County Fair To Be Held Oct., 16-17-18

Representatives Here From Baylor, Knox and Haskell Co. In Two-Days Session.

Ermer Campe Selected as Manager For 1930 Fair. Preliminary Work Now Under Way.

A definite decision as to the dates of the forthcoming Haskell County Fair were chosen at a meeting of the officers and directors of the fair held at the City Hall Saturday morning. Dates were Thursday, Friday and Saturday, October 16-17-18, this date about one week later than usual time chosen for the Fair, the change was thought advisable due to the fact that crops this year will be somewhat late.

Ermer E. Campe of Graham was selected as manager of this year's fair. Mr. Campe is no stranger to Haskell county people, he having been the first manager of the Fair when it was inaugurated in 1924, and is therefore fully familiar with the field here and the preliminary work. Mr. Campe came to Haskell Wednesday morning and immediately began preliminary work getting things in shape for the

COWS AND POULTRY BRING PROFIT TO COUNTY FARMERS

(By Joe C. Williams, Co. Agent)

Poultry Demonstrator Makes 70c Per Hen Clear Money in 4 Months

J. T. Therwanger of near Weinert makes money with the present low price of eggs. According to the record kept by Mr. Therwanger the following results were made:

Eggs produced 27,841 or 232 dozen.

Feed costs \$202.24 with an average cost of 8c per dozen.

Total sales of \$461.00 or a profit for the four months of \$259.06.

Mr. Therwanger says, laying hens need to be fed plenty through the moult as they need the feed to aid in growing a new crop of feathers. Green feed and plenty of good water and sanitation are the things that pay.

What Price Butter Fat?

\$107.52 is what H. W. Richey says that his four common grade cows were worth to him during May and June. These figures were secured from Mr. Richey's dairy calendar. Total milk from the four cows weighed 5,549 pounds that averaged 4.33 butter fat test or 267.38 pounds of butter fat at 45c per pound (the sells butter fat for 45c). 5,282 pounds of skim milk at 80c per hundred for hog and chicken feed, for that is all the hogs are eating. Feed cost was \$41.20 for the two months. Sales for the two months were \$151.42 counting the skim milk in with the butter fat.

Butter fat cost in May was 14.5 cents per pound due to the pasture. June cost per pound was 18.5 cents per pound the difference in May and June is accounted for by failing pasture.

The agent will be glad to help any farmers that have from three to five cows, who will weigh milk. Each cow's milk will be tested with out charge to the demonstrator, and a calendar with daily milk sheets for recording milk weights.

ENROLLMENT OF 75 CHILDREN IN VACATION SCHOOL

The first two days of the Vacation Bible School now in progress at the Presbyterian Church witnessed an enrollment of seventy-five children. The sessions are held from 9 to 11:30 each morning, with the professional and the flag salutes first and then a period of worship, followed by a play period out of doors. The Bible lesson is then conducted with an interesting study of the helpful stories for children and a number of memory verses are learned. Then each department has a period of handicraft. The children enrolled are evidencing unusual interest in the school, and the adults who have charge of its direction are highly pleased with results which are being accomplished.

INJURIES SUSTAINED AT LUEDERS SUNDAY FATAL TO YOUTH

Cecil Leflar, 17, Dies in Stamford Sanitarium as Result of Injuries.

Cecil Leflar, age 17, son of Mr. and Mrs. J. E. Leflar of this city died in the Stamford Sanitarium Sunday afternoon about 6:15 o'clock from injuries sustained when he dived into a swimming pool at a Lueders tourist park four hours earlier.

Young Leflar in company with several other youths from Haskell, had gone to Lueders to spend the afternoon, and all had entered the swimming pool shortly before the tragedy occurred. According to witnesses of the accident, Cecil dived from a tree about 30 feet above the water, which was about six feet deep, and his head struck the rock bottom of the pool. John Oates, Jr., and Joe Bryant, who had accompanied Cecil to Lueders, removed him from the water and first aid was given the stricken youth, who was removed to Stamford Sanitarium as soon as an ambulance could be summoned. At the sanitarium, physicians were of the opinion that the youth sustained a fractured skull and that his spinal column was broken. He was paralyzed from the shoulders down, and never regained consciousness after the accident.

