**CHAMBER OF COMMERCE BANQUET**—Bob Philpot, left, was named Outstanding Citizen at the annual banquet Friday night, while Milton Christian, right, was named Outstanding Farmer. George Fouts took office as new president of the Haskell Chamber of Commerce.

If the theme and the cheerful decorations of the annual Haskell Chamber of Commerce banquet Friday night didn't put a 'smile' on the faces of the some 300 people present, then the guest speaker certainly did! Emcee Dr. William J. Kemp did his share, too, to hospitably entertain the crowd. After guests were introduced from Anson, Albany, Abilene, Burleson, Brownwood, Dallas, O'Brien, Knox City, Kingsland, Rule, Sweetwater, Western Texas College at Snyder, Seymour, Stamford, Throckmorton, Vernon, Wichita Falls and Weinert.

Dr. Kemp then introduced a couple—Mr. and Mrs. Bailey Toliver—from Josselet Switch! In introducing guest speaker, Dr. Kemp conveyed the regrets of one speaker, unable to attend, and explained that a hurried call to Texas Tech in Lubbock had secured Dr. Carl Hanson of Denmark, to fill the gap. He very adequately did so—in a very entertaining manner. Much humor was interspersed with gems of wisdom to live by. Emphasizing the fact that he felt soon the world would discover the good thing—the small town, he said we might want

to rush and build fences to keep it that way. Using a Roosevelt quote, 'there is nothing to fear but fear itself', he changed it to a new one, 'the only thing to fear is not to fear', reminding us of the wisdom of a healthy respect for the awesome power of destruction we have, and the possibilities for the good they might attain.

Taking a seat in the vacant guest speaker chair, he was then introduced as Cactus Jack Pryor—and the rest of his delivery was carried on in the same vein, noting happily that we have the capacity to laugh at ourselves, a very necessary ingredient to a healthy society.

Guests were welcomed by a receiving line that included WTCC director and lifetime West Texas Chamber of Commerce member, Dr. and Mrs. T. W. Williams, and WTCC director Abe Turner and his wife. Chamber Board members were throughout the banquet room to welcome guests and help them be seated. Each received a 'smile' button for their lapel at their plate, and decorations on each table included potted plants of the 'smile' faces for blossoms; smile faces on place-cards, and a giant 'smile' face on the backdrop of the stage. Head table held a huge arrangement of yellow mums. Decorations were done by Progressive Study Club.

New officers for the new year were introduced as George Fouts, president; Doyle High, first vice president; Edith Wheatley, second vice president; Odell Bynum, treasurer; Dr. T. W. Williams, WTCC director and lifetime member; Abe Turner, WTCC director.

New board members are Royce Williams, Charles Thornhill, Wallace Cox Jr., Howard Perry and Bill Lane.

Bob Philpot, manager of Lone Star Gas of Haskell, was named Outstanding Chamber of Commerce Worker, for his untiring efforts in many phases of the Chamber of Commerce throughout the year.

Milton Christian was awarded Outstanding Farmer of the Year. A lifetime farmer in Haskell County, and a successful one, he adds many modern innovations to his farming operation that make for greater production and efficiency.

The crowd thoroughly enjoyed the excellent music provided by the HHS Stage Band, under the direction of Wendel Gideon, as they did the community sing he lead, accompanied by Ellen Walling at the piano, when the crowd sang, "Smile, Darn Ya, Smile!"

Edith Wheatley, the banquet chairman for 1972, received an enthusiastic 'red rose' of applause from everyone for her excellent management of the marvelously well-organized banquet arrangements. She is surely the most gracious hostess in Haskell!

## A Salute to Haskell FFA

Future Farmers of America Week in Texas is February 19-26, and Haskell merchants and businessmen—especially those with farm-related business—know full well the importance of this program in the lives of the young men of our county. They have, in another part of this edition, dedicated a full-page in their sincere salute to these boys and their leaders. It expresses their pride in the record these boys have made for Haskell, and their appreciation of the dedication and hard work it takes to make those records.

Duane Gilly, Vocational Agricultural teacher in Haskell High School for the past two years, is responsible a good deal for their success and accomplishments. Haskell High School Superintendent H. T. Wilkinson and the board of trustees have cooperated with the FFA program to the extent that has made these fine records possible.

