34 MEN FROM COUNTY TO GET WORK FROM RELIEF COMMISSION

F. Kennedy, chairman of the work in Haskell county has notified that under the emerty Conservation Work Act rely passed by Congress, 34 men be accepted for this work from Haskell county, if that many can qualify for the position.

Six months employment will be provided at \$30.00 per month, wathe following rules and regulations. The men accepted must be 18 and 25 years, who are now on who have dependents whom are willing to help support. The men accepted by the local commit-tee will be required to go to Wichits Palls on their own expense, where they will be asse transferred to Port Sill, Okla., for two weeks training before they are ent to the forest campe.

Transportation will be furni from Wichita Palls to Port Bill, at which place they will be issued tothing and mess equ fore they are sent to the work to stay for the entire six m mless some extraordinary cir

200 men in each camp, work will tarium where it was found he was consist of 8 hours per day for five injured internally. days per week and the men will be given their board, clothing, hand tools and other equipment, and paid \$30.00 per month. However, it is expected that those selected for this work will allot from such cash allowance sufficient su eare of their dependents Preference being given those applicants who most clearly indicate their recognition of this obligation by the size of the allotment made. 25.00 per month is considered ample spending money while in camps.

Those who would like to accept

Highway Bring \$162,000 Extra Business to Haskell County Yearly, Says Report

Haskell county's state highways bring \$162,000 a year in extra business to the county in the form of ness to the county in the form of tourist trade, the Texas Good Roads Association has estimated from a survey of the state's last official traffic census.

traffic census.

This business, the survey points out, dozs not include "natural" trade from local cars or those of adjoining counties, which obviously would increase with improved roads. State checkers, from few days as hal count, found the average daily traffic to be: 400 motor vehicles on lighway 30; 100 on Highway 130; 30 on 18; and 200 on Highway 130; 30 on 18; and 200 on Highway 130;

"Motor traffic in Texas is divided, the experts have found, in two almost equal classes. Roughly, half are local cars or from adjoining counties. The other half are from beyond the state, or from Texas points at least two counties distant. The latter are genuine tourists.
"On this basis, some dis wanted cars cross Harkell county out of day." In Association's survey mid. "but their are genuine tourists." ong their good Assertion collec-cong the restaurants, batals, plan-camps, het des

Building Materials of All Kinds

BY THE MAYOR

The Week of May 1st to 6th, inclusive has been designated as Spring Clean-Up Week

There are many reasons why the Spring Clean-Up Campaign this year should receive the enthusiastic suport of every man, woman and child. First-Because that a city that is clean and beautiful creates cheer and banishes gloom. Cheer produces courage and confidence, and no doubt most of us are badly in need of both these attributes at this particular time. Second, Because every dollar destroyed in property by fire, which so frequently is the result of "careless" housekeeping in the home and in the average place of business, is a serious drain upon our present economic condition. Third, because every job created in connection with a Clean-Up Campaign not only develops better fire protection, but supplies better sanitation and public health. It creates an atmosphere of encouragement.

Now therefore, I, Emory Menefee, Mayor of the City of Haskell, do hereby designate the week of May 1st to 6th, inclusive, as a Spring Clean-Up Week and most respectfully call upon all departments of the city. the service clubs, and all organizations of the city and our people in general, to take an active part in this Clean-Up Campaign.

The City Council will appoint active committees to supervise the work and we earnestly request each and every one to accept the place designated.

IN TESTIMONY WHEREOF. I hereto sign my name and seal of office, this 24th day of April, A. D. 1988. EMORY MENEFEE.

THE SUCKER LIST

Methodical dealers and salesmen keep a list of prospective customers upon whom they bring to bear from time to time their most persuasive selling arguments. The plan has been proved of value, as better results are obtained throu prospects than through random efforts.

But it is not unit those engaged in legitimate business who thus seek to simplify their salesmanship by concentrating upon those most likely to buy. Promoters and vendors of wildcat stocks also select their prospective victims with extreme care, although many of their lists run to large figures.

President Auchincloss of the National Better Business Bureau recently declared that one New York promoter has a list of some 600,000 names of persons who are known to be easy victims for swindling schemers. Such a compilation of names is known as a "sucker list." Advertising literature holding out the most glowing opportunities for profitable investment is sent regularly to those who have been found gullible enough to bite at such a bait. A good sucker list is a veritable gold mine

for the unscrupulous promoter. If one receives frequent letters or circulars offering amazing inducements to purchase oil, mining or other stocks he may be sure that he is listed among the "easy marks," whose credulity yields millions of dollars to

SOUTHERN SLASH PINE PAPER

swindlers every year.