The body was brought to Haskell Sunday night, with funeral services being held Monday afternoon at 5 o'clock at the Methodist Church, conducted by Rev. Jack Thompson, pastor of the Weinert Methodist Church, assisted by Rev. M. L. Baker, Rev. G. R. Forrester, and Supt. Breedlove of the Haskell schools, each of whom paid high tribute to the life and character of this young man whose untimely end has brought sorrow not only to the hearts of loved ones, but to the entire citizenship of our town.

Cecil was a graduate of the Haskell High School, finishing last year with high honors. He was a leading athlete, a star member of the Haskell Indians. He had returned only last week from the C. M. T. C. at Fort Bliss, where he ranked as second best athlete in the camp, and was awarded medals as the camp's best baseball player, winner of tennis doubles, swimming relay, senior lifesaving, and rifle marksman.

BOY SCOUTS OF HASKELL VISIT CARLSBAD CAVERN

C. B. Breedlove, Jack Thompson, Ira Roberts and Dave Persons accompanied a group of Boy Scouts of Troop No. 36 to Carlsbad last week. Scouts making this trip were Ralph Bernard, C. B. Breedlove, Jr., Frank Bryant, H. J. Hambleton, Jr., Jack Larned, Woodrow Roberts, Hugh Shelley, T. C. Stewart, Claude Lee Thomas and Lowell Thomason.

Each of these Boy Scouts earned his own money for this trip by real labor and this alone made it more appreciated by them. The party took full camping equipment and enjoyed that feature greatly. Some of the other interesting features were the swims and motor boat rides in the clear cool water of the Pecos River, seeing the beautiful Carlsbad Springs, and the irrigation canal as it crossed over the Pecos just above these springs and observing the picturesque scenery of the tree shaded city of Carlsbad. Of most importance was the visit to the Cavern. The grandeur of this masterpiece of nature is beyond description. Only those who have an opportunity of seeing it can have much conception of the beauties there in.

Woodrow Roberts dropped off at Hobbs on the return trip to visit his sister. All report a pleasant and delightful trip and are determined to make better Boy Scouts. They are looking forward to other trips of this kind.

Mrs. J. B. Harrison of Spur spent several days here this week the guest of her sister, Mrs. Jess Edwards.

THE INDIVIDUAL YET NEEDED BY BUSINESS

By JOHN G. LONSDALE
President American Bankers Association

SOME seem to think that the day of the individual in business has passed. But they are wrong.

John G. Lonsdale

While the individual may not attract such outstanding attention as he did in the days of old when institutions were conducted on a smaller scale, he nevertheless is to be found in a large corporation, dominating the situation, giving orders here, co-operating there and shouldering the responsibility of keeping a large group of lieutenants, captains and privates working in unison and moving forward under the banner of progress.

And all of these are held accountable to the public because the public has entered into a partnership agreement with the corporation through purchase of stock.

Welfare of Workers

Even in the gigantic mergers that have taken place within the last two years there remains more than ever the necessity for a leader, an aggressive personality, whose duty it is to see that basic principles are not forgotten, that the rights and privileges of the individual workers and the customers they serve are as well provided for as in the smaller business units.

It is gratifying to note that our corporations are giving more and more concern to the welfare of their workers. Numerous benefit organizations have been formed, opportunities offered for advancement of education and position, hospital service established and insurance and retirement pensions provided. This general humanitarian movement in reality is the outgrowth of analysis, which has disclosed the need of improving the well-being of our individual workers, realizing at the same time that our institutions will benefit.

PREPAREDNESS IN BUSINESS

By R. S. HECHT,
American Bankers Association

My observations for many years, both as an employee and as an executive, have convinced me that the reason some men and women go ahead and others do not is that some keep themselves constantly prepared to accept and fulfill larger duties and responsibilities as they offer, and some do not.

Grant, as we must, that there is a certain element of luck in the conditions under which opportunity for promotion comes to different men and women, we nevertheless must also see that it is each individual's own state of preparedness which determines his ability to seize opportunity if and when it comes, and having seized it, to succeed in meeting the greater demands which it inevitably places upon him.

