*I haven't the foggiest*  
Well, I've lost it. Of course, most of my friends and family tell me that I never had it to begin with. And, I don't have the foggiest notion what "it" is. But I have decidedly, unequivocally, lost "it".

My mind, such as it is, never stops spinning. I have a real problem ever clearing it and getting the thing settled down, even in the midst of sleep. So, I wasn't surprised last night when I woke up in the middle of the night having thought of something important. At least, in my sleep fuzzed, two a.m. brain, it seemed important.

But, I couldn't find the pen I keep by the bed to write with. There was paper there, but no pen.

So, I recall carefully taking a piece of paper, rolling it into a cylinder, and then crimping it in the middle.

I can remember thinking "this is the right size and shape, I'll be reminded in the morning what it is I need to do".

But, morning came and there I sat, on the edge of the bed, holding the small white roll of paper and trying desperately to remember what it is that I needed to do, or find, or order, or whatever it is that I woke up in the wee hours of the morning thinking about!

I carried the paper around with me all day. I looked at it, I wracked my feeble brain over and over.

I don't have a clue. I mentioned this to my husband. He looked at me holding the paper up and said "you're scary sometimes, you know that?"

As the day progressed I spent less and less time trying to do my work and more time trying to remember why in the dickens I would sit up and fold paper to remind me of something "important" in the middle of the night!

It's making me crazier and crazier. I just don't have the foggiest notion what it is this mysterious reminder is supposed to remind me OF! I hope it really wasn't important. Because whatever it is, it won't get done.

## Deport City council hears from residents

Allen Vanderburg of Hayter Engineering discussed the grant and loan projects now underway in the city. According to Vanderburg On Line Construction is approximately 44% complete at the present time.

Vanderburg also fielded questions from resident Ruth Skaggs concerning the water to her residence being muddy and undrinkable. Mrs. Skaggs stated she has had to replace three ice makers because of the water. Vanderburg assured Mrs. Skaggs there is a loop in the line to avoid this problem and the contractor installing the new main line and fire hydrant to her home is responsible for providing a clean line that will pass the necessary test before the new line is approved.

Council approved a bid from Wesley King of Deport to remove an oak tree at 200 Depot St. for \$780. The tree is hollow and becoming dangerous and in the way of the new main water line.

Consolidated Disposal Service of Sulphur Springs was awarded the

contract to remove and land supply 250,000 gallons or more of biosolids from the city's waste water treatment plant lagoon.

The council discussed replacing an aerator at the sewer plant.

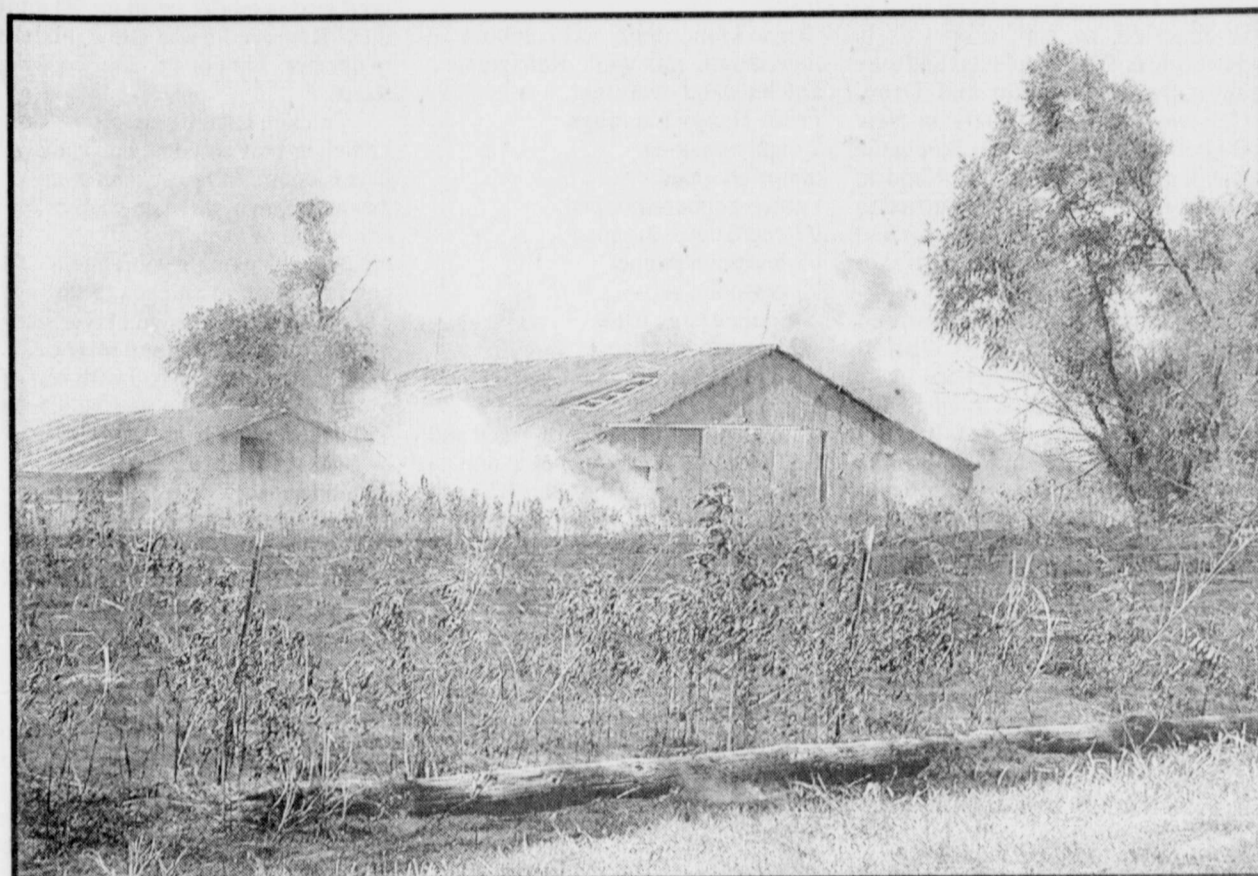

Rick Hanning, Distribution Service Consultant with TXU Electric and Gas met with council members and guests to discuss TXU rates and service.

The council heard from Vicki Jeffus and Janette Burks concerning the condition of Fourth street. The city agreed to use an oil and rock mixture to resurface the street as soon as materials could be purchased and the work be done.

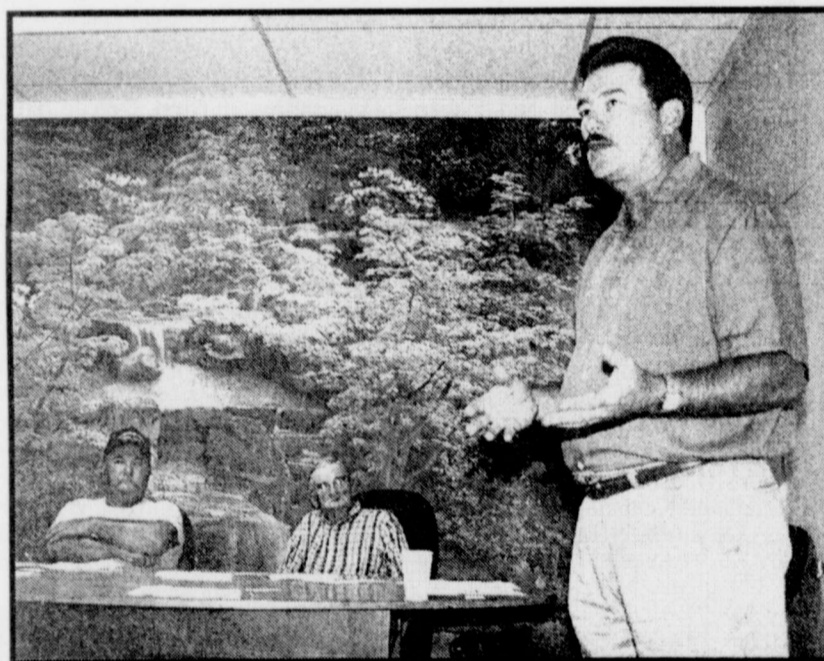

They also hired Charles Reavis as Sewer and Water Superintendent.

