Like genuine imitation pigskin, some of the "homemade", "home cooked", "just like mom made" foods out today are a long way short of what most of us grew up with ... unless our mom's were mighty strange cooks!

Read the ingredient label on say "grandmammy's soft, double chocolate extra-homey cookies". (I don't need to be fussed at about trade name infringements)

Listed after the chocolate and sugar and flour comes some real goodies. Like monosodium glutamate, modified food starch, vegetable protein, cottonseed oil and guar gum.

Somehow, I can never remember my mother or either grandmother rummaging around in the spice cabine r a dash of monosodium glutamat

I'm almost certain that they never, ever added any cottonseed oil to the cookies!

Now, I realize that preservation and packaging make some of this stuff necessary. But, is it quite fair to advertise that they are "just like mom's"

Ice cream that recalls those summer afternoons of childhood is another favorite-type ad technique. Cozy pictures of grandpa and grandson cranking the handle of an ice wooden freezer re-inforce those memories.

But do you recall grandma adding any lecithin or five or six artifical flavors, including coca butter or powdered eggs?

All natural foods have tried to return us to the days of more homestyle, but of course we not only pay extra for those foods, they still never measure up to "scratch"

Pie crusts may come frozen and ready to use, but they aren't ever gonna win the bake-off against an experienced cook's masterpieces of flakiness.

It has to be because of those strange ingredients and cost effective additives! Just knowing that a cake has a dose of cauojeenon in it tends to put one off!!