Real advancement never means going ahead to easier tasks, but always to harder ones. Opportunity for advancement is worthless unless in accepting it you are able to carry with you the abilities and qualifications that prepare you to meet the heavier exactions that are an inherent part of opportunity.

It is far better to go into action in the field of enlarged responsibility prepared and qualified, rather than that you and the institution you work for shall be exposed to the hazard of your having to build up to new responsibilities after having assumed them.

The new spirit of all business seeks to prepare its people in advance through education for the higher duties it holds in store for them.

Bank Bandits Active

The greatest number of bandit raids on American banking ever recorded in the figures of the protective department of the American Bankers Association were reported during the six months ending last February. Bank members of the association reported for investigation 311 forgery cases, 107 holdup robberies, 16 burglaries, 2 sneak thefts and 8 mortgage swindles while non-member banks, numbering less than half the total enrolled in the association, suffered 86 hold-up robberies and 9 burglaries, non-members being burglarized or held up once for every 89 banks, as compared with once for every 164 member banks. The association detective agents caused the arrest of 143 of the 236 bank criminals apprehended during the period covered.

The association's report on these conditions urges support of the movement to provide city police departments with radio-equipped cruising automobiles which have proved particularly effective in Cleveland and Detroit in the broadcasting of alarms and the closing in on criminals immediately after or even in the midst of the perpetration of crimes. Last year the average time elapsed between the receipt of radio calls by these cars and the 1325 arrests which followed was one minute and forty-two seconds, the report says.

Keeping Our End Up

In most aspects of life, people hate to fall behind. The man who is running a race hates to come in behind his competitors. The boys of an athletic team hate to show less ability than their rivals. In social life people hate to seem less interesting than their associates.

We need more of this spirit in our life as residents in a community. People should hate to fall behind their neighbors. The man who looks at his disorderly grounds should hate to see how poorly his place compares with some neighbor who cleans up. If people could realize what an unfavorable impression is made in Haskell by those who fall behind, they would not permit themselves to be outdistanced by their neighbors in the care they give their surroundings.

The only time a man ever reads all the fine print on his accident after a crash.

The cloud with the silver lining has nothing on the blue serge suit with its shiny outside.

THIS SEASON

Has become known as a Tornado period. At this season of the year the Twister's Terrifying Threat often becomes a reality laying waste thousands and thousands of dollars' worth of property and snuffing out many lives. Tornadoes are beyond the control of man, and the only defense is insurance to pay for the damage they cause. Almost every day the newspapers carry big headlines with reference to the latest disaster. No locality is exempt—yours may be next. Anywhere in this country—windstorms can and do destroy millions of dollars' worth of property. Each year adds to the list of places which "could never have a destructive wind storm"—and did. Windstorm insurance rates are so low that it is not worth the risk to be without it. Let us tell you how little it costs to protect yourself from loss through damage done by wind to home, business property or car. Wind destroys a 7-where! Play safe and INSURE.

Subject Sunday 11:00 a. m. "I KNOW THAT MY REDEEMER LIVETH"

These words were spoken by Job many years ago. He had many experiences with God that were as real as life itself. He had an assurance in his own heart that his enemies could not shake. We find this positive expression "I KNOW" a number of times in the Bible. The same feeling of assurance should be in every saved heart.

In dealing with this text we will not offer arguments to prove the existence of God, for no one but fools say there is no God, and we do not have a moment to give to them. On the other hand, we will give many reasons why we know beyond the shadow of a doubt that Christ is our Redeemer.

Subject Sunday 8:15 p. m. "A MAN RESCUED FROM PRISON WITHOUT A MOB"

Among the most marvelous prayers in the history of the New Testament church is recorded in the twelfth chapter of Acts. Simon Peter was in prison, chained to two soldiers and was to be executed the next morning. A church met in a private home and prayed for him. The prayer continued long into the night. The world was asleep, even the soldiers in the prison. The church so prayed that an angel came and loosed the fetters that bound the prisoner, opened the door and set him free.