They also adopted a Rabies Resolution as a state requirement.

A place to burn brush was also discussed. No action was taken at the present time.

STILL STANDING-these two older barns looked as if they would be destroyed by a large grass fire Saturday afternoon north of Deport, but in spite of flames burning around them, they did not burn up. Intense heat made fighting the blaze difficult work for the Deport and Pattonville Volunteers. Two homes were threatened by the fire, but thanks to the efforts of the volunteer fire departments, were saved. (Staff Photo by Nanalee Nichols)

## Tax Holiday is upcoming

Just in time for back to school shopping, many clothes and shoes can be purchased tax free August 3-5 during Texas' third annual sales tax holiday.

On the first Friday, Saturday and Sunday of August, no state or local sales tax will be charged on most clothing and footwear priced under \$100.00. The holiday provides much needed tax relief for hard working Texas families and lets them stretch their budgets a little farther as they shop for school clothes for the kids and work clothes for mom and dad.

This year, the sales tax holiday is expected to save Texans \$31.2 million in state sales tax and \$8.4 million in local sales taxes. Cities have the option to not waive local sales tax during the tax holiday, but no community has opted out of the event this year.

Rules for the 2001 sales tax holiday are the same as in previous years. They include:

Most children's and adults' clothing and footwear priced under \$100 are exempt from sales tax. Customers may purchase as many tax exempt items as they wish.

Clothing and footwear used primarily for athletics or protective wear, such as golf cleats or football pads are not tax exempt. Tennis shoes, baseball caps, jogging suits and other athletic clothes that are commonly worn on the street are eligible for the tax exemption.

Accessories, jewelry, watches, handbags, wallets and briefcases are not tax exempt.

Items previously placed on layaway may be redeemed tax free during the sales tax holiday, and items laced on layaway during the holiday may be redeemed tax free later.

School supplies and backpacks are not tax exempt.

During the first two sales tax holidays in 1999 and 2000, Texans saved an estimated \$69.6 million, including \$54.8 million in state sales tax and \$14.8 million in local sales taxes.

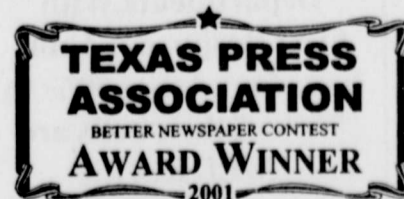

For more information about the sales tax holiday and a list of tax exempt and nonexempt items, see the Comptroller's website at [www.window.state.tx.us](http://www.window.state.tx.us) or call the tax assistance hotline at 1-800-252-5555.

Kasey Raulston of Detroit served "Gotcha" campaign underway

The Texas Department of Transportation has initiated the "Gotcha" program designed to catch litterers. The program allows Texas citizens to observe and keep track of litterers and report them for littering along state maintained roads. Citizens are asked to record the license plate number, type of vehicle, time, location, date and the item littered. The information may be submitted by e-mail to [www.dontmesswithtexas.org](http://www.dontmesswithtexas.org) or by calling 888-TEX-8633.

When TxDOT receives the information, it will be entered to the vehicle database and an exact match is located. A letter is then mailed to the litterer along with a Don't Mess With Texas litterbag to remind them to put their trash where it belongs.

For more information about the program, contact Stacy Short at 903-737-9352 or contact Chante Bergman at 512-486-5911.

**Radiology Center of Paris Installs New Imaging System to Improve Patient Care**

Radiology Center of Paris has installed a breakthrough medical imaging system that produces more detailed images of the human body than ever before. According to Radiology Center of Paris, this advanced technology not only means more diagnostic information for doctors in routine situations, but its improved speed can also save precious time in emergency situations.

