Coach Hill was pleased with the play of the Antelopes in the tournament and expressed his feelings. "Our boys have shown a lot if improvement in the few weeks we have been in basketball. They are still making unnecessary mistakes, but they are also doing things they couldn't do two weeks ago. Ou. passing is improving, our shooting percentage is getting better, and we are playing real good defense. If the boys will continue to improve we think they can develop into a good ball club before the year is out. The coach added "We are especially pleased with the play of our younger boys It helps when we can have boys came off the bench and pl-

Apply Treflan this fall and help protect yourself against another wet spring!

Last spring holds sad memories for a lot of cotton and soybean growers. Rain and more rain. Weeds beating your cotton up, while you're kept standing on the sidelines? Yet, some growers escaped this nightmare. They applied their Treflan last fall. Their weed control was already in the ground working when the rains started. As soon as fields dried, growers went in, planted without much delay. For more facts about fall application of Treflan, see your Treflan dealer today ... and get a head start on next spring's workload.

range. And, your family will love you for it.

The real secret of better cooking is fast, accurate heat control. And nine out of 10 professional chefs agree that only a gas range gives you the control needed for gourmet meals... that's why so many of them use gas.

A gas range gives you an infinite number of temperature settings, not just a few pre-set push buttons. You can see the blue flame, adjust it, always know how much heat you're getting. And, when you turn on a gas range the flame is there... no waiting for warm-up. Turn it off and the flame and the heat disappear immediately - precision control for every phase of top-of-range cooking.

There are lots of extras you can get with a gas range, too. Like high-speed infrared broilers, the Burner-with-a-Brain that makes every pot and pan an automatic appliance, automatic controls that start and stop ovens at preselected times and hold food at serving temperature without over cooking, and ovens that clean themselves. All these things to give you greater kitchen freedom.

The fact is that a gas flame cooks better than an electric coil, and costs less too. So, whether you're a prize-winning cook or a beginner, respond to a gas range and your family will respond to you. See your gas appliance dealer.
