## Fridays To Be Watering Days During Dry Spell

City Council decided in a meeting Wednesday afternoon to set Friday as lawn watering day, unless rainfall comes before that time to relieve the situation.

Good cooperation has existed since the water shortage accrued last week and ample supply has been available for domestic use.

Unless rain relieves the situation, Friday of next week will be the next lawn watering day. Under this arrangement the Council hopes to get over the extreme period.

Many towns over the country are having the same situation and several of them have ample water supply, their pipe lines are not adequate to carry enough water for demand.

## State Loan For Pipe Line Being Considered

The following news release was given from Austin in regard to water supply for Rotan:

"The Rotan Municipal Water Authority wants a state loan of \$900,000 to finance a pipeline to Snyder to get a new water supply for Rotan and the surrounding area.

Clarence Crowe of Dallas, attorney for the Authority, said a delegation at the Texas Water Development Board meeting July 27 will make formal application for the loan. A notice of intention to apply has been filed.

Wells near the Fisher-Scurry County line provide Rotan's water and a pipeline brings the water in.

Creation of the authority was authorized last year by the legislature. It includes Rotan and the area immediately around it and an area half a mile on each side of FM 1614 along which the pipeline lies.

A tentative agreement between the authority and Snyder has been reached, with Snyder selling treated water to the authority for 27.7 cents per 1,000 gallons.

Homer A. Hunter, engineer, had recommended a 12-inch line from Snyder to the present well field, and a new 8-inch line from that point to Rotan.

Bonds have not been voted for the project, but an election is being planned for September."

## Rotan Represented At Boy Scout Camp

Troop 133 of Rotan had six boys and their Scoutmaster to attend the annual Scout Encampment at Camp Tonkawa, 4 miles southwest of Buffalo Gap, Texas. Making the encampment were Gerald Ashbrook, Chris McCasland, Arlin Collins, Charles McCall, Bob Witherspoon, David Smith, and Scoutmaster Louie Hayes. All boys except David were Tenderfoot Scouts before camp. During the camp, these boys passed their Second Class scout requirements and some of their First Class requirements. Bob Witherspoon passed both Second Class and First Class requirements. David Smith, who was in the old troop before, is a Star Scout and he received his cooking Merit Badge while at camp. The boys did a good job at camp and learned a great deal. Everyone attending seemed to have had a good time. The hope was to carry at least fifteen boys to this camp, but only six could make it. Boys who didn't get to go this year will surely want to work on their requirements and be ready to go next year so they can get a taste of the thrill in boys gathering together to do their scouting.

Court of honor will be held July 31st for the boys that have passed their tenderfoot requirements. Troop 147 from Sweetwater will conduct the ceremony. All parents of the scouts and boys interested in becoming scouts are cordially invited to attend.

## New Chairman For Crippled Children Fund

Charlie Morris, chairman of the Cattlemen's Round-Up for Crippled Children, announced the establishment of a horse division of the round-up. In announcing the division, he named Ed Heller of Dun-dee, Texas as chairman of the new division.

Heller is a rancher and quarter horse breeder who operates the Round E Ranch at Dun-see, Texas. He is well known in the livestock industry and rodeo and quarter horse world. He contested in major rodeo circles for ten years, participating in Saddle and Bareback Bronc Riding and Calf Roping.

Heller's long association with the American Quarter Horse makes him most valuable as chairman of this division. He was one of the first inspectors for the American Quarter Horse Association and has judged most of the top quarter horses in the business.

He is a director of the American Quarter Horse Association, director and arena director of the Santa Rosa Round-Up, director of the Texas-Oklahoma Fair, director of the Maskat Temple of the Shrine, and a member of the Methodist Foundation. Heller today confines most of his rodeo activities to judging. He has judged some of the top rodeos in the circuit and was a judge for the Texas Cowboy Reunion Rodeo in Stamford.