The new computed tomography (CT) scanner from GE Medical Systems is the world's first scanner to allow doctors to simultaneously capture multiple images of a patient's anatomy and is up to six times faster than traditional CT scanners. The new CT scanner

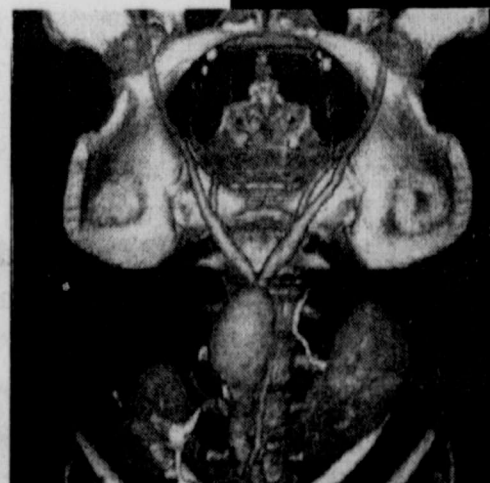

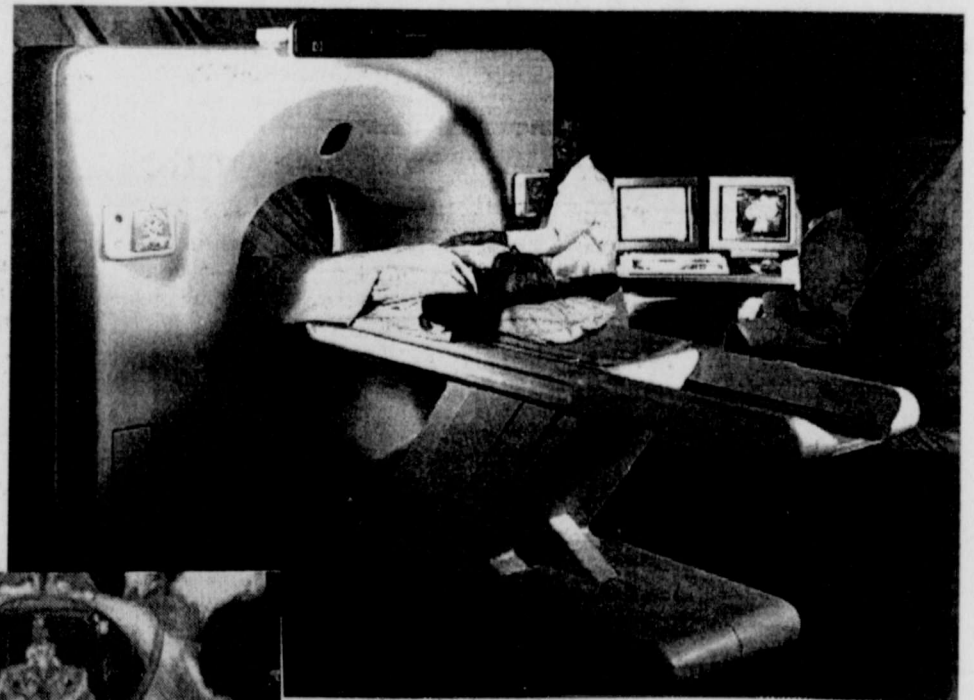

has the potential to significantly reduce diagnostic time and increase image clarity for the diagnosis of cancer, spinal injuries and pediatric conditions. Life-threatening blood clots and cardiac conditions also have the potential of being detected faster and more reliably with the new scanner.

According to leading medical institutions, diagnostic imaging methods are becoming the best non-invasive means of seeing inside the body. The faster image speeds could allow doctors to develop a host of new applications and potentially replace invasive procedures such as angiography, with non-invasive imaging.

Originally developed in the 1970's, CT or "CAT" scans combine the power of x-ray technology and computers, allowing physicians to view wafer-thin cross sections of internal anatomy without the need for surgery.
