America's Best Sports Car.

...picked Camaro as
...and *Road & Track*
...merican car we've ever
...-seat sports car
...are it to our Corvette.

Both have standard disc brakes. Both have bucket seats in front, wide-base wheels and tires and floor-mounted transmissions. But Camaro seats four and is priced much less. Come in and we'll give you more reasons for buying Camaro.

**Impala. The big family car
a family man can afford.**

**Vega. "For the money, no other American car
can deliver more."**

Impala delivers you and your family more standard equipment than any other car at its price.

Turbo Hydra-matic transmission with any V8 and power steering are now standard. And that's not all. It has built-in power front disc brakes, a built-in power ventilation system, a built-in double-panel roof that's stronger and does a better job of absorbing sound. It has built-in side-guard door beams, built-in steel cargo guard in the trunk and more built-in room than any other car in its field (so says *Automotive Industries* magazine). Not only is Impala traditionally America's No. 1 seller, it's traditionally high in holding its resale value. See the U.S.A. in comfort, and at reasonable prices.

**We're bringing back that
good old summertime air, too.**

Happily, things are looking up in the battle against air pollution. Because, fortunately, a lot has been done by Chevrolet in the past 10 years to check pollution caused by our cars.

In the early 1960s, we began installing emission controls on our engines. And now, every 1971 Chevrolet is equipped to reduce hydrocarbon output by 80%, and carbon monoxide emissions by about two-thirds.

You can help, too. Keep your car tuned and those pollution controls checked regularly.

Let that sun shine in.
