THURSDAY, AUGUST 11, 1977

VOLUME 69 NUMBER 32

### County Celebration, Rodeo Begins Today

The annual Silverton Young Farmer Rodeo and Briscoe County Birthday Celebration will take place this year August 11-12-13 in Silverton. Activities will begin with a western parade at 4:00 p.m. Thursday, August 11. Harvey McJimsey is the parade marshal.

There will be parade divisions for the best floats and riding clubs, and a section of the parade will again be devoted to the kids bicycle contest. The bicycle parade will form south of the hotel just off Main Street at 3:45 p.m. but each rider must go by the office of the Briscoe County News prior to the contest to pick up a parade identification number for the benefit of the judges who

may not know all the participants by names. Prizes in the kids parade will be \$10.00, \$5.00 and \$2.50.

The rest of the parade will form on South Main Street. A free barbecue will be served in the City Park following the parade. During the barbecue, the Silverton Lions Club is sponsoring the Briscoe County Old Fiddlers Contest with cash prizes for the winners.

Rodeo performances will be held each night beginning at 8:00 p.m. with stock furnished by C Bar T Rodeo Co. of Lubbock. Admission will be \$2.50 for adults and \$1.00 for children. The first 30 contestants per event will be accepted

for Tie Down Calf Roping (\$27.00), Heading and Heeling (\$32.00), Ladies Barrel Race (\$27.00), Bareback Bronc Riding (\$27.00), Bull Riding (\$27.00), Kids Break Away Roping (\$5.00), and Saddle Bronc Riding (\$27.00). There will be a calf scramble each performance.

Fred Strange is the rodeo secretary. Books open 8:00 a.m. August 9, and close 8:00 p.m. August 10. Entrants must be 18 years old or have parents release. Money must be in before Thursday performance. Phone 806-823-2277 for additional information.

Dances will be held Thursday, Friday and Saturday nights at the concrete slab with music by Country Additions of Amarillo.

#### BOAT RECOVERED FROM BOTTOM OF LAKE MACKENZIE

A boat was recovered from the bottom of Lake Mackenzie Wednesday by Scott Hutsell and John McCammon, certified scuba divers, and Mike Long.

The boat became filled with water when the wind was blowing waves over it and it sank in about 12 feet of water earlier that day.

Both the boat and outboard motor were recovered for the owner, who is not a Silverton resident.

#### Where's The Fire?

Firemen answered a call at 2:00 a.m. Sunday to the Manuel Aguilera home where fire had broken out in the kitchen.

The family had the blaze under control when the firemen arrived.

Chafe Tipton came home Friday, August 5, after having spent three months in the hospitals in Amarillo.

#### New Students Need To Register Now

All students who did not attend school in Silverton last year, but who plan to enroll in the Silverton Schools this year, need to register.

Plan to go by the high school as soon as possible to do this to save time during regular registration and opening of school.

#### BAKE SALE

The Young Modern Home Demonstration Club will sponsor a bake sale this Saturday, August 13 beginning at 9:00 at Nance's Food.

Club members are asked to have their baked goods there by 9:00 a.m.

#### SENIOR CITIZENS TO MEET NEXT WEEK

The Senior Citizens will be meeting August 19 for their regular monthly luncheon and business meeting.

They will be electing officers for the coming two years.

Seven Silverton High Schools girls are competing for the honor of being named Rodeo Queen at the final performance of the Silverton Young Farmers Rodeo and Briscoe County Celebration Saturday night.

The contestants are Linda Hardin, Rose Lee Perkins, Kim Cornett, Susan Payne, Connie Rowell,

#### GUIDLINES GIVEN FOR FREE SCHOOL LUNCHES

On July 14, 1977, the Board of Trustees of Silverton Independent School District selected the following guidelines for free school lunches.

Family Size	Free Meals	Family Annual Income	Reduced-Price Meals
1	\$0-3,140	\$ 3,140- 6,120	
2	0-4,130	4,130- 8,050	
3	0-5,110	5,110- 9,970	
4	0-6,090	6,090-11,880	
5	0-6,990	6,990-13,630	
6	0-7,890	7,890-15,380	
7	0-8,710	8,710-16,980	
8	0-9,530	9,530-18,580	
9	0-10,270	10,270-20,030	
10	0-11,010	11,010-21,470	
11	0-11,740	11,740-22,890	
12	0-12,470	12,470-24,310	

Each Additional Family Member \$730 \$1,420

The school will give each family an application on the first day of school.

Beryl Long became ill Saturday morning and was taken to Caprock Hospital in Floydada by the Silverton Volunteer Ambulance Service. Anthony and Ted Kingery were the Emergency Medical Technicians on the trip.

Mr. and Mrs. Jim Brooks have recently enjoyed a vacation trip to Cheyenne, Wyoming.

Lisa Younger and Debbie Storie. Linda Hardin is being sponsored by the Silverton Young Homemakers. She is the daughter of Mr. and Mrs. Buck Hardin. She has been elected to Who's Who, has served as class officer, FHA officer and won the Biology Award last year. Activities she enjoys are track, skiing, swimming, horseback riding and other outdoor sports. Her special interests include reading, playing guitar and piano, listening to country music, and soccer.