Haskell Free Press and Haskell merchants this week take pride in saluting this leadership, and especially each of the boys in FFA work at Haskell High School.

The Greenhand Chapter FFA members include Bobby Cobb, Chris Conner, Bill Cox, Pat Dulaney, Glendon Hawkins, Jimmy Lancaster, Forrest Mayfield, Joe Miekler, Kevin O'Keefe, Ferman Williams, Steve Guess, Bobby Howard, Steve Sammons and Leo Sanchez.

The Chapter Farmers include president Ricky Plemister, vice president Joe Kretschmer, secretary Allen Moeller, treasurer Keith Hannsz, reporter Alvin Sammons, sentinel Danny

Wainseott, and members David Hill and Roy Isbell.

During the school year, every FFA member participates actively either by showing animals in local and state stock shows, or in being a member of a judging team that participates on the district, area and state level.

The records set by FFA members in stock shows has been reported here throughout the year, and even at the present time some members are showing in the Houston Stock Show.

The records made by judging teams will continue throughout this school year. In November the Farm Radio team, consisting of Ricky Plemister, Steve Guess and Forrest Mayfield, placed first in the Hamlin contest. The Greenhand Quiz team, (Continued on page 2, Sec. 1)

As the sun was coming up Saturday morning, 12 basketball girls, Coach Burson, and his wife, Linda, were on their way to Lubbock which was the site of the girls Regional Basketball playoffs. They took the school stationwagon and Bailey Toliver's suburban van and arrived in Lubbock at about 8:30. The girls attended the games where Spearman won the AA title and Claude won the Class A. # Americanism Is Program For The Magazine Club

The Magazine Club met Friday, Feb. 18, for a program on American Heritage. Miss Nettie McCollum, president presided over the business meeting. Mrs. Buford Cox read and explained the full meaning of the American's Creed, which was written by William Tyler Page.

Mrs. J. G. Vaughter discussed the topic of our American Heritage. She said we are somewhat deficient in our sense of history, and our awareness of our great American Heritage. This is perhaps caused by the fact that we are still a young nation compared to the old countries of the world. In some ways we do pay tribute to our heritage. We admire and collect antiques and delight in old historic homes. We have preserved some of the important remnants of the past. We have established organizations to maintain records and relics of historic significance.

Mrs. Vaughter said there are some things of our past that we can not be proud of, such as child labor, illiteracy, religious persecutions, unjust punishment, abuse of power and position. Even in the face of these bad things we should not hold a negative attitude toward the values held by our forefathers. Our ancestors had a high regard for the individual. They believed in law and order, a criminal's right to a fair trial and the right to express one's own views.

Mrs. Vaughter said that the core of our heritage of values is the faith that brought the early settlers to America and enabled their descendants to build a great nation in the face of vast difficulties. Our ancestors believed in a Divine Being and sought His guidance.

"In God We Trust" was a way of life to them. She quoted Dwight D. Eisenhower, "America will be great only as long as it is good." Part of insuring our goodness—and our greatness—as a nation is by restoring the ancestral virtues to our own lives. In this way we can pay a fine tribute to our American Heritage.

The golden thread of our American heritage is the persistent effort of the American people to educate the children and youth with humane qualities. It is a strong thread, from the very early days of our history. Our hope for the future lies in our fine youth of the land.

Miss McCollum and Mrs. Kenneth Thornton were hostesses for the meeting.

MRS. CORSIE P. JOHNSTON

### RETIREMENT IS ANNOUNCED

The board of directors of the Rice Springs Care Home regretfully announce the retirement plans of their present administrator, Mrs. Corsie P. Johnston.

Plans for her retirement are set for March 1, 1972. She will however, remain on the staff as honorary and advisory administrator. Mrs. Johnston has been associated as administrator, with the Rice Springs Care Home since August 29, 1963.

Prior to that date, she had her own care home here in Haskell which she opened in her home May 27, 1953. Over the years, she has had just less than 300 patients under her care. All of Haskell is familiar with her love and devotion to her job and her patients. This devotion to her profession is best expressed in Mrs. Johnston's own words, "I have loved this work and these people with every fiber of my being. The nursing home profession has always been a great chal-

enge and I feel it has made a better person of me. I will miss the work and the everyday association with the staff, the patients and their families. For the past eight and one-half years, I have been privileged to work with our board of directors, all of them staunch, devoted men and I hold all of them in the highest esteem."

