

The Abernathy Weekly Review

Volume 6

Abernathy, Texas, Thursday, September 22, 1927

Number 21

FIRST BALE IS GINNED FRIDAY

The first bale of cotton for Abernathy was brought in last Wednesday, September 14th, by A. G. Goldwater, and was ginned Friday night at the Stone gin.

The bale weighed 553 pounds and was bought by T. B. Stone for 23 1/4, a premium of .75c above market price being given.

Abernathy merchants and business men made up a splendid premium for Mr. Goldwater, the list totaling \$53.00 when The Review office was reached, with several more contributions to come.

Mr. Goldwater, who lives two and a half miles southeast of County Line, has 90 acres in cotton, which he figures will make from a third to half a bale to the acre. He was mighty proud of his cotton, and still more proud of the splendid reception he and his cotton met in Abernathy.

The seed from the bale sold for \$25.69, which brought the total received for the bale around \$210 dollars.

The first bale this year was received 12 days later than the first last year, and a week earlier than the first bale for 1925.

The first bale for 1926 was brought in on September 2nd by A. J. Green and sold for 20c.

The first bale for 1925 was brought in by Edleman on September 21st and sold for 25c.

Luncheon Club Hears of Possibilities of a Cheese Factory at Meet

Not so large a crowd as usual was present on Wednesday at the regular meeting of the Chamber of Commerce Luncheon club, which was held at the City Cafe.

A new project for the Chamber of Commerce to work on was sought, and some interest was evidenced in the securing of a cheese factory here. C. W. Beene, Herman Schulz and W. A. Richter told of what they knew about such projects, and from their reports it appeared that the securing of such a plant for Abernathy would prove of value to the whole community. It was stated by Mr. Schulz that where such factories were located in Wisconsin the dairymen received 14c more for their cream than they do here.

C. W. Beene and W. A. Richter promised to look into the matter and get all available information on the cost, operation and such like matters pertaining to cheese factories, in order that the matter might be more fully discussed at future meetings.

ACCIDENTS WILL HAPPEN—AND DO—IN ABERNATHY THE PAST SEVERAL DAYS

Quite a chapter of accidents happened in and around Abernathy the past several days, none of them very serious—except to those who had them.

On Tuesday, Will Jackson was pretty badly bruised and shaken up in an auto accident south of town. While driving to Lubbock he ran over a dog, which in some manner became entangled in his front wheels, and caused the car to turn over. After the injuries were treated, Jackson was able to be around town a little Wednesday afternoon.

Orie Hembree had the misfortune to have his arm broken in a binder on Tuesday. He is reported doing all right.

Jim Watts, while working at the Felmet Gin, on Monday sustained a severe gash on the head, when he was struck by a piece of falling pipe.

Lutheran Mission Festival

The Mission Festival of the Abernathy Lutheran church was a very enjoyable affair last Sunday, and a number of out-of-town visitors were present. Several cars of folks from Kress and Wilson were here, as well as a carful of people from Petersburg. Lunch was served on the church grounds for the visitors by the local members of the church.

H. L. Harral Building Modern and Up-To-Date Filling Station

A modern and up-to-date filling station is now under construction on the highway leading to the depot and opposite the Harral Motor Company building.

H. L. Harral is the owner of the new building, which is of hollow tile and stucco construction, and which promises to be a very attractive building when completed. Being situated on the corner lot, ample space is being left for driveways, and the new business should attract quite a good deal of tourist trade when it is completed.

It is not yet known who will operate the new station upon its completion.

NOTICE

I now have charge of the Vineyard Auto Workshop, and am ready to do your Blacksmithing, Automobile Repair Work, Generator and Starter Work, and Batter Charging. All work guaranteed and satisfaction assured.

Panhandle South Plain Fair Opens Next Week at Lubbock

"Come on Along" is the invitation that is being extended to everybody on the South Plains by the Panhandle South Plains Fair Association of Lubbock.

"Fun by the Ton" is promised for those who attend the Fair, which will be held on Tuesday, Wednesday, Thursday, Friday and Saturday of next week.

Booster caravans have visited almost every town on the South Plains, and all attendance records are expected to be broken at the fair this year. Splendid exhibits have been promised from all South Plains counties, Hale County being among the number. The livestock exhibits promise to be exceptionally good this year.

In addition to the splendid list of premiums on exhibits at the fair, five automobiles will be given away, one on each day of the fair. In addition to the prizes, there will be any number of free entertainments provided, included being a grand fireworks display every night.

Dr. B. A. Prestridge is the owner of a new Buick coupe.

First Real Norther of the Season Hits Here the Past Week-End

A cold north wind Sunday, and a still colder one on Monday, accompanied by a drizzling rain, was the present of the weather man for Abernathy citizens. On Monday the temperature was down to 52 degrees, and on Tuesday it hit the low level of 45. Overcoats and sweaters were brought out from their summer hiding places, and stoves and heaters were polished up and put in place.

According to the Plainview Herald, this cold spell came a week earlier than the first cold spell last year. In 1926 between September 25th and 29th, the temperature dropped to 34 degrees and six inches of rain fell. W. J. Klinger, Plainview weather man stated that the earliest cold spell on record came on August 31, 1915, when the temperature was 45 degrees. Tuesday and Wednesday were slightly warmer than the two preceding days, the sun breaking through the clouds late Wednesday afternoon and making things a good deal more pleasant. Thursday is still a little uncomfortable, but gives prospect of being more pleasant later in the day.

RUSSIAN RED SEED WHEAT IS IMPORTED BY JOE E. KELIEHOR; OTHER VARIETIES

A small quantity of imported Russian Red wheat has been bought from a Kansas farmer and seed man by Joe Keliehor, prominent South Plains wheat farmer of Hale County. The dealer has promised to ship Mr. Keliehor three and one-half bushels at \$10.00 per bushel. This is the variety of wheat imported several years ago by the United States Department of Agriculture that has proven such a popular, dark, hard winter wheat in this country. Various derivatives and hybrid grains have been used extensively here. Mr. Keliehor hopes to get from this start good Russian Red to plant on his extensive acreage if he finds the variety to his liking.

He has also received recently a quantity of Burbank wheat, which is reputed to be an exceedingly high yielding wheat. He has planted it on the triangular plot of ground on his farm east of Plainview which was cut off by the dump for the new Fort Worth & Denver South Plain Railway.

Get Certified Kanred

Enough seed to plant thirty acres has been shipped in by H. S. Hilburn from Ft. Hays Experiment Station, Fort Hays, Kans. It will be planted on the Hilburn farm northeast of Plainview by Wilburn and Grady Edleman, who have some 500 acres planted. This wheat is certified Kanred, a derivative of Turkey Red, which has been used extensively in this section, following its very successful use in Kansas, where it was developed. —Plainview Herald.

The condition of Grandpa Maupin, who has been seriously sick for the past few weeks, is still unchanged.

J. J. Riley was a Lubbock visitor Tuesday.

Gins Expect To Be Ready for Season's Run By End of the Week

Today and tomorrow should see the finishing touches put on all the gins in Abernathy, and by the first of next week they should be able to report "Ready."

Stone's gin turned out the first bale of the season last Friday, but is not yet fully in running order.

At Felmet's gin, everybody is busy getting ready to go, and the end of the week should see them lined up for the start.

The Farm Bureau Gin is also nearing the final stages of the extensive overhauling it has undergone, and they expect to ready just as soon as the others. This gin, which is being operated by members of the Farm Bureau, will be managed by J. T. Carlisle.

There is still a good deal of speculation as to how much of a cotton crop will be raised this year. Early planted cotton is doing fine, and all of it will be ready for picking in a few days. The later cotton is still "up in the air" so to speak, and whether or not a good crop from it is made depends almost entirely upon the time the first frost hits here.

Lakeview Girl Wins Prize in Funny Face Drawing Contest

Ethelyn Gragg of near Lakeview is the budding young artist or cartoonist who captured the \$5.00 prize in Pinson's Funny Face Contest which was held last week.

Contestants were required to complete a picture of a face in the funniest possible manner, and judging from the entries that were received, Abernathy youngsters are not lacking in ability to portray the funny. There were noses that made Mutt's and Major Hoople's classical by comparison; there were chins that rivaled Emmy Schmalz' for aggressiveness and sharpness, and chins that were as absent as Andy Gump's. There was hair that would have made the famous Shock-Headed Peter look like a sheik by comparison, and bald patches that were "all that the name implied."

However, there was only one prize, and Ethelyn Gragg got that. But everybody who entered seemed dead sure that their entry would win, for you couldn't stir the kiddies with a stick in Pinson's Pharmacy on Monday afternoon when the decision was announced. Just as soon as school was out, they all made a rush to Pinsons. After the decision was announced Ray Pinson rendered first aid to wounded disappointments by serving lemonade all around—so a good time was had by all.

In the pencil guessing contest, also staged by Pinsons Pharmacy, E. R. Turner, Jr., won the satchel. He guessed 233, and the actual number was 234.

MATCHES, CIGARETTES, AND CIGARS ARE BLAMED FOR THE HEAVY FIRE LOSS

Matches, cigars and cigarettes, due to the carelessness and thoughtlessness of their handlers, caused a fire loss in the United States last year of \$37,880,000 alone, a memorandum from the State Fire Insurance Commission at Austin discloses. Other causes of fire are enumerated in an effort to rouse the public to the necessity of reducing fire losses.

Fire Prevention Week will be held over Texas from October 9 to 15th. At that time speakers will discuss the enormity of fire losses, both in lives lost and property destroyed. The causes of preventable fires will be discussed at length.

The dollar loss from fires in Texas for the year 1926 was approximately \$20,000,000, the commission states. There were 231 lives lost in Texas during the same period from fires.

REMOVAL NOTICE

I have removed my equipment from the City Garage Stand to my home, where I will be able to render you the same satisfactory service in all kinds of Tinning, Plumbing and Welding work.

JOE M. RAMSEY.

There are close to a million raidos on the farms of America.

MACHINE COTTON PICKER IS NEARLY PERFECTED IS CLAIM WILL TEST IT OUT THIS YEAR

Chicago, Sept. 2.—The machine age has contrived an apparatus that promises to replace the picturesque plodding cotton picker of Dixie with machines that pick, strip and clean the bolls.

The International Harvester Company stated Friday that after many years of experimentation it has built three machines, a picker of a spindle type for use in the South; a stripper for use in the Southwest, and a cleaner for general use.

The company regards the picker as still being an experiment, but the stripper and cleaner already have proved their adaptability. A number of pickers have been placed in Dixie where their performance will be carefully noted. The problem in the old South is made more difficult because the entire crop can not be picked at one time and a machine must pluck the ripened bolls without disturbing green ones which may be adjacent. In the Southwest the cotton generally ripens evenly.

Two men can operate the machine, one guiding the tractor and the other controlling the picker, the International statement said. The machine can pick from two to five bales a day—equivalent to what two men could do in from eight to 15 days, it continued.

So far all the machines produced at the International plant have been hand-made. Quantity production is awaiting final results of observations this year.

City Jail Is Completed Has Distinction of Being Only Vacant House

With the completion of the new jail, Abernathy is now ready to extend her hospitality to all who happen to come here—undesirables as well as desirables.

The tile building around the cells has been completed, and the building presents quite an attractive and substantial appearance, from the outside. Inside, it looks still more substantial, but not quite so attractive.