Rose Lee Perkins, daughter of Mr. and Mrs. Thomas Lee Perkins, will be a sophomore in Silverton High School this fall. She has played basketball and participated in track, and is a six-year member of 4-H. She is a winner of the 4-H Gold Star Award, has served as a cheerleader, played on the Rainbow Girls Volleyball Team, attended Rainbow Grand Assembly in Fort Worth and presently holds the station of Hope in Rainbow. She enjoys horseback riding, basketball, Rainbow and sewing. She is being sponsored in the Rodeo Queen Contest by Silverton Rainbow Assembly No. 304.

Kim Cornett, daughter of Mr. and Mrs. Don Cornett, will be a junior in Silverton High School this fall and is being sponsored by the Silverton Chapter of Future Farmers of America. She was elected FFA Sweetheart for this year. She is also a member of the Student Council and was named Best Dressed. She enjoys water skiing, basketball, horseback riding and track.

Susan Payne is the daughter of Mr. and Mrs. Charlie Payne and will be a senior in Silverton High School this fall. She is being sponsored in the Rodeo Queen Contest by the Silverton Lions Club, which she serves as Sweetheart. She is a member of the Pep Squad, Future Homemakers of America, Future Business Leaders of America, 4-H, Future Farmers of America and plays basketball. She also enjoys riding horses, being with friends and cooking.

Connie Rowell is the daughter of Mr. and Mrs. W. D. Rowell. Her sponsor is Southwestern Home Demonstration Club. She will be a sophomore in Silverton High School this fall. She likes to play basketball, water ski and be with friends.

Lisa Younger is the daughter of Mr. and Mrs. Roy Younger. She is a junior in Silverton High School this fall. She is being sponsored by the Silverton Young Farmers. Her interests include basketball, track, volleyball, sewing and helping farm. She is a member of Future Business Leaders of America, Pep Squad and Future Homemakers of America, in which she will hold the office of parliamentarian during the coming school year.

Debbie Storie is a senior in Silverton High School and is the daughter of Mr. and Mrs. Harold Storie. She is being sponsored in the Rodeo Queen Contest by the L. O. A. Junior Study Club. She is a two-year member of Future Business Leaders of America and a three-year member of Pep Squad and Future Homemakers of America. She is a three-year member of the Owlette Basketball Team and enjoys water and snow skiing, running track and sewing.

All of the girls are busy selling tickets to the Young Farmers Rodeo which begins tonight. The girl who is selected as Rodeo Queen will be the one who sells the most rodeo tickets, for she will be the one who has most helped the Young Farmers to show a profit on this project.

### Solar Open House to Benefit Ambulance Service

Silverton Volunteer Ambulance Service will host open house in the beautiful new solar energy home of Mr. and Mrs. Jarus Flowers on Sunday afternoons, August 14 and August 21, from 1:00 until 8:30 p.m. A \$1.00 fee will be charged adults attending the open house, and all of this money will be a donation to the ambulance service for the purchase of communication equipment for use in emergencies in Briscoe County.

To reach the home, drive about a mile north of the entrance to Lake Mackenzie on Highway 207 to the microwave tower, then turn

east for a mile on a county road. It is the first house on your right.

"Many people have expressed an interest in seeing our new home and having its solar energy features explained," said Flowers. "We are pleased to be able to offer this opportunity and to assist our ambulance service." Flowers will be present both afternoons to answer any questions you may have, and in addition, a representative from Fields & Company in Lubbock will be present from 2:00 until 6:00 p.m. on August 14, to discuss the workings of

the solar energy system.

The brick ranch-style home is not of far-out futuristic design, but is constructed with no offset in the roof and on one level. It is an all-electric Gold Medallion Home, which faces north from its location near the rim of Tule Canyon. From the front yard you don't get a clue of its energy-saving features. The profile of the house looks different, but the home must be viewed from the back, or south, to see the solar panels which are mounted horizontally on the roof.

The design incorporates 24 collector panels, that collect solar energy for the home. Although the panels are interconnected, four panels are needed to heat water in the 82-gallon water heater while the other 20 are designed to heat the house. Each collector panel consists of two 3x6-foot sheets of heat-treated glass approximately three-eighths-inch apart. Two tin ribs under the glass of each panel acts as heat absorbers to heat air circulating between the panels. Underneath the tin absorbers is a 2x6-foot framework filled with 6-inch batt insulation. Hot and cold air

circulates between every eighth collector.

The warm air from the collectors travels to a "brain" located inside the house, which sends warm air either to heat the house or to the 6-foot riverbed rock pit for heat storage. While the brain is doing this, it also sends heated air to a coil and motor that circulates the heated air in the water heater, with water temperature reaching as high as 140-160 degrees.

Starting from the top and working down, the rock pit is constructed of a 6-inch concrete top, water-proof sheet-rock, a 2x6-foot roof with two 6-inch insulation batts squeezed in, three-quarters plywood, more insulation, a 6-inch air space, and 6 feet of three-quarters inch riverbed rock for heat storage. The rock bed rests on a diamond-shaped steel wire grid supported by U-shaped concrete blocks. The concrete blocks are surrounded by three-sixteenth-inch stiff fiberglass insulation. Gauges installed at the surface tell the temperature of the rock bed at three different levels. The

Flowers wanted to reduce maintenance wherever he could, so the roof is made of concrete shingles that can take a great deal of punishment from hail and whatever else the weather can throw at it.

