.

HOUSTON — Croup is prevalent here to the great anxiety of parents.

GIDDINGS — The Centennial Masquerade Ball was a brilliant success, reflecting credit upon the city. The attendance was large, from all sections.

GRAHAM — A party that started from here after Buffalo Bill has returned and report him dead.

BEXAR COUNTY — General Ord will probably organize a frontier scouting party to consist of two regiments of cavalry.

GALVESTON — The norther yesterday made the atmosphere of the cockpit of the Central Market anything but genial to His Honor, and judicial proceedings were suspended until a fire had been kindled in the court room; in the meantime, the judge toasted his shins in the police headquarters.

ERATH COUNTY — Farming is decidedly progressive here. Erath County is taking steps to organize an Agricultural and Mechanical Association.

WOOD COUNTY — Thursday's eastbound through freight on the Texas and Pacific Railroad fell through a trestle about two miles west of Mineola. The engine passed over unharmed, the caboose also escaped; the remainder of the train was wrecked.

GALVESTON — Many folks are arriving from the interior for the Mardi Gras celebrations.

Advertised in Leading Texas Newspapers — A Farm of Your Own is the Best Remedy for Hard Times! Free homesteads and the best and cheapest railroad land are on the line of the Union Pacific Railroad in Nebraska. Secure a home now. Full information sent free to all parts of the world.

The Scientists Tell Me... Fish Can Grow Year-Round In Power Plant Effluent

By Robert L. Haney
The Texas Agricultural Experiment Station

As most any freshwater fisherman will tell you, life processes for fish slow down in cold weather. Fish don't hibernate, but they don't do much growing either.

Now, if you warm up the water, fish become more active, they want to eat, and when they eat they grow. To put to good use the vast quantities of heated water that are a byproduct of electric power production is the intention of a current program of TAES research on the Texas coast.

At the Cedar Bayou plant of Houston Lighting and Power, scientists with the Texas Agricultural Experiment Station (TAES) are growing a variety of finfish, crab and shrimp. These researchers, who are also in the Wildlife and Fisheries Sciences Department at Texas A&M University, are putting this heated water to use in their mariculture program. Dr. Kirk Strawn directs five graduate students in a year-round mariculture program testing three types of culture, all using the power plant effluent. These are: 1) a laboratory, 2) fish ponds, and 3) cages in the cooling water.

All three are testing the heated water as a medium for "hurry up" fish production. In the laboratory, about 30 species of fishes are grown and studied. The 25 quarter-acre ponds are stocked with shrimp, redbreast, speckled trout, flounder, spot, black drum, mullet, oyster, pompano and spadefish. The coolant water is pumped through the ponds in about 2 1/2 days. While in the ponds, the water ranges in temperature from about 90°F to 50°F. The major goal in the pond experiment is to discover how to best use the heated water to extend the growing period of the marine life. The cage project is testing mariculture production in a 2,600 acre reservoir used for cooling water. (More than 1.4 billion gallons of water per day are heated by three units and must be held in this lake until it cools to bay temperature.) Cages of fish also are being tested in the powerplant intake and discharge canals leading to the lake.

Cage testing is designed, Strawn says, to find which species, raised together, are most efficient in using the available food with minimum fouling of cages. In another TAES Project being conducted at Texas Power & Light Company's Trinidad Plant,

WHO KNOWS?

1. Name the capital of California.
2. When did women win the right to vote?
3. Which amendment was this?
4. What are the first five books of the Bible called?
5. What is another name for these books?
6. Name these five books.
7. Which is the largest continent?
8. Name the Pelican State.
9. What is the estimated age of the earth?
10. Where was the peace treaty, ending the Revolutionary War, signed?

Plenty True

"Do you think our daughter will ever get married, John?"

"Well, yes, dear, I do. But I wouldn't worry about it for at least twenty years, darling. I never heard of a girl sixteen months being an old maid."

Proved

A man recently won a bet by entering a restaurant with a lion. He wished to prove that waiters could move quickly.

A Terrible Situation Bates—Gregg hasn't taken a vacation in years. Gates—He must be a hard worker.