Heller has been a chairman for the General Division of the Cattlemen's Round-Up for the past two years and will be in charge of the entire southwest area for the horse division. Heller pointed out that this was an opportunity for the Horse Breeders of the Southwest to support a worthy project. He also stated that the sale for the colts and horses will be on September 29th, the same day as the cattle sale, at the Abilene Livestock Auction Commission.

Guests in the H. T. Fillingim home Saturday night were their daughters and families, Dr. and Mrs. Stanley Gilbert, Lisa, Jan, Stan and Susie of Dallas who left Sunday morning for Crosbyton to visit briefly with Mr. and Mrs. Homer Fillingim. Also coming Saturday night were Mr. and Mrs. Doyle McSpadden, Tina and Chip of Uvalde, who went to Wolfert Sunday to visit friends. They shall be abundantly satisfied with the fatness of thy house; and thou shalt make them drink of the river of thy pleasures. For with thee is the fountain of life: in thy light shall we see light."

Readings from "Science and Health with Key to the Scriptures" by Mary Baker Eddy will include (p. 246): "Life is eternal. We should find this out, and begin the demonstration thereof. There is some good in all things no matter how bad it might seem.

You take this case of our great Billy Sol. It proves how rotten this farm program actually is and it is still wrong to lie, steal and misrepresent, no matter who you know in Washington.

And then there is the case at Ft. Worth where the police had to kill a Negro to keep him from hurting people. Now when they have to shoot a white man who has gone off his rocker; well, that is different.

Now we socialists disagree with those doctors up there in Canada. Their services should be made available free for us whether they like it or not. And best of all -- old

Mr. Kruschev is happy, I am sure, that the highest court we have has made it unpopular to pray. Everybody will want to pray now that it is against the law.

Mrs. J. R. Strayhorn returned home Wednesday night of last week from a visit with relatives and friends in Fort Worth. **If you take your truck for granted**

*...it's a good one!*

A truck that doesn't call for a lot of attention, that just does its job every day, is a great asset. This is the thing most users tell us they like about Chevrolet trucks—their reliability. And this, of course, comes from quality. Sound engines, strong frames, double-wall construction, insulated cabs, separated bodies

and cabs, tight tailgates . . . are some of the features that help Chevrolet trucks work longer and bring back more of your investment at trade-in. If you wish you had a truck that cost you less thought and attention, put your money on quality. Make your next buy a dependable Chevrolet truck.

## Important To Keep VA Beneficiary Listings Up To Date

Thousands of veterans are neglecting to keep up to date their listing of a beneficiary for their GI insurance policy proceeds, says John S. Gleason, Jr., Administrator of Veterans Affairs.

Because of this failure to keep the VA informed of changes necessary to reflect the births, marriages, deaths or divorces that occur over the years, their insurance proceeds may not be paid to the individual one in the manner the veteran would wish.

The VA must pay the proceeds of the insurance policy to the beneficiary designated by the veteran himself.

Changes in family status cause designations made years ago to be out of harmony with the veterans present wishes.

But the Administrator pointed out, the VA has no alternative but to pay the insurance proceeds to the beneficiary of record in the VA files.

Gleason said that a recent sampling in which the VA asked a group of Veterans if they wished to change beneficiaries or payment methods brought six out of ten affirmative replies from those returning the questionnaire.

He strongly urged all veterans holding GI policies to make certain that up to date beneficiary designations and payment methods are on file with the VA.

Necessary forms for these changes may be obtained from any VA office in person or by mail or may be received by writing directly to the VA insurance office where the veterans policy records are kept.

### WIDOWS STATUS MAY NOT AFFECT CHILD'S PENSION

Unmarried minor children of deceased veterans may be eligible for pension payments even if their mother has remarried or is ineligible for other reasons.

Ineligibility of a veterans widow to draw a pension does not affect the eligibility of the veterans children, the Veterans Administration emphasizes. Whenever widows on the pension rolls become ineligible, their payments are stopped but are continued to the eligible minor children.

dren.

