Fireman At Wait's Farm Store

## Abernathy's Firemen Respond To Fire

FIREMEN, right, back-worked and put out a fire that did several thousand dollars damage to the Monroe Wait's Farm Store, 308 Avenue D in Abernathy, Abernathy Volunteer Fire Department responded to the call either late Tuesday afternoon or early Tuesday evening, July 15. Although the outer walls show to be standing, the interior was gutted, destroying equipment and merchandise shipments ready to go out to florist

shops over the nation. Also destroyed by the fire was a building just back of the one shown in the photo. A mobile home owned by Jesse Duran, whose home is just north of the Wait's buildings, was destroyed by fire along with its contents. Duran used the mobile home for storage. Monroe also uses a big barn on his farm east of Abernathy to do some of his production of merchandise to send to florist shops. (Several thousand dollars in damages.)

## Attend Football Camp at Canyon

Nine of Abernathy's future football players attended the Bill Yung Football Camp at West Texas State in Canyon, the week of July 13 thru 18. Teams were chosen and Shad Kelly and Brent Spradling's team had the most points for the week and each boy on the team received an individual trophy.

## City Issue Warning On State Law

There is a State Law which prohibits burning of any kind in the City Limits, and is administered by the Air Control Board. Due to the drought that everyone is experiencing at this time, each and every citizen of Abernathy should take extra precaution with anything such as cigarettes, matches, or anything else that could possibly endanger property or more importantly --endanger human lives.

## Farm and Ranch Safety Week

COLLEGE STATION--- National Farm Safety Week is July 23-31, and Gov. William P. Clements, Jr., has also proclaimed that week as Texas Farm and Ranch Safety Week. Urging all who live and work on Texas farms and ranches to make accident prevention a part of every activity, Gov. Clements authorized a weeklong campaign to make safety the conscious concern of all who work to produce Texas' and America's great agricultural abundance.

IF YOU ARE ON A LOW-SALT OR SALT-FREE DIET OR SUFFER FROM HEART DISEASE, HYPERTENSION, DIABETES, LUNG DISEASE OR OTHER CHRONIC DISORDERS, CONSULT YOUR DOCTOR BEFORE INCREASING SALT INTAKE OR APPRECIABLY ALTERING YOUR DIET. --Don't overeat or overindulge in alcoholic drinks. --Don't exercise just before or after meals. --Avoid sudden changes in temperature. For example, don't dash from an air-conditioned building to a hot car. Open the car up for a few minutes before getting into it. --Don't exercise strenuously in the sun or heat.

## What To Do For Heat Strokes

Don't become a heat stroke victim during Texas scorching heat wave. Know the warning signs --and take action! Most likely affected are older persons, the obese, the very young, alcoholics and people suffering from chronic diseases. When it's too hot, people can suffer heat exhaustion or heat stroke. Heat stroke will kill, if you don't take immediate action.

Heat exhaustion, on the other hand, usually is not life threatening. HEAT STROKE----- Warning signs are reddened skin, fiery hot to the touch DRY. The victim is obviously feverish but NO LONGER PERSPIRING. The victim might be disoriented--or possibly unconscious. Most heat stroke victims collapse. Heat stroke victims can be suffering body temperatures up to and over 108 degrees F., because in cases of heat stroke, the body's normal cooling mechanisms have quit functioning.

HEAT EXHAUSTION-- Warning signs are pale skin that is cool and moist to the touch, and the body temperature is about normal. The victim might be disoriented. A few heat-exhaustion victims do become unconscious and collapse. Minutes count in cases of heat stroke. Reduce the body temperature at once. Call for an ambulance or medical help, then start cooling the victim with whatever means you can find. Bathe him with cool water if possible. But be careful if he's unconscious, so you don't accidentally get water into the nose or mouth. Another warning: watch for respiratory distress, and assist his breathing if necessary. Due to the necessary rapid cooling of the body, the victim may go into shock, and that can affect breathing. Heat-stroke victims should be hospitalized and observed for several days--in case there might be kidney or nerve damage. Early treatment of heat exhaustion involves moving the victim to a cool spot and trying to get him to drink cool fluids, such as water or lemonade. Also, loosen or remove clothing, and cool him off by bathing with cool water. Usually the person will feel better promptly, but if he seems tired, or if he is elderly or has a chronic disease, make sure he sees a doctor.