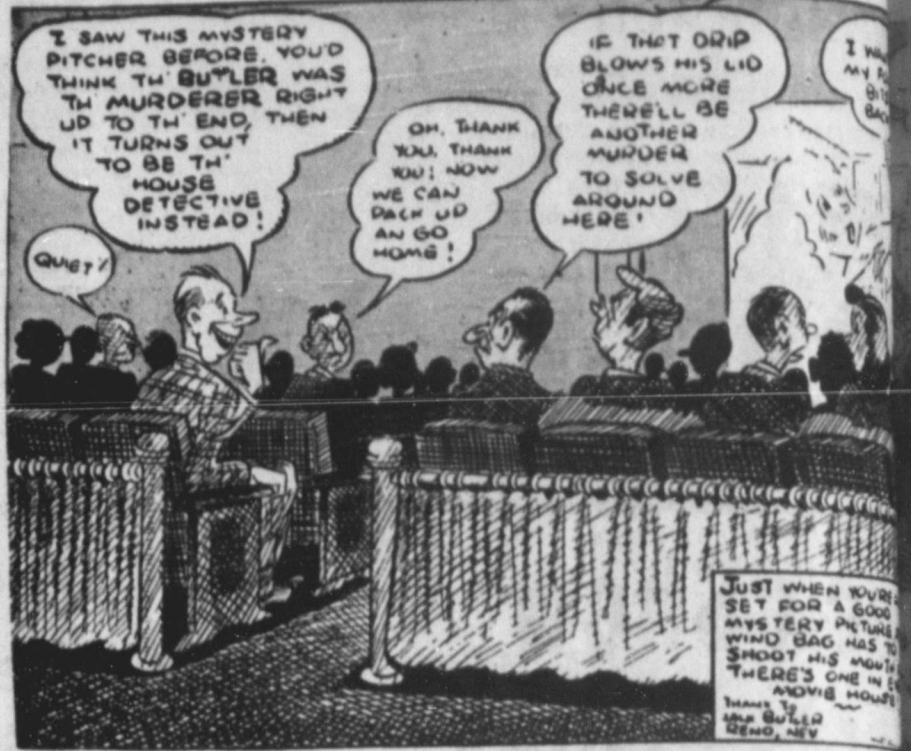

Bates—Just the opposite. His job is so easy that he hates to rest because it's too much like work.

ON FOOD COSTS

Higher middleman charges accounted for nearly three-fourths of a \$126 boost in what a typical family paid for U.S. farm-produced food last year. The Agriculture Department said cost will continue to go up in 1976.

Answers To Who Knows

1. Sacramento.
2. In 1920.
3. The 19th Amendment.
4. Pentateuch.
5. Five Books of Moses, or The Law.
6. Genesis, Exodus, Leviticus, Numbers and Deuteronomy.
7. Africa.
8. Louisiana.
9. About three billion years old.
10. Paris, France.

INCREASING FOOD PRODUCTION

U.S. Farmers would likely respond if the call went out to increase food production. But their decision would hinge on two factors—new land would have to be brought into production and prices for agricultural products would have to increase, says an economist for the Texas Agricultural Extension Service. About 266 million acres of forests and rangelands could be converted to cropland, mainly in the Northern and Southern Plains and in the Corn Belt. Prices for agricultural products would have to increase to give farmers an incentive to produce. This, of course, would mean increased food prices.

MARTIN & SAIGON

Graham A. Martin, the last U.S. ambassador to South Vietnam before it fell to the Communists, said that in the long run the final American evacuation of Saigon will be judged as "a hell of a good job."

CAR SALES JUMP

DETROIT—The four U.S. automakers have reported that a 27 per cent jump in new car sales last month provided them with the best year-opening month since the pre-Arab oil embargo January of 1973.

catfish studies, and one with application to catfish farming anywhere, has been the discovery that appropriate feeding will result in better frozen storage of catfish fillets. The study, just completed by graduate student Timothy O'Keefe, indicates that feeding high levels of Vitamin E just a few weeks prior to slaughter greatly enhances the storage stability of frozen catfish. Thus an economical method is available to improve the product, and in the long run, the demand for catfish.

Interest in tilapia as a culture species is growing. Not only does this bream-like fish taste good, but it grows very rapidly and takes little feed. One study conducted by O'Keefe and Noble in the intake canal of the plant indicated that growth occurred without any feeding at all. Water, rich in phytoplankton (plant) organisms, flowing through the cages, provided enough food for some growth. With additional feeding of low rates of pelleted feed, fish gained 1 pound for each 1.6 pounds of feed consumed.

The scientists agree that tests so far indicate good possibilities of using heated water to increase the state's production of shrimp, blue crab and finfish. An increased supply of these widely popular foods will be welcomed by us all.

Editor's Note — Any questions regarding this column should be addressed to Science Writer, Dept. of Agricultural Communications, Texas A&M University, College Station, Texas 77843.

IT NEVER FAILS

Ban Commercials

Canadian television viewers have just been somely "treated" by their government. U.S. television commercials have been banned. The hope in this country is that a way can be found to reduce in number the savage volume of commercials on U.S. television screens. Until another method of financing is developed, commercials can't be banned. But they could be limited to half-hour intervals, and required to be factual. The ban on U.S. commercials in Canada resulted in a realization that this massive flow of tasteless, dishonest bilge, deliberately interspersed to destroy continuity of programs, is harmful to the public eye. As loosely regulated as this multi-billion dollar commercial business is today, the deluge is also unmanageable in this country. Congress should prod the Federal Communications Commission into action. But few politicians dare buck the powerful television networks.

Handgun Hokum

Congressman John Conyers (D-Mich.) continues his misguided effort to disarm the citizenry. His latest proposal in the House Judiciary Committee, a national ban on the possession of handguns, was defeated. The present day, scandalously-high U.S. crime rate is ample cause for alarm. But taking handguns from law-abiding citizens, who now need them more ever for protection, isn't the answer. A law that ownership would only disarm law-abiding citizens would only keep theirs. The first step, in the rise of dictatorships throughout history, is often the disarming of the citizenry. Citizens have had the right to own firearms since the founding of this country; today's criminals should not be allowed to deprive them of that right. Rather, criminals who use guns in the commission of crimes should get minimum jail sentences automatically—as several states have already provided with new laws and as President Ford has recommended.

KENT COUNTY STATE BANK

Member F.D.I.C.

Each depositor insured to \$50,000

News Notes From Washington --

Omar Burleson, M.C. 17th District, Texas
 WASHINGTON* D.C.--Last week the house of representatives debated the deregulation of natural gas. It finally wound up authorizing more regulation than we have at the present time.

