

LITERARY AND EDUCATIONAL ITEMS. The Sunday School Visitor for August has reached us. It is a beautiful number of a periodical, which ought to be in every family and Sunday School in the State.

Arthur's Magazine for August is equal to its established and excellent reputation. Arthur is neither affected, artificial, nor transcendental, but is sincere, natural, hearty and practical. "Lookout," by Mrs. Townsend, is a charming story, and the "Young Governors," by T. S. Arthur, is a most delightful domestic story.

Ladies' Repository for August has arrived. We are frequently, heretofore, spoken of the ability and taste of this Magazine. In addition to these, its completeness, as a ladies' magazine, is not surpassed, if equaled, by any other. The variety of its "departments" and contributions, if examined, will abundantly establish it as such.

The Cavalier Maffei is about to publish, in Turin, a new Italian translation of Paradise Lost. Louis Rattkay, a nephew of Keosauk, recently graduated at Union College, Schenectady, N. Y. The University of Missouri has three hundred and sixty-four students.

Lord Palmerston has granted to the widow of Hugh Miller, Cromarty, a pension of £70 a year, in consideration of Mr. Miller's services to literature. Prof. Geo. W. Greene, grandson of Gen. Greene, of the Revolution, is about to publish the "General's Papers." They consist of despatches, military reports, orders, and correspondence with Washington, Jefferson, Lafayette, Steuben, &c. In the history of the campaign at the South in 1780-81-82, these papers are very complete.

Florence Wesleyan University, at Florence, Ala., at its recent commencement, graduated seventeen young men. Rev. Dr. Doerns assisted in the exercises, and his part in platform efforts is spoken of as possessing a high degree of merit.

Andrew Colledge, Trenton, Tennessee, at the recent commencement, graduated five young gentlemen. Addresses were delivered by Dr. Nelson, Prof. Cochran, and President Jones. These are highly spoken of by the Independent. Our friend, Dr. Nelson, made a fine impression in his addresses and sermons, and on the Sabbath made an excellent collection for the missionary cause.

Rev. R. Crawford writes us that in the last of June he had a four days' meeting at Field's Chapel, Andersonville, Ga. Texas Conference; several conversions, and twenty-nine added to the Church. The meeting was of one great power. Several other good meetings since the above was written. The Lord has sent them rain also.

Grayson circuit, East Texas Conference, has a fine prospect for an extensive revival of religion. Rev. W. E. Bates closed a meeting at Baton Springs recently, during which there were five conversions, and twelve additions to the Church. He baptised four adults and seven infants, and left many at the altar of prayer.

Houssier, Grimes county, Texas, was informed by a correspondent, and all the Spring Creek region, do not have as much Methodist preaching as desirable. Rev. Pleasant M. Yell, a local preacher, preaches there occasionally. They complain that the postoffice is kept in a "dogery," and that they do not get all their Advocates.

A revival is reported to us by private correspondence, at Travis, Austin county, at which several were added to the Church. It was a real preacher's meeting. Hope to hear of more of the same sort.

TEXAS ITEMS. A Steam Flouring Mill is to be erected at Belmont, La. in a great wheat country. Another Mill is to be erected on the Leon, above Belton.

Rains have recently fallen in Anderson, Bastrop, Harris, Galveston, Bell, Tarrant, W.ashington, Walker, Montgomery, Parker, Lamar, Upshur, Gonzales, Guadalupe counties, and no doubt in others.

Rain has fallen in abundance in Ellis county, Texas, as we learn by a letter from Rev. P. P. Ray. Corn will be abundant, and emigrants will not fear to move there.

The farmers on the Guadalupe bottoms have made excellent crops. According to the Herald there has been a religious revival among the Methodists at Lavaca.

The Gonzales Inquirer has been presented with a demijohn of fine golden-colored sugar mill molasses, manufactured from the Chinese Sugar Cane. It is believed by some, he says, that this is the identical nectar about which the mythological gods made such a fuss.

The travelling public will be glad to learn that a coach line has been established between Victoria and Gollad. Considerable rain has fallen in Gonzales county, and the Guadalupe has risen somewhat.

The Austin Intelligencer, of the 5th inst., says that the Colorado river had risen several feet within twelve hours, and was still rising.

The crops in Dallas and surrounding counties are said to be quite promising. Fayette county is suffering for rain, but bread will be made.

The San Antonio Texan says that, notwithstanding the dreadful drought, worse than in twenty years past, in that region, the country contiguous to that city will make bread.

The mail party from San Antonio to San Diego, California, has been attacked by Indians, the carriage taken, and two of the party killed.

Mr. Robert W. Rainey, editor of the Seguin Mercury, is dead. One of the most extensive and imposing funeral demonstrations we ever witnessed took place in this city on Saturday, in honor of the memory of the late Gen. Rusk.