There are some expressions in the chapter that emphasize this prayer and it is with these we wish to deal. We believe this study will help every Christian and will greatly encourage our church to pray. Come and see what prayer will do. We will also learn what prayer is.

WICHITA FARMER CALLS TO TELL OF NEW EXPERIENCE

Orgatone Brings Him Relief From Ten Years of Suffering. He Says.

C. D. Sears, a well-known farmer residing on rural route No. 4, Wichita Falls, Texas, who is a man of high standing and many friends, while in Allison's Drug Store a few days ago said:

"I have never had anything to do me the good Orgatone has. Since taking it I feel strong and full of energy, and in fact, I never felt better in my life than I do now.

"I have been suffering for ten years from indigestion and liver trouble. My stomach would fill with gas and bloat me up and make me miserable for two or three hours after my meals. I had no appetite at all, and got so I dreaded to eat, because the little I managed to force down would sour and cause me so much trouble. I was so nervous and restless I could hardly sleep at all, and always felt tired and good for nothing in the mornings. I had a sluggish depressed feeling, my strength and energy were getting less all the time, and I just had to force myself to work.

"I'm glad I tried Orgatone, for I'm sure it has saved me many a sick day. I was getting worse all the time until I began using it, and I've been getting better ever since the day I started taking it. I first found after taking it two or three days that no gas formed on my stomach, my food stopped getting sour, and I had no uncomfortable feelings after eating. I have a great big appetite now and eat anything without it hurting me in the least. I sleep as sound as anyone, and just feel bubbling over with new life and energy. It would be hard to tell the value Orgatone has been to me. I feel it has saved me many a dollar, and best of all it has saved me my health and built me up so that my work is a pleasure again. Everybody ought to know about a medicine like this, and I'm glad to recommend it."

UNDER THE STERLING PLAN TAXES WILL BE REDUCED IN HASKELL COUNTY

The taxpayers of Haskell County, including the farmers, home-owners and business men are now assessed an average tax of approximately 15 Cents on the \$100.00 valuation to pay for the construction of State Highways, a tax that should be borne by the State.

UNDER THE STERLING TAX REDUCTION PLAN the State will assume this obligation and pay for it out of the gasoline tax.

The Sterling Tax Reduction Plan will place the burden of paying for the state roads your county has built on the traffic, where it belongs.

The Sterling Plan will provide the state with adequate funds to build a connected state system of hard surfaced, all-weather highways and for paving the gaps over the state without county aid and without increasing the gasoline tax one penny.

R. S. STERLING Houston Candidate for Governor

The Sterling Tax Reduction Plan provides that no property tax shall ever be levied to carry out its purposes.

Vote for R. S. Sterling and LOWER TAXES

Explanatory Note.—The estimated reduction in the tax rate has been calculated in accordance with the best available information. The exact figure will depend upon varying conditions in each county. But that a material reduction of the ad valorem taxes would be affected under the plan is certain.

An economist urges everyone to buy a home. Good advice, for then you will have something to mortgage in getting that new car.

The Art of Buying

The business philosophers tell us that it does not make much difference to us what we earn, but it is what we save that counts.

The capacity to save depends upon two things. First the ability to deny oneself foolish expenditures. Second, the judicious use of our income.

Success in the use of money depends upon a process of education. Some folks are skillful buyers and some are unskillful.

Miss Edwina Smith of Houston, is visiting in the homes of Mrs. John P. Payne and A. C. Pierson for a short time.

One of the principal means for acquiring this skill in the art of buying, is to study the newspaper advertising. People who read advertisements closely form a good idea of what goods should cost.

Business men help the public acquire this kind of skill by printing as many details as they can in regard to their goods.

STATE TAX MEN AND BANKERS IN ACCORD

Months of Negotiation Lead to Agreement on Changes Broadening Method of State or Local Taxation of National Banks.

NEW YORK.—Months of conference and negotiations between an American Bankers Association special committee and the Committee of the Association of States on Bank Taxation have resulted in an agreement on a form of amendment to the Federal statute dealing with state or local taxation of national banks that "maintains the integrity of the protective principles of the section and is satisfactory to the commissioners' committee," says the American Bankers Association Journal.

