Somewhere along the line the phone company has gotten the upper hand. Talk about converts...they made 'em!

For the first six years of our married life, Thomas and I lived in houses without a telephone.

We simply felt no need for a phone.

The phone company even sent a representative around when we were building our house, and we told him we didn't want, didn't need and wouldn't have a telephone!

Life went along for those six years quietly (boy, how quiet compared to now). We didn't seem to need a phone at all.

Somewhere along the line, though, we decided the budget could handle a telephone, and we had one installed. It was convenient, but that was about all.

But as the years have gone by, our phone system has changed a little bit. It just seems that we need to contact people or people need to contact us almost all the time.

The other day, when we were hooking up our new fax machine, Thomas asked how many phones we had now.

That prompted a count. And that count revealed just how spoiled we have become!

At home the count racked up a phone upstairs (for convenience and to save running down the stairs) one in the kitchen, another in the bedroom and phone jacks outside so that we can move one outside when we're working or playing.

At the office the count runs to one at my desk, the phone attached to the fax, the one on the front desk, the one in the dark room and the phone at the back of the room! That doesn't count the phones at the other offices or locations! They add four more to the list.

Then, to cap it all off, Thomas came up with a trade-out agreement to swap advertising and a little cash for a slightly used "bag" phone to go in his vehicle.

I protested that "this is the last straw". He pointed out that it would make it very easy to locate him while he is out on sales routes, or if he was broken down in the hay meadow.

This has proved to be quite true. It has also saved lots of miles of travel for him.

The fax has proven to be invaluable, too.

The phones are semi-permanently attached to my car.

Our monthly phone bills, due to having papers in various towns, all of which are long-distance from one another, probably make the phone company accountants smile with joy each month.

Life without the telephone? It seems absolutely impossible!

What I just haven't managed to figure out yet is how this conversion took place.

Where did it go from being a luxury item to a necessity?

Why do I now feel incomplete and out of touch without a phone?

I don't know when it all took place...it was a gradual thing. There was a time I would have scoffed at the whole idea of being so dependent on telephone service. But...Like I said...when they made converts they really made CONVERTS out of us!

## Constable Says Patrols Curtailed Because Of Expenses Incurred In Wreck

Precinct One Commissioner Randy Boren reports that he has recently appeared before commissioner's court to ask for help in replacing his patrol car, and two other constables, Billy Foreman and Wiley Lamberson appeared to ask if the county would help them with emergency vehicle insurance.

Boren's patrol car was totalled August 25 during a high speed chase and shooting incident.

Boren says that his insurance will not cover his vehicle, and the suspects insurance company refuses to pay for damage to the patrol car.

He says that the wreck cost him between nine and ten thousand dollars, which he simply can't afford.

"I just want the people in my precinct to know that I'm not able to patrol like I have been in the past because of the financial burden this has placed on me. I've replaced the patrol car, but had expected insurance to pay for it. I'm just unable to overcome these costs right now."

Boren says that he was thanked for presenting his case, as were the other constables, but that later he asked a commissioner what action had been taken and was told "none".

## Red Ribbon Campaign Waging War On Drugs

Sponsored by the National Federation of Parents, the Red Ribbon Campaign is a project that links via red ribbons millions of Americans who are convinced that the war on drugs is winnable. It is a grassroots effort which is helping to change attitudes about drugs.

The Red Ribbon Campaign originated when Federal Agent Enrique Camarena was murdered by drug traffickers in 1985. The Red Ribbon became the national symbol to reduce the demand for drugs, just as the yellow ribbon symbolized the hostages in Iran and the POW's in North Vietnam.

During Red Ribbon Week, October 24-November 3, communities will

participate in activities designed to promote a drug free America. By wearing a red ribbon, individuals can create positive peer pressure about drug free choices. It is the rallying point for millions of children and adults who share the commitment to live healthy lives unhampered by substance abuse.

As a drug-free company, McCoy's Building Supply Centers are proud to be a part of the Red Ribbon Campaign. Beginning October 26 while quantities last, your local McCoy's will distribute free imprinted red ribbons and encourage customers to join the nation in promoting a drug free America.

To all the people who were disappointed with the darkness or lightness of the photographs in our newspapers last week we would like to explain what happened. Our pictures were good. The Paris News prints our papers for us, and we were one of the first to run on their presses after they were moved and rebuilt. They assure us that they could do no better until the presses were adjusted. It was out of our control completely. We were upset too.

SHIRLEY JAYNES prefers baking sweets and candies and is sharing some recipes with

readers this week in the Country Cooking Column. (Staff Photo by Judy Screws)

# Country Cooking

By Judy Screws

Shirley Jaynes prefers to bake sweets and make candy, but her favorite meal to eat or serve her family is red beans and cornbread, fried potatoes, fried okra, fried squash, a big slice of onion, and country smoked ham with red eye gravy. Doesn't that just make your mouth water?

I visited in Shirley's home this week. She lives just east of Blossom. As you enter the house by way of the front porch, you are surrounded by hanging baskets and flower beds just spilling over with beautiful flowers of every color imaginable. I commented on how nice they looked, and asked her how in the world she managed to have that many flowers blooming at the same time. I touched some of them to make sure they were real, since the only flowers I grow are silk ones. She began showing me the ones she is particularly fond of and rattling off names. She lost me right away. You can tell how enthusiastic she is about anything she does just by talking with her.

Shirley drives a school bus for the Prairiland Schools, works for the Kwik-Korner in Paris and works at the Texaco station on the weekends. Her husband, R.E., is a lumber broker.

Shirley and R.E. have five children, three boys and two girls. Rickey, the oldest son and his wife, Laura, have one child, Candace Nicole; Roy Dean (Dinger) and his wife Tammy have no children yet. Their youngest son, Michael, isn't married, yet. The older daughter, Leisa Morris has a 7-year old daughter, Brittany; Anita

Copeland, who is the youngest daughter, and her husband Jimmy are expecting their first baby in November.

Shirley is involved in just about anything that takes place in the community. Whether it's helping to raise money for a walking track, singing in the choir at the Methodist Church, or umpiring a softball game, she gives it all she's got. She really gets pleasure out of coaching girls' softball and Little Dribbler basketball. Shirley was no slouch when she played basketball at East Lamar. Everyone will not be old enough to remember that, but I do.

She also likes to visit as often as possible with her 89-year old mother, who is a resident of Cherry Street Manor.

I met Shirley many years ago when my husband and kids were playing softball. I can still see her trying to give a tournament, coach and play on a team, and keep up with her kids all at the same time. Every so often you'd hear her yelling "Dinger, you and Michael had better sit down or I'm going to whip you all over the place."

When she plays ball, she plays for blood, but when the game is over, she's ready to hug, shake hands and put that game behind her.

Shirley says that most of her recipes just come off of packages, or she gets them from friends. Hope you enjoy them.

If you have any special recipes you use for the holiday season, I'd like to print them, even if you don't want to be featured in a column.

**WAGON TRAIN??** Mr. Leverett looks on as Wagonmaster Brandon Maroney points out

**Gifted/Talented Students Participating In Wagon Train**

This semester, gifted and talented junior high school students are participating as members of an imaginary wagon train which departed Fort Independence, MO in 1843 headed for the Oregon Territory. This activity, called PIONEERS, is a simulation which allows students to participate in situations and events similar to those experienced by pioneers who headed west in early wagon trains. As settlers heading west during the 1840's, the students face problems, such as floods, droughts, blocked trails, snakes, Indians and a lack of food.

The would-be homesteaders must make numerous individual and group decisions, such as what to do about a

lack of water, how to cross a flooded river, how to handle hostile Indians and which trail to take. These decisions and the other events provide the students with a realistic view of what pioneer life was like, why people went west, and what happened to them along the trail.

While learning about wagon trains and pioneer life, students participate in individual and small group decision-making, and they learn how to take notes, how to outline material, and how to write a brief research paper.

Jerry Leverett, Director of Prairiland's Gifted and Talented Program, is coordinating this activity.