Mrs. Johnston acquired her administrator's license in November 1970 and has been a preceptor for many others of her profession to acquire their administrator's license. Being aware of the rapidly changing techniques and medicines, Mrs. Johnston has constantly studied and traveled over much of Texas and Oklahoma to further her schooling in order to bring to Rice Springs Care Home the very latest medical and technical application to her profession.

The board has named Mrs. Johnston as honorary administrator consultant on a retainer fee basis to be called back to service when, and as the need arises. The board of directors of Rice Springs Care Home, Mr.

CONSERVATION VIEW POINTS

J. C. YEARY, JR.  
District Conservationist

(Editor's Note: The following essay was the prize-winner in the soil conservation essay contest, written by Miss Kerry Gibbs, daughter of Mr. and Mrs. W. D. Gibbs of Paint Creek.)

CONSERVATION—THE KEY TO SURVIVAL

In the beginning, there was light—and it was good. In the beginning, there was soil—and it was fertile and good. In the beginning, there were plants—and they were healthy and good. In the beginning, there was air—and it was clear and good. In the beginning, there was water—and it was clean and fresh and good. In the beginning, there were animals; they were plentiful and good. But, this was the beginning.

When the generation before us began, these things were, in the most part, still good. Some of the natural resources had been wasted. Some of the animals had been hunted and slaughtered until they were no more. The great industrialization age had begun and with it, the pollution of our water and air took its start. But, at looking, our all-over conditions looked very well. Yet instead of trying to control these conservation problems, the people tucked them under their pillows in hope that they would disintegrate. As time passed, people soon began realizing that instead of perishing, the problems proportioned themselves to great sizes. Today we are faced with the paralyzing question—how can we preserve what we have for the forthcoming

KERRY GIBBS

generations? Maybe a deeper look into conservation might help us to answer this questioning dilemma.

Conservation is controlled by the government. It covers timber, fish, game, fertile topsoil, pasture and minerals; also drainage of swamps and irrigation of arid regions. The waste of these natural resources are checked. Forests have been made into large national reserves. In these reserves, animals can run wild and free, protected by law. Also, more attention has been put on the mineral resources. Coal and iron are being preserved. This is federal conservation. This will greatly help preserve our natural resources and God's earth. But not until, we, as individual citizens, take part in the conservation immediately around us, will the effort of our government be worth anything. We must all take individual responsibility in helping, not only preserving our minerals and wildlife but also in keeping our water and air clean. We all need to become "earth" conscious. We need to find out, from our government and from our fellowmen, just exactly what part we can take in this revolution of preservation and conservation.

In our beginning, there was light, and soil, and plants. There was air and water and animals. But what about their beginning. Don't they deserve a clean earth and a fresh start? I think so; therefore, let's make an effort. Since we can't make a new beginning for them, let's take care of what we do have. Let's give 'em a fair chance.

Easter Seal Campaign Will Find In Texas On Easter Sunday, April 2

The first sheet of 1972 Easter Seals has been presented to Gov. Preston Smith by Donald "Donnie" Scowden of Odessa, 1972 Texas Easter Seal Child, in behalf of the Easter Seal Society for Crippled Children and Adults of Texas.

The Texas Easter Seal campaign, which will last until Easter Sunday, April 2, is to raise funds for the treatment and rehabilitation of crippled children and adults in Texas. Last

year, 21,562 handicapped Texans received rehabilitation and other services rendered by the Texas Society through a statewide network of affiliated Easter Seal Societies, which includes 19 treatment centers.

Gov. Smith stressed that the needs of handicapped Texans like Donnie are greater than ever before. He said, "The people of Texas will respond with the generosity necessary for this important effort." Gov.

Smith added that the costs of services for handicapped Texans are rising at the same time the number of persons requiring these services are rising.

The Easter Seal Society for Crippled Children and Adults of Texas will conduct its annual campaign for funds with a traditional Easter Seal Mail Appeal and through special events throughout the state. Over 35,000 volunteers, led by 254 local Easter Seal Chairmen and Representatives, will participate in the traditional appeal. Through these volunteers, the Texas Easter Seal Society is represented in every county in the state.