Sunday School of Nazarene Church Holds First Meeting Here

The Sunday school of the Nazarene church was moved to Abernathy from Science Hill last Sunday, and at their initial meeting here, had a splendid attendance, there being 54 present.

The week after next the Nazarenes expect to move into their new church building, and Sunday school will then be held there. Last Sunday it was held at the tabernacle, as it will be next Sunday.

R. C. Patterson, superintendent of the Sunday school, was much pleased with the splendid start the Sunday school made here, and he is hoping for an even larger attendance in the future.

You can blame it all on Doctor McBride. Last Sunday the Doctor went to Pampa to visit his son-in-law, A. W. Funnell, who is sick, and either going or coming says he found the North Pole. We are quite willing that Doc should be presented with a medal as big as a manhole cover for his discovery, but what we want to know is why in the devil he had to bring part of his discovery back home with him.

E. C. Abernathy almost had a search party out after him when he was reported "missing" and "overdue" last Sunday and Monday. Mr. Abernathy made a little trip up in the north part of the state, and became mud-bound, or water-bound, or both, finally arriving in Abernathy on Monday evening.

Mr. and Mrs. Fred Riley, Arch Riley and King Riley of Huntington Beach, Calif., arrived in Abernathy Tuesday night for a visit to the old home.

John D. Rockefeller made his first dollar raising turkeys when he was a boy of seven.

Mahlon Loomis, a Washington, D. C., dentist, was granted a patent on wireless telegraphy before Marconi was born.

LAYING OF GAS PIPES IS STARTED

Laying of gas mains in Abernathy was started Monday by the West Texas Gas Company, and rapid progress is being made with the work. The ditch digging machine that is being used on the job literally walks away with it, digging a three-foot ditch at the rate of about a block in half an hour.

Work was started on the south part of town, and already that section has been net-worked with the pipes.

Judging by reports to date, almost every residence in Abernathy will be piped for gas, a large number of them already having been piped.

JEFFERIES OF ABERNATHY BUYS GIN AT O'DONNELL

L. P. Jefferies of Abernathy purchased the New Moore gin last week and has already begun extensive repairs on the plant which he hopes to have in first class shape within a short time.

Mr. Jefferies has moved his family to O'Donnell for future residence where they will have the benefit of a good affiliated school.—O'Donnell Index.

It will not be long now before gas is available. Better let me figure with you now for your gas fitting. JOE M. RAMSEY.

Breakdown of Engine Halts Work on Well; Double Crew Put On

The breaking of a connecting rod in the power plant of the rig has held up drilling operations on the Richter No. 1 for the past several days. Replacement for the broken part is expected to arrive today, and it is expected that drilling will be resumed shortly. The well is down to 560 feet. All casing and material necessary for the completion of the well is on the ground, and a double crew will be put on as soon as the necessary repairs are made.

The test is running about 20 feet higher than the old Bledso test, just 600 feet southeast of it, and indications have been good so far. The sand is due to be picked up at about 960 feet according to the log of the old well.

J. P. Nystel made a trip to Hale Center Wednesday and reports that things are being got ready on the Mulican tract for active drilling. Two of the rigs there were reported damaged last Monday by a storm, which temporarily suspended operations.

A co-operative test well is to be spudded in today or tomorrow on the northwest quarter of the northwest quarter of Section 65, Block A-3, Thompson Survey, to be known as the Kittrell & Allen's Gouley No. 1. It is stated that this well is being financed by a group of Plainview citizens who are anxious to have a thorough test made of the Kegans sand. Although it is expected that the shallow sand may produce commercially the hole is to be completed, so that the well may be drilled to a greater depth if so desired.

OBSERVANCE OF SABBATH PAYS SAYS SAN ANTONIO DAIRYMAN, BUSINESS GROWS

San Antonio.—Scruples against engaging in a gainful occupation on the Sabbath day have actually increased the profits of a dairy near here, asserts Paul Loven, its owner, who refuses to sell milk on Sunday.

Two years ago Loven decided that, while it was necessary to care for the milk on Sundays, it was wrong to sell it. Accordingly he gave the entire product of his dairy to orphans' homes the next Sunday and has adhered to that practice ever since.

The loss of one-seventh of his income hurt Loven's bank account rather badly at first. Since that time, however, he says, his cows have increased their production and the price of milk has risen slightly so that he is making more now in six days than he formerly did in seven.

Loven has 150 cows and every Sunday gives six local orphanages \$75 worth of milk, cream, cheese, butter and other dairy products.

Be ready to use the gas as soon as it is turned on. Let me pipe your house now. JOE M. RAMSEY.

THURSDAY, SEPTEMBER 22, 1927

The kind of girl for a young man to marry is the one who is always smiling and good natured as a candidate for office.

Some of these presidential booms are going to have to go the way of the Florida boom.

A strike of operators closed all of the Chicago movie theatres recently. But more excitement would probably be had if all the bootleggers should go on vacation.

Luxurious ocean liners travelling between New York and European ports have made a ten per cent reduction in rates. But they'll have to do better than that before they get much of our business.

SOME WELL KNOWN MISTAKES

When the doctor makes a mistake, he buries it.
When the garage man makes a mistake he adds it to your bill.
When a carpenter makes a mistake it's just what he expected.
When a lawyer makes a mistake it is just what he wanted, because he has a chance to try the case over.
When a judge makes a mistake it becomes the law of the land.
When a preacher makes a mistake nobody knows the difference.
But when an editor makes a mistake, good-night!—Contributed.

COMMUNITY SINGING IS ENJOYED DESPITE THE COLD SPELL—GOOD ATTENDANCE

The cold spell of Sunday failed to dampen the ardor of the singers of the community, and a quite good crowd enjoyed the afternoon at the tabernacle.