The Flowers' home is an energy saver in many ways in addition to the savings realized from the See SOLAR HOME—

CONTINUED ON PAGE FOUR

Front of the Jarus Flowers' new solar energy home shows the attractive brick and wrought-iron fence and the neat concrete tile roof. Only one row of the tile is attached to the roof; all the other tiles are loosely arranged and can be laid aside if roof repairs become necessary. The home has three bedrooms, an office, kitchen, family-living room, pantry, utility room, basement-playroom and double garage.

### COAL HAULED FROM WYOMING TO INSURE DEPENDABLE ELECTRIC SERVICE

Why does Southwestern Public Service Company haul a million tons of coal a year from Wyoming to the Southwest? Just one reason. Dependable electric service for the area it serves.

Coal, which for the last quarter century has played a declining role as a primary energy source, is now back on center stage.

Coal is America's most abundant energy resource, being about 80% of our total energy reserves. It is estimated that about 3,244-billion tons of coal are available. We don't know yet where it is located; nor, do we have the technology, at this moment, to mine it all, but we do know that we have enough that we can get at now to carry us well into the 21st Century.

Coal will buy America time. Time to convert from a fossil-fueled economy to a nuclear-electric energy economy and to make the transition without economic upheaval.

Natural gas has been the fuel for generating electric energy on the SPS system. As a matter of fact, natural gas was regarded as a nuisance which had to be put up with as a part of discovering oil, until the electric utility industry created a market for it as a boiler fuel. Up until that time, natural gas was either flared off or discharged into the atmosphere.

Southwestern has adequate fuel supplies, with the help of oil standby, for the gas-fired generating equipment now in operation. However, the declining reserves of natural gas, as well as its increasing cost, made the conversion to coal-fired equipment economically feasible.

A conventional nuclear power plant doesn't make sense on our system at the present time, because it would have to be too big. We'd have to put too many eggs in one generating basket—and, then, have a spare, too. But, we are continuing research into nuclear power, including the breeder reactor and thermonuclear fusion.

When the decision was made to go to coal, many factors had to be weighed, most important being those related to the environment. SPS wanted to be certain that the atmosphere was just as pollution-free with a coal-burning plant as it has been with gas-fired equipment.

That called for installation of the latest in emission-control equipment; and that, in turn, called for a more expensive plant. About one-third of the cost of the first coal-fired unit at Harrington Station was for pollution-control equipment.

You just don't burn any old coal in any old boiler in an electric generating station. The boiler equipment is designed for the coal used—custom-built, so to speak.

The coal for which Southwestern has contracted is "clean." It has a sulfur content of one-half of one percent or less by weight, which reduces the sulfur dioxide control problem to a minimum.

The coal comes from Wyoming to the plant site in a unit train of 110 cars. The train carries eleven-thousand tons of coal and makes approximately two trips a week.

The train is pulled over an eight hundred foot trestle at the plant while the coal drops through doors on the bottom of each car into a storage area some forty feet below the trestle. At maximum efficiency, the entire train can be unloaded in twenty-six minutes. The coal goes from the storage area to a crusher which reduces the size of the coal to an average piece of three-quarters inch.

Twin conveyor belts, each capable of moving eight hundred tons of coal an hour, take the crushed coal to one of five bunkers. The bunkers are each capable of holding about seven hundred tons of coal, and the conveyor system is operated twice each day, filling the bunkers for a day's operation.

From the bunker, the coal moves by gravity through a feeder into a mill where it is pulverized to a face-powder consistency.

The feeder controls the amount of coal that gets into the mill and thus into the boiler where it is mixed with the right amount of air. In the boiler it is burned to provide the proper amount of steam at the desired temperature. This, of course, is very important in the operation of the steam turbine which drives the electric generator. The generation of electric energy is a matter of rather delicate balance. You need to match the heat required to produce the steam which drives the generator so that it produces the exact number of kilowatts. Incidentally, it's not unlike what you do with the accelerator on your car when you want to go 60 miles an hour. The generator is designed to run at 3600 R.P.M. When it is running at this speed, it generates electricity at 60 cycles a second. When load is increasing on the generator, which is like going uphill in your car, the coal feeder has to let in more fuel, just as the accelerator on your car does when you step down on it. The amount of coal has to be matched by an increase in the amount of air to provide the right mixture for efficient combustion. When load is coming off the generator, less of the coal-air mixture has to be fed into the boiler so there won't be too much heat, and that's like taking your foot off the accelerator.

The American farmer builds two things better than anyone else in the world. He builds the next generation, passing along a special kind of wisdom... respect for the soil, honesty, independence, and faith in the future. And he builds his land, leaving it better than he found it. That kind of building usually requires borrowed long-term capital. That's where we have helped for 60 years.

