## WHEELER STORM WARNING SIREN

The next few months are "tornado season" in Texas, so a few pointers and safety tips on tornadoes are in order, says Dale Dunlap, County Agent with the Texas Cooperative Extension. Here are a few

general facts about tornadoes:

\*\*Tornadoes generally travel an average speed of 30 miles per hour but have been clocked at 70 miles an hour.

\*\*Tornadoes normally move from southwest to northeast although their direction of travel can be erratic and change suddenly.

\*\*Tornadoes are often spawned in thunderstorms that have accompanying large hail.

\*\*Most tornado damage is caused by violent winds but most tornado injuries and deaths result from flying debris.

\*\*Tornado winds may produce a loud roar similar to that of a train or airplane.

\*\*Tornadoes can occur with little or no warning although most occur during the mid afternoon or early evening hours. Stay tuned to weather forecasts during times of unsettled weather. When a tornado or severe thunderstorm "watch" is issued, it means that tornadoes or severe weather are possible in the area designated. On the other hand, a tornado or severe thunderstorm "warning" means that tornadoes or severe weather are occurring. Persons in or near the storm path need to TAKE COVER IMMEDIATELY!

\*\*Stay away from windows, doors and outside walls.

\*\*In small buildings or homes, go to a basement or an interior part of the lowest level. Closets, bathrooms and interior halls offer the best protection many cases. Seek cover under something sturdy.

\*\*In schools, local businesses or hospitals go to a pre-designed shelter area. Interior hallways on the lower floor are usually best.

\*\*In mobile homes or vehicles, leave and take shelter in a substantial structure. If non is available, lie flat in the nearest ditch or ravine and shield your head with your hands.

The key to surviving severe weather such as a tornado is prior planning. All family members should know where the safest areas of the home are in event of threatening weather.

## Storm (from Page 1)

it to the lake!

Wildlife is beautiful and sometimes sad. We had a pair of Canada Geese on our pond for all of my life. Every spring they would come to our place to lay their eggs and raise their family. It was fun to watch the little ones trying to fly. They would swim around the pond in a long line. One big goose would be in the front, then all the babies in the middle in a line, then the other big goose would be at the back. It was a beautiful family. When my cousins and I were little we rode 4-wheelers like that. Dad was in the front and mom at the back and all of the little kids rode in a line in the middle. Mom always said we were like the geese. Every year we looked for "Loosey and Goosey" to come back to raise a family. This year they made it back to us. They were together all the time. Then one day we only saw one goose. We thought the other one was on a nest, but we never saw her again. Goosey is grieving. It is sad. One day he was floating by the bank with his head in the water. He raised his head, looked at us and put his head back in the water. We thought he was about dead. The next day he was swimming in the pond. It is very strange. I hope he is ok, but I know that he is sad that he is alone.

We cleaned out the pig barn to get ready for next year. I don't know if I am going to raise a pig or not. I think I will show a heifer next time. That's it!