Thomas B. Paton, the organization's General Counsel, in making the announcement says that previously proposed amendments to the statute, which is known as Section 5219, have been opposed when it was felt their terms would enable any state to place banks in a tax class by themselves.

"The law as it stands today," Mr. Paton says, "permits state or local taxation of national banks or their shareholders in one or the other of the four following forms: the shareholders upon their shares,—a property tax; the shareholders upon their dividends,—a personal income tax; the bank upon its net income; the bank according to or measured by its net income. Only one form of tax can be imposed, except that the dividend tax may be combined with the third or fourth form if other corporations and shareholders are likewise taxed."

"The conditions permitted are: the tax on shares must be at no greater rate than on other competing moneyed capital; the income tax on shareholders must be at no greater rate than on net income from other moneyed capital; the tax on bank net income must be at no higher rate than on other financial corporations nor the highest rates on mercantile and manufacturing corporations doing business within the state; the tax measured by net bank income is subject to the same limitations as the tax on net income of the bank but may include entire net income from all sources."

States Seek Broader Law
National banks and their shareholders are taxed in different states under a diversity of systems, he says. The U. S. Supreme Court has held that the low millage rate on intangible personal property is in violation of the present law where it results in national bank shares being taxed at a rate greater than that assessed upon competing moneyed capital. A number of states, unwilling to use the income methods permitted, had the alternative of either repealing the intangible tax laws or limiting taxation of national bank shares at the intangible rate. Therefore they sought a broadening of the permissive provisions.

LIVING IMPETUS TO CONSTRUCTION PROGRAMS

At this season when many impetus to construction programs is particularly timely, several newspapers, a university, and even a friendly tornado have joined forces in supplying good roads news.

A few days ago the Semi-Weekly Farm News, Dallas, recounted the recapitulation of Professor F. R. Agg of Iowa State College, who has proved by road tests that automobile travel is from one to three cents per mile cheaper on paved highways. Just earlier the Paris Morning News had told of Kent County, Maryland, which recently built fifty-one miles of pavement, planning a fifteen-year road program into a single year's achievement, and incidentally reducing its local maintenance responsibilities by that many miles.

And Maryland has been writing of Texas too. The Blue Book of Southern Progress, published by the Manufacturers' Record, Baltimore, and just off the press for 1936, describes the letting of contracts for 100 miles of highway last year by the Texas State Highway Department during 1935. Governor Dan Moody on June 16 also discussed the largest highway problem of any state in the union in the United States Daily, a business newspaper published in Washington. And a somewhat unusual as well as timely crusade for highway building and home-rebuilding has been started in Texas newspapers by the Universal Ahas Cement Company, which is urging the public to do so much to "buy cement" as to "buy your cash in pavements" by buying local bonds—a community improvement message doubly valuable in unemployment times.

It took a Nebraska tornado, however, to drive home the good idea most forcibly. The tornado, a playful one visiting a railroad spur at Hastings, Nebraska, a few weeks ago, is said to have lifted a heavy freight car loaded with scrap iron across a concrete sidewalk—without damage to the sidewalk.

Amos and Andy would say, "DAT SUMPZ!"

Millions of people look forward to their summer vacations as a period of unbounded joy that will compensate them for all the labors and troubles of the year. But it takes the right kind of personality to make these dreams come true. Some folks who look forward so eagerly to this rest time, become very grouchy when it comes. If they travel by automobile, they kick about the rough roads and poor food along the way. If they go by train, they find fault with delays.

Vacation Days

Something is always wrong. It takes some philosophy to get useful results out of a vacation. A good many of these tourists would really be better off to stay at home. They are so bound to their ordinary home comforts, that they are unhappy if they miss them.

They can't expect things just the same as they had them at home, where all their personal tastes are considered and provided for. When they go on a journey, they have to take the things that are offered in a wholesale way. It is very costly business running summer resort places. If perfect service is provided it is apt to be more costly than the average person cares to pay for.

To get real enjoyment out of a vacation trip, people need to have some tolerance. When they storm at a hotel table because they have to wait five minutes too long for their dinner, or because the meat is underdone or the pudding cooked too much, they are simply wasting their breath, and spoiling their outing. Their minds should be so full of the scenic beauty they have observed, the wonders of nature spread before them, the fascination of seeing what people are doing in other states, cities, and countries, that they lose all desire to crab. They should reflect that even if the service is the worst conceivable, it is a hundred times better than the conditions the pioneer ancestors had to get along with in their day.

"LONE STAR RANGER" IS ACTION SAGA OF ROARING FRONTIER DAYS

When Texas seceded from Mexico and declared itself a free and independent republic in September, 1836, it was flying the famous lone star flag. This flag bore two horizontal stripes, one red and the other of white on a field of blue in which was set the white five pointed star, emblem of the American settlers who fought against the tyranny of the Mexican government for freedom.

The lone star flag waved over the Alamo when Davy Crockett made his sensational stand against the armies of Santa Anna near San Jacinto on March 6, 1836. Early the following month General Sam Houston came to the rescue, routed the enemy and afterwards became the first president of the republic.

Later Texas was recognized by the United States and in 1845 was made a member of the union.

The Texas Rangers were organized in 1832 and bore the brunt of the conflict when Texas separated from Mexico. Later they protected the frontier from Indians and since have protected the border.

The activities of these men form the background for Zane Grey's romantic and thrilling story, "The Lone Star Ranger" which has been adapted for the all talking screen by Fox Movietone and in which Geo. O'Brien and Sue Carol portray the leading roles. It is the next attraction at the Texas Theatre.

The Berean Class, "The Class of Southern Hospitality."

Boy Howdy, it is going to be a wow! And every Berean is expected to be there. But I won't keep you in suspense any longer. It is this: The Berean Class has agreed to furnish the cars for the trip and the Glad Girls Class has agreed to furnish the lunch and the drinks. So you see what a bargain we have. Now all of you who have cars be at the Baptist Church Sunday morning at 7:30 and let's be gone on a day that will long be remembered. These are not idle words, you are urged to be there. We want you to be there, and in fact you must be there. Get your car, boy, and let's go.

ANOTHER VICTORY

FOR THIS REGULAR STOCK MOTOR OIL

CLOSE ON THE HEELS OF ITS ACCOMPLISHMENT AT

INDIANAPOLIS MAY 30, CONOCO WINS 3RD, 4TH, AND 5TH PLACES AT ALTOONA AT BETTER THAN ONE HUNDRED MILES PER HOUR

Frank Farmer, in a Miller Special, "placed" third with an average speed of 102.2 miles per hour. "Shorty" Cantlon, in a Miller-Schofield Special, was fourth with 101.5 miles per hour. "Speed" Gardner was fifth in a Miller Front Drive Special. All three used CONOCO Germ-Processed Motor Oil in this convincing demonstration of the qualities of this regular "stock" motor oil. At Altoona, as at Indianapolis, this was the first time that a stock oil had placed so high in the finish of the race.

The story of the Altoona race cannot be told without reference to the accomplishment of CONOCO Germ-Processed Motor Oil at Indianapolis. For it was in that 500-mile classic that the stamina of this new oil was impressed on the racing fraternity. After observers had seen the oil at the close of the

Indianapolis race; after they had observed its full body and good color as it came from Dave Evans' motor, the word went out that CONOCO Germ-Processed Motor Oil had displayed the qualities necessary to solve the lubrication problems of racing motors. CONOCO had earned the respect of this most skeptical group—and earned it fairly.

In view of the Indianapolis results, it was only natural for a majority of the drivers at Altoona to choose CONOCO Germ-Processed Motor Oil for America's fastest competitive race.

And as these cars whizzed around the boards at Altoona on June 14, CONOCO again proved its worth in a field previously dominated by castor blends—a field which other stock oils have repeatedly tried to enter without success. So chalk up another victory for CONOCO

Germ-Processed Motor Oil, close on the heels of Indianapolis... a victory won with the same stock Germ-Processed oil that you can buy at any Red Triangle station.

These CONOCO victories have a definite meaning to every one who drives a car. They substantiate every claim that was made for it when the oil was introduced last November.

You can experience the safety and economy of this oil by stopping at the next Red Triangle Station and asking for:
