MODERNIZE YOUR TRUCKING EQUIPMENT NOW AT **today's low prices**

CHEVROLET TRUCKS LEAD IN SALES..
because they lead in economy, dependability and value!
TRUCK OWNERS WANT FACTS...CHEVROLET GIVES Certified Proof
On the longest test run ever conducted under the supervision of the A.A.A. a stock Chevrolet 1 1/2 ton truck turned in a marvelous performance record. These facts are clearly outlined in a booklet entitled "Says Who?" You may obtain it from your Chevrolet dealer or by writing to Chevrolet Motor Division, General Motors Sales Corp., General Motors Building, Detroit, Mich.
Chevrolet trucks lead in sales because they have the most desirable balance of power, economy and durability—power to do the job well, economy to do the job at low cost, and durability to stay on the job. That all adds up to value—exceptional value that has kept Chevrolet trucks out in front in sales—leading again in 1940, as they have led year after year. Consider modernizing some of your trucking equipment now—all models and types of Chevrolet trucks are still available at today's low price level.

**Part of every Texas oil dollar
finds its way
into your pocket**

EVERY merchant in our State—every business and professional man—every worker, shares in Texas oil's huge expenditures.

Many Texas cities with all their varied businesses and employment exist and prosper today because of oil.

Last year petroleum created a direct buying power in our state of 550 million dollars.

Of this, Texas retail merchants received 324 million dollars, landlords 44 million, utilities 38 million and professional men 22 million, while 83 million more went for insurance and savings.

This huge sum is distributed and redistributed in an endless chain of income for our State and its people.

Texas oil payrolls are over 60 per cent of all the wages paid to all Texas workers. Directly or indirectly, you get a part of your income from oil.

If you're a Texan, you're in the oil business.

Much Damage Is Done To Batteries In Taking Them Out Of Cars To Charge Them. We Have A New Machine That Charges Batteries Without Disconnecting Cables or removing it from the car. It takes from 20 to 55 minutes to charge a battery with this new machine. There's no use to drive a car with an under-charged battery when it is so simple and economical to have it charged this new and more effective way.
