## LIGHT SNOW FALL WEDNESDAY NIGHT

The people of Haskell awoke Thursday morning to find the earth covered with about one inch of snow which was quite a surprise. The snow is melting off and the sun comes out from under the drifting clouds occasionally. Unless there is a change in the weather there will be very little snow on the ground by night fall.

Haskell has experienced several changes in the weather since our last issue. Saturday morning a light sprinkle of rain fell, changing to colder weather during the day moderating by Sunday afternoon to pleasant weather with bright sunshine. The weather continued clear until Wednesday morning a little flurry of snow with another light sprinkle of rain changing to cooler weather. Not enough moisture has fallen to be of any benefit to the farmers. Rain is needed in most parts of the county while it is believed the feed crop will come up with the moisture will be needed to insure a stand of cotton. Reports from different sections of the county indicate that the cold weather of last Saturday did not seriously damage the fruit and grain crops.

Below is an expression from Mr. Brown which will better acquaint him with the voters of Haskell county:

"To the voters of Haskell County I take this means after urgent solicitation of many friends to announce as a candidate for County Judge of Haskell County, subject to the action of the Democratic Primary Election.

"I have been a citizen of Haskell County for fourteen years. I never before asked the people for an office, and neither would I at this time, if it had not been for the request of many have consented to run. I promise if elected to stand for the Constitutional rights of every citizen of the County.

"I do not believe in any man, or set of men, dominating the Courts, and if any one has occasion to come before the Courts, he certainly should have justice, for this is the place that the guilty should be prosecuted and the innocent defended.

"I do not believe in discriminating between good citizens as factors in the prosecuting of the law. I believe all law abiding citizens are eligible, and if elected, consider myself a servant of all. And I will do all in my power to enforce the law in the interest of the masses of the people.

"If any voter desires to know my position on any question affecting the interest of the people, I will gladly commit myself, privately or publicly.

"With these ideas and principles set forth, I earnestly ask your support and influence.

Signed, D. R. Brown."

## WHAT DO I OWE MY TOWN?

Everyone delights in seeing and talking with the man who is proud of his town in which he lives. He is the man to whom HOME really means something. He is the man who lives a happy, contented life both under his own roof and outside. He is the sort of a man who will be found consistently doing his trading in his home town. He is satisfied and happy in the thought that he is dealing with friends and neighbors and that in so doing he is doing his bit toward the completion of a foundation such as every solid, substantial, progressive town should have.

Ordinarily, the man who consistently patronizes home trade is the thrifty, dependable and successful citizen. He is known as a civic booster and he grows up with the town and prospers as it prospers. He buys at home, not only because he likes to throw his trade at the home merchant, but also because, being a careful man, he knows what he wants and wants to see what he buys. He does not believe in buying goods "unsight unseen" and he isn't going to take unnecessary chances by buying from a picture or a printed description in a Mail Order Catalogue.

The Fly by Night citizen, the unsettled, dissatisfied individual, is usually the one who buys away from home, from Mail Order Houses and stores in the big city. He buys elsewhere because his home town means little to him. He is a drifter through life, no matter whether he be a town man or a farmer a mere moth attracted by a far away flame. He is no evident prosperity of his own because he has not

joined forces with prosperity. In other words he has not identified himself with those things that build up the community and help to make for wealth, progress and contentment.

It is a well known fact that the Mail Order Catalogue is one of the most dangerous competitors the local merchant has to contend with and loyal citizens of Haskell should show a solid front by refusing to send or spend their money away from home and with strangers. There is no denying the fact that the big Catalogue Houses know their stuff. They broadcast their wonderful works of art with keen foresight and precision. Knowing just how to work upon the minds of the buying public they show up their wares so beautifully, and make their prices look so attractive, that many a dollar is sent away to them and thus lost forever to when, as a matter of fact, the buyer could probably have found a better grade of goods right here at home and even lower prices.

STOP AND THINK A MOMENT, FOLKS, before you send away that check or money order. WHO PAYS FOR THAT TREMENDOUSLY EXPENSIVE CATALOGUE? Who pays for that terrific overhead expense including the rentals, salaries, postage, insurance and general upkeep? YOU PAY IT FOLKS, and in doing so you help to support the Big Store in another city to the loss and detriment of Firms who really deserve your patronage.