Preventing heat exhaustion and heat stroke usually can be achieved by following some simple, common-sense precautions. During hot weather: --Don't expose yourself to the heat when you don't have to. --Wear loose-fitting, light-colored clothing that reflects the sun's rays and allows for better sweat evaporation. --Don't get out in the hot sunshine without a wide-brimmed hat. --Drink water often, even when you don't feel the urge. --Stick to cool drinks and food--and salt your food liberally. IF YOU ARE ON A LOW-SALT OR SALT-FREE DIET OR SUFFER FROM HEART DISEASE, HYPERTENSION, DIABETES, LUNG DISEASE OR OTHER CHRONIC DISORDERS, CONSULT YOUR DOCTOR BEFORE INCREASING SALT INTAKE OR APPRECIABLY ALTERING YOUR DIET.

Electric Co-ops Establish Fund For Scholarships

WTSU--Eleven electric cooperatives in the Panhandle and South Plains have joined to establish the West Texas State University Electric Cooperative Scholarship Fund with a gift of \$13,750.

Interest from the endowment will be used to provide scholarships each year to majors in agriculture, accounting, computer information systems and management. The cooperatives include Bailey County Electric Cooperative Association; Deaf Smith Electric Cooperative, Inc.; Dickens Electric Cooperative, Inc.; Greenbelt Electric Cooperative, Inc.; Lamb County Electric Cooperative, Inc.; Lighthouse Electric Cooperative, Inc.; Lynteg Electric Cooperative, Inc.; North Plains Electric Cooperative, Inc.; Rita Blanca Electric Cooperative, Inc.; South Plains Electric Cooperative, Inc.; and Swisher Electric Cooperative, Inc.

According to the fund agreement, the donors will make annual contributions to the West Texas State University Foundation on or before Sept. 1 of each year. Each donor will contribute a minimum of \$250 until that cooperative has awarded \$1,250. Scholarship recipients will be selected on a merit basis by a committee which includes the dean of the WTSU School of Business, dean of the School of Agriculture, and two faculty members each from the business and agriculture faculties. Lyle Robinson, general manager of the Swisher Electric Cooperative, Inc., of Tulla, which serves portions of six counties, said he believes the cooperatives and WTSU are members of the same community. "We appreciate WTSU," said Robinson, who has been with the coop for 21 years. He said students who leave the rural areas to attend colleges and universities in larger towns and cities often do not return to their home areas. "We need the young people who love small communities and we feel that many of these will be coming from WTSU," he said. "We need to bring people back to the rural towns." Representatives of cooperatives in Texas, eastern New Mexico and the Oklahoma Panhandle met on the WTSU campus for the annual meeting in January. (Mona Statter 7-14-80)

## Sunshine Group Has Meeting

The Sunshine Group met July 17 at our Community Clubroom. We enjoyed all the spare room as we had 45 people there. That would have been a little crowded in the old room. Rev. Riddles from the First Baptist Church gave the opening prayer. We did our usual pattern of the Group: singing songs, reading the minutes, we had one birthday and then Floyd turned it over to Minnie Northcutt who got up the program. She had a quartet consisting of Jim Bob Smith, Wayne Riddell, John Harley, and Bill Skipper accompanied by Patsy Tucker at the piano. It was really good listening. We tried to get them to sing more but they said that was enough and sat down. Then Rev. Riddles gave a short talk. He told us about a little boy trying to eat the syrup out of a barrel. This was a long time ago evidently. The syrup got low so the boy climbed on a box but still couldn't reach it so his prayer was, O Lord please give me a tongue to match this opportunity! Then he talked on friendship which was very good as I know how much my friends mean to me. We have to work at finding a friend which takes time but every one should sacrifice a little something to have real friends that we can share our deepest thoughts with and we know they will respond in the same way. Now he didn't say exactly that but that is my translation. Try to go a little further than good morning, how are you and how is your health. Try to develop a super friendship. Of course our Lord Jesus is our greatest friend, always present and looking after us so Rev. Riddles and both say reach out and touch some one and try harder to be friends.

We enjoyed this group of people and hope they come back some time. Ruth Phillips has the program in August. Rev. Coggin gave the blessing and the rush was on. Those present were: Dixie Pittman, Ollie Selke, Dot von Struve, Mildred Bundie, Mrs. C. Brewer, Ona Maserang, Bernice Smith, Lizzie Lebow, Ruby Knox, Robert Lutrick, Furman Shipman, Lois Shipman, HB Coggin, Katherine Dye, Ethel Petty, Oma Toler, Callie Nunn, Addie Robertson, Vera Tucker, Frances Howard, Lillie Bell Kemp, Carey Riddell, Ruby Deener, Rev. Riddles, making 45 people. Don von Struve

**County to get heat wave aid**

By BUDDY BAKER  
 Herald Staff Writer

Hale County will receive \$18,000 in federal emergency funds to help relieve the medical and utility burdens forced upon many persons by the three-week siege of hot weather, it was announced Thursday by the Community Services Administration.

John Moody, of the federal agency's Dallas regional office, said that the funds are part of \$6 million being distributed to six southern and midwestern states. Those other states are Arkansas, Oklahoma, Louisiana, Kansas and Missouri, with Texas getting \$2.3 million.

The money is to be used to help pay high utility bills, transport the elderly to centers where they can get away from the 100 degree heat, the purchase of rental or fans or air conditioners or to mitigate other areas which might constitute immediate health hazards.

The program is designed, he said, to help the elderly, handicapped or those who are medically "at risk" and who have low incomes.

FAMILIES CAN receive up to \$200.

Moody said, of which no more than \$100 can be used to pay utility bills nor more than \$100 for the purchase of cooling appliances.

More than 180 counties in the state have been included in the emergency project. In this area, Lamb, Castro, Swisher and Briscoe counties will get a portion of the funds.

Lamb will split a \$25,000 allotment among nine other neighboring counties, while Castro, Swisher, and Briscoe are among 25 Panhandle counties which will divide \$66,000 between them.

Applications for the money will be handled locally by the Community Action Program.

**Make quick work of lawn chores with a 5- or 8-hp John Deere Riding Mower**

There'll be more time for golf, fishing, boating or just plain relaxing when you assign your lawn mowing chores to a work-saving John Deere Riding Mower.

Choose from two power sizes — the 5-hp 65 with 28-inch cut and the 8-hp 68 with 30- or 34-inch cut, recoil or electric start. Each is "human-engineered" with cushioned seat, color-coded controls, and wide nonslip footrests.

The 65 Rider has a 3-speed transmission, the 68 Rider, a 5-speed in-line transmission that lets you shift on the go. The 68 also has a fully enclosed engine for quieter operation.

An optional bagger for the 68 with 30-inch mower mounts in the rear to let you trim close to trees, shrubs and buildings. The hamper removes easily for quick, effortless dumping.

Come in today and test-drive a 65 or 68 Rider. You'll see firsthand why we call them "Weekend Freedom Machines."

**SEEDS FROM THE SOWER**  
 By Michael A. Guido, Metter, Georgia

A gossip went to her minister and said, "You'd be fine, pastor, but for one thing. Your tie's too long. May I take your scissors and shorten it?"

"Yes, ma'am," he said, "you may."

When she finished cutting his tie, he said, "You'd be fine but for one thing. Your tongue's too long. May I take the scissors and shorten it?"

Gossipers with long tongues have been catalogued in three different types. The vest-button type—they are always popping off. Then there is the vacuum cleaner type—they are always picking up dirt. And finally there is the limnet type—they are always rubbing it in.

But no one can have a gossiping tongue unless that one has gossiping ears.

Do not believe anything bad about another person, unless you know it to be absolutely true. Then do not tell that bad thing unless you feel it is vitally necessary. But even then remember that God is listening to you while you are telling it.

When you brush your teeth, ask the Lord to scrub and sweeten your tongue. Then there will be no need to shorten it.

The alter area of the church was the traditional brass archway with columns enlaced by greenery. Baskets of gladioli accented by pink bows surrounded candelabra. Escorted to the altar and presented in marriage by her father, the bride chose a formal length gown of Crystal organza embellished with alenco lace. Seed pearls enhanced the sheer yoke which finished in a Queen Anne neckline. Accordion pleated ruffles at the wrist finished the full bishop sleeves. A chapel length mantilla veil of matching lace and point d'esprit completed her bridal ensemble. She carried a nosegay of white daisies, pink sweetheart roses and burgandy mums accented by baby's breath.

Candy Middleton of Big Spring attended as Maid of honor. Bridesmaids were Sherry Reed of Ackerly, sister-in-law of the bride,

### R's or inches

It's not the thickness of insulation that counts; it's the R factor—a measure of its resistance to heat.

Batts, blankets, rigid board, loose fill or foamed in place insulation are the most common types of insulation. But within these types are a variety of substances; rock wool, cellulosic fiber, glass fibre, all with varying R factors. While FHA minimum specifications call for R-11 in the walls and R-19 in the attic, R-11 to 15 in the walls and R-26 to 30 in the attic is recommended in Texas.

Building or remodeling? Check the R factor of your insulation.