Several from the surrounding country were present for the singing, and with more favorable weather in the future, it is expected that these community singings will prove popular. The next singing is scheduled for Sunday, October 22.

If the house wives in the United States were paid for their home services at the rate of fifteen dollars a week, the payroll would amount to \$17,000,000,000 yearly.

PERSONAL MENTION

Mr. and Mrs. Louis Stambaugh and family visited in Ropes and Meadow Friday and Saturday.

Mr. and Mrs. W. H. Seale of Floydada are visiting here this week.

Mr. and Mrs. Jesse Seale left Monday for an extended trip to East Texas.

Lamar McKenzie and Urceel Moreland motored to Lubbock Monday.

Mr. and Mrs. Edwin Settle are visiting home folks this week.

George Daggett of Tulia spent Sunday with Dr. and Mrs. B. A. Prestidge.

R. R. Holland of Dallas is here on a visit to his brother, M. Z. Holland.

Mrs. B. A. Prestidge and Mrs. Urceel Moreland visited in Tulia Saturday.

Miss Irma Struve left Thursday for Austin, where she will teach the coming year.

Mesdames Chapman and Heggen were Lubbock visitors Monday.

Mrs. W. H. Ragland left Sunday for Amarillo, where she will visit her son, Hugh.

Henry Jones of Friona is visiting friends and relatives here this week.

Mr. and Mrs. Pete Buske left Monday for Brownwood, where they will visit for a couple of weeks.

Messrs. and Mesdames Leonard Harral, Bob McAlister, Troy Stambaugh and W. A. Richter attended the ball game between the Fort Worth Cats and the Ex-Cats at Lubbock Sunday.

Ray Pinson was a Lubbock visitor Tuesday morning.

Mrs. Stolley Honoree

Mrs. F. W. Struve entertained with a bridge party on Monday night in honor of her sister, Mrs. Stolley, who is here for a visit with her.

Those enjoying the evening were: The honoree, Mrs. Stolley; Messrs. and Mesdames Festus Clausen, E. B. Lindsey, H. E. Richter, George Ragland, Bob McAlister, Leonard Harral, W. A. Richter, Dutch Crow, and Mrs. J. O. Jones, Mrs. D. E. Carter, and Misses Lottie and Eleanor Struve; Edwin Hardesty and Barney McBride.

Mrs. Bucks Entertains With Bridge
Mrs. C. H. Bucks entertained with an afternoon of bridge Tuesday at her home north of town.

Numbered among the guests were: Mesdames Clarence Schulz, John Jones, D. E. Carter, F. Clausen, Walter Harp, Bob McAlister, E. B. Lindsey, Dutch Crow, Leonard Harral, Misses Estelle McAlister, Ruby Latimore.

Celebrate Birthday With Party

The home of Mr. and Mrs. Fred Singerob was the scene of a delightful party Monday night in honor of Mr. Singerob's birthday. Dancing and games were the order of the evening, and was followed by a delightful supper served to the following guests: Mr. and Mrs. Randall Heggen and family, Mr. and Mrs. A. G. Gilbert and family, Mr. and Mrs. Rieken and family, Mr. and Mrs. Dan Brandt and family, Mr. and Mrs. Charles Brandt, Mr. and Mrs. H. H. Selke, Mr. and Mrs. Richard Neis, Mr. and Mrs. Holland Neis, and Mr. and Mrs. Singerob.

LAKEVIEW LOCALS

Churches Organize Young People's Association

Mrs. C. C. Cecil is visiting in Oklahoma.

Henry Vineyard and family of Abernathy were visitors in the E. C. Wilson home Sunday.

Miss Estelle Fitzgerald, who is working at Lubbock, spent the week-end with homefolks.

L. Mays of Floydada was transacting business here Monday.

C. C. Cecil returned Friday from Colorado, where he has been working the last few months.

J. R. W. Brewer and daughter, and Mr. and Mrs. L. Brewer are visiting in Wellington.

Mrs. O. D. Morrow and daughters were shopping in Lubbock Saturday. Mr. and Mrs. Homer Elliott and baby of Canyon are visiting her parents, Mr. and Mrs. Jim Miller.

Lena Ragland of Plainview spent the week-end with homefolks. Jordan Cobb was a visitor in Plainview Saturday.

Mr. and Mrs. Joe Goldston visited friends at Lubbock Saturday evening.

There were not very many at Singing Sunday afternoon on account of the cold weather. Prayer meeting was conducted by Mr. Henry Brown.

The young folks of the two Sunday schools met Sunday evening and organized a Young People's Christian organization. Mrs. Charles Huff was chosen leader. They will meet each Sunday evening and have programs from the different organized groups. The older folks will continue the prayer meeting at the church at the same time.

All the young people are requested to be present Sunday evening for the first program. Young People, if you want training, come! Here's your place to get it. And if you are trained, come and give your best service.

Mrs. J. E. Fitzgerald and children were transacting business in Lubbock Saturday.

Robert Castleberry of Amarillo was transacting business in our community Tuesday.

Remember: Rev. G. O. Dean will preach Friday night. The singing on Sunday. Also, the lunch at the Methodist church Sunday noon.

IOWA AVENUE ITEMS

Everybody Busy With Harvest—Singing Enjoyed

Neil Braudt of Plainview spent Sunday in the Edd Hudgins home.

Zenda Kisar spent Saturday night and Sunday with Mrs. E. H. Davis.

Mr. and Mrs. Edd Hudgins visited Mr. and Mrs. Bill Davis Sunday.

Mr. and Mrs. B. F. Moring and children were Abernathy visitors Sunday.

Misses Garrett and Miller visited Mr. and Mrs. Bill Davis Sunday afternoon.

Tracy Moring spent Saturday night with Chalmers Brashear. Everybody in this community are busy harvesting their crops.