THE LATEST NEWS. The Consul standing Persia arrived at New York August 5th. Cotton had advanced at Liverpool 3-16d. a lb.

Flour had declined 1c and wheat 3d a 3d at Manchester. Sugar unchanged at London.

Another plot, originating in London, to assassinate Napoleon, is reported. Three Italians had been arrested, and have confessed.

Spain accepts the mediation of England and France with Mexico.

Russia talks seriously to England about the late Italian insurrection, and about the asylum England affords to notorious agitators.

Ninety-eight persons implicated in the late insurrectionary movements in Spain had been executed. Letters from Bucharest state that a schism exists among the British, Austrian and Turkish Commissioners, the British being in the minority.

We have reports of tremendous rains from Mason, Ga., to Montgomery, Ala. The trains on the railroad were obstructed, by the water undermining the embankments.

There is a report in Washington that Brigham Young has written a letter to President Buchanan, expressing his gratification at the prospect of being elected to the Presidency of the United States.

The Committee has awarded Gen. Jackson's Monument to Lieutenant-Colonel Dickinson, of the First Regiment New York Volunteers in the Mexican War.

The unsettled government of New York city, and the consequent prevalence of crime, have suggested a Vigilance Committee.

The Committee has awarded Gen. Jackson's Monument to Lieutenant-Colonel Dickinson, of the First Regiment New York Volunteers in the Mexican War.

The Bonaparte mansion at Bordentown, N. J., with its extensive park and grounds, was to have been sold at auction by the New York Merchants' Exchange, recently, but there were no bidders, and the auctioneer offered to commence with a bid of \$60,000, for property which it is said cost \$200,000.

In the United States there are five hundred and fifty-one rice plantations, which yield an annual revenue of four millions of dollars.

The largest mass of granite in the world is Stone Mountain, in De Kalb county, Ga., which is three thousand feet high, seven miles in circumference.

The Paola (Miss.) Star says: Col. Th. M. Caldwell has just returned from a visit to Cuba, and informs us that, at a house seven miles this side of the mouth of Colungo, he saw over one hundred rattlesnakes, stuffed and hung on a tree, being the spring crop of one small farm. The proprietor said it had not been a good season for rattlesnakes.

The British Governor-general of India has declared the annexation to the Anglo-Indian empire of the States of Jijoy-Singh, the Rajah of Hindou Khouch, who died on the 11th of April without heirs. The territories are situated on the southern slopes of the Hindou Khouch, a vast chain of mountains called the Indian Caucasus, which extend from the frontiers of Persia to the Indus, in the north of Afghanistan, and in the south of Balaigh-Singh and Independent Turkistan. The States of Jijoy-Singh contain very rich and fertile districts, and possess from their geographical position great political importance.

THE TEXAS CHRISTIAN ADVOCATE

Editorial. Educational. Travel and Transpiration.

Miscellaneous Advertisements.

SLEEP A BENEDICTION.

The following beautiful and beautiful lines, from the muse of Miss Browning, will unfold to the soul of true faith and sympathy, the much-neglected truth, that the mercy of God is an ever-present and all-embracing as the cheerful light of the day, and the subdued darkness of the night. We imagine that every reader of the Texas Christian Advocate, after reading these lines, will prepare to say and do, not like a brute, but with the spirit, and with the understanding also.

What would I give to see you? Not the face that I have seen, Nor the smile that I have known, Nor the voice that I have heard, Nor the hand that I have held, Nor the heart that I have felt, Nor the soul that I have loved.

What would I give to see you? Not the face that I have seen, Nor the smile that I have known, Nor the voice that I have heard, Nor the hand that I have held, Nor the heart that I have felt, Nor the soul that I have loved.

What would I give to see you? Not the face that I have seen, Nor the smile that I have known, Nor the voice that I have heard, Nor the hand that I have held, Nor the heart that I have felt, Nor the soul that I have loved.

What would I give to see you? Not the face that I have seen, Nor the smile that I have known, Nor the voice that I have heard, Nor the hand that I have held, Nor the heart that I have felt, Nor the soul that I have loved.

Monday to Friday evening were spent at the institution, and Saturday was devoted to preparation for his course of study; and after occupying one or two successive stations was admitted, while a member of the Cincinnati Conference, to the Cincinnati College, with the personal countenance of Dr. Bates and the late President Hart.

Since that period of his chaplaincy, Dr. Durbin has occupied a variety of positions. For a short time, in 1842, he was Professor of Natural Science in the University of Michigan, from which he was elected to the editorship of the Christian Advocate and Journal. In 1844 he was called, without being aware that his election was contemplated, to the office of Professor of Theology in the University of Michigan.

His style in preaching is pre-eminently pleasant. He claims by the entire self-possession with which he proceeds with his discourse, and the simplicity and directness of his language, which he adopts. He has a large knowledge of men as well as books. His remarkable sagacity has not failed to turn to profit the fruits of his extensive observation. In his preaching, the human heart is a consummate master.

By some who were not regarded as the best judges in the denomination to which he belongs, Dr. Durbin has been elevated to the rank of the first rank in the denomination. This position was conceded to the late Dr. Olin.

This splendid monument of American genius is to be of cast-iron and glass, 124 feet in diameter at its base, and rising above the top of the dome to a height of over 200 feet. The apex consists of a magnificent lantern, 10 feet in diameter and 25 feet high, surmounted by a bronze statue of the genius of Liberty, 16 feet high.

The foundation of the dome is to be the circular wall of the rotunda, carried up 24 feet above its interior cornice, and surrounded above the roof of the rotunda by a gallery, with an ornamental balcony. From this gallery, a double row of hollow cast-iron columns to the height of 120 feet, will be carried up to the top of the dome.

A gentleman is not merely a person acquainted with certain forms and the etiquette of life, easy and self-possessed in society, able to speak and act and move in the world without awkwardness, and with an excellent and a dignified bearing. A gentleman is much beyond this; all that which lies at the root of all his ease, refinement and fact, and power of pleasing is the same spirit of the person, the same society he is in. It is the thoughtful desire of doing, in every instance, as he would that others should do unto him.

It is constantly thinking, not how he may not yield to, but surely we cannot condemn. His style is as clear as a crystal; his figures are, but pertinent; his logic is a chain which one fate to be confined with, but knows not how to break; his thoughts are unobscured, like those of Aristotle, and his conclusions ponderous, but somewhat alarming. It is certainly the most able work on government which has appeared from an American source.

The beauty of a religious life is one of its greatest recommendations. What does it profess? Peace to all mankind. It teaches us those arts which will render us beloved, and respected, which will contribute to our present comfort as well as our future happiness. Its greatest ornament is that which is called by the name of a virtuous life.

SPAIN IN EIGHTEEN HUNDRED AND FIFTY SEVEN.

The progress of Spanish civilization within the last few years has been very considerable. Roads are becoming better, more plentiful, and more secure. Spanish ships multiply in Spanish harbors, and the commerce of the country is increasing. The universities are reviving, free schools and institutes are established by government, and an agricultural press finds an ample field. Lines of railway reach France through Catalonia and Navarre, Portugal through Estramadura, and the Atlantic at Cadiz, are in process of construction.

The line from Madrid to Valencia on the Mediterranean, as well as several short lines in Catalonia, Andalusia and Castile, are completed. A noble aqueduct near the waters of the Moyola to Madrid, a distance of fifty miles. A telegraph across the Pyrenees gives instantaneous communication with the rest of Europe, and a long line of telegraph, some 1,000 miles long, will be completed in a few months.

Three French chemists, as we learn from Household Words, have been experimenting on the subject, and their labors have led to the conclusion that the ocean holds dissolved two millions of tons of silver. They took water from the coast of St. Malo, a few leagues from the land, and in 1842 it had amounted to a ton of the water they acted upon by the usual tests of silver, and the presence of the precious metal was clearly ascertained. The remainder of the water they evaporated, and the salt they obtained was boiled with lead. This lump of impure lead they placed on a saucer made of lime, and then submitted it to a heat sufficient to melt the lead, and the silver, which was contained in it, was dissolved in the lead.

The lead, as it melted, was sucked up by the porous saucer, and finally a small globe of silver glistened in the vessel. This process is called the cupellation of the silver, and should be repeated several times. The silver thus obtained is not so pure as that which is obtained by the usual process, but it is still of great value. The process is simple, and the result is satisfactory.

This continued in use from the time it was authorized by Julius Caesar till the fall of the empire, and throughout Christendom till 1582. It was inaccurate; it made the year some months longer, and some months shorter, than it really was. Pope Gregory XIII in his year issued a brief bull, abolishing the Julian calendar in all Catholic countries, and introduced the one now in use, under the name of the Gregorian or reformed calendar. This was the first year of the new style, and from that time, called the old style. Protestant retained the Julian calendar till 1700. England adopted the Gregorian calendar, by an act of Parliament, in 1752.

The regular sessions will commence on the first Monday in February and will continue in regular session until the first of March. The sessions will be held in the city of Austin, Texas, at the University of Texas. The sessions will be held in the city of Austin, Texas, at the University of Texas. ANDREW FEMALE COLLEGE

This institution, located at Huntsville, Walker county, Texas, is accessible by stage from Austin, Washington, Texas, and Houston, Texas. It was founded in 1857, and is now a well-established and flourishing institution. The college is situated on a beautiful site, and is surrounded by a large tract of land, which is well cultivated. The buildings are of a substantial character, and are well adapted for the purposes of instruction.

The college is now in process of construction, and will be completed in a few months. The new buildings will be of a more substantial character than the old ones, and will be well adapted for the purposes of instruction.