### The Land Bank The Bank of Generations

FEDERAL LAND BANK  
ASSOCIATION OF FLOYDADA  
105 South Wall  
FLOYDADA, TEXAS 79235  
Ph. 983-2480

The boiler stack, or chimney, at the new Harrington Station rises 250 feet in the air. It is thirty-eight feet wide at the base and tapers to thirty-three feet at the top. It was built in seven foot, six inch increments and is lined with a special acid proof brick.

While coal and glamour aren't usually thought of in the same breath, there are some exotic things that can be done with coal that make it most important in our future energy planning.

For example, if you take the carbon out of coal and the hydrogen out of water through the gasification technique, you come with a synthetic natural gas. That's the light molecule route. If you go the heavy molecule route, more formally known as liquefaction, you still use the carbon from the coal and the hydrogen from the water and wind up with crude oil.

These applications of coal to our energy problem make it possible, with some slight modifications, to extend the life of the gas-fired and oil-fired boilers now being used to generate electric energy.

Engineers at SPS are studying coal gasification as a practical means of extending the life of some of the newer gas-fired boilers on our system. We are, at the same time, developing additional natural gas resources to assure the useful life of this equipment.

Coal's final advantage for the future is economic. While it prob-

### GOVERNOR ANNOUNCES GRANT TO COMMUNITY ACTION GROUP

Governor Dolph Briscoe announced approval of a \$461,247 Office of Human Development grant to Texas Panhandle Community Action Corporation of Amarillo, Texas.

The grant includes \$338,447 in new funds and authorization to use \$122,980 in carryover funds for a full-year—part day Headstart program. Funded under Title V of the Economic Opportunity, Headstart, and Community Partnership Act of 1974, the grant is effective retroactively June 1, 1977, through May 31, 1978.

The program is serving 600 four year old children from low-income families in 16 centers. These are: Emerson elementary, Forest Hill elementary, Glenwood elementary, Whittier elementary, Travis elementary, Baker elementary, Highland elementary, Humphries

Highland, Margaret Wills, South Campus of Borger High School, Aikman elementary, West Central elementary, and Hilltop Learning Center.

Objectives of the program include providing low-income children with educational programs, health services programs, social services programs, and career development opportunities, providing dental health examinations along with appropriate follow-up treatments, and nutritional meals and instructions regarding good nutrition. Parent involvement in the child's education will also be emphasized.

Grant processing and program liaison are through the Economic Opportunity Division of the Texas Department of Community Affairs.

### Garner Is New Officer Of TUCO Inc.

The board of directors of TUCO Inc. at their quarterly meeting Monday, July 25, elected Dale T. Garner vice president and principal operating officer. The announcement was made by Berl M. Springer, vice chairman of the board of directors of the Amarillo-based firm.

TUCO INC. is a wholly-owned subsidiary of Southwestern Public Service Company and provides a large portion of the electric company's fuel requirements, including natural gas, coal and fuel

oil. TUCO INC. also produces other liquid hydrocarbon by-products for sale to non-related wholesalers.

Garner is a native of Manning, Kansas and is a graduate of Oklahoma University. He joined Southwestern Public Service Company on April 1, 1977 as an executive assistant in the finance department. Before coming to SPS, Garner served as a systems analyst for the Occidental Exploration and Production Company and as administrative manager for Esso Exploration,

Inc. in Tokyo, Japan. His past experience also includes various financial and operational positions with the Creole Petroleum Corporation and the Carter Oil Company.

"The management of TUCO Inc. carries with it the extremely important responsibility of providing fuel for Southwestern Public Service Company," Springer said. "Garner is a seasoned oil and gas executive and brings to TUCO INC. a wealth of worldwide experience."

# OPEN HOUSE

IN THE BEAUTIFUL NEW SOLAR ENERGY  
HOME OF MR. AND MRS. JARUS FLOWERS

1:00 UNTIL 8:30 P.M. -- SUNDAY, AUGUST 14 AND SUNDAY, AUGUST 21

\$1.00 FOR ADULT ADMISSION

The three-bedroom brick ranch-style home of Mr. and Mrs. Jarus Flowers is the first house east of Highway 207 at the microwave which is located about a mile north of the entrance to Lake Mackenzie. The all-

electric Gold Medallion solar energy home incorporates a number of energy - saving features which will be explained to everyone interested. A company representative will be present Sunday, August 14.

This event is being sponsored by the

**SILVERTON VOLUNTEER AMBULANCE SERVICE**

All proceeds will go toward purchase of communication equipment for use in emergencies in Briscoe County.

This Page Is Donated To The Ambulance Service by The Briscoe County News

**SOLAR HOME—**

CONTINUED FROM PAGE ONE

solar system. The walls are heavily insulated with a heat-resistance factor of R-19.38. This is achieved by placing 3 1/2-inch (R-13) insulation in the walls with .6-inch styrofoam aluminum-covered insulation on the outside between the wood frame and the outside sheathing. The aluminum reflects heat either in or out, depending on whether the air conditioner or the solar system is in operation. Each one-tenth-inch of the styrofoam is equivalent to one-inch of regular insulation.

The styrofoam insulation is continued below ground level, to insulate the basement area. In addition, a continuous vapor barrier prevents air leakage, around window areas by wrapping the edges of the vapor barrier over the window frame and fastening it. Six inches of insulation in the ceiling further protects against heat loss to make the solar system as efficient as possible. Flowers intends to bring the level up to an even higher R-38 factor.