Presumably, it exempts small producers from price controls. The fact is that it places more controls and restraints on all producers, including those delivering gas within a State. Intrastate gas has never been controlled by the Federal Government. Only interstate or that which goes across State lines is controlled by prices set at the wellhead by the Federal Power Commission.

The matter has yet to be resolved in a Conference with the Senate which has passed a bill to phase out controls over a period of seven years.

This action calls to mind an ad by an oil company but which can apply to most any industry.

It seems there was once a squirrel who collected nuts and stored them. In this way, he was able to see himself safely through the long, hard cold winters. Other squirrels soon noticed how good he was at finding nuts and bringing them home. So they asked if he would do the same for them. They, in turn, agreed to pay him for his services.

Soon, he was finding and delivering nuts to other squirrels far and near. In fact, the demand was so great that, in his range, nuts became harder to find. Because the search became more difficult, it cost much more. So he had to raise the price he charged the other squirrels.

This, of course, caused some concern, particularly among those squirrels who were not familiar with all the problems involved. A group of them filed a suit, appealing to the High Squirrel Court. They got a favorable decision. The enterprising squirrel asked the question, "Why should I knock myself out? This is tough work and it's risky business to contract for delivery and risk being sued if I don't come through." Besides that, he had other squirrels working for him and had an investment.

So--his incentive being greatly reduced by controls and lower profits, he stopped searching for nuts in hard-to-find places. Pretty soon, they began to run out of supplies. Naturally, the enterprising squirrel began to cut back on deliveries to other squirrels who lived some distance. His customers were upset. They could not understand why there were not enough nuts to go around.

The business squirrel patiently explained to his customers that if they wanted nuts they simply could not have them as cheap as when they were plentiful and supply and demand governed the price. He tried to show them how much more expensive it had become to discover new sources of supply and how his cost of operation had increased.

Not all his customers were convinced. In fact, the greater number thought his position was one of exaggeration and called on the governing squirrel body to impose more controls and more restraints. It was all enough to drive the enterprising squirrel up a tree.

Moral: Unless the entire economy is placed under government control, which would mean changing our entire economic system, a few controls just have not worked and throw a lot of other things out of kilter.

In this instance, the fable is applicable to the oil and gas business but could be applied to any other part of our economy.

Detente & Russia

In the nuclear age there can really be only one policy for the United States and Russia--peaceful coexistence. That, which we call detente, causes the hawks in each country to complain, from the best of motives, usually.

In the case of America, 1976, the hawks have a valid fear that growing Russian military power will soon out-balance U.S. military power and thus endanger detente since the temptation will grow as Russia gathers dominating power--for Kremlin leaders to use it.

In our system there's the danger military profiteers will mislead the people and Congress and corrupt the military for contracts; in the Russian system there's the danger absolute power or an absolute leader, only possible in a dictatorship, will impulsively commit aggression.

Thus detente is something both countries and governments must continually work for and guard. Genuine detente, when neither side seeks to outgain the other militarily, is worth the effort. It enables each government to allot more tax money to the peoples' needs, rather than to means of destruction.

There is an additional advantage in the process for America. Genuine detente will mean the Russian people obtain more and more work-saving and modern products--raising their standard of living. Russians enjoying a higher standard will inevitably be less inclined to tolerate military aggression, which would rob them of such gains.

From the common-sense standpoint, that neither country wishes to destroy the other and see itself destroyed, from the standpoint of saving vast sums of money and from the U.S. standpoint of allowing the Soviet standard of living rise, detente is desirable--so long as we insure that we keep abreast militarily, that Russia is not militarily cheating.

Homemaking Hints

For Safety & Economy

KITCHEN SAFETY

There's no safer place than the comfort of your own home--or so you think. Actually, danger lurks right in your kitchen! To help you avoid big accidents as well as little mishaps, follow these helpful tips.

Load your dishwasher with sharp utensils pointed down, and store kitchen knives in racks which don't expose the edges. When chopping food, use a cutting block and always cut away from you. Remember to put the canned food lids inside

the cans before throwing them away. This way, you won't get a surprise cut as you grab the trash bag.

Store household cleaning products and chemicals in a locked kitchen cabinet. And avoid using hazardous chemicals when possible. For example, use non-chemical Drain Power instead of acid or lye drain openers which can cause serious injuries and burns if they come in contact with skin. Drain Power is safe to store, too, since it takes 30 pounds of pressure to discharge the contents and cannot be easily activated by children.

Never stand on a chair or a box to reach high places. Either one could slip out from under you--especially as you lean forward or to one side. If possible, take only one item down at a time, keeping one hand free to catch yourself if you lose your balance.

Follow these suggestions and mix them with a little common sense. It's a recipe for safety in your kitchen.

The Market

Those who believe the stock market telegraphs business conditions about six months hence see the immediate business future of the nation optimistically. The market has been surprisingly strong since the beginning of the year.

Interest rates have also fallen sharply, another encouraging sign. (One wonders how this is possible with such massive federal borrowing going on at present.)

Economic indicators are up. Car buying is up. Unemployment is down, though still high. But amidst all the good economic news, one should keep in mind that this is an election year. The year 1977 is likely to be a surer test of the long-term trend in the economy than 1976.

COUNTY DISTRICT CLERKS SEMINAR

County and district clerks from throughout Texas will participate in an annual seminar at Texas A&M University, Mar. 2-4. Theme of the seminar is "The Clerk: Serving Present and Future Generations." Discussions will deal with such topics as probate management, public records, the Uniform Commercial Code, the Voting Rights Act, laws of the 46th Legislature as they affect county government, the civil appeal record, uniform cost assessment, information management systems, public relations, post judgment remedies, and the Family Code.