DO A LITTLE FIGURING ON YOUR OWN HOOK. Take the above into consideration then add the cost of transportation to your out of town purchase and take into consideration

the fact that the class of goods you get is apt to be what is called "seconds." Also consider the trouble you may have securing an equitable adjustment in case the goods are unsatisfactory. Just size it all up from a fair common sense point of view and you will not be so ready to send outside dealers your trade.

By the way, do you realize just what is meant by the term "seconds"? If you have been or now, a catalogue buyer, this should be of interest to you. Practically everything we use is manufactured, except those things coming direct from Nature, and there never was a factory that could turn out its products 100 per cent perfect. There is always a percentage of the product imperfect and these are called "seconds." This imperfect product cannot be "junked" as the loss would be too great for the manufacturer to stand so a market must be found for these goods. This is where certain Catalogue Houses step in and become valuable customers to the manufacturer. These "seconds" are jobbed to either Mail Order Houses or Professional Auctioneers and the sucker who buys them is the Dear Public.

On paper, or via the smooth tongue of the Auctioneer, these are genuine bargains and sold at a loss to the firm. Strange to say, there are enough of Barnum's folks born every day to absorb this product and while those who are stung today are sadder but wiser tomorrow, the new crop steps in and pays the price for theirs just the same. Are you one of em? "THERE'S A SUCKER BORN EVERY MINUTE", SAID BARNUM. (copyright)

### Mark Twain on "Man."

"Man can't sleep out of doors without freezing to death or getting rheumatism; he can't keep his nose under water over a minute without being drowned; he is the poorest, most dumsy creature of all creatures that inhabit the earth."

"He has to be oiled, hoisted and swatted and bandaged to be able to live at all. He is a nicely sort of thing any way you take him--a regular British Museum of infirmities an infernal few."

"He is always undergoing repairs."

### To Stop a Cough Quick

take HAYES' HEALING HONEY, a cough medicine which stops the cough by healing the inflamed and irritated tissues. A box of GROVE'S O-PEN-TRATE SALVE for Chest Colds, Head Colds and Croup is enclosed with every bottle of HAYES' HEALING HONEY. The salve should be rubbed on the chest and throat of children suffering from a Cold or Croup.

The healing effect of Hayes' Healing Honey inside the throat combined with the healing effect of Grove's O-Pen-Trate Salve through the pores of the skin make a cough a walk.

Both remedies are packed in one carton and the cost of the complete treatment is 50c.

Just ask your druggist for HAYES' HEALING HONEY

machine as unreliable as he is would have no market value.

"The higher animals get their teeth without pain or inconvenience. Man's came through months of noble torture at a time when he is least able to bear it. As soon as he gets them they must be pulled out again. The second set will answer for a while, but he will never get a set that can be depended upon till the dentist makes one.

"Man starts in as a child and lives on disease to the end as a regular diet. He has mumps, measles, scarlet fever, whooping cough, croup, tonsillitis, diphtheria, as a matter of course. "Afterwards as he goes along his life continues to be threatened at every turn by colds, coughs, asthma, bronchitis, consumption, quinsy, yellow fever, blindness, influenza, carbuncles, pneumonia, softening of the brain and a thousand other maladies of one sort and another.

"He's just a basketful of pestilent corruption, provided for the support and entertainment of microbes. Look at the workmanship of him in some particulars.

"What is his appendix for? It has no value. It's sole interest is to wait for grape seeds and breed trouble.

"What is his beard for? It is just a nuisance. All nations persecute it with the razor. Nature, however, always keeps him supplied with it instead of putting it on his head.

"A man wants to keep his hair. It is a graceful ornament, a comfort, the best protection against weather, and he prizes it above emeralds and rubies, and half the time Nature puts it on as it won't stay.

"Man isn't even handsome, as compared with the birds; and as for style, look at the Bengal tiger--that ideal of grace, physical perfection and majesty.

"Think of the lion and the tiger and the leopard, and then think of man--that poorest thing! The animal of the wig, the ear trumpet, the glass eye, the porcelain teeth, the wooden leg, the silver windpipe--a creature that is mended all over from top to bottom.