But if the widow has not applied for a pension, knowing she is ineligible, or if her claim was disallowed, the VA has no record of minor children who may be eligible. Unmarried children of deceased veterans are eligible for pension payments until becoming 18 years old, or until age 21, if they are attending school and their personal incomes are not too great.

### RANKS OF SPANISH-AMERICAN WAR VETS NUMBER ONLY 28,000

Today, 64 years after the outbreak of the war with Spain, the roll of living Spanish-American War veterans has dwindled to an estimated 28,000 from the 392,000 who served in that war. The Veterans Administration says that the average age of the survivors is nearly 84 years.

Of the estimated 28,000 Spanish-American War veterans, there are slightly more than 26,000 on the compensation or pension rolls. The veterans are most heavily concentrated in California where there are 4,000 and in Florida, New York, Ohio and Pennsylvania, each of which has about 2,000.

There are about 10,000 Spanish-American War veterans in each of the following states: Illinois, Indiana, Kentucky, Massachusetts, Michigan, Missouri, New Jersey, Oregon, Tennessee, Texas and Washington with probably another thousand living outside the United States.

In the other 34 States and the District of Columbia, Spanish-American War veterans range from a handful to less than 500, the VA estimates.

## For Safe Motor Trip Follow These Rules

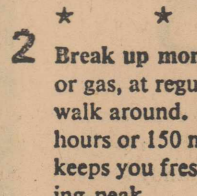

FLINT, Mich. Your vacation trip this summer will be a lot safer and more enjoyable if you will get plenty of rest each night and limit your driving to 10 hours per day.

These are two of the most important rules followed by Buick test drivers in compiling a record of 3,000,000 miles without an accident at the General Motors Proving Grounds, Milford, Michigan.

A. E. McManama, general supervisor of Buick's road test department, lists the following as cautions for Buick's driving team:

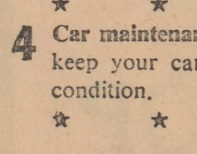

1 Good living habits — plenty of sleep and rest, and a good frame of mind with no worries while driving.

2 Break up monotony — stop for coffee or gas, at regular intervals, get out and walk around. Never go more than two hours or 150 miles without a stop. This keeps you fresh, alert and at your driving peak.

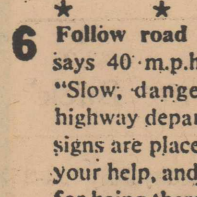

3 Limit your Daily Driving — ten hours of driving per day is the limit. After that you are asking for trouble.

4 Car maintenance — it's a must to keep your car in top mechanical condition.

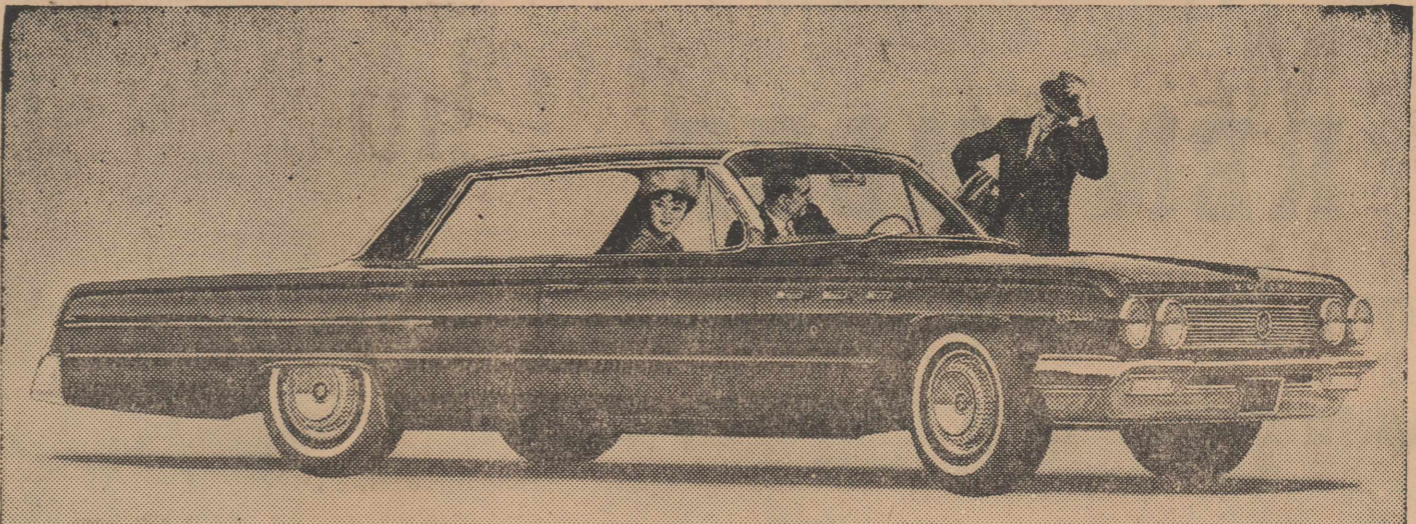

5 Drive a tidy Car: Loose articles, litter, packages, etc., can be dangerous. Keep the inside of your car neat and tidy, everything packed in convenient places where loose items can't slide around. Packages piled on the rear window ledge become missiles in case of a collision, and they also block the view of the driver behind you.

6 Follow road conditions: If the sign says 40 m.p.h., believe it. If it says, "Slow, dangerous curve," take the highway department's word for it. The signs are placed along the roadway for your help, and they have a good reason for being there. Dusk and dawn are poor visibility driving times. Use extra care then.

"These are the rules we follow," points out McManama, "and everyone of them can be adapted by the motorist. Strict adherence to them is the best insurance we know against accidents."

How can this car have so much extra—and still be almost low-priced? Answer... it's a Buick... in name, styling, quality and resale value. Yet its price is right close to many models of the "low-priced" cars. So before you do any buying, come see how little extra it costs to get all the extra values included in LeSabre's surprisingly low price. Some examples...finned aluminum front brakes—safest made! A 401-cu. in. Wildcat V-8. Exclusive Advanced Thrust engineering that moves the engine forward—gives you straight tracking, flat cornering—and a nearly flat front floor! Turbine Drive automatic transmission—smoothest there is! And lots more you'd never guess LeSabre gives you. Your Buick dealer's great trades make LeSabre an even greater buy right now! **BUICK LESABRE IS THE BUY**

## About Your HEALTH

A weekly public service feature from the Texas State Department of Health. HENRY A. HOLLE, M. D., Commissioner of Health

Parents have their hands full remembering all the things needed for a child beginning school for the first time. But one time they should put on their list is a birth certificate.

This word of advice from W. D. Carroll, state registrar, whose vital statistics staff at the Texas State Department of Health is responsible for handling the flood of requests for birth certificates for children entering school for the first time this September.

Many parents tend to put off requesting copies of their youngster's birth record until the last moment, resulting in a heavy work overload.

The vital statistics staff, despite long hours of night and weekend work, can process just so many requests before school begins.

More than 170,000 children are expected to enter elementary schools of Texas for the first time this fall. The estimate is based on calculations made by the Texas Education Agency.

A good many parents, some of whom may have waited too long in past years, have already requested and received birth records on this year's new scholars, but tens of

thousands of additional records will have to be processed between now and the first time that first school bell rings in September.

More than one youngster has been forced to postpone his first days at school simply because his parents couldn't produce proof of his age when it came to register for him.

Carroll's advice to parents: "Send in your request today to the local registrar, county clerk, or the State Department of Health."

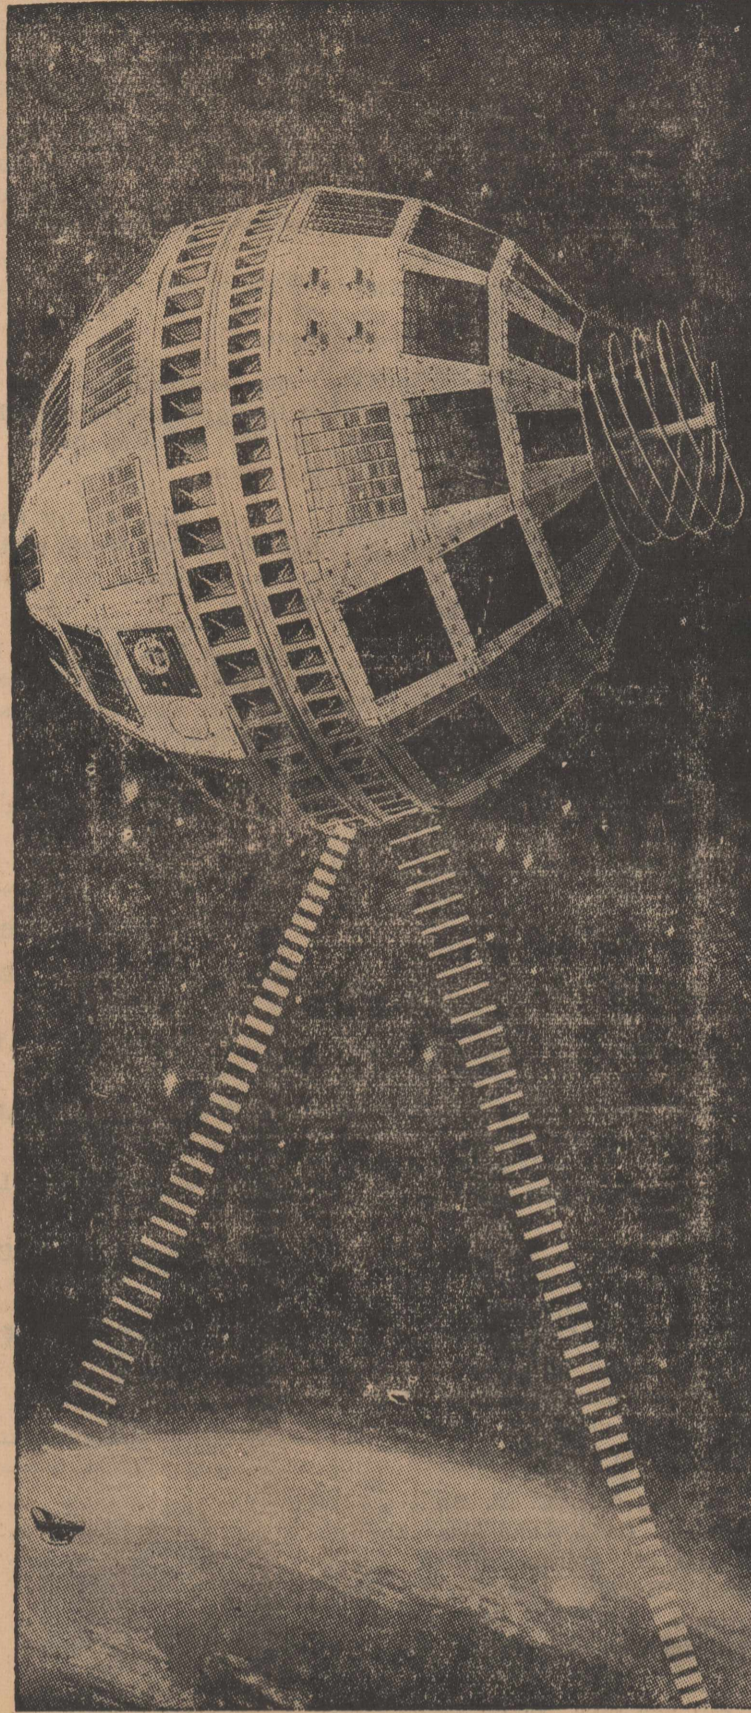

All you have to do is give the child's name, date and place of birth, the mother's maiden name, and the name of the father. This information, with the necessary fee should be addressed to the local registrar, county clerk, or to the State Department of Health, Section on Records and Statistics, 410 East 5th Street, Austin Texas.

Something else: Be prepared to show school officials a record of "shots" your youngster has had. Depending on local school board regulations, proof of immunizations against smallpox, whooping cough, diphtheria, and other diseases may be required.

## New "TELSTAR" relays phone calls and TV pictures for first time!

Bell System microwave-in-sky satellite is latest communications triumph for America arising from telephone research

The world's first private enterprise communications satellite is now being used for dramatic experiments in relaying telephone calls and television internationally.

Its name: Telstar. It was launched from Cape Canaveral at Bell System expense by the National Aeronautics and Space Administration.

Telstar receives signals beamed to it from a ground station, amplifies them and transmits them to another station on the ground below—perhaps an ocean away from the first one. The new satellite thus acts as a microwave relay station in the sky, enabling voices, TV pictures and data messages to leap thousands of miles in a new and exciting way.

The ground stations in the U.S. now being used for Telstar were built by the Bell System at Andover, Maine, and Holmdel, New Jersey.

Telstar is a first major experimental step toward a worldwide satellite communications system that was first proposed as a practical venture at Bell Telephone Laboratories. Progress toward such a system would not have reached its present state without continuing research and development by the private communications industry.

Above all else, Telstar is the latest achievement in an unending Bell System quest—the search for ways to make your telephone service still better, more economical, and more useful.

**VFW Auxiliary To Hold Writing Contest**

The Ladies Auxiliary to the Veterans of Foreign Wars announced today the opening of its 28th annual National High School Writing Contest. The topic will be "What I Can Do For My Country."

The writing contest, first started in 1935, is intended to put before the student some problem of patriotism, citizenship or similar topic about which he must study and learn in order to write the essay.

During the last school year some 40,000 students wrote on the contest topic, "America the Beautiful - How Long Without Clean Water?" The U. S. Department of Health, Education and Welfare supplied students with free kits of background readings on water and the importance of pollution control, and awarded to each state winner a special certificate. Dr. Albert E. Burke, Cheshire, Conn., an authority on conservation and world affairs, served as chairman of the national judges.

Students in all public, private and parochial high schools are eligible to enter the contest. National prizes are: First, \$1,000 cash; second, \$500; third, \$250; fourth, \$100 and gold medals, and 20 other cash awards for honorable mention. State and local contest winners receive additional Auxiliary awards which vary with the community.

**A Special Report**

**Army National Guard's Mobilization Termed 'Most Successful' in History**

WASHINGTON—Now that the period of the "Berlin Mobilization" is coming to an end—now that the active services have had time to increase their striking power and the immediate need for the reserve forces is over—many people are asking: "How effective were these National Guardsmen and Reservists, anyway? How long did it take them to become truly combat-ready?"

The answer from one high Pentagon source: "This was the most successful mobilization in the history of the United States." Thus states Major General Donald W. McGowan, Chief of the National Guard Bureau.