A fireplace adds a romantic touch to almost any home. But Flowers knew the average fireplace provides little real warmth, with up to 80 per cent of the heat going out the chimney. Not only that, a fireplace draws heat out of the room to satisfy its air supply requirements. A fireplace will also "steal" heat from a house if it is part of an outside wall.

Flowers sought to solve these problems while retaining the rustic charm and romance of an old-fashioned fireplace. He built his fireplace in a living room corner, at an angle so it faces the room, inside a conditioned space. Glass doors cover the front of the fireplace. The air supply comes from the outside through ducts, with dampers that can be closed tightly when the fireplace is not in use. The heat escapes through another duct system that comes out near ceiling level in an adjacent wall, while smoke goes up the chimney. No heat is lost from the room because of the outside air supply. When the fire is out, ashes can be swept to the back of the fireplace where a chute dumps them into a pit.

Convenience features of the Flowers' home include a central vacuum cleaner, a complete weather station including wind gauge, and an intercom and stereo system throughout the house.

The kitchen features a Jenn-Air electric range with grill, rotisserie and deep fryer, and an

**Funeral Held For Mrs. Lottie Nelson**

Funeral services were conducted Friday at 10:30 a.m. at Sage Road Chapel of Geo. H. Lewis & Sons Funeral Home in Houston for Lottie Kate Nelson, a former Plainview resident, who died Wednesday morning in Houston. She was the granddaughter of Mrs. Kate Price and a sister of Mrs. Billy Earl Ehresman of Plainview, and a great-niece of Mrs. Dorn McMurtry.

Born in Canyon, Mrs. Nelson grew up in Plainview and was graduated from Plainview High School. She was a member of Chapelwood United Methodist Church in Houston and of the Daughters of the Republic of Texas.

Other survivors are her husband, Dr. Earnest J. Nelson; one son, William Paul Nelson of Houston; two daughters, Mrs. Mary Kjellstrom of Fort Benning, Georgia and Mrs. Rebecca Eadie of Houston and two grandchildren.

Mrs. Carl Bomar and Mrs. L. D. Griffin visited with their aunt, Mrs. Kate Price, in Plainview Friday.

unusual exhaust system. Off the kitchen in the pantry is a butane-fueled grill, "in case of power failure," says Flowers. It can also be used for singeing poultry and game birds.

The basement-playroom includes a model railroad platform which folds into the wall when not in use and a bed which folds away into the wall.

Mr. and Mrs. Flowers, natives of Tullia, are parents of two sons, Michael and Kinoc, who live at home, and a married daughter, Mrs. Wendell (Nedra) Hardin, of the nearby Rock Creek community.

Please mark your calendar and plan to attend one of these open houses. The Flowers have delayed moving into their new home for the sake of the ambulance service. Mr. Flowers is an Emergency Medical Technician, and while in this training became aware of some of the needs of the local ambulance service. If the road to the home is muddy due to rains on the days of the open house, the event will not be held. A visit to the open house will provide you a drive across the canyons, and an opportunity to visit beautiful new Lake Mackenzie.

**Phil Cates Will Not Seek Re-Election**

State Representative Phil Cates today officially announced his intention not to seek reelection. Cates is completing his fourth term as State Representative from the 66th Legislative District composed of Armstrong, Briscoe, Childress, Collingsworth, Donley, Floyd, Gray, Hall, Motley, and Wheeler Counties. "Landslide Cates", as he is referred to because of having won his first primary election by only two votes, expressed his heartfelt appreciation to those who enthusiastically supported him throughout the eight years that he will have served as state representative.

"The one person who deserves

more credit than anyone else for these years of service," Cates explained, "is my gifted wife Nancy, who is the mother of our three-year-old son Andy and our nine-month-old son John David. Even now," Cates continued, "Nancy encouraged me to run for reelection for the House seat or for another higher office. Many have expressed disappointment that I would choose to leave the position of service that I have held for four legislative terms, and for their trust and this high compliment that they have given me, I am very grateful.

"The decision is mine alone. There are simply more important tasks for me at this time. I must make certain that my family is in the kind of strong and healthy environment that I want for my sons. This we would do if we stayed in politics, but it would

simply be much easier in the business field. Someday, I hope to again hold this or other offices of the public trust.

"There are major important goals, issues, and needs for good services which I have left unfinished. In this regard, I would support the very best person seeking the position of state representative. I feel that this is my responsibility as a private citizen. I would never seek to name my successor, but rather to fulfill this responsibility by supporting the best possible person. I must mention my personal pleasure of having been associated with public servants like Max Sherman, Bob Simpson, and Bob Close along with the many responsible leaders within the district.

"Benjamin Franklin expressed my feelings best during the Constitutional debates when he said

in essence that leaving public office will be considered by our best leaders as the higher honor than even having been originally elected to that position. In other

words, it is exciting to be reelected and to serve, but it is even greater to return to walk equally as a private citizen with one's former constituents."