HISTORY OF FARMERS UNION

CHARTERED 1902—POINT, RAINS CO., TEXAS

(This is the eighth of 52 articles pertaining to goals and accomplishments since 1902, running every Thursday in the Haskell Free Press.)

Jan. 31, 1934—The Federal Farm Mortgage Corporation Act was signed, a measure passed by Farmers Union to help farmers faced with losing their farms through foreclosure.

Jan. 29, 1934—Jones-Costigan Sugar Act created a sugar stabilization program, using production control. Farmers Union had been urging for five years that something other than a tariff on imports was needed. The Roosevelt administration in 1933 ordered a tariff commission inquiry into imports, then recommended a production stabilization program.

Jan. 21, 1934—The Frazier-Lemke Act became law, a measure designed to deal with farm bankruptcy crisis by refinancing real estate at 1 1/2%, chattels at 3%. President Franklin D. Roosevelt had been urged to sign the bill in a nationwide flood of telegrams from Farmers Union people, seeking to counteract financial interests urging the President to veto the bill. Support for signing of the bill also came from the Minnesota Legislature and some members of Congress. Although aimed at retaining individual enterprise and the private ownership of farm land, the Frazier-Lemke bill was termed by opponents as "a direct plunge into communism."

Jan. 30, 1935—President Franklin D. Roosevelt established the Resettlement Administration by executive order. This was later to become the Farm Security Administration and more recently the Farmers Home Administration.

Jan. 11, 1935—President Roosevelt, by executive order, created the Rural Electrification Administration as part of the federal emergency relief program and as a make-work project. It was expected that commercial power companies would do the job. Farmers Union leaders in the midwest, aware of the success of electric co-ops in Ontario, urged that cooperatives be given the responsibility, but the suggestion was not into effect until the permanent REA Act was approved by Congress a year later.

Jan. 29, 1935—Bankhead-Jones Act was approved, providing for a broadening of farm research, directing it into the fields of improved distribution, development of new uses, and improving crop varieties and livestock breeds.

Electric Drying

**Either we're four times cheaper, or they're four times more expensive.**

Drying is not only easier on your pocketbook, it also takes a whole lot easier on the thing, gas drying eliminates the need for ironing. The new gas dryers are so simple that clothes come

out almost wrinkle-free. Clothes are tumbled dry, then cooled, and gently fluffed. Automatically, Pleats stay pleated. Creases stay creased. All this for a cost of about a penny a load. (Or \$2.00 a ton.)

Take a look at the new gas dryers at your gas appliance dealer. Then do something nice for yourself.

And your pocketbook. Lone Star Gas

7:00 EACH NIGHT

MORNING SERVICES: TUES. thru FRI. 10:00

**Congratulations. You just saved \$5 by doing your own income tax. And all it cost you was three long, sleepless nights.**

And a slight case of heartburn.

Had gone to H & R Block, on the chance, you could have relaxed while they figured out your income tax for you. Quickly and confidently, probably unlike any other tax preparer you've ever done it.

When you figure out your own income tax, you may be surprised to find that deductions for interest, state and local taxes, and other items are not taken into account. And even if you do take them, you may not know how to do it. And there's a big difference between an amateur when it comes to doing tax.

See, when it comes to income taxes, you should depend on H & R Block. We have over 6,000 conveniently located offices, manned by thousands of specially trained personnel. They're warm and friendly people who are anxious to help you. Let us sit you down over a free cup of coffee and show you some things about

your income tax that you might never have known existed.

Furthermore, if your return is audited, we will accompany you, at no extra cost, to the Internal Revenue Service and explain how your return was prepared, even though we will not act as your legal representative.

This means that H & R Block is ready to offer you year-round tax service for just one low fee a year, with no extra charge for audits and estimates.

H & R Block's charges start at \$5 and the average cost was under \$12.50 for the 7 million families we served last year.

Which is somewhat less than what you paid. Not to mention the fact that aggravation isn't tax deductible. And we are.

**DON'T LET AN AMATEUR DO H&R BLOCK'S JOB.**