### Not Seriously Hurt.

A car containing a number of negro field hands was being drawn by a mule driver, a darkey of 20 was endeavoring to induce the mule to increase its speed, when suddenly the animal let fly with its heels and dealt him such a kick on the head that he was

stretched on the ground in a twinkling. He lay rubbing his woolly pate where the mule had kicked him.

"Is he hurt?" asked a stranger and jumped from the conveyance and was standing over the prostrate driver.

"No, boss," was the old darkey's reply, "dat mule will probably walk and 'bout head for a day or two, but he ain't hurt."

### Music Notes.

"What is your occupation?" "I used to be an organist." "And why did you give it up?" "The monkey died."

### NEW RECORD IN AUSTRALIAN RACE WON BY STUDEBAKER

Speeding across desert wastes, countainous roads and rugged canyons, a Studebaker Special-Six touring car has just established a new record in a thrilling race against time from Fremantle to Sydney, Australia.

The car was driven by John Burton, a veteran Australian motorist. It went through the gruelling grind of 2,889 miles in five days, 21 hours and 45 minutes. This is 16 hours and 12 minutes faster than the previous record of 8 days, 13 hours and 57 min-

utes. The new record was set by the Studebaker through to a new record in his race, by clipping off considerable time

between Fremantle, Adelaide andbourne. The Special Six averaged the entire 2,889 miles under extreme severe conditions and came through in perfect order.

This new Australian record of Studebaker's comes on the heels of new record recently established by stock Studebaker cars in the Sydney and in the Union of South Africa

A great deal depends upon the course, but a business new grows the vision of the boss.

**Yes—it can be done**  
The finest of cars can be sold at these prices

**T**HE Studebaker name guarantees to you the utmost in fine-car construction. For 72 years it has stood for quality, for honest workmanship, for square dealing.

It has always stood for style and class. Remember Studebaker carriages—supreme examples of fine coach building.

Consider our facilities—mark what we have at stake. \$90,000,000 in assets, \$50,000,000 in plants and equipment, \$10,000,000 in body plants alone.

Note our multiplying sales—the sensation of Motordom.

It is fair to assume that we can and do build the finest cars and at Studebaker prices.

**What is a fine car?**  
A fine car means the best materials any cost can buy. We use 35 formulas for steels, each known to be best for its purpose. We pay a premium of 15% on some to get the formulas exact.

All Studebaker models are equipped with Timken bearings. There are few cars in America, regardless of price, which equal ours on this point. In our Light-Six, for instance, we put more Timken bearings than are used in any competitive car, within \$1,500 of its price.

A fine car means fine engineering. We spend \$500,000 yearly on that department, employing 125 able men.

It means careful construction. We have 12,500 up-to-date machines. 1,120 of our operations are exact to 1/1000 of an inch. 360 are exact to one-half of 1/1000 of an inch.

It means infinite pains. For instance, we machine all surfaces of our crankshafts as was done in Liberty Airplane Motors. We are

the only makers of cars at our prices who do this. It means careful inspection. With us it means 30,000 inspections in the manufacture of each Studebaker car.

**Luxury and beauty**  
It means a car to be proud of. Our body finish includes 15 coats of paint and varnish. Chase Mohair is used to upholster our closed bodies—made from the soft fleece of Angora goats. We offer much extra equipment.

Where savings come  
Then how do the Studebakers so far undersell any comparable cars? Because we build so many. The fixed costs are divided by enormous output—150,000 cars per year.

Because we build our own bodies. The saving to you on some types is up to \$300 per car.

Because we make our own forgings, saving another profit there.

Because our plants are modern and efficient. We have spent \$38,000,000 on them in the past five years.

Because we keep our men, make them partners, pay them large bonuses to stay. Changing men is expensive.

Because we conduct this business in every way on the best modern lines.

**What buyers save**  
The Studebaker Light-Six Touring Car sells for \$1,045. Under ordinary manufacturing conditions it would need to cost you from \$1,200 to \$1,400.

On our Special-Six the difference might be \$400 to \$700.

On our Big-Six type the difference may run into thousands, depending on the number produced. For this car compares only with the highest-priced cars in Europe and America.

You will respect the Studebaker methods when you come to know them. You will admire the cars they create. You will delight in the values.

Remember that last year 145,167 fine-car buyers, after comparisons, chose the Studebaker models. So many people could not be wrong. Learn why they did so before you buy a car at \$1,000 or over. You owe that to yourself.

**Go and See**  
**Why Studebaker Leads**  
Studebaker is now the world's largest builder of quality automobiles.  
Last year, 145,167 fine-car buyers paid \$201,000,000 for them.  
There are 13 models.  
Prices begin at \$1,025.  
Go see the reasons for this trend. See why sales have almost tripled in three years. Why these cars have become the sensation of Motordom.  
You owe that to yourself before you buy a fine car.

Some of our Big-Sixes, for instance, have two nickel-plated bumpers, one or two extra disc wheels with cord tires, a courtesy light, a motometer, steel trunk, etc.

This factory, remember, is the ancient home of fine coach work.

A fine car must be enduring. A Studebaker Big-Six, built in 1918, has so far run 475,000 miles. That means 80 years of ordinary service.

COTTON PRODUCTION CONTEST ENCOURAGED OVER STATE

We have noticed articles in daily papers in regards to cotton production contests being put on in various counties of the State. These contests are conducted by various organizations, such as the Y.M.C.A., Chamber of Commerce, Farm Association and other clubs. It is noted that in most cases three cash prizes are offered to the farmers producing the greatest net returns on 10 acres of cotton.

In view of the fact that cotton is the leading crop of Haskell County it seems that such a contest would be of value here. There is no doubt but what a large number of farmers would be willing to enter such a contest and do everything possible to increase their yield per acre to win one of the prizes.

The progressive spirit has always prevailed in Haskell county. Only recently there was organized a Haskell County Chamber of Commerce which has as its aim the advancement of those things which are beneficial to the county and the people as a whole. It is believed therefore should a contest be desired in this county it will be backed to the fullest by this organization.

A County Agent has been appointed for this county and has recently assumed his duties here. We are sure that he will do everything in his power to make a cotton contest a success if it is desired by the farmers and backed by the business men.

Haskell Citizens Attack Finny Tribe

M. O. Field, R. D. Lacky and two other citizens living south of town were in the city early last Friday morning preparing for a fishing trip to the placid waters of Big Paint. They purchased long cane fishing poles and a good supply of hooks and lines and another thing was observed they carried plenty to eat with them. They had been on fishing trips before. It is only the young and unsuspecting that rely altogether on the hook and line for subsistence on these outings. No report has been made by any of these gentlemen regarding the catch, but it is presumed that the fish they caught were "weighed in the balance and found wanting", when a fellow angler to catch a big one it is always exhibited by the fishermen to their friends in town, but spousal of us very common place thing out there that it's no trouble to land the big ones when they are after trout.

The heavy tribute of the parties were unannounced by someone that they left the fish in the stomachs will show up the next day they will see how they have done.

NATIONAL GARDEN AND BETTER HOMES WEEK

We are especially glad that National Garden Week is being sponsored by the General Federation of Women's Clubs in America, the demonstration of which is to be held in Haskell the first week in April, by the Magazine Club.

The program for the National Garden week commands support from all those who would see more of our homes and our city blocks given that quality of charm and beauty that only growing things can add. Weather it be arrangement of shrubbery around a house, or planting of trees, the intelligent cultivation of plants around the house is to be encouraged.

A house does not suggest a home unless it has a garden and growing things around it. The house without the garden has an unfriendly appearance and seems but a temporary stopping place for the occupants. In striking contrast is the house with a garden and nature's setting. Here is the home atmosphere, the appearance of permanence and the feeling that a happy and contented family lives within. This is why the General Federation of Women's Clubs and Better Homes in America are working side by side for more gardens and better homes.

In the education of a child the home is more important than either church or the school. All thinking people agree about it. The home is where character is formed, and the more forming we do in the home the less reforming will be necessary outside.

There is a law compelling a man to send his children to school, but only the law of a man's being compels him to provide a home—a home, not a lodging or a shelter or a rented place, but a home for them.

Why have a better homes demonstration in your home town?

- 1. To demonstrate the advantage of thrift for home ownership.
2. To overcome the present shortage of homes in America.
3. To make a sweet and wholesome home life available to all.
4. To assist and encourage home makers and home builders.
5. To improve the home environment thereby helping to build character.
6. To mobilize community pride for a common object—Pride of Home.

