W. M. S. of the Brushy Church Makes Wonderful Progress

The Brushy Woman's Missionary Society of the Baptist church at that place is one of the youngest societies made phenominal progress since its organization. It now has 43 active members and its organization dates back to December 1927 when it held its fire meeting and began actual work. Mrs. T Jones is the president of this society and she has through much effort inspired the members with zeal which has won for them this wonderful success that have attained in these few months. Every member is faithful in attendance on every Monday afternoon and sickness or other providential hind-

rance is all that keeps them from their meetings. They attribute their progress to the guiding spirit of the Lord Nothing easier, says their president than to meet all collections necessary During the month

Important Announcement to every owner of a Model T Ford

of the Dittrict on

ON MAY 25, 1927, when Henry Ford first announced his plans for making a new car, he announced also that he would continue to make parts for the Model T Ford. He said:

"The Model T Ford car was a pioneer. It blazed the way for the motor industry and started the movement for good roads everywhere. It broke down the barriers of distance in rural sections, brought people in these sections closer together, and placed education within the reach of everyone. We are still proud of the Model T Ford. If we were not, we would not have continued to make it so long."

For twenty years, the Model T Ford led the automobile industry and it still serves more people than any other automobile. Over one-third of all the automobiles in use today are Model T Fords - an indication of the sturdy worth of the car and its value to people in all walks of life the world over.

The Ford Motor Company will continue to make replacement parts for these cars "until the last Model T is off the road." That is a part of Ford service. That is what Henry Ford meant when he said: "We believe that when a man buys one of our cars we should keep it running for him as long as we can and at the lowest up-keep cost."

Because of this policy a considerable part of the Ford manufacturing plants is given over to the making of parts for the Model T Ford. These replacement parts are made of the same material and in the same way as those from which your car was originally assembled.

Make it a point, therefore, to see the nearest Ford dealer and have him look over your Model T Ford. You may find that a very small expenditure will enable you to get thousands of miles of additional service, and at the same time protect the money you have invested in your car.
