## Hudnall No. 1 Is Reported Good Well

According to the daily press, Fox and Ransdell of Abilene completed No. 1 H. O. Hudnall as a Flippen Sand oil discovery three-fourths mile east of Rotan in Fisher County.

The strike is in Section 124, Block 2, H&TC Survey. It is one-half mile southwest of Noodle Creek production in the Rotan Field, but there is no nearby Flippen production.

It was finalized for a daily potential of 122 barrels of 42 gravity oil, flowing through a 12-64-inch choke and 74 perforations at 3,950-3,982 feet. Casing was set at 4,222 feet. Total depth was 6,650 feet, plugged back to 4,222. Gas-oil ratio was 500-1.

The operator suggested the name "Rotan Flippen Sand Field" for the discovery.

## Voters To Decide Water Bond Question

Voters are urged to express their wishes at the poll tomorrow, Friday in the proposed water bond issue. Regular election hours will be held and voting done at City Hall.

Strong sentiment prevails over town and many citizens expect the issue to carry by as high as 5 to 1. There is no doubt as to the need, our water supply is rapidly dwindling and the present 6 inch line will not carry enough water during dry, hot periods without growth, and with the present influx of building there seems to be no question of the need for more water.

All service organizations of Rotan have endorsed the issue as well as women's clubs.

# --ELECTIONS-- Friday, August 31, 1962

- Where to Vote: Both elections at City Hall.
- Why 2 Elections?
  - a- One Election called by City of Rotan to authorize the City Council to sign a contract with the Rotan Municipal Water Authority to purchase water from the Authority.
  - b- One Election called by the Rotan Municipal Water Authority to give Board right to issue the bonds in the amount of \$900,000 to construct pipelines.
  - c- Should qualified electors vote in both elections? Yes, only qualified Electors who reside within the city limits can vote on the water contracts. All qualified voters who live within the authority can vote on the bonds.
- From what source will the water be obtained? The Rotan Municipal Water Authority has signed a contract to buy treated water at the Treatment Plant in Snyder, which gets its water from the J. B. Thomas Lake through contract with the Colorado River Authority.
- Will the supply be ample? Yes, the contract with City of Snyder runs for 35 years, with the Rotan Municipal Water Authority having the option to extend the agreement for 25 years.
- Will the water be of good quality? Yes, same as used by City of Snyder, Big Spring and Odessa.
- How will the money from sale of the bonds be used? To build a 12 inch line from Snyder to the Rotan Well Field and an 8 inch line from the well field to Rotan which will supplement the present 6 inch line from the well field to Rotan. Use of the two lines from the well field will permit ample water to be delivered to Rotan under pressure at Snyder plant without expense and cost of pump stations.
- From what source will the bonds be paid? The City will pay one-third of the Average Annual Principal and Interest requirements, to the Authority out of its net revenue and the Rotan Municipal Water Authority will provide two-thirds by a tax levy.
- Who pays Snyder for the water? The City of Rotan will pay the Authority the exact cost of the water from Snyder plus 3 cent per each 1M gallons. The extra 3 cents will give the Authority's Board funds to operate.
- Will the well fields be discontinued if the elections carry? Yes, it is believed it will not be necessary to use the well fields, which are depleting very fast. It costs the city annually between \$25,000 and \$30,000 to operate the well fields, pumping, equipment, equipment repairs and other costs. This cost will be saved and will be approximately enough to pay for the water from Snyder.
- If the elections carry when will the water lines be installed? It is planned that the lines will be put in and water available by the spring of 1963. The first year's interest and principal will be paid out of the bond issue--so there would be no tax levy until the fall of 1963.
- Can a person vote absentee? Yes, at City Hall from August 14 through August 28th.

**What's in it for ME?**

"I'm not a member of an electric cooperative. I don't use their electricity. They don't serve my town. What do they mean to me?"

They mean a great deal to you my friend. Their member-owners buy one billion dollars worth of appliances every year from home town merchants like yourself. The nation's rural electric systems provide a broader industrial base for national security. They provide jobs in rural areas. They create a healthier, happier community. They make farming, ranching, dairying and other rural pursuits more efficient. In short the nation's rural electric are good for everybody.

THROUGHOUT THE CENTER OF THE SOUTHWEST IN CONTROL ROOMS LIKE THIS, THERE'S AN...

INCREASING FLOW OF ELECTRICITY

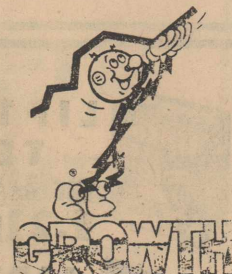

The demand for electricity in our service area is growing rapidly. The reason is simple — there are more people, more businesses, more industry coming here into the Center of the Southwest.

That is why we are investing millions in new electric generating capacity and in new distribution facilities to keep pace with this area's exciting growth.

But of more significance, this fact explains why we are planning vast additional expenditures in anticipation of even greater growth to come.

Because the Southwest is growing 25% faster than the Nation, we are convinced that our service area — the Center of the Southwest — faces GROWTH UNLIMITED.
