Reed Is Fans' Player Of The Week

Wayne Reed, 155-pound senior end and linebacker for the Owls, was selected by the fans as the Player of the Week for the Silverton vs. Lubbock Christian High School game. He is the son of Mr.

and Mrs. George Reed.

The fans' Player of the Week selection is being conducted by Nance's Venture Foods, and a ballot for voting on the Player of the Week for the game between Silverton and McLean is located next to Nance's ad in this issue of the Briscoe County News. Voting coupons are also available at Nance's, and balloting must be done at the store before Tuesday noon of next week.

According to Coach Jerry Watson, Reed was credited with eight tackles, five assisted tackles and a pass reception which netted the Owls a 20-yard gain and their only first down of the game against Lubbock Christian High School.

Miss Gill is a 1978 graduate of Silverton High School where she was a cheerleader and a member of the National Honor Society.

She is the daughter of Mr. and Mrs. John Gill of Silverton.

Miss Hutsell is also a 1978 graduate of Silverton High School, where she served as a cheerleader and was a member of the National Honor Society.

She is the daughter of Mr. and Mrs. F. E. Hutsell of Silverton.

Silverton's varsity Owls will host the McLean Tigers, a former Class A district rival, at 8:00 p.m. Friday on Owl Field.

Like the Owls, the Tigers have dropped back into Class B, and will be the first Class B opponent the Owls have had this season.

Last week, McLean was defeated 25-20 by Shamrock, while the Owls were losing to a private school that is said to be nearly the equivalent of a AA school, Lubbock Christian High School.

Following the game, the Lubbock Christian High coach reportedly told the Owls that they hit his boys as hard as anyone else has this season.

The Owls were unable to move the ball against the Eagles, but really did a good job of holding the Lubbock Christian score down until late in the game when desperation forced mistakes.

Lubbock Christian scored their first points of the night on a two-yard run. Off-setting penalties on the first conversion kick forced a replay, and on the second try the Eagles were thrown for a big loss. Thus the visitors led 6-0.

In the second quarter, Owl Quarterback Paul Brannon completed a pass to End Wayne Reed for no gain before the team was forced to punt. Reed brought down the Eagle ballcarrier as soon as he took possession of the ball. This drive was halted when Defensive Back Diji Couch intercepted a Lubbock Christian pass.

Just before halftime, Lubbock Christian scored from four yards out, kicked the extra point, and led 13-0.

The Owl defense stopped the Eagles' first third quarter drive and the ball went over on downs. Their next drive was stopped when Safety Kirk Durham recovered an Eagle fumble.

Early in the fourth quarter, the Owls held the Eagles on the Silverton two yard line, but were unable to move the ball. The Owls got off a short punt and on top of that were penalized half the distance to the goal.

It took the Eagles three plays to move the ball five yards to score. Their conversion try failed, and the visitors led 19-0.

Silverton's next series of downs

was concluded with a blocked punt that was recovered in the end zone for another score for the Eagles. Their kick was blocked, and Lubbock Christian held a 25-0 lead.

The Owls came back with a passing attack, completing an aerial to Back Kyle Bean and another to End Wayne Reed (this one for a first down at midfield). This drive was abruptly ended when Lubbock Christian intercepted an Owl pass and carried it for a touchdown, which was called back due to a penalty against the Eagles. Silverton returned the favor by committing a 15-yard infraction, and the Eagles scored from the 12 on a reverse, raising their lead to 32-0. The game ended on still another pass interception against the Owls.

The Owls have had a very tough beginning for an inexperienced team, and the coaching staff is working very hard to keep spirits up. You, as a fan, can help by encouraging the boys to keep trying, and by filling the stands Friday night to make a lot of noise for the Owls. Attend the FHA Hamburger Supper and then go out to the ballgame!

A stitch in time OR Elias Howe was a SEW-SEW inventor.

When Howe invented the sewing machine in 1846, he really got needed. Some tailors said a machine could never replace hand work, or so it seemed. But a few followed the thread of Howe's thinking. An automatic stitcher worked faster and more consistently, and the results were highly profitable.

Which happens to be the same reason folks today sign up for the Payroll Savings Plan. It's tailored to let you buy U.S. Savings Bonds automatically. And that makes saving faster and more consistent. With results that are highly profitable.

So, save regularly with U.S. Savings Bonds. You'll have your future all sewn up.

Owls To Try Claude Today

The Junior High and Junior Varsity Owls will travel to Claude this afternoon for games which are scheduled to begin at 5:00 and 7:00 p.m.

The Junior Varsity Owls played their first game of the season with Lubbock Christian High School at Lubbock last Thursday night, and came away with a 13-0 defeat. The Owls carried only 11 players with them to Lubbock, and all played the whole game.

Silverton's Junior High Owls lost their opening game of the season to Happy here last Thursday afternoon, 12-0.

The Owls were unable to make a first down on their first possession of the game, but recovered a Happy fumble on their fourth

down punt. The Owls held Happy to less than 10 yards on their first possession, and Happy punted into the end zone.

In the second quarter, the Owls made only five yards on three downs and punted. Tad Cornett knocked the Happy ballcarrier out of bounds at the Silverton 45 on the punt return.

Happy passed for the first first down of the game, from the Silverton 47 to the Silverton 25, with Clifford Clardy saving a touchdown by making the tackle. Happy made another first down on their next play to about the Silverton 11. From there the Cowboys scored, but the Owls stopped the two-point conversion, and Happy led 6-0.

The second half saw the teams holding one another and punting, but near the end of the third period Happy made a first down on the Silverton 15, and then scored from 10 yards out. The Owls also stopped this conversion, and Happy led 12-0.

A couple of fumble recoveries and a pass interception hurt the Owl offense in the fourth stanza. Tad Cornett recovered a Happy fumble on the Silverton 21 after he had thrown the Happy quarterback for a loss on the previous play. Silverton made a first down on a run by quarterback Kyle Couch shortly before the game ended.

Clifford Clardy was the leading rusher for the Owls. Jim Forbes was a defensive standout.

DO YOU RECALL.....

THOSE WONDERFUL YEARS...

They shall abundantly utter the memory of thy great goodness... The Lord has blessed us with children and now grandchildren. Our lives, and now theirs have been molded in the church. One generation shall praise thy works to another, and shall declare thy mighty acts. Pass on this priceless heritage to your children and grandchildren.

The Church is God's appointed agency in this world for spreading the knowledge of His love for man and of His demand for man to respond to that love by loving his neighbor. Without this grounding in the love of God, no government or society or way of life will long persevere and the freedoms which we hold so dear will inevitably perish. Therefore, even from a selfish point of view, one should support the Church for the sake of the welfare of himself and his family. Beyond that, however, every person should uphold and participate in the Church because it tells the truth about man's life, death and destiny; the truth which alone will set him free to live as a child of God.

What Think Ye?

"TO US PREACHERS"

I sat in the shop of a barber, and the barber cut my hair and shaved my face. And there came a seller of barber's supplies and spake unto the barber while the barber did things unto me. And the seller of barber's supplies spake thus: "Behold, I have brought unto thee a sample of our new brand of bay rum which I desire thee to try and see if it be not more mild than thou hast ever used."

And the barber spake unto me, "Shall I try the bay rum upon thee?" And I said, "Go to it; I'll try anything once." He put the new brand of bay rum upon my face and my neck. And he saith unto me, "How dost thou find it? Is it indeed mild?"

And I answered him, "Thou hast said; it is surely so mild that I cannot tell whether it be bay rum or rainwater!" The seller of barber's supplies answered and said, "If thou must have it bite, I might put in some red pepper."

Then I said unto him, "Mildness is very good in its place. A little mildness now and then is relished by the best of men; but if I pay

real money to the barber, I desire that there be some evidence that he giveth me the real stuff and not something out of the rain-water barrel. I would rather be hurt with something that is to do me good than be mollified by that which shall harm me or profit me nothing."

So I, leaving the barber shop, went unto mine own house where I sat me down to prepare wise words to speak unto the people Sunday morning. And it was in my heart to speak unto them in all gentleness, for I love them and they are very good to me. But I read where God said unto me: "Cry aloud, spare not, lift up thy voice like a trumpet and show my people their transgressions, and this congregation their sins."

And I did as God spake unto me, and I called them unto repentance and a new life. Then they said unto me, "Now that's the way to preach! We desire sermons that have some punch to them." And so I reflected that they had rather be hurt by that which was to do them good than to be pleased by that which would harm them or profit them nothing.

Some folks just like to argue, and will get into a discussion on most any subject. Take religion: they will argue about it, write about it, fight over it, even die for it, but it is almost impossible to get many people to live by it.