Mr. and Mrs. Berton Hughes, along with her sister, Mrs. Billie Overmyer, and brother, Gayle Renfro, spent several days in Red River, New Mexico last week. On returning to Texas, the Berton Hughes spent the weekend in Mineral Wells with their son and family, Rev. and Mrs. Randy Hughes, Amy and Matt. They brought Amy and Matt home with them for a week's visit.

**ALL-DAY MOURNING DOVE HUNT SET**

All-day shooting for mourning doves and half-day hunting for white wings has been set by the Texas Parks and Wildlife Department.

Jim Dunks at the P&WD said mourning doves during both the North and South Zone seasons may be hunted from 30 minutes

before sunrise to sunset. The North Zone dove season is set for September 1-October 30; South Zone, September 24 - November 6 and December 31, 1977 - January 15, 1978.

Exception to the all-day hunting hours is in those counties with a concurrent whitewing and mourning dove season September 3, 4, 10, and 11, when the two species may be hunted from noon to sun-

set.

Shooting hours during the September 10-18 teal-only season are from sunrise to sunset. Rails and gallinules may be hunted from 30 minutes before sunrise to sunset, September 1 - November 9.

The later starting time for teal hunting is to give hunters ample light to distinguish teal from other species of waterfowl which might be moving through Texas in early September.

Officials at the U. S. Fish and Wildlife Service notified Dunks late August 4 of the framework for shooting hours of migratory game birds.

Litigation involving shooting hours prevented the U.S.F.&W.S. from providing Parks and Wildlife Commissioners with such frameworks at their July 22 meeting when dove seasons were set.

Mr. and Mrs. M. C. King of Agano, Guam spent Monday with her aunt, Mae Bomar. Mrs. King has been in Denton in school this summer. Mr. King flew over to travel back with his wife, and

they have been visiting relatives enroute to California where they will emplane for Guam. Mr. and Mrs. King have taught six years in the University on Guam.

Paul Choate of Lubbock is spending this week with Cary Fleming.

Mr. and Mrs. George Whitehead, Goldie and Brad of Carthage, Texas, recently visited in the home of his parents, Mr. and Mrs. Shorty Whitehead, in Silverton. They also visited with Mr. and Mrs. Wilton Whitehead at Tulia and Mr. and Mrs. Bill Gilbreth at Floydada.

Miss Nelle Bryant broke her arm in a fall at her home Saturday morning, and was taken to Central Plains Hospital in Plainview by the Silverton Volunteer Service. Emergency Medical Technicians on the trip were Anthony and Ted Kingery and Charles Sarchet. Mrs. Ted Kingery accompanied Miss Anne Bryant to the hospital in her car, and returned with the ambulance crew. Ted Kingery remained at the hospital with the Misses Bryant.

**ARTS AND CRAFT SHOW SET AT FLOYD FAIR**

A new feature planned for the Floyd and Surrounding Counties Fair this year is an Arts and Crafts Show, scheduled for all day (9 a.m. to 6 p.m.) Friday, September 16 in the entertainment build-

Mrs. Denny Rex Clayton and David Rex left Friday, August 5, for Wackerhiem, Germany to join their husband and father who has been stationed there since February. Sgt. Clayton is with D Battery 1/59 ADA and is a Specialist First in maintenance.

Wackerhiem is a missile base, and Sgt. Clayton has a platoon of 15 men whose job is to keep the trucks that carry the missiles and check the missiles to make sure they fire. They recently made a trip to Crete for a two-day firing. On these missions, about four to six missiles are fired simulating actual combat. Sgt. Clayton and family will be stationed in Germany for about two and a half years.

ing at the fairgrounds in Lockney. To enter the Arts and Crafts Show (or for more information) call Tommy Billington, show chairman, at 652-2408 as soon as

possible. Booths at the show will be free. Fair dates this year are Thursday, Friday and Saturday, September 15, 16 and 17.

**FALL-WINTER LEAGUES NOW FORMING AT TULIA BOWL**

**'Right Now' Parts Service**

Now we have parts service no one can equal. We've installed an electronic data terminal right in our office. It lets us "look into the bins" of all of International Harvester's huge parts warehouses across the U.S.

As you know, we stock just about all the parts you regularly call for, and we can give you "right now" service on those we don't stock because the entire country's inventory, in effect, is our warehouse. We can find the part you need faster than anybody in any business, in any industry. And that's mighty important when you're in a hurry.

# Cotton Talks

## NEW COTTON PROGRAM EXPECTED TO BE BETTER

Some provisions of the government cotton program now going through Congress are still to be finalized, "but it now appears certain that the next cotton program will be better for producers in several respects than the present program," states Lloyd Cline of Lamesa, president of Lubbock-based, 25-county Plains Cotton Growers, Inc.

Major areas in which improvements are forthcoming, Cline says, include the cotton allotment system, disaster coverage, payment limitations, loan provisions and target prices.

The Senate has passed a bill for 1978 through 1982 and the House has passed a similar, but not identical, bill which would extend through 1981. The differences between the two measures will be worked out in a Senate-House conference committee, expected to begin meeting August 1. Hopes are that the conference committee report can be ready for both houses to consider when they return September 6 from the August recess.

