## **Storm Strikes At Deport Sat. Night**

Deport began a clean-up Tuesday after Saturday's mid-night storm. An apparent tornado touched down, tearing the metal roof from Robert Farm Supply in east Deprt. Metal was scattered and rolled up and some came to rest against the B. G. Bailey house south across the street. A large pecan tree just east of the Farm Store on the Frank Griffin property was felled by the freakish wind. Property damage at the Charlie Joplin home several hundred yards southeast was the destruction of a garage-shed. Many TV antennas were toppled, limbs on trees scattered over town and at Grant Park west of town, were broken.

ilege bill - died in a conference committee. Compromise language that might have been acceptable to both the House and Senate would have made it a "qualified" privilege for newsmen - and it looked for a time that the conference committee was going to vote it out.

Publishers, editors and broadcasters told their legislators that they preferred "no privilege at if it could not be "unqualiall" fied" - and the conference committee members let it "R.I.P."

Representatives of the Texas Joint Media Committee - members of professional press groups -expressed disappointment that the Senate would not accept the original House bill - which included no qualification except in cases of "libel or right of priv-

acy" law suits. Some felt the Watergate case had taken the "heat off the press" and fewer subpoenas would be isused in the future to obtain information from newsmen.

Unless Texas newsmen have problems with grand juries and the courts in future years, it will be difficult to get press support for a "newsmen's privilege" measure in this state, said Don Coppedge, president of the Texas Press Association.

tional but the measure (HB 311) was killed in the Senate.

Hill found some questionable provisions in the senate's version of ethics legislation, but urged leaders to correct them and pass a constitutional bill. In other recent opinions, Hill

concluded: • Legislation to restrict distribution and sale of a brand of beer to exclusive territories and distributors is unconstitutional. Drug control legislation does not unconstitutionally delegate legislative authority to the commissioner of health to designate additinal controlled substances.

• The assistant executive director of a state agency may also serve as a river authority member.

• The Taylor County constable's salary minimum is set at the figure of Jan. 1, 1972, and county commissioners can't cut it below that.

REDFISH DECLINING -Parks and Wildlife Department marine biologists fear the redfish population may be declining along the Texas coast.

First sign is said to be reduction in the number of large redfish.

PWD officials say that if further evidence gathered by staff biologists confirms a decline, remedial measures may be ordered that could affect activities of both sport and commercial fishermen.

## WE BUY FIRE INSURANCE YET FEW PEOPLE EVER EXPERIENCE A FIRE

Every one of us will eventually face the great emergency of making Funeral Arrangements. Isn't it practical and sensible to provide for something we know is going to happen.

Call Us About Low Cost Funeral Insurance — It's Too Inexpensive Not To Have

Two items of encouraging news are coming from engineers who have run extensive tests on automotive emissions: 1. The newer cars are more than twice as clean as their

pre-1968 counterparts. 2. Proper maintenance reduces emissions very sharply. In a special study conduct-

ed last summer, Champion Spark Plug Company sought to determine how well the emission control devices are working, particularly on cars of the 1970's. It was found that by any standards of measurements, the new emission control devices are doing the job of keeping emissions low.

Cars tested were not laboratory specimens. They were cars driven by the average man and woman under typical, everyday conditions.

It was also found that a disproportionately high amount of harmful emissions comes from a small minority of cars. One car with a neglected engine can and does produce as much pollutants as three cars with properly working controls. And that old standby, maintenance, specifically periodic tune-up, is still the best assurance of keeping harmful emissions low. Two typical test sites were