NOTICE OF ELECTION

An election will be held in the City of Jayton, for the purpose of electing three members of the City Council. Said election to be held on Saturday the Third day of April, 1976.

Anyone desiring to have his or her name printed on the ballot as a candidate for the office should file with the City Secretary by March 3, 1976.

Signed:
 Estelle Luna, City Secretary

Let us hold fast the profession of our faith without wavering; (for he is faithful that promised.)

Have faith in God. He will lead us in the right paths. He will never fail.

As the highways are clearly marked and numbered so that we might easily find our way from city to city and across the nation, God's word clearly marks life's paths.

Attend church regularly and exercise your faith in God.

The Church is God's appointed agency in this world for spreading the knowledge of His love for man and of His demand for man to respond to that love by loving his neighbor. Without this grounding in the love of God, no government or society or way of life will long persevere and the freedoms which we hold so dear will inevitably perish. Therefore, even from a selfish point of view, one should support the Church for the sake of the welfare of himself and his family. Beyond that, however, every person should uphold and participate in the Church because it tells the truth about man's life, death and destiny; the truth which alone will set him free to live as a child of God.

Mesquite Tree Is Problem For Land Owners

Consider the mesquite tree. It's top does not take up much room but it's roots may run out sixty feet from the trunk. It takes three hundred gallons of water to grow a pound of wood - a pound of grass requires only seventy gallons. Which do you want - a pound of mesquite or four pounds of grass?

If you do a lot of barbecuing and had rather have the mesquite, read no further. If you want grass, read on. A mesquite tree may be killed by poisoning, dozing, or rootplowing. Good intentions or foul language will not bother it in the least. Cost shares for control of this pest are available through the local ASCS Office.

The best time to do the work is in the hot months of the year. A well placed dose of coal oil around the base of this tree will do wonders for the grass.

For more information contact the Soil Conservation Service working through the Duck Creek Soil and Water Conservation District.

Possibly a bridegroom tried to get married with a dog's license. But maybe that was the kind of life he expected to lead.

It is easy to get the idea that no one should interfere with your business.

"I FINALLY GOT A PLACE TO PARK! HOW WAS THE FIRST FEATURE?"

Texas Highways Facial A Crucial Fiancial Situation

LUBBOCK--The crisis is upon us. It is real, and it is serious." District Engineer, George C. Wall, Jr. spoke before Associated General Contractors, Texas Highway-Heavy Branch at the Lubbock Club.

Citing the fact that the federal and state governments have been investing decreasing amounts in better transportation in recent years at a time when transportation needs have grown as a result of an expanding economy, he noted that transportation in Texas is caught in a squeeze between declining revenues and rising costs.

Studies currently underway have revealed that the State Department of Highways and Public Transportation has a backlog of construction and right of way projects totaling \$11 billion.

"The best forecast as things stand now indicates that we will have about \$1.9 billion in state and federal funds for construction over the next 20 years," he said.

"Actually, this will be available for only six years or less since around 1980 we will not have sufficient state dollars to match federal dollars," he added.

"That's enough to whittle away only 17 percent of our current backlog." Putting it another way, the program will be only one eighth as large as was possible at past funding levels, he said.

Recognizing the gap between projected revenues and established needs and the drastic program reductions to be made, the State Highway and Public Transportation Commission contracted with McKinsey and Company, a noted management consulting firm, to study the conditions and to assist the department in finding the best courses of action to respond to the changing environment in order to provide the most mobility for the available dollars.

Included in the study will be an assessment of what facilities and what mobility can be provided at different levels of taxation, including current tax levels. Each element will be tested for its benefits-to-cost ratio.

The study is expected to develop, by mid-year, alternate statewide arterial systems, together with financing alternatives. The results of the study will be reviewed with local officials and private citizens at an appropriate time.

A number of cost-reduction actions and improved management procedures have already been instituted by the department, including a moratorium on certain right of way purchases, a 20 percent reduction in the work force, cancellation or deferral of contract lettings, curtailment of mowing operations, and related functions.

Also under consideration are various design alternatives such as reductions in grade separations, median widths, and numbers of lanes. An aim will be to invest in projects that start providing benefits at an early date, especially on a statewide basis, and to defer projects for which benefits would not be realized for several years.

"Looking ahead, many commitments for projects now included in the department's backlog of work will have to be rescinded," he stated. "It is also clear that financial resources at this point will make it necessary to reduce many ongoing projects in both scale and cost."

Conflicting accounts and rumors about the financial condition of the department prompted invitations statewide to department officials to address civic leaders, officials, and the public to provide detailed assessment of the present situation, the study and the ongoing cost-reduction efforts of the department.

"It is the department's duty to inform the people of the situation and to point out that the mobility modern Texans enjoy, the mobility on which our economy depends, is in danger," George C. Wall, Jr. concluded.

FCC Fails

Further evidence—if needed—that the Federal Communications Commission is more a protector of the commercial television networks than a guardian of the peoples' interests comes in a new congressional report.

The staff of the House Communications Subcommittee accuses the F.C.C. in blunt language of making rules to stifle cable television growth and protect the television networks' favored position.

The report says a complex series of rules adopted by the F.C.C. appeared to "ensure that cable television remained an unthreatening adjunct to over-the-air television regardless of the important benefits cable can offer viewers."

