HAM PREPARATION FOR THANKSGIVING

Planning ham for Thanksgiving dinner? It's a wise choice since pork is plentiful this November.

Another good reason for selecting ham is its ease of preparation. The secret of tender, succulent ham dinners is dry heat roasting in a moderate 300-degree F. oven. No liquid, and no cover is needed -- just slow cooking. Place the ham, fat side up, on a rack in an open roasting pan.

Insert a meat thermometer into the center of the ham, if you wish. Just be sure that it does not rest on bone or fat. Allow about 18 to 20 minutes per pound to cook

OVERSEAS MAIL TO SERVICEMEN

Postmaster Herman Lambert of Abernathy today announced that henceforth all first class mail, personal sound recordings (voice letters), and parcels weighing 5 pounds or less and measuring not more than 60 inches in length and girth combined, will be airlifted on a space available basis between the United States and all military post offices overseas.

Also, under Public Law 89-725--The Dulski Military Mail Act--which was signed by President Johnson on November 2, 1966, second class publications such as newspapers and magazines published weekly or more often, and featuring current news of interest to the military, will be airlifted from San Francisco to the armed forces serving in Viet Nam.

Postmaster Lambert explained that parcels weighing 5 pounds or less and not exceeding 60 inches in length and girth combined, paid at surface rates, will be moved by surface transportation within the United States from the points of mailing to the port of embarkation.

To speed up separation and delivery of these smaller parcels falling within this category, Postmaster General Lawrence F. O'Brien directed that all parcels be clearly marked upon acceptance at the post office with the letters SAM (surface airlift mail.)

This will eliminate the task of reweighing and measuring the parcels at the San Francisco Concentration Center prior to dispatch to Viet Nam or other overseas military post offices.

Postmaster Lambert also reminded mailers that Christmas parcels weighing 5 pounds and under, though they are given airlift priority from San Francisco to Viet Nam, should be mailed no later than December 1. Airmail, he said,

MORE HORSES--The horse population of Texas is expected to increase by 10 percent annually over the next 10 years. The prediction, according to Dr. O. D. Butler, head of Texas A & M University's Animal Science Department, is based upon continuing prosperity, shorter work week, and a strong trend toward outdoor exercise for health as well as wholesome recreation purposes. He added that the value of horses in Texas is now estimated at \$100 million.

ART IN CARVING THANKSGIVING TURKEY SHOWN

Will that succulent Thanksgiving turkey be carved into beautiful, mouth-watering slices, or will the man of the house hack it into a mangled wreck? Carving a turkey is an annual trauma for some people, but is simplicity itself for others. As with so many things, it's easy when you know how.

Drawings taken from World Book Encyclopedia show you how. First, remove the leg by turning the turkey on its side with its breastbone away from you. Hold the end of the drumstick and pull it forward as the knife cuts through the joint. (Figure 1.)

Next, carve the drumstick into lengthwise slices by standing it on its thick end and holding the thin end with your hand. (Figure 2.)

Carve the thigh after the leg. Expose the thighbone by slicing down to it. Remove the thighbone by running the point of the knife around it and lifting it up with the fork. Then finish slicing the thigh meat. (Figure 3.)

If you want only a few large slices from the breast, carve with the grain. Slice lengthwise until you reach the wing joint, then remove the wing. Continue slicing until you have carved all the white meat on one side of the turkey. (Figure 4.)

If you want several small slices from the breast, carve across the grain. First remove the wing, then slice at an angle of about 45 degrees. Continue carving slices until you reach the breastbone. Loosen the slices by cutting along the bone under them. (Figure 5.)

And that's all there is to it.

Provided, of course, that you have the proper tools. The article on "Meat and Meat Carving" in World Book says:

"The well-kept carving set is very important to good carving. A good carving knife needs to be sharpened only once in a while, but it should always be steeled before using.

"A meat platter or a carving board allows more room for cutting and makes carving easier. A large carving

fork holds the meat much more firmly than an ordinary dinner fork.

Bon appetit, and don't forget the cranberry sauce.

Give Thanks...

Is Thanksgiving only a holiday from work, only a family gathering, only a dinner of roasted turkey? We don't think so. Join with us in giving thanks for peace, for security, for a free enterprise--democracy and all the other wonderful things which are a part of our American way of life. We give thanks for the thousands of neighbors and friends whom it is a privilege to serve in a variety of ways.

VOTE FOR COTTON RESEARCH AND PROMOTION

Save your markets, acres, profits

Your vote for expanding cotton research and promotion will really say something.

It will say you believe in positive action, not just talk, to reduce the all-time record cotton carryover. It will say you know the only way to get more cotton used is with research to produce better products and promotion to sell them. Your vote will say you don't want further acreage cuts—you want to keep on growing cotton at a profit.

The only answer to highest carryover ever... lowest acreage since 1872

Expanded research and promotion are cotton's only hope. With these same two tools, producers of higher-priced synthetic fibers have taken a total market now equal to nearly 7 million bales of cotton. They have gained over 2 million bales in the last 2 years . . . and new plants are scheduled with capacity equal to another 3.5 million bales.

Growers also can use these tools effectively. Experience has proved it. The only problem is to get enough money to use them on a big enough scale.

New legislation makes that possible. It enables farmers to vote, in a Beltwide referendum, on establishing a uniform assessment of \$1.00 per bale for research and promotion. The law provides that individual farmers

who do not want to participate can have their assessments refunded.

Funds from uniform collection will attract other money—more than two times as much on the average.

This plan originated with farmers. Thousands of growers and 61 cotton organizations across the Belt have endorsed it—overwhelmingly.

All projects must be initiated by grower trustees elected by cotton farmer organizations. Other provisions give equal assurance of producer control.

We, the undersigned, strongly endorse and recommend this uniform collection plan for research and promotion. We urge you to join us in working and voting for its approval in the upcoming referendum.

Help yourself to greater markets, acreage, profits