The new cotton allotment sys-

tem prescribed in both House and Senate bills will apply to cotton, wheat and feed grains. Farm allotments for these crops will be figured as a percentage of each year's planted acreage, "giving most High Plains producers program coverage on a considerably higher percentage of whatever crop they choose to plant," Cline says.

In the past allotments have been based on historical plantings, and cotton allotments on High Plains farms have been generally less than 50 percent of cultivated acreage.

The percentage factor used to determine farm allotments would be arrived at dividing the acreage calculated by the Secretary of Agriculture as needed to supply domestic and export markets by the estimated U. S. acreage for harvest. Under the Senate measure the allotment on each farm could not be less than 90 percent of planted acreage. The House bill specifies no minimum.

A revised version of the disaster program which has meant so much to High Plains farmers since 1973 will be continued in the new law through 1979, during which time the Administration proposes to develop an acceptable crop insurance plan to replace it. The 1973 Farm Act afforded yield deficiency and-or prevented planting payments on allotted acres only.

# Cotton Gin To Be Dedicated in Sept.

A 100-year-old cotton gin, a prize example of the transition from the antebellum plantation gin and commercial one of the late 19th century, will be dedicated September 16 at The Museum of Texas Tech University.

The gin was given to The Museum in 1961 and restored by the Texas Cotton Ginners and the Plains Ginners associations as a memorial to the late Ennis Moss Sr., inventor of the Moss Lint Cleaner.

But disaster protection spelled out in the new legislation will extend to all planted acreage.

Under the current law there is a \$20,000 per person limit on total program payments, but neither of the bills going to conference committee August 1 carries a limitation on disaster payments and both call for raising the limit on target price payments.

The House bill would phase up the payment limit from \$35,000 in 1978 to \$46,585 in 1981. The Senate measure puts the limit at \$50,000 for the life of the program.

The Commodity Credit Corporation loan price in 1978 will be between 50 and 51 cents per pound, basis Strict Low Midling 1-1-16 inch cotton, up from the High Plains rate of 44.6 cents this year. Also, when the new legislation takes effect producers will have the option to extend loans eight months beyond the current ten-month maximum except when the price of cotton exceeds 130 percent of the previous 36-month spot market average.

The target price would also be improved in the new program, from 47.8 cents in 1977 to at least 51.1 cents as stipulated in the Senate bill. The language of the House bill would raise the target to about 55 cents per pound.

"These program changes should be welcomed by all High Plains cotton producers," Cline says, "and PCG is proud to have had a part in making them possible."

Cleaner. The unusual gin was built about 1875 by Samuel A. Goodman who used oak beams, yellow pine studs and cypress siding for the 64' x 34' building. Equipment consisted of one gin stand with 48 10" diameter saws, a highly unusual two-story screw press and the necessary transmission apparatus, all powered by mules.

A hard day's work could produce six ginned bales. Cotton was delivered from the field to a receiving platform leading into the second floor of the gin.

Four men carried cotton in baskets from receiving stalls to the floor in front of the gin stand and assisted the ginner.

One man operated the gin stand, powered by two teams of mules. There was a baling crew that carried cotton in their arms from the lint room to the press, packed the cotton in the press box with their feet and operated the wood screw press which was powered by two mules.

The press is unique even among wood screw presses common to the last Century. Most screw presses operated by means of two mules attached to levers which turned the wooden screw. However, the Goodman press was operated by two mules turning the entire press box around the wooden screw, forcing it up or down.

Price said that the public is invited to the dedication scheduled for 2 p.m., September 16.

Willard B. Robinson, faculty member and authority on architectural history, has been supervising the restoration. "From an architectural point of view," Robinson said, "the Goodman Gin is noteworthy for its

beauty of craftsmanship, functional form and innovative mechanical operation.

"The restoration has been based on Bush's drawings and old photographs. The building came with the original press, but we have had to replicate the wheels that powered the gin stand and incorporate some steel support which will not be visible to visitors."

# Revenue Growth Large In Past Five Years

Comptroller Bob Bullock said Thursday that revenue from 10 Texas occupation taxes has grown a remarkable 133 percent in the past five years, reaching a total of nearly \$1 billion in 1976.

Bullock said the increase was led by the oil and gas production taxes, which leaped from a combined total of \$305.2 million in 1972 to \$793.7 million in 1976.

Oil and gas production taxes account for 80 percent of all occupation tax revenue in the state, he said. The Comptroller noted that during the five-year span, gas production taxes rose 219 percent and oil production taxes 125 percent.

Bullock said occupation taxes

are levied on the privilege of engaging in certain businesses in the state. His report on occupation tax revenue growth was contained in the Comptroller's July financial statement.

The monthly report noted that May state revenues totaled \$803.8 million, bringing total receipts during the first nine months of fiscal 1977 to \$5.2 billion, a 12 percent increase.

The biggest chunk of the increase, the Comptroller said, was a \$391.9 million jump in sales tax collections, which are running 15 percent ahead of 1976 levels.

State spending during May totaled \$587.8 million, boosting total 1977 to \$5.06 billion, a three percent increase.

Bullock concluded that the state closed out its fiscal books at the end of May with a cash balance of \$1.5 billion.