Mrs. E. E. Saunders and children are visiting relatives in East Texas.

The singing given Sunday night by Mr. and Mrs. Ben Kisar was well attended and everybody reported a real nice time.

Mr. Berthol Trent was in Lubbock last Thursday.

Eldred Kisar spent Saturday night with E. E. Saunders.

Sunday school was well attended Sunday morning.

Wheeler Davis of Abilene has been visiting his brothers, Ernest and Bill of this place for the past week.

May Humphries is visiting his sister, Mrs. Bill Davis.

Mrs. H. E. Dewey and little daughter, Flo, are visiting in Iowa at present.

Lee Thomason is working about six miles west of Iowa Avenue. But Lee refuses to tell where he is working and what at.

Annie Kate Moring returned home Sunday from Abernathy where she has been for the past week. She has been working as operator at the telephone exchange.

NEGRO SENTENCED TO 99 YEARS WEDNESDAY FOR HALE CENTER MURDER

Fred Davis, negro, was found guilty in district court Wednesday of murder, and sentenced by a Hale County jury to 99 years in the state penitentiary.

Davis was charged with killing another negro in a fight following a gambling game near Hale Center last April. He was defended by L. D. Griffin and W. W. Kirk. Meade Griffin, district attorney, prosecuted.

The jury was: Isaac Holmes, J. P. McGarr, F. S. Schearer, L. J. Halbert, R. L. Mosley, H. A. Hegi, S. W. Wadill, I. N. Belcher, Charles Brewer, W. F. Durrett and T. J. Cook. They were out about two hours before returning the verdict.—Plainview Herald.

Renew for The Review.

PERFUMED FERTILIZER IS FOUND FOR FASTIDIOUS

Washington, D. C., Sept. 19.—A perfumed fertilizer has been found for a meticulous farmer. It is made from by-products of manufactured cocoa and chocolate and has the aroma of both elements.

Ordinarily the potency of fertilizer is judged by the desire it creates for a gas mask, but the Bureau of Soils has discovered the sweetly odiferous content to possess a suitable plant food.

Mr. and Mrs. Jack Nettles of Meadow spent Sunday with Mr. and Mrs. John Crow.

Mrs. Troy Stambaugh was a Lubbock visitor Saturday.

Leon Young and family and Mrs. M. M. Young spent Friday and Saturday in Girard.

Miss Pauline Harp left Thursday for Denton, where she will enter C. I. A.

Mr. and Mrs. J. M. Thomas of Plainview were in town Saturday.

George Ragland and R. F. Littleton were business visitors in Lubbock Monday.

Mr. and Mrs. Dutch Crow and family spent Sunday in Petersburg.

G. G. Gilliland and Lee Crow were Lubbock visitors Monday.

BARTONSITE HAPPENINGS

**Big Rain Had Monday—Get Church
House Ready for Services**

Everybody is wearing their coat
this morning (Tuesday). We got a
big rain Monday afternoon which
stopped the wheat drills. The wheat
that is already drilled is up and look-
ing fine. The farmers in these parts
are expecting a big wheat crop next
year.

Mr. Barton was in Abernathy Mon-
day morning.

Mr. Carl Rhodes and family have
been attending the meeting at Aber-
nathy this week.

Miss Louise Chaney is on the sick
list this week. She hurt her back last
week and is suffering very much. It
seems as though she gets worse in-
stead of getting better. We hope she
will soon recover.

Mr. and Mrs. Arthur Chaney and
family were guests in the R. A. Chan-
ey home Sunday.

Walter Baughman of Eagle Springs
was visiting relatives at this place
Thursday.

Mrs. Henry Carr and children were
in Abernathy one day this week.

Frank Simalton, who has been on
the sick list for the past few days,
is doing fine again.

Mr. Roach of Lubbock called in the
Chaney home Tuesday.

Arthur Chaney and Walter Baugh-
man were in Abernathy Thursday
calling on friends at that place.

Joe Rhodes is visiting his brother,
Carl Rhodes, this week.

Miss Beth Pool is teaching at An-
chor this term.

Mrs. W. D. Ball is spending this
week with her daughter Rose, and her
husband, who have been seriously ill.

They now have the Baptist church
settled on its foundation. There were
several workers cleaning out the
house, cleaning up the yard, building
a fence, making a coal bin and getting
things arranged for use next Sunday.

The Anchor folks are proud of the
building we (Bartonsite) people gave
them.

We did not get our crops laid by—
it just raised 'em by. We got a big
rain Monday, with a heavy wind.

Wish we could divide with others who
need it but who are not getting any
rain.

There are several around here re-
porting boll worms in their cotton.

Maize heading and wheat sowing
is the order of the day here now, but
the rains make it slow work.

There were several from our com-
munity who drove over to the oil
wells Sunday to see if they could
learn anything new. They report
them busy drilling.

Most of the people from here were
shopping in Abernathy Sunday.

Mr. and Mrs. A. R. Kookon were
visiting in the J. C. Baughman home
Wednesday afternoon.

Well, we had quite a little cold
spell Sunday. Looked real funny to
see folks wearing their overcoats.

SENIOR NEWS

On Monday afternoon, September
19th, the Senior class assembled to-
gether to elect class officers. Mr.
Johnson called the house to order,
and announced that the house was
in order to receive nominations for
the class president. Robert Harral
was elected president. Immediately
after his election, Mr. Harral took
charge of the class. The other of-
ficers elected were: Vice-president,
Ima Mae Stambaugh; Secretary, Ger-
trude Pool, Treasurer, Douglas Ad-
kinson. Social committee: Adel Al-
sop, Charlie Johnson, Vance Carlise,
and class editor, Berniece Oliver.