The continued failures of the F.C.C. suggest strongly the President should be authorized by Congress to appoint a non-partisan, completely independent board or commission—of prominent Americans immune from intimidation. The F.C.C. should be phased out of existence—it can probably never be reformed.

The new body would set standards of truth for both commercials and for historical truth in television programs—and limit commercials to specified periods every half hour or hour. It would also establish news reporting standards and guidelines to provide for correction of untruth and prevention of news distortion and the mixing of propaganda with news.

Television News

The effort continues by television stations and the networks to justify slanting the news.

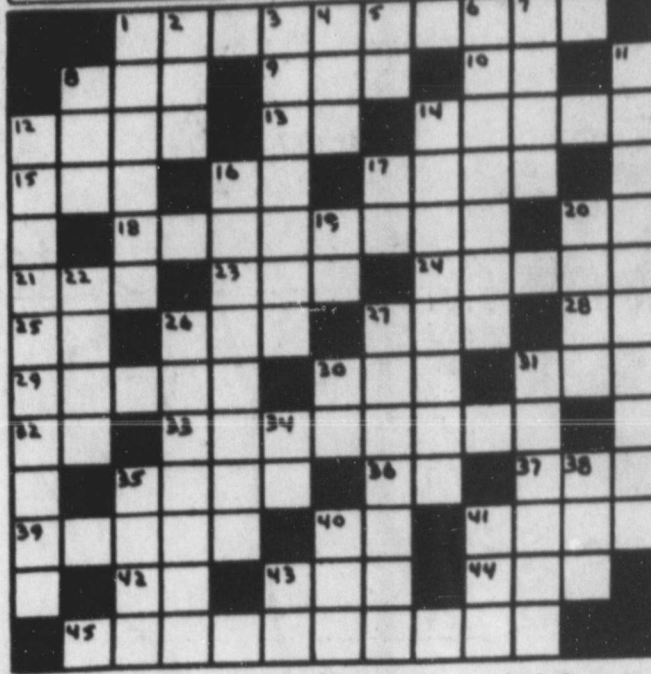

Earlier this month in a Washington newspaper an ad appeared boasting a two-man news team. The catchline was: "Ask me just to read the news and I'd quit." Two newsmen were pictured under that large, heroic quote.

The question arises, "Why shouldn't they just read the news?" Why should they color it with commentary? They're supposed to be newsmen—not editorialists.

The most dangerous trend in the media today is that of so many media newsmen to color, slant and distort the news according to their prejudices. It's done in a variety of ways.

What America needs is not a Joseph Goebbels to color the news but newsmen to report objective news objectively. The opinions should come in editorials—and on television on a different program.

Alcoholism Meet Held in Lubbock

South Plains Alcoholism Regional Council Board of Directors meeting at 2 p.m. in the Smithlawn Church of Christ building, Tahoka Highway, Lubbock, Thursday, Feb. 19, according to Joe B. Phillips, SPARC President.

The newly formed 15-county alcoholism council was formed on Jan. 15. Its purpose is to offer citizen input from 15 counties in all alcoholism projects in the Lubbock Planning Region. Since 1972, such an organization has been in the Lubbock Regional Alcoholism Plans.

Other officers besides Phillips are: First Vice President, Ross Lumsden; Lamb Co.; Second Vice President, Mrs. Marie Lamb, Bailey Co.; Treasurer, Richard Casey, Floyd Co.; and Secretary, Mrs. Velma Esqueda, Crosby County.

At present there are 10 active Board of Director members representing 10 counties. It is hoped that five additional board members all can be named at the Board of Directors meeting on Thursday, Feb. 19.

For The Record

Tips On Choosing And Using Your Record Player

To be eligible for warranty service you are sometimes required to fill out and mail a warranty card that is packaged with the equipment. It's a good idea to do this as soon as you unpack the unit. Also, file the sale slip away should proof of the purchase date be required later, say the experts at the Electronic Industries Association.

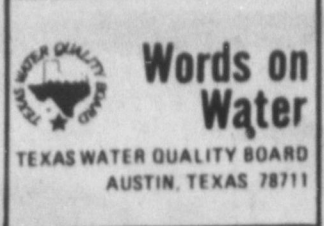

If there's no power coming in to your stereo unit, before you call the repairman, check to see if your unit is plugged in. If it is, check the fuses in the rear of your receiver. If one has burnt out, it is very inexpensive to replace.

Much of the poor performance in audio equipment is the result of not properly installing and operating the equipment. Before you buy, ask a salesman to familiarize you with the installation requirements and operating instructions. Follow the directions carefully and be sure to save all manuals and operating instructions in case you have a question later on.

WEALTH TO CHARITIES BIRMINGHAM, ALA. -- When Allen W.T. Davis died recently at 94 in the 14th-floor hotel room where he had lived since 1927, he left about \$1 million to charities in three states. He had made earlier plans to be buried in his pajamas and a cheap casket with no flowers or music.

What has become of the idea that everyone should be temperate in everything.

A LOOK AT THE FUTURE

Water Quality Management for the years ahead in Texas isn't growing like Topsy. It is being carefully planned. In fact, the need to plan ahead was recognized in 1967 when the Texas Water Quality Act was passed.

In addition to Texas law, federal law, though it came along some time after planning began in Texas, has had a considerable effect on procedures at the state level. The planning process is intricate and difficult to explain briefly, but let's take a swing at seeing just what is being "planned" for the waters of the state.