# be your own Meter Maid

You can add up your groceries while you're buying . . .

You can add up your gasoline while you're buying . . .

**But** can you add up your electricity while you're buying?

## Yes you can... Here's How!

Learn to read your electric meter. It will let you determine how many kilowatt hours you use in a given period of time . . . an hour, a day, a month or a year. That's how electricity is measured — by kilowatt hours used.

Your residential electric meter will have either 5 or 4 dials

Electric meters are easily read from right to left as you look at the meter. If the pointer on a dial is between two numbers, write down the smaller number. When the pointer is directly on a number such as one (1) (see center dial above) then read it as 1 if the pointer on the next dial immediately to the right has passed zero (0). However, read it as zero (0) if the pointer on that dial to the right has not reached zero.

The dials above read (from left to right): 9-3-1-1-5. If, however, the pointer on the second dial from the right above was between 9 and zero then the center dial would read as a zero.

Now let's read the same meter 24 hours later

This later reading is 9-3-1-3-8. Subtracting the first reading, 93115, from the new reading of 93138 — the answer is 23. Thus you would have used 23 kilowatt hours in the 24 hour period.

Now you can become a METER MAID and watch your meter like a miser if you choose. WE HAVE A BOOKLET CALLED "MANAGING YOUR ELECTRIC BILL" plus other WISE USE TIPS booklets that help keep you from wasting electricity and so help lower your cost. Any of these booklets are free for the asking at your Public Service office . . . come by and see us.

Clip this message — Save for reference.

## NEEDED — TIME FOR MEDITATION

Every working Mother and housewife will admit that there is never enough time — time for being the mother and wife she'd like to be, time for mending, time for planning well balanced meals. Certainly never enough time to meditate on God and His laws — to think on day by day happenings and consider whether or how they affect God's plan for her life.

One way for her to assure herself this time of needed meditation is to make it her habit to visit the church of her choice each Sunday. The quiet atmosphere of love and peace and prayer will restore a feeling of oneness with God and His plan, and give her strength for the work ahead.

"Be still and know that I am God". Psalms 46:10

"He restoreth my soul". Psalms 23:3

The Church is God's appointed agency in this world for spreading the knowledge of His love for man and of His demand for man to respond to that love by loving his neighbor. Without this grounding in the love of God, no government or society or way of life will long persevere and the freedoms which we hold so dear will inevitably perish. Therefore, even from a selfish point of view, one should support the Church for the sake of the welfare of himself and his family. Beyond that, however, every person should uphold and participate in the Church because it tells the truth about man's life, death and destiny; the truth which alone will set him free to live as a child of God.

**PARENTS' RESPONSIBILITY**

"Train up a child in the way he should go: and when he is old, he will not depart from it." Proverbs 22:6

Ask anyone what his most precious possession is, and he will almost invariably say, "My children." The desire for the welfare of our children enables us to "move mountains". We will do anything, give them anything, if we think it will help them.

The one most important thing we can do for them, however, is to instill in them a love of God, and a desire to obey him. The church can help you in this endeavor, inspire and strengthen you. We invite you to take your family to church this week. It may make a great difference in the life direction taken by your children.

**EVERYONE IN THE CHURCH  
THE CHURCH IN EVERYONE**

The Church is God's appointed agency in this world for spreading the knowledge of His love for man and of His demand for man to respond to that love by loving his neighbor. Without this grounding in the love of God, no government or society or way of life will long persevere and the freedoms which we hold so dear will inevitably perish. Therefore, even from a selfish point of view, one should support the Church for the sake of the welfare of himself and his family. Beyond that, however, every person should uphold and participate in the Church because it tells the truth about man's life, death and destiny; the truth which alone will set him free to live as a child of God.

The Bennie Reagan family

**KINDERGARTEN STUDENTS TO REGISTER** Kindergarten students will register Tuesday, August 23, 1977, at 9:30 a.m. at the Silvertown School.

It is important that all students who will be five before September 1 attend. If there are too many for one section, they will take those who are older for the fall section and the younger ones will attend the spring section.

**HIGH SCHOOL REGISTRATION SET**

Registration for the high school classes has been scheduled on Thursday, August 25, and Friday, August 26, in the Silvertown School.

Seniors will register at 10:00 a.m. Thursday, August 25. Junior registration will be at 1:30 p.m. Thursday, August 25.

Plans are for Sophomores to register at 10:00 a.m. Friday, August 26. Freshmen will register at 1:30 p.m. Friday, August 26.

**LIMITED-TIME OFFER!**

**Buy a StakHand 10 now, get a StakMover 10-W FREE!**

That's right! A FREE StakMover 10-W if you buy a StakHand 10 during this special offer. The StakHand 10 has proven itself to many operators who weren't satisfied with the limitations of conventional baling. With a StakHand 10, haying is strictly a one-man operation. Properly formed stacks can be stored outdoors without protection. And during this limited-time offer, we'll give you a time-saving, labor-saving StakMover 10-W that makes moving the stacks a simple, one-man operation. Come in today and find out more about this exciting offer!

**Pay no finance charges 'til May 1, 1978. Find out about Hesston's Finance Charge Waiver Program!** First with a better way.