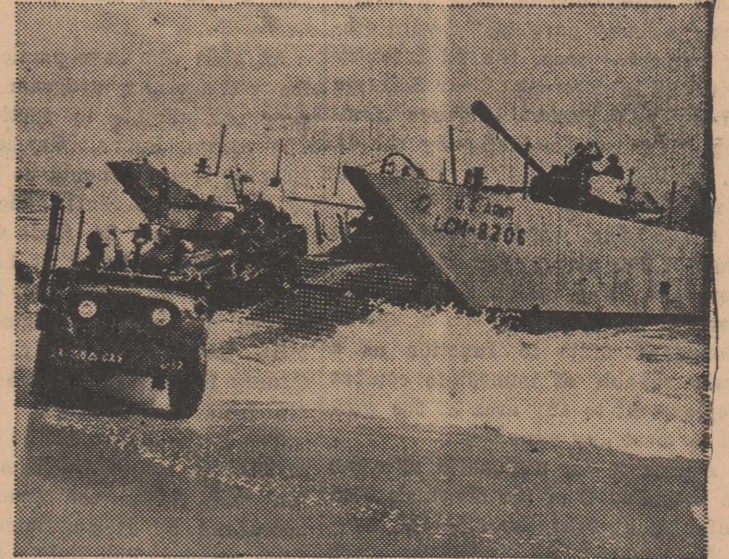

General McGowan is a man who ought to know. He has spent a lifetime in the National Guard and has been through three mobilizations himself. His accomplishments include leading an armored cavalry regiment through the Normandy invasion, commanding a Guard combat division, and guiding the entire 470,000-man Army and Air National Guard through the most crucial—and fruitful—years of its existence.

"To see how well the Guard did in this mobilization," General McGowan said recently, "you have only to look at the record of the two divisions that were called to active duty: the 32nd Infantry Division of Wisconsin and the 49th Armored Division of Texas."

Here are the facts that bear out General McGowan's claim.

Back in 1955, both the 32nd and the 49th were among six National Guard divisions selected for a new high-priority status by Gen. Maxwell D. Taylor, then Army Chief of Staff. General Taylor called this his "Six-by-Six" plan because he required these six divisions to be combat-ready within six months after they were mobilized. All but forgotten by the general public, the plan is significant now by the contrast that it offers to the events of the past ten months.

Instead of taking six months, the 32nd and 49th were declared completely combat-ready in four months—and this included the two weeks it took them to get to camp and two weeks to leave at Christmas time. If the world situation had required it, they could have made it in three months.

**HIT THE BEACH!**—Jeeps and tanks of the mobilized 150th Armored Cavalry Regiment of the West Virginia National Guard roar down the ramp of a landing craft at Ft. Miles on the Delaware coast. The swiftness with which the 150th became combat-ready last winter earned it a place in the Army's elite Strategic Army Corps (STRAC).

It was a grueling experience, not soon to be forgotten by the members of these units.

At Fort Polk, Louisiana, the 49th Armored was challenged in the dust and mud with rugged combat exercises requiring its tanks and men to maneuver and fire exactly as they would on the battlefield. At Fort Lewis, Washington, the 32nd was challenged in the tall pines and in the mountains, day and night, against a tough, clever aggressor who turned a routine tactical exercise into an infantryman's nightmare.

But all this seemed worthwhile when, immediately after being declared combat-ready, both divisions were assigned to the Army's Strategic Army Corps (STRAC), the first National Guard units ever to be assigned to this elite fighting force.

So impressive was the Guard's performance, in fact, that General James Van Fleet reported: "The quality of these units is far above any previous mobilization that took place in World War II or Korea."

Are there any specific reasons for such a marked improvement in our citizen-soldiers?

"Yes," says Gen. McGowan, "and the primary one is the six months training program which provides active duty

basic training for every non-prior service man we enlist. This has raised National Guard training to the unit level across the board.

"Then, too, we avoided our mistake of both world wars of reorganizing Guard units after they were called up. In 1959 we converted the entire Army Guard to the new Pentomic structure and when the Berlin crisis came upon us, we were able to provide the Army with the type of units it really needed. All they had to do was finish their training.

"And finally, this was the first mobilization in modern history in which we were able to preserve the integrity of our units. In Korea, you will remember, many of our key officers and NCOs were pulled out of their units to beef up overseas-bound active Army units. This helped the Army but it sure weakened our Guard units."

These are the facts of the Berlin Mobilization. But they do not tell the whole story. It remained for Sen. Henry M. Jackson of Washington to put the overall effect into words.

"This is the first time," he said, "that a President has been able to use the military power represented by our reserve program to achieve a foreign policy objective."