Three planning areas concern "Facility" (sewage treatment plant) Planning, Area-wide Planning for specific areas of the state, and River Basin Planning.

Cities and towns are required to participate in facility planning in connection with building or modifying their sewage treatment plants and related facilities such as sewer lines. The result is a highly detailed plan which considers a wealth of technical and environmental

data, enabling a manager to get maximum benefit from money which will be available. Area-wide Planning is that the Governor has designated urban-industrial areas which have substantial water control problems. This area can be considered whole, rather than with a group of projects on a piecemeal basis. Seven such areas have been designated by the Governor and have been approved by the federal government. The federal funding to the planning activities are the Dallas/Fort Worth Area, Houston, San Antonio, Rio Grande Valley, Southeast Texas, and the Rio Grande Valley. Christ and Texas. Then there are the Plans which deal with geographical areas within a river basin, not only the principal in the basin, but all smaller streams as well. Basin Plan evaluates the basin to which the water a river basin are polluted. It recommends a program to improve quality, as well as to maintain the quality of water which is not now polluted. That hits only a few spots in the extremely complex planning process. It is that planning is going on and has been going on some time, and that it will be carefully thought out procedures to assure good quality for the years ahead.

March, 1976

Far-off, unseen, Spring faintly cries;
Bidding her earliest child arise,
March!

-Bayard Taylor.

March is a turning-point month, when winter begins to give way to warmer weather and the first signs of spring appear. In early colonial days, the year began in March. The name of the month comes from Mars, which in ancient Italian meaning was the name of the God of War.

Spring officially begins on the 20th of March, this year. St. Patrick's Day comes on the 17th and the month is a notable one for New York, Texas, Maryland and Massachusetts. Maryland Day falls on March 25th. Albany became the capital of New York on March 10th, 1797, and the United States Military Academy was established at West Point, on March 16th, 1802.

In Massachusetts Evacuation Day in Boston is commemorated on March 17th, which took place in 1776. The Boston Massacre took place in March of 1770.

For Texas March is an historical month because on March 2nd, 1836, even while Santa Anna was besieging the Alamo, Texas was declared to be independent of Mexico. March 6th is also Alamo Day in Texas, the anniversary of the fall of the Alamo, which came about on March 6th, 1836.

Several major birthday anniversaries occur in March. March 3rd is the birthday anniversary of Alexander Graham Bell; March 7th that of Luther Burbank; March 8th that of Simon Cameron, who founded a political dynasty in Pennsylvania which lasted for decades; March 16th that of President James Madison; March 17th that of Roger B. Taney, fifteenth justice of the United States Supreme Court; March 18th that of Grover Cleveland, the only American President to serve two non-consecutive terms as President; March 19th that of William Jennings Bryan, and March 29th that of President John Tyler, the tenth President of the United States.

Also in March come Girls' Scout Day, on March 12th, and Seward Day on March 30th, in Alaska, the anniversary of the day, in 1868, when Russia ceded Alaska to the United States for \$7,200,000.

Deceiving

"They look like such a happily married couple, John."

"You can't go by looks, dear. They probably say the same about us."

A good loafer is an artist at his profession.

And About All

The farmer's biggest turnover is his spring plowing.

Moshe Dyan, former Defense Minister of Israel: "We must keep the atomic option without depending on the United States."

Mulching Cotton Burrs Is Good For The Land

Mulching-Cotton burrs are being applied to many fields in Kent County as a conservation measure. This mulch of cotton burrs will reduce erosion from soil blowing, conserve moisture and reduce runoff.

These burrs are on the Sallie McAteer farm east of Jayton. For more information contact the Soil Conservation Service working through the Duck Creek Soil and Water Conservation District.

Mr. and Mrs. Emery Copeland from St. Louis, Mo. have been here visiting her aunt and uncle, Bill and Eunice Daniels. Mrs. Lucille Copeland called all the Kyles to come by for a nice visit.

Shaking It

At Harvard, where weird things happen of late, a cute thing in flimsy cover recently performed a belly dance before the mostly-male student class, and male teacher.

The idea? This was supposed to demonstrate that consumer sophistication has made such Madison Avenue promotions obsolete!

Well, if a pretty young thing shaking it is now obsolete, why were the professor and all those students watching so closely? And why were photographers on hand?

And why do men turn their heads to look at cute things passing by? And why do women show off good figures with revealing clothes? And, etc., etc.

TO SAIL SOLO

GDANSK, POLAND -- Krystyna, a 45-year-old Polish woman shipbuilder, has set out to beat two rivals and become the first woman to sail solo around the world. Her big fears are illness and whales.

Patrick Buchanan, columnist:

"If Reagan wins New Hampshire, he will win the Republican nomination."

BLACKBIRDS AGAIN

WASHINGTON -- Emergency legislation passed by Congress in an effort to rid Kentucky and Tennessee of millions of blackbirds may have no effect on the problem, the Fish and Wildlife Service reports. Officials from both states testified that the blackbirds are causing serious health problems and crop losses.

ONE MINUTE SPORTS QUIZ

- Who will host the Winter Olympic Games four years hence?
- How many medals did the USA win at the Winter Olympics?
- Who won the Andy Williams-San Diego Open Golf Tournament?
- Who won the Daytona 500?
- Bob Dandridge plays pro basketball for what team?

- David Pearson.
- Milwaukee Bucks.