# FHA Leadership Meeting Held

The Prairiland FHA Leadership meeting was opened on October 19 with the members being welcomed by president Katie Mowery. North Lamar, Chisum and Detroit were the guests for the meeting. Forty members attended and each chapter brought refreshments and games to share.

The topic of the games were learning cooperation, taking responsibility, developing leadership skills and

giving service to achieve a common goal. Officers Reigen Mitchell, Pam Spears and Carrie Gibson helped with the games and activities.

Officers Kay Lynn Ford and Brenda Moreland worked behind the scenes to prepare refreshments and clean up. This 1992 Leadership meeting was successful in that it taught cooperation and leadership, as well as bringing schools of the area in a non-competitive manner.

**NOTICE OF APPLICATION FOR WASTE DISCHARGE PERMIT RENEWAL**

CITY OF DETROIT, P.O. Box 180, Detroit, Texas 75436-0180 has applied to the Texas Water Commission for renewal of Permit No. 10724-01 which authorizes a discharge of treated domestic wastewater effluent at a volume not to exceed an average flow of 108,000 gallons per day. The wastewater treatment facilities are approximately 1200 feet south of U.S. Highway 82, approximately one mile southeast of the intersection of U.S. Highway 82 and Farm-to-Market Road 2573 in Red River County, Texas. The effluent is discharged into Scatter Creek; thence to Cuthand Creek; thence to the Sulphur River/South Sulphur River in Segment No. 0303 of the Sulphur River Basin.

In accordance with the Texas Surface Water Quality Standards, the Commission staff must determine the existing uses for the receiving water in the area of the proposed discharge and whether the proposed discharge will cause significant degradation to any high quality waters in the area. The un-

classified receiving waters of Scatter Creek have no significant aquatic life uses. The designated uses for Segment No. 0303 are contact recreation and high quality aquatic life uses. The effluent limitations in the draft permit will maintain and protect the existing instream uses. All determinations are preliminary and subject to additional review and/or revision.

The Executive Director of the Texas Water Commission has prepared a draft permit which, if approved by the Commission, will enforce more stringent effluent limitations in order to meet existing applicable rules and regulations. It is proposed that the expiration date of the renewed permit be specified as midnight, five years after date of Commission approval.

Legal Authority: Section 26.028 of the Texas Water Code and 31 TAC Chapter 305 of the Rules of the Texas Water Commission.

No public hearing will be held on this application unless an affected person who has received notice of the application specifically requests a public hearing. Any such request for a public hearing shall be in writing and contain (1) the name, mailing address and daytime phone number of the person making the request; (2) the statement "...request a public hearing"; and (3) a brief

description of how the requester, or persons represented by the requester, would be adversely affected by the granting of the application. If the Commission determines that the request sets out an issue which is relevant to the application, or that a public hearing, would serve the public interest, the Commission shall conduct a public hearing, after the issuance of proper and timely notice of the hearing. If no sufficient request for hearing is received within 30 days of the date of publication of the notice concerning the application, the permit will be submitted to the Commission for final decision on the application.

Requests for a public hearing on this application should be submitted in writing to Kerry D. Sullivan, Assistant Chief Hearings Examiner, Texas Water Commission, P.O. Box 13087, Austin, Texas 78711, Telephone (512)463-7908. Information concerning any technical aspect of this application can be obtained by writing Dale W. White, P.E., Wastewater Permits Section, Texas Water Commission, P.O. Box 13087, Austin, Texas 78711, Telephone (512)463-8201.

Issued this 20th day of October, 1992.

Gloria A. Vazquez, Chief Clerk  
 Texas Water Commission

**Bill Ratliff has already brought hundreds of jobs to Northeast Texas.**

**And he will bring us more.**

It's tough to understand business unless you've run one yourself. And Bill Ratliff has. He founded his own engineering company in Mt. Pleasant. He has managed employees, dealt with government regulations, worked hard to make his firm grow.

Bill Ratliff took his skills with him to Austin when he was elected our senator four years ago and we're all benefiting. His program to encourage local economic development has created work for Northeast Texans. He was named one of the 10 best state legislators by Texas Monthly and one of the 7 best by the Dallas Morning News. Bill Ratliff deserves our vote.
