Farming to Beat Oil

"If the Mayflower had landed in San Francisco, New England would still be a howling wilderness!" So said an "Eighty-niner" Oklahoman when interviewed by Mr. John E. Pickett, of the field staff of

The COUNTRY

(Stage business: Yankee snorts; Westerner grins.) We all know Oklahoma as an oil state, but the truth is that there is a lot more to her than oil. There's agriculture!

Even in the oil boom last year the income of the average Oklahoma farmer—nearly \$4000— included only about \$200 of oil money. Oklahoma is doing big things in agriculture. In a series of four Country Gentle-man articles, all of which you will enjoy if you send me your dollar to-day, Mr. Pickett tells about them. Every farmer hereabouts will

profit by the experience of this great farm state, which pays the most excess-profit taxes. And re-member: this series is just one among scores of features covering every farm interest included in a year's subscription for this unique national weekly of helpful farm service. The cost? Next to nothing! Send me only \$1.00 for 52 big issues!

Users find their tire mileage increased from 50 per cent to 75 per cent.

Blow-outs have been eliminated.

Uniform mileage has been accomplished. Only six tires in 1,000 come back for adjustment - only five Miller Cords in a year.

A Louisville dealer compared wear and mileage on 116 styles of tires which he repaired. The con-stant Miller supremacy has caused him now to handle the Miller Tires only.