Those present at the meeting
were: Ima Mae Stambaugh, Irene
Craig, Lois Cooper, Faye Cleveland,
Adel Alsop, Gertrude Poole, Vance
Carlise, Hazel Emery, Lizzie Buske,
Berniece Oliver, and Robert Harral,
Charlie Johnson, Jerry Morehead,
Douglas Adkinson, Raymond Clark,
and John C. Clark.

JOE M. RAMSEY
TINNING AND PLUMBING

WHY

**Famous Soldiers Made
Themselves Conspicuous**

It is told of Gen. Cornelius Francis
Clery, who died in London recently,
that he continued to wear the scarlet
tunic in action, after khaki came in,
because he liked to be conspicuous on
the firing line. So he got the reputa-
tion of "a military dandy of the old
school." At El Teb and Tamal in the
Egyptian campaign the British was
a khaki-clad army. But Clery, who
was galloping about to hold his lines,
wore the scarlet.

Writing about the battle, General
Graham said that wherever he saw
that red coat he knew all was going
well. General Clery seemed to have
a charmed life, and he lived to be
eighty-eight.

The British general was probably no
more of a military dandy than Gen.
George A. Custer in fiercely fought
battles of the Civil war. Custer al-
ways sought the post of danger, and
his uniform was about as brilliant as
the plumage of a Baltimore oriole. He
explained why he went in for bright
colors, wore a big hat and let his hair
grow long. He was only twenty-three
when he won the brevet of brigadier
general by gallantry in action. Prom-
oted over the heads of veteran offi-
cers, he felt that he must not only
lead his men but be conspicuously
dressed that they would always know
him on the field and have no excuse
for not following him into the ranks
of the enemy. So he dressed gayly for
the part and was willing to be called
a dandy. He chiefly affected a scarlet
scarf, or bandanna, which he draped
about his uniform coat.—New York
Times.

Why Locomotives Are

Credited With Ailments

Ailments of locomotives are referred
to by engineers and firemen in the
terms of ills of the human body. When
the steam valves, which are called the
lungs of the locomotive, through which
"she" breathes, are not set even and
true, she is said to be "coughing," says
Neason Jones, in "Tom Kennan, Lo-
comotive Engineer." If the injector,
through which the water is forced
from the tank to the boiler, becomes
stopped up, it is said to have "heart
failure." If a side rod, attached to the
driving wheels, becomes disconnected,
it is said to be "lame." A cylinder
head is blown out and the locomotive
is a cripple. The boiler foams and
it is "bilious," and when the flues leak
so badly as to extinguish the fire, the
locomotive is said to be "dead." All
these ailments are remedied by taking
the locomotive to the "hospital," as
the repair shop is called.

Why Palms Need Drainage

A perfect drainage of both air and
water is of the greatest importance
to the successful culture of palms. In
order to insure this place at least an
inch of broken pots, bits of charcoal
or even small stones at the bottom of
the pot or tub. Cover this drainage
material with sod fiber, cocoa fiber or
decayed leaf mold, just enough to
prevent the soil from sifting through into
the rough material, and this will al-
ways insure proper drainage. The
best soil for the palm consists of two
parts garden loam, one part clay, one-
half part sharp sand and one-half part
powdered sheep manure. The palm
can stand various degrees of tempera-
ture, but it always suffers greatly
when the temperature is below 45 de-
grees. It thrives best in 75 degrees
during the day and 60 degrees at
night. To control scale and fungous
growth wash the palm with a sponge
with a solution of fish or whale-oil
soap in a common bucket, adding three
tablespoonfuls of commercial lime-
sulphur. Allow the plant to stand for
a day and then bathe with clear water.

Why Wood "Petrifies"

The name "petrified wood" conveys
the idea of wood turned into stone, for
such is the apparent condition. As ex-
plained by scientists, there frequently
has occurred in the case of a piece of
wood buried in the past and subjected
to certain conditions gradual disap-
pearance of the particles thereof, ac-
companied by a corresponding replace-
ment with a deposit of dissolved silica.
As a result the place originally occu-
pied by the piece of wood has come
to be occupied by a stone formation,
corresponding in size and shape with
the said piece as it formerly existed
and frequently corresponding in tex-
ture or grain and more or less in gen-
eral appearance with such piece.

Why Sauerkraut "Spoils"

Spoilage of the top layers of vege-
tables fermented in brine is sure to
occur unless the scum which forms
on the surface is frequently removed.
This scum is made up of wild yeasts,
molds and bacteria, which, if allowed
to remain, attack and break down the
vegetables beneath. They may also
weaken the acidity of the brine, in
which way they may cause spoilage.
The fact that the top layers have
spilled does not, however, mean that
all in the container are spoiled.

Why Plants Seek Light

Why plants in window boxes turn
toward the light is due to the irregu-
lar development of the growing tis-
sues of the plants in the absence of
uniform lighting. The plants should
be turned often to keep them straight.

How Apples "Breathe"

Growing apples "breathe," taking in
oxygen and breathing out carbon
dioxide. The rate of this breathing
is to be measured at Cambridge this
year.

Mrs. Welcome Ragland returned
Monday from Paris, Kentucky, where
she had been called by the serious
illness of her mother, who died short-
ly after Mrs. Ragland's arrival.

Mrs. W. J. Hamilton and little
daughter, Bennie Lois, of Texline is
visiting her mother, Mrs. B. A.
Prestridge this week.

Mrs. Chas. Felmet returned Thurs-
day from Wainsville, North Carolina.
She was accompanied by her sister,
Mrs. Corzine, who will visit with her
for awhile.

Mr. and Mrs. P. E. Ware of Sweet-
water spent the week end in the
home of Roland Smith.