If my sources are correct, you can forget about all the warm weather we are having in February and look for a hard freeze on April 17th.

Faye Forbes, an old timer in the county said she heard it 'thunder last Tuesday, the 17th during the dust storm (that is right) and this means, she says that we will have a freeze in 60 days. Watch for it.

This Saturday I was out in my back yard looking at the few fruit trees we have out there. And I noticed one little peach tree is solid with tiny buds, which have been brought out by the warm weather. Now, I think I can say good bye to any peaches. They will be sure to get caught in a freeze later on.

A lot of us are now worrying about the dry weather, and in the area they are setting up "Praying for rain" meetings.

We have an opposing situation. Some say the wind will continue to blow as long as it is dry, and others say it won't rain until the wind quits blowing. That creates a bad situation.

This week, I saw something that tells what season it is--tail water running out on the road from an irrigation ditch.

Some predict that irrigation will be slow to get going this year, as it was last year, because of the high price of fuel to drive the pump motors.

Every year most people watch the Miss America contest. Did you ever wonder what happens to them after they finish their first year?

One good example is Miss Merriweather, who won the contest a number of years ago. She now plays Betty on the Barnaby Jones show.

Here is information on those who have won the title the last ten years:

After pageant host Bert Parks croons: "There she goes - Miss Americaaaa! Where does Miss America go?"

For one hectic year she travels all over the nation, making personal appearances and speeches - but when her reign ends, she leaves the glitter and glamour behind, and Enquirer check of the past 10 winners shows.

Here's what the former beauty queens are doing now:

Vonda Kay Van Dyke (Miss America 1965), is divorced, lives in Florida and works often in theater around the country. Deborah Bryant (1966) has divorced her first husband and is now married to a car salesman in Arizona.

Jane Jayroe (1967) is married and working toward an advanced degree at the University of Oklahoma. Debra Barnes (1968) is a housewife and mother of two daughters living in Missouri.

Judith Ford (1969) became a physical education teacher, then a housewife in Rockford, Ill. She recently gave birth to her first child, a boy.

Pamela Eldred (1970) spent four years as a model and actress on TV commercials before marrying a doctor. They're now living in Korea.

Phyllis George (1971) is a sportscaster for CBS-TV and also co-hosts the network's popular "Candid Camera." She's single and lives in New York City.

Laurie Schaefer (1972) is a housewife living in Northridge, Calif. - and her neighbor is Terry Meeuwzen (1973) who's also a housewife.

Rebecca King (1974) lives in Denver and attends law school. She's single, as is Shirley Cothran (1975), who recently completed her year as Miss America and is now studying the flute in her home town, Denton, Tex.

U. S. Congressman Al-honso Bell, a Republican from California is boiling. He says:

In an outrageous example of selfish use of taxpayer's money, Congress has continued padding its pockets with incredible salary and fringe benefit boosts - despite the nation's poor economic health.

It now costs the American people an unbelievable \$488,505 a year to keep a single member of Congress in business - a 30 percent increase in the last two years!

And quite frankly, I am not at all sure we are worth it.

People are fed up with Congress. They think we can't act decisively on things that really count. And for the most part they're right.

But we've definitely shown that we can move fast when it comes to feathering our own nest.

The most flagrant examples come, as you might expect, in the area of salaries.

Not content with their handsome \$42,500 a year - nearly three times what the average American family lives on - Congress last July pegged its salaries to the cost of living.

They thus assured themselves of regular pay hikes in the future, without the embarrassing necessity of voting for one every year.

But even that wasn't enough. They went ahead and raised their salaries anyway - to \$44,625 a year.

Congress has also increased each representative's annual stationery allowance by \$1,250 or an astonishing \$543,750 for the 435 Congressmen. Why they did this is beyond me.

We already generate far too much paperwork up on Capitol Hill.

And thanks to generous boosts in office staff allowances, members of the House can now spend a staggering \$277,220 each on staff. We're now entitled to 18 office aides apiece.

Congress employs more than 16,000 staff personnel for members and committees - and still can't get its job done.

But your luxury-loving senators and representatives have plenty of time to fly themselves around the country at your expense. They've voted to raise the number of free round trips they can take to their home districts in any two-year period from 36 to 52.

And that's for first class typing - not coach.

Congress also created a brand new expenditure for itself - \$5,000 a year for each member to print two newsletters. When you multiply by 435 Representatives and 100 Senators, the taxpayers' bill comes to \$2,675,000 a year for this political propaganda.

Don't forget, we're already using \$38.7 million each year under the free mailing system.

Let's take a close look at the overall figures. In 1966 it cost \$102,794,000 to keep Congress going; for the coming fiscal year it will be a monumental \$325,794,000 - an increase of over 200 percent!

With figures like these, is it any wonder the country is going broke?

The federal government is spending \$30,000 of your hard-earned tax money on a humorous film about toilets, and at least one member of Congress thinks the project should be flushed.

"This is another glaring and inexcusable example of wasting the taxpayers' money on foolishness," snorted U.S. Rep. Marjorie Holt (R.-Md.)

The project under fire is a \$30,000 grant by the tax-supported National Endowment for the Arts (NEA) to the South Central Broadcasting Co. of Hershey, Pa.

According to NEA records, the money is to be used to make a film "depicting urban planning development with mechanical systems as the determinant in the evolution of architectural forms."

