FIRE DEPARTMENT RECEIVES CHECK

Silverton Volunteer Fire Department recently received a check for \$150.00 from Texas Farm Bureau Insurance Companies as an expression of thanks for the department's work on the property of Harris Gin.

The money will be used for their loss prevention program.

The Texas Farm Bureau Insurance Companies pay fire departments this amount when the department works at a fire in rural areas, involving property insured by them.

The Insurance Company be-

lieves fire departments have contributed to reduce the amount of loss involved by fire and more importantly, to prevent fires. It is their hope this money will help the Silverton Volunteer Fire Department in their program.

Extension Highlights

Dirk Aaron
Briscoe County Extension Agent

Spring land preparation and crop planting are at hand, and farmers should have their tractors in good running order to help keep operators' costs down, and to prevent mechanical breakdown during critical operator time later during the season.

Attention to a few details can help farmers reduce fuel consumption in farm machinery, whether gasoline or diesel powered.

Perhaps the most neglected item on any engine is the air cleaner. A dirty air cleaner can cut down the amount of free air flow and change the fuel to air mixture. A tractor operating at full load needs about 1,200 cubic feet of air to burn one gallon of fuel. Anything less cuts down on power and increases fuel consumption.

Tractor engines also should operate at the proper temperature, usually 180 to 190 degrees F. Engines operating at lower temperatures because of faulty thermostats use more fuel, exert less power, and wear out faster.

Farmers can save as much as 400 gallons of fuel a year, based on 800 hours of tractor operation, by cutting down the time an engine idles. Studies show that tractors idle as much as 12 percent of the time and use half a gallon of fuel an hour at idle speed. A fast idle will use 40 percent as much fuel as the tractor engine needs at full load.

Pay careful attention to idle time when operating a tractor, make sure the engine thermostat is operating properly and service the air cleaner regularly. These practices will assist you in reducing operating costs, which is critical for 1985.

I want to take this way to say "thank you" to everyone who helped me in any way while I was in the hospital and since I've come home. I want to thank the doctors and wonderful nurses at Lockney Hospital—they are the best.

I want, especially, to thank Jerry Sue for her loving care and for the beautiful flowers. Thanks to every one for the prayers, cards, phone calls, and to Sandy for taking me to Lockney, and to Stella and Mildred for the food.

Thanks to each and every one and God bless you all. Maybe I can be up and help myself before long, God willing. We love you all.
