Labeled for PROTECTION

Some medicines may be taken internally; others are for external use only; therefore labels caution us as to their proper use. These precautions are for our own protection and good.

All things in life are not so clearly marked as to their proper use. The Bible is our source and guide, our label.

Thy word is a lamp unto my feet, and a light unto my path.

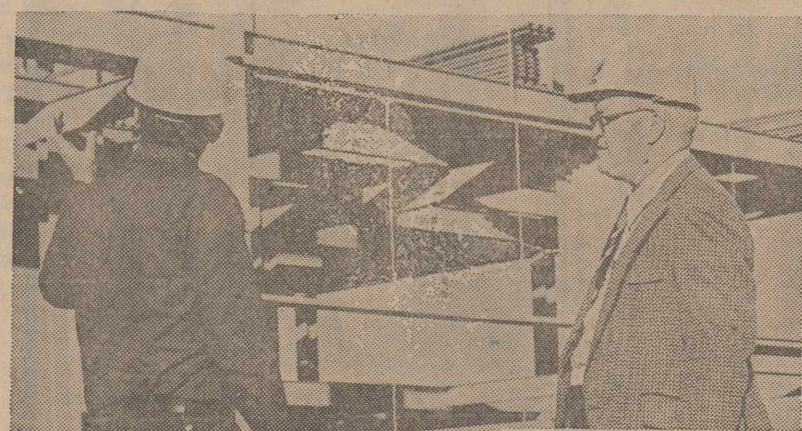

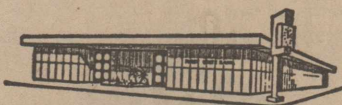

Psalm 119, 105

ATTEND CHURCH, STUDY GOD'S WORD

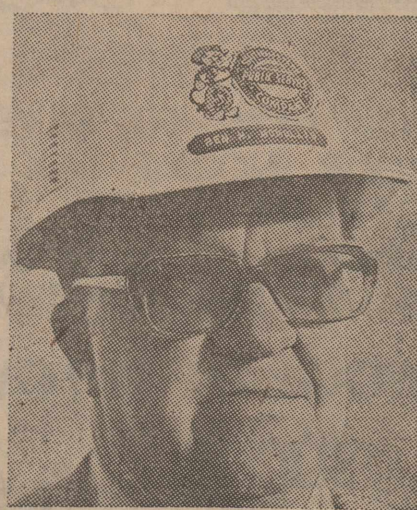

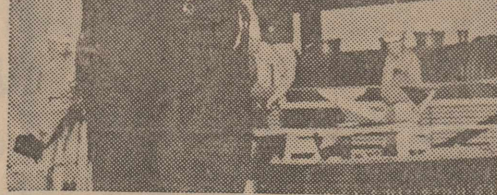

The Church is God's appointed agency in this world for spreading the knowledge of His love for man and of His demand for man to respond to that love by loving his neighbor. Without this grounding in the love of God, no government or society or way of life will long persevere and the freedoms which we hold so dear will inevitably perish. Therefore, even from a selfish point of view, one should support the Church for the sake of the welfare of himself and his family. Beyond that, however, every person should uphold and participate in the Church because it tells the truth about man's life, death and destiny; the truth which alone will set him free to live as a child of God.

A pleasure . . . and a challenge!

That's the way Ben McMullin, PRINCIPAL STRUCTURAL ENGINEER for Southwestern Public Service, sees his job . . . his role in the boy scouts . . . and life!

"You know, I've got some 30 years in scouting. I've done it all . . . workin' with the boys and the adult leaders. Lookin' back, I think the highlight in scouting for me was taking 11 boys to the National Jamboree in Idaho. Now that was an experience! It's been a pleasure . . . and a challenge. Same as my job at SPS. I'm the Principal Structural Engineer in charge of the power plant group . . . that's the steel and concrete that holds up the place, you might say. It's very exacting work. We combine past experiences with research on new and better materials and products . . . trying to make the next power plant we build more efficient than the last one. It's a real challenge but that's what it's all about . . . keeping the costs down for everybody. I've been at it 25 years now and I'm glad to be part of that team. We're doing the job we set out to do.

SPS has encouraged me in my job and in all my civic activities. You bet I'm proud to work for SPS . . . and for my community. For me, it's hard to imagine one without the other."

THE AG SIDE

Many are talking gloom for the farmer by saying farms are getting larger and before long they will be run by big business. This may be the case but some of the big corporate farms will tell you a different story. Most of the corporate farms who have tried to produce common marketable goods have had to give up and go back to products for which they could control the marketing as well as the production.

With the exception of a few cases our largest production of every agricultural product has come from what has been known as the family farm. A recent analyst survey showed that there is no way that large corporate farms can produce as cheap as the smaller farmer with constant attention to smaller acreage.

There is also so much crop diversification that if we were run by corporations on the farm more than half the products raised would be eliminated. Russian agriculture has proven the larger the operation in farming the less efficiency of production. There may come a day when the largest percent of the land is farmed by farming corporations but to make it interesting to investors in these corporations, the profit in farming will have to do a lot of growing.