EAGLE SPRINGS ECHOES

Storm Does Some Damage—Sunday School Class Entertained

Mr. J. C. Baughman was very sick last week. The doctor made three calls on him and he was confined to his bed a few days, but is able to be up at this writing.

Mr. C. W. Nolen and family had business in Lubbock Monday.

Miss Ruby Ladd accompanied Mr. Leon Rice and Mr. and Mrs. Bill Hampton to Abernathy Sunday, where they visited Mr. and Mrs. Lawrence Rice.

Mr. Jerry Moorhead is attending school in Abernathy.

The little storm we had last Monday week blew several light buildings over and damaged several windmills.

Mrs. S. E. Muggleton and daughter, Miriam, called on Mrs. H. E. Ladd and Mrs. Jack Barton Monday.

Miss Lillian Ladd and Mr. Carl Williams attended the show in Abernathy Saturday night.

Mr. and Mrs. A. R. Kookin visited J. C. Baughman Wednesday evening.

Mrs. Bishop Lamb had her Sunday school class for supper Sunday night.

C. A. Rice and Rube Hudson called on J. C. Baughman Sunday afternoon. The young folks Sunday school class had their regular business meeting at Mr. Marvin Evans' Friday night.

Mrs. Clarence Moorhead has been sick for the last few days.

Mr. and Mrs. S. E. Muggleton and daughter, Miriam, visited Mr. and Mrs. J. W. Daniels Wednesday of last week.

H. E. Ladd was a business visitor in County Line Monday.

Mr. and Mrs. Marion Jones and children of Lubbock visited C. W. Nolen and family from Saturday till Monday.

Mr. and Mrs. Arthur Chaney and children, and George, Sam and Minnie Chaney, visited J. C. Baughman and family Sunday afternoon.

Mrs. Dick Spodgrass visited Mrs. C. W. Nolen last Tuesday.

The gas lines are going in now—let me give you an estimate on piping your house. JOE M. RAMSEY.

Robert Louis Stevenson once worked as a reporter in Monterey, Calif., for two dollars a week.

The estimated value of religious property in America is \$1,760,217,061. The Delaware, at the point where Washington made his historic crossing, is one thousand feet wide.

Former Senator Harrel of Oklahoma invested twelve dollars in an oil lease and sold it for \$80,000.

In England a woman cannot vote until she is thirty.

The early Egyptians were great raisers of chickens producing more than 100,000,000 annually.

POULTRY ASSOCIATION FORMED AT PLAINVIEW—HOPE TO INCLUDE 16 COUNTIES OF PLAINS

With the counties of Hale, Floyd, Swisher and Motley around which to build, plans are rapidly being effected for a poultry organization which it is eventually hoped will take in 16 counties and have 160,000 laying hens.

At a meeting held in Plainview Saturday a week ago, there were about 100 enthusiastic, interested poultrymen and women from Hale, Motley, Swisher and Floyd counties who realize fully what the industry can do to this section of the country if properly organized and standardized and has marketing facilities. The meeting was held under the auspices of the Hale County Farm Bureau, and in its extension will be sponsored by the Farm Bureaus of the various counties that are to be included.

M. S. Hudson, vice-president of the Farm Bureau and state director, presided at this meeting. He introduced Mrs. Hudson, who has recently returned from a tour of inspection of poultry associations and egg circles on the Pacific coast. Mrs. Hudson spoke in detail of the splendid organization and co-operation which, she declared, are the main factors in making the industry the success it is in those states.

J. T. Hatch, superintendent of the poultry department of the Hale County fair, made a brief comparison of the cost of production in Hale County and in California. He also made a plea for better bred flocks and market facilities.

The county agent of Motley County, M. P. Leaming, discussed standardization of eggs according to the U. S. requirements. He stated that until certain standards are met we cannot hope for the highest market for our eggs.

Quality and production were emphasized in a talk by E. B. Miller, who said that these two points would naturally be the main factors to consider in such an organization.

During a general discussion, Mrs. R. B. C. Howell, Jr., told of her experience with eggs on the El Paso market. At the time Hale County was receiving 15c a dozen, her eggs were bringing as high as 30c in El Paso where she was then living. This is only one incident of many, and only goes to prove that eggs, properly standardized and with a marketing organization behind them, can bring prices that will pay the farmer for their production.—Plainview News.

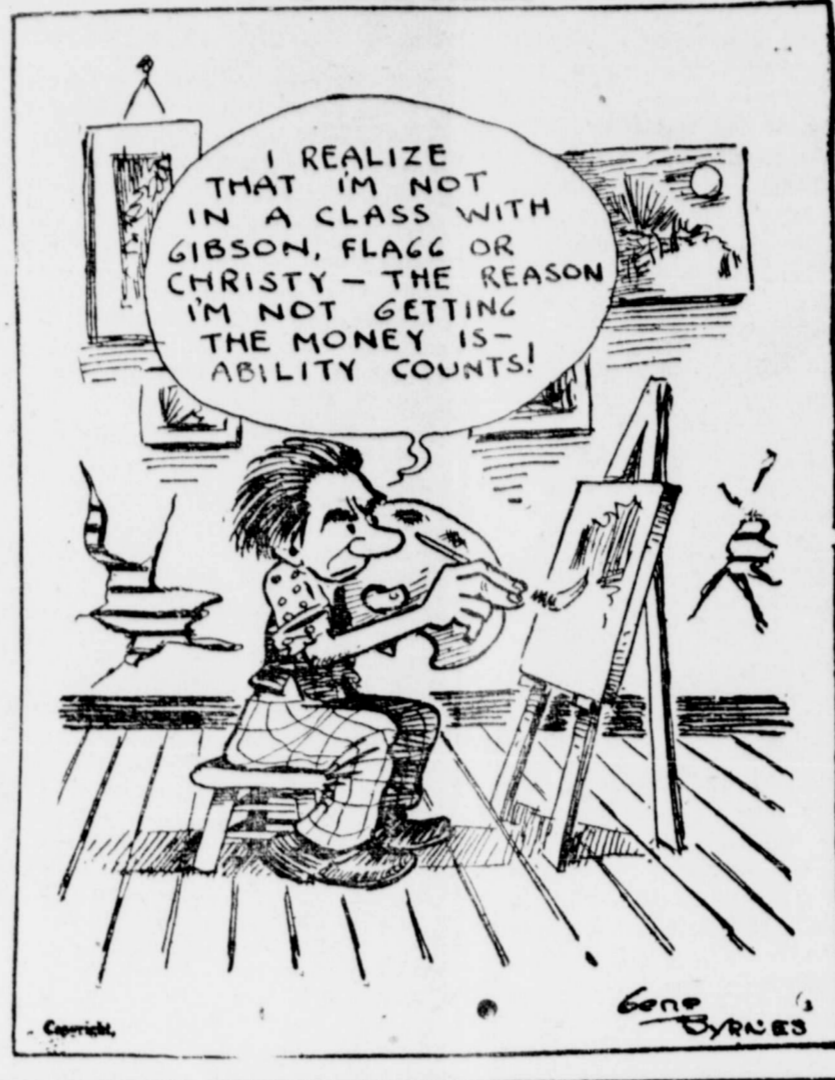

According to the last census there were 4,931,905 people in this country over ten years of age who could neither read nor write.

When a woman goes visiting nothing hurts her so much as her inability to impress upon her hostess the idea that she is used to something better at home.

In England there are 701.3 persons to the square mile; in the U. S. 35.5.

THINGS THAT NEVER HAPPEN

By GENE BYRNES

TWO-THIRDS COST OF GRADING AND CONSTRUCTION TO BE PAID BY STATE, HIWAY NO. 9

Allotment of two-thirds state and federal aid for the construction of grading and drainage structures on Highway No. 9 between Lubbock and Swisher County lines in Hale County has been made by the Texas Highway commission, according to a telegram from R. A. Thompson, state highway engineer. This allotment covers 37 miles, estimated to cost approximately \$3,000 per mile.

Allotment of \$81,000 state aid and \$13,500 federal aid to match county funds for one-third the total cost for grading and constructing grading structures on the north and south highway is reported in the morning newspapers, which is substantially in keeping with the direct report from the state highway engineer. However, the early newspaper reports were to the effect that this allotment had been made for Highway No. 28, 27 miles from Lubbock to Swisher County lines. This report is in error, no allotment having been made on Highway No. 28, which extends from Floyd County Line to Lamb County Line through Hale County.

The permanent location of Highway No. 9 from Lubbock County line to Swisher County line, through Hale County, has not been determined, Mr. Thompson advised the Herald this morning.

Judge George L. Mayfield and the county commissioners have been in Austin this week in conference with the State Highway commission relative to the paving of Hale County highways.—Plainview Herald.

JUTE CUTS OUT 750,000 BALES

WASHINGTON, Sept. 3.—A survey completed by the Bureau of Agriculture economics of the Department of Agriculture reveals that cotton consumption would be increased 750,000 bales through the use of cotton to replace bags made of other materials for the wholesale grocery trade. The survey was made in connection with the study to find new uses for cotton. Last winter when the cotton farmer was suffering as the result of the over production of cotton, wholesale grocers throughout the Middle West and the South urged that the government replace its jute containers with those made of cotton. Grocers in the Southern States asked the Government to aid in having cotton substituted generally for jute which is a product of India and imported in large quantities here. Some effort is being made to have cotton bagging substituted for jute in covering of cotton bales.

It is roughly estimated that 225,000 bales of raw cotton and cotton waste go annually into the manufacture of cotton bags, most of which are used in the grocery trade. The estimated quantity of bags made of materials other than cotton used in one year by wholesale grocers, which the wholesale grocers must be replaced by cotton, totals nearly 329,000,000 lbs. Pound for pound, this is equivalent to approximately 787,000 bales of raw cotton.

The estimates are based on questionnaires sent by the American Wholesale Grocers' Association to its members.

A \$10,000 bill is the largest paper money issued by the United States.

There are almost four and a half billion members of the Masonic order in the world.

HOME BREWER GETS HIS WIRES CROSSED—JOINS HIS FRIEND IN HOSPITAL

Chicago, Sept. 20th.—Timothy Kopper has always coveted one of those automatic ice boxes. It appeared to him that such a refrigerator would keep his home brew at a nice, even temperature and it would not explode so violently. But Kopper lacked the ready cash to buy one, so he conceived the idea of stealing one. He talked the problem over with his wife and told her how easy it would be to steal the box.

"I need a new hat," she complained, "and if you had any sense you would be out stealing a few tons of coal, with winter almost upon us."

Still obsessed with the idea of securing an iceless ice box, Kopper paid a friendly visit to his friend, Fred Ramsey, who was in the county hospital after running second in an argument with a policeman. On the way out Kopper saw just the box he desired, albeit this one was a trifle large. However, he slipped some broken matches into the lock on a side door, so he could be assured of easy entrance.

Later in the night he came back, this time with a stolen truck and with the help of some casual loafers, carried out the box and got home with it. There were some sundry pushbuttons and switches on the stolen box, but Kopper filled it with home brew and turned on some of the switches. Presently there was an explosion and Mr. and Mrs. Kopper and what was left of the box were blown out through the kitchen door.

Came presently the ambulance to gather up the debris and police to quarrel with Kopper. One of them picked up a slab from the exploded box and the whole situation became clear. Kopper had stolen an incubator and when he turned on the switch the heat agitated his stock of home brew to the point of explosion.—Fort Worth Star-Telegram.