TREE TRIMMING

The Committee reports that most all residents should do some tree trimming:

- The following are asked to give special attention to theirs:
The McConnell Home, Dr. Taylor, T. J. Arbuckle, Elmer Irwin, O. E. Patterson, J. E. Bernard, Mrs. Ellis' Home, Methodist Church, John Couch, Magazine Club, Judge Hughes, C. W. Bledsoe, A. J. Smith, W. N. Huckabee, Jno. W. Pace, J. F. Kennedy, M. O. Lyle, R. C. Couch, M. H. Gilliam, T. H. Hancock, J. K. Quinn, Judge Radloff, The Jail, Court Yard, Sam A. Roberts, Mrs. Thompson's Home, W. ## FROM THE FIELD

BY W. M. FREE

**J. M. Woodson Dairy**  
We enjoyed a trip with County Agent W. P. Trice on a visit to the east and north of Haskell Friday afternoon. We drove to the home of J. M. Woodson one of Haskell's dairymen, and looked through his plant and observed very closely how he feeds and milks his cattle and gets the milk ready for delivery.

Mr. Woodson has 25 head of select jersey cattle and 20 of this number he is milking. He recently purchased a registered male from a reliable breeder to head his herd which is one of the best individuals it has been our pleasure to see. Mr. Woodson has had at the head of his herd for the past several years registered males but this time he has gone higher up in class and has now one of the best males in this section of the state. He has a number of registered cows and his entire herd is made up of well graded cattle.

It is quite an inspiration to see the methods used by Mr. Woodson in the operation of this up-to-date dairy. He has two big silos with the combined capacity of 240 tons. He is not using his silos for an ornament but puts up ensilage each year and he has enough on hand now to feed through the month of April. His milking shed is up to the

requirements of the sanitary laws of the state. The house where he prepares the milk for delivery is equipped with modern machinery and when the milk is put into bottles and delivered to customers in town they are getting milk that is absolutely clean and sanitary. He has a large flock of Rhode Island Red Chickens, which are well bred and very beautiful. His birds are direct descendants of the A. and M. College strain which was introduced here by Mrs. J. M. Baker of Haskell. He is putting in a new Delco Light System in the place of the one he has been using for the past three or four years. Mr. Woodson uses this plant for power to operate the machinery of his milk packing house as well as lights and other conveniences of the home and farm. He owns a good farm from which he grows most of his feed which he uses in feeding his cattle. The dairy business is not an experiment with him, he has been in the business for more than 16 years and has profited by the proceeds of the business. He is conservative and does not try to over stock his farm, but sticks closely to the business and tries to make it better instead of getting the idea of expansion, to the extent that his expenses would exceed his income. He believes that doing well is hard to beat, and sticks closely to his job.

**Visit the City of Weinert**  
After leaving the home of Mr. Woodson we drove to the city of Weinert by the way of Powell School arriving there about 4 p. m. We spent about an hour in the city and visited a number of the stores and business houses. We note the thrift of the city by the new houses going up. Fred Hoid who is connected with the Buda is building a nice barn roof bungalow and other houses could be seen going up on all sides. R. H. Jones the lumber man said on our previous trip to Weinert that he was selling more lumber than ever before and it looks very like a continuance of good business for him. We came back to Haskell by the way of the Benjamin Road and Paper Woods took passage with us at Weinert and came to Haskell.

We note that the farmers are further advanced with their crops than usual and the small grain looked good. Some oats that had just come up looked real good and with a few showers will grow off nicely. But very little small grain has been sown compared to other years. Haskell county will plant the greatest row crop in its history this year, and it looks like we will have a greater cotton acreage planted than ever before.

Mrs. R. C. Montgomery attended a Vaudville Tea, given by the joint hostesses Memos, Harry Fuller and W. R. Harlan in the home of the latter in Stamford last Saturday afternoon.

R. C. Montgomery and H. M. Rike made a business trip to Olney last Thursday. They drove through the country in an automobile.

### SCHOOL NEWS

The work of this semester has been much better than any semester since I have been connected with these schools. The grades have been higher and the failures have been much less than any semester. Not much over 25 per cent of the high school pupils failed in one or more subjects as compared with from 40 to 50 per cent before. Many of those that failed are in a position, if they will work some harder, to pass in their subjects because their failing grades are not so low.

The work in the elementary grades was also better than at any time since we have been connected with these schools. The failures were fewer and the grades better. This is encouraging to the teachers. If all of the parents would co-operate properly with the schools to see that their children did the necessary amount of studying each school night at home and to see that their children were not on the streets after school, our school work would be much better and the children would build much better foundations for success in life. There is nothing that is more demoralizing to boys and girls than idleness, loafing and running the streets in the afternoon and night. This habit, long indulged in, will ruin the best boys and girls on earth.

All of next week will be patrons week and the patrons are earnestly urged to visit the school to see what their teachers and children are doing. Specimens of every day work will be on exhibition and regular class work will be in full swing so that the parent

may see just what we are doing. Please take a little time off from your work or your home duties and come out and see what your children are doing in school. Just come in and take your seat and stay in any room as long as you desire. At the recess periods you can visit with the teachers and look at the work on exhibition and talk with your teachers about your children's school work.

The Haskell schools are the biggest and most important enterprise in your town. You spend more of your money on them. The happiness and success of your children depend largely on the kind of school you have. Therefore don't you think you should give them a little of your time, interest and sympathy. The Superintendent, teacher and pupil can not make your school, also requires your interest and co-operation. If your schools continue to succeed, Haskell will continue to grow and prosper. If your schools fail, Haskell will suffer greatly. A man that does not take a healthy interest in the school and knocks them is not a good citizen. So come out fathers and mothers next week and see what your schools are doing and thus show your children and teachers your are backing the schools.

Week before last the preliminaries in the Junior Declamation Contest was had and Bessie Bee Kaigler won out for the Junior Girls and Thomas Brasher won out for the Junior Boys and they will represent the Juniors of the Haskell Schools in the County Interscholastic League Contest on March 28th. On Wednesday evening of that same week the preliminaries in Debating was held and Lynda Robertson and Thelma Williams won out for the girls and Ewell Bagwell and Hugh Anderson for the boys of the Haskell High School. These two teams will represent the Haskell High School in the County Interscholastic League Contest on March 29th. On last Wednesday night was held the preliminaries in Senior Declamation in which 8 girls and 4 boys contended. Fern Case won first place and Louise Kaigler won second place for the girls and Milton Simmons won first place and Charles Brasher won second place for the boys. Milton Simmons and Fern Case will represent the Haskell High School in the County Interscholastic League Contest in Declamation on March 29th.

All of these contests have been exceptionally good this year. They mean much to the training of these boys and girls for an efficient life. There has been more interest in these contests than ever before. However, many more boys and girls should be interested in these contests for they furnish wonderful training that can not be secured in any other way.

The Juniors are to be congratulated for the success of their play. It was a good play and participants all did well. The play was a credit to the class and the Haskell High School. Miss Killgore deserves much credit for training these pupils and it was gotten up in just two weeks time. The faculty and the class appreciate very much the fine audience that greeted the giving of this play. The money taken in will be used to help pay for the High School Annual. The Sophomore Class under the direction of Miss Chambers will give a play in April.

### An Explanation

Since I announced the coming of Mr. Louis Zuckerman, the converted Jew, twice and we were disappointed both times, it seems necessary that I make some explanation. I acted in good faith both times. The first time I had his promise to speak on Tuesday night at the court house. The crowd assembled and he did not appear. Later he claimed that he did not understand he was to be here. He then promised to be here on Sunday, March 9, and speak in the court house at 3 p. m. I have his letters in which he assured me he would be here without fail. He also called me by long distance telephone and assured me he would be here at the appointed hour. Then just a day before he was to speak I received a postal which read "Can not be with you coming Sunday Louis Zuckerman". I am very sorry of this disappointment and can explain it only on the grounds that Mr. Zuckerman has gotten in bad with the Seminary at Ft. Worth and is cancelling his engagements. I learned this last week while in Ft. Worth.  
Leon M. Gambrell.

Mrs. J. C. Lewellen of Roberts was in the city Saturday and stated to a Free Press reporter that they had brought their son, Henry, home from the sanitarium and he is doing nicely and will soon recover from his lung illness.

One of the largest congregations that has visited Haskell on a similar occasion were here Sunday afternoon to hear the Vaughan Quartet sing. The expression from all was very complimentary.

J. R. Dismore and family were Haskell shoppers from Howard Monday.