SMALLER CROP BRIGHTENS COTTON PRICE OUTLOOK

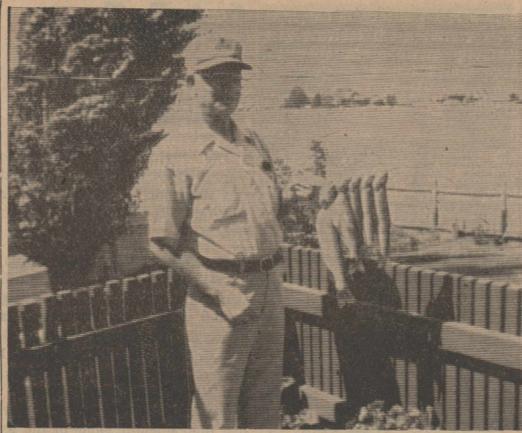

Prospects for a smaller cotton crop than was expected earlier this year have improved the price outlook despite sagging demand.

With deteriorating crop prospects in West Texas and California, U. S. production may be down to about 11 million bales instead of the 11.8 million estimated by the U. S. Department of Agriculture Crop Reporting Board on August 1. The 1977 crop totaled 14.4 million bales.

"The shortfall points to a price level somewhat higher in the second half of 1978 than the average of 49 cents per pound received by Texas producers during the first half of the year," notes Dr. Carl G. Anderson, cotton marketing specialist with the Texas Agricultural Extension Service. "However, supplies are expected to be adequate to meet disappearance. This means that carryover of cotton at the end of the 1978-79 season will be only slightly less than the 5.4 million bales on hand when the season started."

While the close balance between production and takeoff will cause the market price to be sensitive to news about any changes in worldwide production, the overall price increase will likely be small. Due to sluggish demand, a

much larger drop in production than now anticipated will have to develop to trigger a substantial jump in price, believes Anderson.

Even though planted acreage in Texas is close to that of last year, the crop is suffering from lack of moisture and hot weather. So it may fall short of the 3.7 million bale crop estimated by the Texas Crop and Livestock Reporting Service in early August. This compares with 5.5 million bales last season and 3.3 million bales in 1976. However, production prospects are better in other major cotton growing areas.

"The higher price earlier this year has apparently encouraged foreign producers not to reduce cotton acreage as much as planned earlier," notes Anderson. Foreign production is expected to slightly exceed the 49.3 million bale crop estimated for the 1977-78 crop year."

Foreign consumption is also expected to change little and will likely succeed production by about five million bales during the present year. That would be about the same size as the gap in 1977-78 and should maintain a strong export market for U. S. cotton, believes the marketing specialist. Cotton consumption in foreign countries is lagging as slow economic growth and a high rate of inflation are reducing the purchasing power of consumers, especially in Japan and several European countries.

"Economic conditions will likely continue to curtail the demand for cotton in the year ahead," says Anderson. "Current indicators point to a sharp slowdown in U. S. economic growth. An escalating inflation rate suggests less capital spending and a slackening in personal income growth that will dampen economic activity."

In the past, an economic downturn has resulted in a slump in demand for fiber, notes the specialist. The Gross National Product in constant dollars decreased 1.4 percent in 1974 and 1.3 percent in 1975 from the level in the preceding year. At the same time, total fiber consumption fell 13 percent in 1974 and another four percent in 1975 before rebounding in 1976 along with the upturn in economic activity.

WHEAT SUPPLIES AMPLE; 1979 SET-ASIDE IN EFFECT

The U. S. Wheat crop is about equal to expected use, according to the latest reports, but carryover is still large. Therefore, the U. S. Department of Agriculture has again announced a program to trim production in 1979.

"The acreage cut-back should keep prices from falling too much," notes Roland Smith, grain marketing specialist with the Texas Agricultural Extension Service. "But, with ample wheat supplies, prices will not show much increase this fall unless crop problems develop elsewhere."

Regarding the U. S. wheat crop, supplies are generally strong despite a below average winter wheat harvest. The Texas crop was hurt most—down more than half from a year ago. The spring crop looks good, however. Total U. S. wheat supply (production plus carryover) for the 1978-79 marketing year will be about three billion bushels, slightly below the 3.14 billion bushels last year. But this decrease will have little effect on the price picture, believes Smith.

While food consumption of wheat should continue near last year's pace, wheat feeding likely will be down due to stiff competition from the large feedgrain crop.

"Putting pressure on U. S. wheat prices are production and trade prospects for world wheat," points out Smith. "Foreign wheat production by major U. S. competitors could be up as much as 20 percent over last year. World wheat production for the current marketing year is estimated to be up eight percent while wheat use is forecast to increase only three percent."

One thing that may partially counter the negative aspects of the larger wheat crop on U. S. trade is the decline of the value of the dollar relative to world currencies, notes the specialist. This could give importers "bargain" prices for U. S. wheat in the year ahead.

Much of the current year's wheat—about 80 percent—is still being held by farmers in anticipation of some price improvement. However, with a good world crop in the making, the chances for stronger prices are dim, contends Smith. Therefore, he suggests some wheat selling at current price while keeping a wary eye on the market just prior to the feedgrain harvest.

The 1979 wheat program announced recently by USDA is similar to that for last year. "If a farmer wants to be eligible for the \$3.40 per bushel target price and the \$2.35 loan rate, he must set aside land equal to 20 percent of his planted wheat acreage for harvest," notes Smith. "In other words, if he certifies 500 acres of wheat, he has to idle another 100. Of course, his planted acreage and set-aside cannot exceed the Normal Crop Acreage (NCA) established on his farm for 1977. Compliance with the set-aside also provides the producer some disaster protection."

"Although no graze-out payment were announced for the program, wheat producers can graze the wheat during the six-month period established by local ASCS offices," adds the specialist.

About 75 percent of the 1978 wheat acreage had the required 20 percent set-aside to receive program benefits, but wheat prices are higher now than last year.

"We still believe that Texas producers will participate in the program at a high level," contends Smith. "Current wheat prices are still more than 50 cents a bushel below the target price, and prospects are not that good for strong price increases. The disaster protection also may be quite important."

HOG OUTLOOK CONTINUES BRIGHT

Hog production has been one of the few bright spots in agriculture for the past year or so. Producers have been receiving good prices and at the same time have kept supplies in line. And things look good down the road.

"The real key to good hog prices has been the industry's resistance to over-production which is the usual response to periods of profit," points out Dr. Ernest Davis, livestock marketing specialist with the Texas Agriculture Extension Service.

"Both breeding and market hog numbers have increased only one percent over a year ago. This means that hog operations should remain profitable through the first half of 1979 and probably longer."

From the supply standpoint, 1978 pork production appears to be near the same level as last year. While production during the July-September period should be about 4-5 percent above the same period a year ago, supplies during the last quarter of the year are expected to be down that same amount from 1977 levels.

"While pork supplies should be up 3 to 5 percent during the first three months of 1979 compared with the same period this year, actual farrowings have been run-

ning less than farrowing intentions for some time. If this trend continues, expected gains in supplies in early 1979 will be wiped out by reduced farrowings," notes Davis.

* As far as prices are concerned, the marketing specialist sees market barrow and gilt prices in the \$44 to \$47 per hundredweight range for the July-September period, then strengthening to \$46 to \$49 for the last quarter of the year. This strength in hog prices toward the end of the year will be a result of improved fed beef prices and lighter pork supplies, contends Davis.

YOUR SOCIAL SECURITY

by Janice Burns Ulmer
Social Security Representative
Question: I get social security retirement payments. I also work part time. In the past, some of my benefits have been withheld because of my yearly earnings. Didn't a new law just change the annual amount a person can earn without losing benefits?

Answer: Yes, but the change only applies to beneficiaries age 65-72. Under the new legislation, a person who is 65-72 can earn \$4,000 in 1978 and still be paid full social security benefits. A person 65 or older who has earnings over \$4,000 will have \$1 in benefits withheld for each \$2 of earnings. Further increases in the annual exempt amount are scheduled through 1982 when it will be \$6,000. After that, the exempt amount will be adjusted automatically to reflect raises in average

wage levels. Also, starting with 1982, no benefits will be withheld on account of earnings for beneficiaries age 70 or older. The 1978 annual exempt amount of peoples under 65 is \$3,240, with the \$1 for \$2 reduction on earnings above that.

For further information regarding Social Security benefits please contact the Social Security office, 1401-B West 5th Street, Plainview, telephone 293-4371.

A stitch in time OR Elias Howe was a SEW-SEW inventor.

When Howe invented the sewing machine in 1846, he really got needed.

Some tailors said a machine could never replace hand work, or so it seemed.

But a few followed the thread of Howe's thinking. An automatic stitcher worked faster and more consistently, and the results were highly profitable.

Which happens to be the same reason folks today sign up for the Payroll Savings Plan. It's tailored to let you buy U.S. Savings Bonds automatically. And that makes saving faster and more consistent. With results that are highly profitable.

So, save regularly with U.S. Savings Bonds. You'll have your future all sewn up.

CATTLE DRIVES ROUND UP STOCK FOR ABILENE, TEXAS

Cattle drives from all over the Southwest in years past had Abilene, Kansas as their destination. Each fall since 1960, Southwest stockmen have also rounded up cattle to go to Abilene—but in this instance, Abilene, Texas.

The 19th annual Cattlemen's Round-Up for Crippled Children is in full swing with proceeds benefiting the handicapped of the Southwest through the West Texas Rehabilitation Center and its campuses in San Angelo, Abilene and Snyder.

This unique fund-raising event for this private non-profit treat-

ment and diagnostic complex each year provides the necessary monies to operate a diverse program of services to the handicapped regardless of age, race, creed, color, place of residence or ability to pay.

Shelley V. Smith, executive director of the West Texas Rehabilitation Center said, "At this point we have received pledges for 70 head of cattle for our September 25th sale at Abilene Auction." Smith added: "In order to offset our operational deficit of \$225,000, we are going to need about 400 head of cattle this year, so we're hoping that the pledges will pick up quickly as September 25 approaches."

Smith went on to say, "As we must arrange to pick up many of the donated cattle from a wide area, we need to have the pledges as quickly as possible." Pickups, trailers and trucks will be roaming the roads and highways of the entire state with their loads of livestock that will ultimately turn into rehabilitation for the handicapped of the Southwest. Pickups have already headed for the tip of Texas near Raymondville to pick up the famous King Ranch cattle and others from the southern portion of the valley.

Last year's Cattlemen's Round-Up raised \$153,000 to help operate the Center. This year's operational budget for WTRC's three campuses is \$1.8 million to serve more than 6,000 handicapped individuals.

Anyone wishing to donate cash or livestock should contact Shelley V. Smith, executive director at the Central Office by calling collect (915) 692-1633.

authority where the property tax is imposed. The wording of the proposed amendment as it will appear on the ballot is as follows: "The constitutional amendment to exempt intangible personal property, requiring the legislature to exempt certain household goods and personal effects, and allowing the legislature to exempt all or part of the personal property homestead from state and local property taxation. The amendment requires the legislature to provide for the taxation of farm and ranch land on the basis of its productive capacity instead of its market value and allows the legislature to provide for the taxation of timber land on its productive capacity. The amendment permits local governments to extend the present exemption of not less than \$5,000 of the residence homestead of persons 65 and older to include certain disabled persons. The amendment grants an exemption from public school property taxes of \$5,000 of the market value of the residence homestead. It authorizes the legislature to grant an additional exemption from public school property taxes of an amount not to exceed \$10,000 of the market value of the residence homestead of persons 65 years of age or older and certain disabled persons. If a person 65 years of age or older qualifies for this exemption, the total amount of public school taxes imposed on that person's homestead may not be increased. The amendment prevents local governments from increasing property taxes unless the governing body provides public notice and conducts a public hearing. The amendment requires the legislature to provide by law for each property owner to receive notice of the revaluation of his property and the amount taxes will be increased. NUMBER ONE (S.J.R. 50)

S.J.R. 50 proposes an amendment to the Texas Constitution to delete an archaic reference to the "Deaf and Dumb Asylum." The amendment would allow the State of Texas to purchase products and services done by handicapped individuals in nonprofit rehabilitation facilities without complying with bid requirements applicable to other state contracts. The amendment also would eliminate the formality of the approval of certain state contracts by the Governor, the Secretary of State and the Comptroller of Public Accounts.

NUMBER FIVE (H.J.R. 37)

H.J.R. 37 proposes an amendment to the Texas Constitution to grant exclusive jurisdiction to justices of the peace in civil cases where the amount in controversy does not exceed \$200, except where the legislature gives exclusive jurisdiction to another court. The Protecting LIGHT

This lighted tower is a light shining in the darkness to guide sailors and ships through the night. Our Lord is our light who guides us faithfully through life, even though it be as a stormy sea — He knows the way. His word, as proclaimed in His church, will light your way and bring peace, joy and comfort. "Thy word is a lamp unto my feet, and a light unto my path." Psalm 119:105.

**EVERYONE IN THE CHURCH
THE CHURCH IN EVERYONE**

The Church is God's appointed agency in this world for spreading the knowledge of His love for man and of His demand for man to respond to that love by loving his neighbor. Without this grounding in the love of God, no government or society or way of life will long persevere and the freedoms which we hold so dear will inevitably perish. Therefore, even from a selfish point of view, one should support the Church for the sake of the welfare of himself and his family. Beyond that, however, every person should uphold and participate in the Church because it tells the truth about man's life, death and destiny; the truth which alone will set him free to live as a child of God.

It is not unrealistic to assume the American farmer could solve our world trade deficit. This deficit has arisen we are told from the importing of large quantities of foreign oil and petroleum products. This immediately tells us Americans use more oil than the balance of the countries use food. There are more hungry people in the world than Americans have automobiles, yet we have large surpluses of food-stuff which is not marketed worldwide. This tells us we no doubt do not have a good sales force in the international food business, and/or our politicians are not practical enough to realize the impact of food in the world market. Could be a point to give some thought.