South Central's Sam Hudson, who will produce the film, put it simpler when he said the film will be called, "The Natural History of The Water Closet." All of which means it'll be a film about the history of the toilet.

"The film is both tongue-in-cheek and serious at the same time," Hudson said. "It's a satire of standard architectural practices and standard engineering practices for the bathroom."

"It's intended for general audiences - first it'll make them laugh, then it'll get its point across."

What is the point? Hudson declined to say, adding, "I'd rather not say any more about it until it's out - which should be in about four months."

All of which prompted Congresswoman Holt to comment, "If this gentleman is so fascinated with bathroom design, he should use his own money to make a film about it - not the taxpayers'."

The way to a man's heart may be through his stomach, but the route is fraught with peril.

There are nearly 700,000 fatalities in this country every year from heart attacks, said Adele McGinty, Director for Weight Watchers in West Texas, who noted that "poor eating habits and excess pounds can contribute significantly to heart disease."

In connection with "Heart Month," now being celebrated by the American Heart Association to alert the public to how they can reduce the risk of heart attack, Mrs. McGinty, in citing Heart Association literature, observed that life expectancy can be shortened for those who are markedly over their normal weight.

The American Heart Association points out that:

1. Men in their middle years who are significantly overweight have about three times the risk of a fatal heart attack compared with those of normal weight.
2. Obesity also heightens the possibility of blood pressure or diabetes.
3. Since most people reach their normal adult weight between the ages of 21 and 25, fewer calories are needed after that to maintain normal weight.

Dr. William H. Sebrell, Medical Director of Weight Watchers International, has stated that, "Regrettably, people in their 30's and 40's tend to eat as much as they did when they were in their 20's.

This, coupled with a diminished physical activity, can mean that the body will store excess calories as fat."

"There are no short cuts to weight reduction," a fact that is being stressed by the American Heart Association.

"People should avoid so-called 'crash diets,'" said Dr. Sebrell, who added that "they invariably omit nutritious foods that are vital to good health."

"And even when extreme reducing diets are successful, they produce only temporary results. This is because the individual does not develop a pattern of eating designed to keep his or her weight at a normal level."

Dr. Sebrell cited an American Heart Association report that there still is no "ironclad proof" that reducing known risks of heart disease will prevent heart attacks.

"However, most scientific evidence points that way, and at the very least reducing the risks--and obesity is a major one--can contribute to general good health," Dr. Sebrell said.

Wrong Nickname
When William was getting ready for college he told the family, "I wish you all would stop calling me 'Big Bill.'"
"Why?" they asked.
"College names sometimes stick, and you know I am going to be a doctor."

Windfall!
"The bank just returned your check dear," groaned the young husband.
The bride beamed. "Isn't that swell? What'll we buy with it this time?"

Henry Kissinger, Secretary of State:
"It is a disgrace to believe and imply that the U.S. would conduct foreign policy on the basis of gifts received."

COUNTY BOARD ELECTION
An election to select a trustee from Precinct 2 and Precinct 3 for the County Board will be held on April 3rd. Application to secure a place on the ballot may be picked up at the County Judge's office.
Deadline for filing is March 3rd.

Rangeland Seeding Is Very Important

The restoration of food forage plants on depleted Kent County rangelands is essential to maintaining a continuously prosperous livestock industry in the county.

Kent County grasslands were once among the most productive in this part of the state. Early explorers and settlers repeatedly described the "unlimited" grazing resources of the county in glowing terms. But as early as the late 1890's, observant writers were reporting signs of brush and weed invasion and "range deterioration."

Unfortunately, this trend of range deterioration has continued unto this day on much of the County's grazing lands due to years of overuse and extended droughts. Vast increases in mesquite, post oak, undesirable weeds, and other kinds of brush have drastically reduced the already "thin" margin of profit to Kent County livestock operators to the point that many of the county's ranges are not paying their own way.

Forage produced on these grasslands or "brushlands" in many instances is so low that the grazing animals do well to even maintain themselves. Low livestock gains, high feed bills, and death losses mean only a loss to the rancher and to the prosperity of the county.

The remedy for these "sick" ranges may be different for each ranch or even each pasture. But one thing is very clear--something can be done and improvement can be made.

Much of the brush infested rangeland has enough grass remaining under the brush that with brush control, improvement is possible through conservation management and natural recovery. On many acres, recovery can be hastened with the application of seed. Much of it, however, will need seeding to make satisfactory improvement.

In the last several years, many successful grass plantings have been made in the Kent Duck Creek Conservation District. Unfortunately, some of these plantings have failed. Many factors contribute to failures, but foremost are lack of rains at the proper time and poor seedbed preparation. Weed competition, insect damage, use of poor quality seed or grasses not adapted, improper methods or equipment, and lack of grazing protection for the seedlings are some other prominent causes of failures.

Failures in grass seeding can be minimized if certain, well-established principles are observed. They are:

1. Use of good quality seed of adapted varieties.
2. Develop a weed-free, firm seedbed.
3. Plant the seed at the proper date and depth.
4. Control competitive plants.
5. Defer grazing until seedlings are well established.

Grass seeding is at best an expensive operation; it should be planned and applied with the best methods and equipment available and with the advice of qualified technicians.

Financial help in establishing your grasses may be obtained through the great plains conservation program and other local programs.

For advice and technical assistance in planning and applying your grass improvement program and other conservation needs, you are encouraged to contact your local Soil Conservation Service working through the Kent Duck Creek Conservation District.
