tion by one corporation would block progress on a program so new that its potential power for good is almost beyond imagination. We are now ahead in space communications because the taxpayers of America paid the research bill. We have spent \$25 Billion of taxpayers' money in research on the space sciences. Therefore, I strongly feel that the taxpayer mut re-

NEWSLETTER From U. S. Senator Ralph W. Yarborough

Here in a land where the Indians talked by smoke signal not too long ago, we have developed a new method for sending television, radio, telephone and wireless telegraph messages all over the world. It is done by sending up what we call satellite into space and relaying signals from it to receiving stations at various points on the globe. Hundreds of millions of tax dollors

went into the research that makes this modern system possible.

Now, we in Congress must decide whether this great new force

shall be turned over to a giant private monopoly or whether it will remain in the hands and control of

the people for the general good. I am a member of a group of senators who introduced a bill for public ownership of the space commun-

ications satellites. Private domina-

Dear Fellow Texan

tain ownership of the satellites. The 'taxpayer deserves a return on his money under a program like the government-owned TiVIA or the Panama Canal Company. That's why I'vs joined with a group of senators to support a bill for government control of our rights to space. I oppose monopoly control by one company at the tax-

payer's expense. The space communications program is too big for a private corporationto handle. It involves treaties with foreign powers . . . far too much of a share of the powers of government to turn over to one private corporate monopoly.

American people must hold on to the golden space-age promise in the areas of world peace and good will. The debate in the Senate is over this conflict. The bill I support is in the public interest. In my opinion and in the opinion of others helping in this fight, the private bill we oppose is not in the public interest but would only benefit one special interest.

Telegrams are coming into my office urging me to stand fast. Let me cite a few of these telegrams from private citizens.

From Corpus Christi: "Don't give up the ship in the great give-away." From Dallas: "We're all behind you here." From a business executive in Chicago: "I am heartily in agreement with you." A man and his wife in New York: "Keep up the good fight for public ownership."

Felow Texan, the public ownership that I propose would not put the United States government in the telephone or telegraph or radio or TV business. The government would merely own the satellite and rent space in the spectrum to all the broadcasting systems and telephone and telegraph companies to let them compete in the true free private enterprise system .

If we create one giant private monopoly we destroy the free enterprise system. Free enterprise means competition and government ownership of the satellite -- with the government sending no messages but renting space in the spectrum to the different competing telephone, telegraph, TV and radio sompanies -- would maintain the true private enterprise system.

Fellow Texan, I believe the Senate flebate is helping to awaken the American ·people to the promise and to the dangers in world-wide space communications.

at least one billion cavities, each of the adult need for fillings is bea potential source of toothache, dental authorities now estimate. They say tooth decay is so widespread that it involves 95 percent of every persons and is still increasing.

A virtually incurable chronic disit is to be conqured at all, tooth decay is a particular nemesis of elementary school-age youngsters although all ages are vulnerable to its ravaging pain.

Children are said to develop cavities at about the same ratio as do adults -- approximately one per child per year. But scholarly sur-

The teeth of Americans contain veys show that whereas one-third ing met, only one-fifth of the cavities in children's teeth are being repaired.

The reason, Texas Health Department dental officials speculate, is that so many parents still cling to ease which must be prevented if the totally false notion that so-called "baby teeth" are unimportant because they are temporary. The frequent result is that good dental health for children is still relatively scarce commodity.

In an attempt to reverse the trend toward almost universally poor dental health among youngsters -- particularly in underprivileged homes -the dental division of the Texas financial and educational support to dental clinics in selected local health departments around the State.

The addition of flouride in carefully controlled amounts of public water supplies is known by dental researchers to be efficient deterrent to dental decay. The State Board of Health at a recent meeting reaffirmed its belief that foluri-

dation is safe and effective, and re- 4-Hers To Attend commanded that local communities consider the practice wherever applicable and practicable.

There is one positive step all parents can take to avoid the fate of toothlessness among their children, dental scientists agree. It's a simple step, requiring only that 14. youngsters be taken to a dentist for a tooth and gum inspection before being enrolled in school each

Before the visit is over, the dentist will have tutored the youngster in good dental hygiene at home, hoping the habits will take hold and last into adulthood.

When enough children have received such instruction, and make it a part of their daily lives, the blight of tooth decay may slowly fade from the American scene.

# SAID FORD FALCON TO THE CHEVY II (AND CORVAIR)

No matter which compacts you compare the facts favor the Ford Falcon. Here's proof!

FALCON VS. CHEVY II

Chevy II tried to copy Falcon's lines, length, wheelbase, height, width—and many inside dimensions. But here's where it missed!

- Falcon's standard engine is a smooth Six; Chevy II's
- Falcon offers more passenger comfort—almost 1 inch more rear leg room for example!
- Falcon has bigger rear doors-11/4 inches wider! Falcon goes 6,000 miles between oil and oil filter changes\*; Chevy II, 4,000—a 33% savings!
- Falcon has extra layers of insulation—50% more
- Falcon holds the Mobil Economy Run's gas mileage record for a Six or Eight!

PLUS 10% more glass area, multi-leaf instead of single-leaf rear springs, wider trunk opening with a mat inside, heftier bumpers, greater maneuverability, more models to choose from! And Falcon's prices† start lower!

FALCON VS. CORVAIR

Falcon is a true family carl It's not only longer but almost 4 inches wider than the Corvair. It holds 6 big people in comfort. (Just try to seat 6 in a Corvair!) And that's just the beginning!

- Falcon's engine delivers more horsepower than Corvair's rear-mounted engine!
- Falcon packs away almost twice as much as Corvair's front-end trunk!
- Falcon bridges the bumps better with a 1½ inch longer wheelbase!
- Falcon has bigger brakes than Corvair! • Falcon seats are comfortably higher—1½ inches higher in front, almost 3 inches in back!
- PLUS 33% savings in oil and oil filters, record gas economy, 10% more glass area in the windshield alone, bumpers almost twice as deep—all in addition to Fal-con's bigger doors, more shoulder room, deeper seats!

And Faicon's prices† start lower! Based on comparison of manufacturers' suggested rett. | prices, including heate
