THOUSANDS OF VISITORS VISIT OLD BATTLESHIP

Many thousands of visitors come an nually to the Boston Navy Yards to see the famous old frigate CONSTITU TION. Her ancient bulwarks, muzzle loading 24 pounders with which she battered into submission the Tripolidistinctly favorable to the tan forts in 1804 and four British war ships in the war of 1812, and her lofty spars and rigging are of perpetual in terest contrasted as they are by the lines and batteries of the modern steel warships which keep her company from time to time at the Navy Yards. These visitors carry away with them a new appreciation of what Americans of an earlier and less secure day did upon the sea. The sight of this beautiful old ship instills a deeper reverence for the dignity and beauty of American ideals and for the Constitution of the United States, for which she was named. A move is on foot to restore her to her original staunch condition, not for active service but as a memorial to the Freedom of the Sea which she gained for the American people forever in 1812. It is planned to sail her into every important sea and inland port of the country after her restoration.

"Old Iironsides" is one of six ships authorized by Congress on March 27th, 1794. President Washington lost no time in proceeding with their building, as he had said to Congress in 1786; "It EVERS LARGE SUMS is in our own experience that the most sincere neutrality is not sufficient guard against the depredations of nations at war. To secure respect to a neutral flag requires a naval force organized and ready to protect it from insult and aggression." The ship was 1922 to July, 1923 according launched at Boston in 1797, ten years After the Constitution of the United States had been adopted. CHEVROLET offers every modern convenience found on cars of higher price. Merit is a built-in feature which accounts for its constantly growing popularity, not only with individuals, but with great commercial organizations requiring great fleets of cars and who buy not from guesswork or sentiment, but from rigid and determined effort to procure the most Economical Transportation, that their dollars will buy. CHEVROLET has proven its merit. It does not repre-

sent an experiment. The years of usage and extensive research work of General Motors have eliminated that. Large commercial users of motor cars have realized this fact, which accounts for their adoption of CHEVROLET. Individuals are realizing this fact more each year, which accounts for the growing popularity of CHEVROLET in this territory, as is evidenced by the following sales in Knox and Haskell counties for the month of June:
