Lubbock Fair Opens Monday

Lubbock, Tex., Sept. 26.—A free grandstand program every afternoon during the six-day exposition will be somewhat a novelty for the Panhandle-South Plains Fair, Sept. 30-Oct. 5. It has been a number of years since such a program has been presented and Fair officials believe the show this year will please thousands of persons. Five big-time circus and vaudeville acts will be presented each afternoon. Tight rope walking, slack wire walking, juggling, whip cracking, roping, horizontal bar performing and roller skating are among the headline numbers. In addition to the circus and vaudeville acts, there will be special maneuvers each afternoon by members of Uncle Sam's Army from Fort Sam Houston. Special demonstrations showing how they go into action and how various pieces of equipment are used, will be given each afternoon before the grandstand. A 56-piece military band from the famous 2nd regiment of Fort Sam Houston will furnish music. A model army camp is to be set up on the fairgrounds for inspection by fair visitors.

Special advance general admission tickets to the 27th annual Panhandle-South Plains Fair went on sale Friday. The strip of four regular front gate admission tickets, valued at 50c each, are being sold for \$1.

Mail orders will be accepted until Saturday. After that, regular admission price will prevail. Advance tickets are on sale at various business houses in Lubbock.

Successor Named

Membership of the local Church of the Nazarene named a successor to the Rev. D. Herbert Land, above, pastor of the church for three years. He is to be followed by the Rev. Melton Thomas of Elk City, Okla., who has been in the evangelistic service for several years. The Rev. Mr. Land several weeks ago resigned his place here effective at the close of the assembly year which is effective Oct. 31. He is considering several calls to pastorate in various sections of the country, however, he stated that he may enter evangelistic work. The annual district assembly is to be in Lubbock during the last week in October.

Thought For The Week:

There is hardly anyone but will admit that the world should live more righteously and justly, but too many expect someone else to do all the righteousness and justice. It seems high time we all take a hand in making a better world, and try to do a little thinking as to what we all should do instead of just what someone else should do.

NOTICE

The County Line Amateur programs are to be resumed with the first in the fall series being set for Friday night, Oct. 4.

Santa Fe

The Santa Fe's 80th Birthday

The Santa Fe was born September 17, 1860, in a tiny, one-story brick building in Atchison, Kansas. There thirteen men met to form "The Atchison and Topeka Railroad Company," with Cyrus K. Holliday, founder of Topeka, Kansas, as its first President.

Beginnings
 Cyrus Holliday visioned a great railroad that would supplant the slow and dangerous traffic over the old Santa Fe Trail—a railroad reaching deep into the prairies, piercing the mountains, ever serving and growing with the Southwest.
 Those were stern, hard times on the raw frontier. The drought of 1860, the Civil War and the post-war chaos, prevented construction until November, 1868, when ground was broken at Topeka. On June 28, 1869, the first Santa Fe train was operated from Topeka to Carbondale. The line was extended to Emporia in August of 1870.

Westward
 Settlement quickened along the new right-of-way, as Santa Fe's land and immigration department pushed surveys west of Emporia. The rails reached Newton in July, 1871, and Hutchinson, Great Bend, Larned, Dodge City and the Colorado line in 1872.

San Diego, Galveston, Chicago
 After 1876, many branch lines were constructed in Kansas. Settlers poured in. The main line was projected across New Mexico, Arizona and California. Colonization continued westward into those states and into Texas and Oklahoma. Santa Fe, New Mexico, was reached in 1880; San Diego, California, in 1885; Galveston, Texas, in 1886, and Chicago in 1887. Thousands of tourists followed the early settlers. The Santa Fe became the outlet for the innumerable products of a vast Southwestern area.

Today
 Today, with 41,000 employees and 13,414 miles of track, the Santa Fe directly serves Illinois, Iowa, Missouri, Kansas, Oklahoma, Texas, New Mexico, Colorado, Arizona and California.

The Santa Fe and the Southwest
 Down through the years the Santa Fe has endeavored to develop Cyrus Holliday's dream—a great pioneer's dream of that swift, sure transportation without which no frontier, no matter how rich, can hope to fulfill its destiny. In that effort we have marched shoulder to shoulder with the people of the Southwest, in good times and bad, in friendship and understanding.

On our 80th birthday, we of the Santa Fe pledge a continuation of the service ideals of its founders.

SPEAKING OF GOOD GINS
We have frequently heard, and from quite a few Ginners, that we had the best gin on the Plains. We know we do have a good gin, and believe we can make as good a sample and turnout as can be had anywhere. Our heater and dryer is great help on green and damp cotton.

Loan Cotton
—Every bale of cotton placed in the 1940-41 Government Loan must be classed by a Board of Cotton Examiners of which there is only about nine such offices in Texas. Lubbock being nearest us, from which we can give you from 24 to 48 hour service with a final full settlement. Advances made at time of ginning if needed, and your cotton stored and insured in a Government approved & Bonded Warehouse right here at home.
We solicit your business on the above basis of SERVICE.

QUESTIONS and ANSWERS
About The —
Fluid Drive
—On The—
1941 Dodge
Q.—Must I learn a new method of driving with Dodge Fluid Drive?
A.—Nothing new to learn. Merely less to do. You'll enjoy driving as never before.
Q.—Does Dodge Fluid Drive do away with the clutch?
A.—No. A clutch pedal is provided to permit you to select the gear you wish to drive in. This gives you complete control of your car at all times.
Q.—Must I use clutch pedal in Normal Driving?
A.—No. After the original shift to high gear you can start, stop and start again in high without shifting or touching clutch.
Q.—How does Dodge Fluid Drive improve my riding comfort?
A.—Engine power flows smoothly providing smooth acceleration at all speeds. No jarring or jerking mars effortless, trouble-free driving.
Q.—What will Dodge Fluid Drive do for me in heavy traffic?
A.—You can travel through traffic in high gear at speeds as low as one mile an hour without shifting gears. Motor will not stall.
Q.—What happens at intersection when car must stop for cross traffic?
A.—Apply brake, but no need to shift unless you wish. You can stay in high gear as you start again. For fast "get-aways," start in second.
Q.—How does Dodge Fluid Drive increase safety on slippery streets?
A.—Because Fluid Drive can operate in high gear in low speeds, the maximum traction is available on slippery surfaces. Wheel spinning, which causes most skids, is virtually eliminated.
Q.—What advantage is Dodge Fluid Drive in deep mud, sand, snow or gravel?
A.—Maximum traction without wheel spinning prevents digging ruts to bog car down. Fluid Drive cars have pulled heavy trucks from mud and snow without difficulty.
Q.—How about Dodge Fluid Drive on hills?
A.—You can climb steep hills in high gear if you wish or descend in high with engine acting as a brake.
Q.—Does summer heat or sub-zero cold affect the efficiency of the Dodge Fluid Drive?
A.—No! The Dodge Fluid Drive unit will function satisfactorily at both extremes of temperature.
Q.—How does the Dodge Fluid Drive operate in reverse gear?
A.—No differently than in forward gear. Fluid Drive always turns forward. Reverse is obtained in transmission behind the Fluid Drive.
Q.—Does Dodge Fluid Drive need frequent service?
A.—With only two moving parts, thoroughly sealed, no servicing is ordinarily required throughout the life of the car.
Q.—How often do you have to change oil in the Dodge Fluid Drive unit?
A.—Never. Periodic inspection of oil level should be made to guard against possible loss through seepage a rare occurrence.
Q.—Can you describe the pleasure and convenience of Dodge Fluid Drive?
A.—Words can't describe it . . . You've got to see and drive it!

Announcing the big
NEW FORD 1941 FORD

In some years, some cars take a big jump ahead. *The Ford does that for 1941.*

It has jumped ahead in size. It's the *biggest Ford* we've ever built, *inside and out.* It's *wider.* It has a *longer wheelbase.* Its seating room is *wider* by as much as 7 inches. It has *new wide doors and semi-concealed running boards.*

You'll notice also a new beauty, achieved by a skilful blending of mass with *longer flowing lines.* *Larger windshield and windows* give better vision all around.

One of its biggest advantages is the *new soft ride.*

New, slower-action springs give a slow, gentle, gliding movement. A *newly designed stabilizer* helps absorb road shocks, and maintains balance on sharp curves and in cross winds.

More rapid acceleration to match its familiar speed and power makes this new Ford an even livelier car to drive.

These are only a few of this new car's outstanding features. It represents all the rich experience gained in building more than 28 million motor cars.

Any Ford dealer can give you many good reasons for making this your 1941 car.

Get the Facts and You'll Get a Ford!
