Let's ask Bert Ballengee - Reddy's financial man.

"It takes money to build for the future so that you'll have a dependable supply of electric power. We'll need \$345 million over the next five years. Of this amount, we'll have to borrow \$200 million. And, at today's interest rates, it's easy to see why electricity may cost more. But, it's all part of creating the good electric service you've come to expect from The Electric Company."

#### A HAT WOULD BE SO MUCH COOLER!

She must go to the native market for her physical needs. The straw hat would be so much better than the old scarf tied and knotted about her head. Sweet, cool air could come through that straw and that would feel so wonderful in this heat!

Where does she go for her spiritual needs? Is there a church on the island? Does she know that she will be told about a great God there who will help her, guide her, and refresh her?

How fortunate we are in this country that there is a church in every community. Spiritual help, refreshment of soul, fellowship and love awaits all who enter her doors. We invite you to attend Church this week.

Labor-saving devices won't turn farming into a "rocking chair" occupation. Still, there are ways that a long-term Federal Land Bank loan at reasonable cost could help you expand - and handle the increased production with less effort. In fact, if you've been working too hard, your credit probably hasn't been working hard enough. To find out how expansion capital might be used to get more efficiency, see your Land Bank Association.