Experiments which have been in progress for several years have finally resulted in the production of firstclass newsprint paper from Southern slash pine. the latest developments representing a revolutionary discovery in paper-making.

Such is the assertion of Dr. Charles H. Harty, former president of the American Chemical Society, who has been a pioneer in the reseaches leading to the recently anounced result. Paper has been made from slash pin before, but the latest product is the first to meet all the requirements of standard newsprint, and even ex-

Perhaps the most sensational fact about the new product is its strength and light weight. It has a "burst strength" of 10 to 12 pounds to the square inch, compared with only 6 to 10 pounds for usual grades of newsprint, in addition to being somewhat lighter in weight. Another advantage in using slash pine is seen in

the fact that by a new method of cultivation discovered by a 20-year-old Georgia farm boy, Marion Renfro, trees of sufficient size for paper-making can be grown in seven years, whereas the average age of Canadian spruce trees now conerally used is 50 years.

The fact that two-thirds of the print paper used by American newspapers is now imported, chiefly from Canada, indicates the possibilities of developing a great paper industry in the South. These possibilities should fit in admirably with President Roosevelt's reforestation

A LITTLE STREET WHERE OLD FRIENDS MEET

That little street is right in your own home town. If you make it a friendly street outsiders will want to come and share it with you. They will sense the glow of friendly contact and wish to linger long within its warmth. And a friendly street is so easy to obtain. Just a kindly attitude towards your neighbor and others with whom you divide the care of the day. Just a little human understanding of what constitutes gentleness and courtesy. That's all you need to make a street where old friends want to meet.

The community that prospers is always a friendly community. Today the world is seeking out such places. There is so much of travail and harshness is the everyday affairs of life that friendly havens beckon from afar. If you want your home town to be prosperous, to be known as a friendly spot, then you be friendly, too. It is a good message to carry with you during the yearand it pays big dividends in happiness and prosperity .-South Kent County News, Grand Rapids, Michigan.

HISTORY REPEATS ITSELF

"In times like these, we find ourselves in the midst of a serious financial and industrial crists. It just seems inconceivable that conditions can ever right themselves enough to have prosperous times in the country again. Trade and industry throughout the land are disorganized. Banks by the hundreds have failed. Securities have fallen to one-half or even one-quarter of their former value.

"The problem of unemployment has become general and in all large cities special committees have been organized to provide food and clothing for the poor and unemployed. In addition to this effort, some cities have caused relief work to be instigated by public bodies.

"The lessening demand for wheat exported to Europe has caused American wheat to sell for less than 50 cents a bushel. Extensive competition, lowering prices and unwise speculation have brought about a crisis abounding in rumor reports, most of which have no foundation and do no great damage. The renewal of confidence and the allaying of violent fear in the minds of the people, which will allow for active buying, rather

than money hoarding, must precede business recovery."

As indicated by the quotation marks, the above language is not our own, but is that of someone else, and it was not uttered in 1983 either. It is from a speech delivered by Daniel Webster, delivered in Detroit in 1887, searly a century ago. Truly, history repeats itself.

Austin.-The Forty-third Legislaportant is the passage of legisla- penses. tion designed to stop tax evasions. and to provide penalties that will insure more effective enforcement of special taxes, such as the cigarette and gross productions. taxes. The Comptroller estimates that at least \$5,000,000 in these special taxes, which has been lost through inadequate enforcement facilities. will be saved and added to State

There are two constitutional mendments pending, which if imit total expenditures of the State the chance of passing the Senate. and the other would abolish the fee system of compensating county officials and make for lowering the
tremendous costs of county government, which averages much higher
than State government. The first of
these amendments has passed the these amendments has passed the Senate and the second has passed the House. Prospects of their submission seems good, but citizens can do a real service by urging the submission of these two amendments.

In spite of failure to adequately meet conditions in many respects. the present session of the Legislature may be counted a success, if it adheres to its present apparent purpore to levy no new taxes and cut expenses and also submits these two amendments. These amendments will open the way for permanent tax reform and provide effective safeguards against recurrence of the recent orgy of spending by all branches of government.

Appropriations for expenses of the S500,000. This represents a reduc-

The worries and problems that seemed so

SUBSTITUTIONARY ATONEMENT By Rev. C. A. Tucker.

If I could preach but one more sermon, what would be its theme? It would be "Jesus Christ died to save sinners." I would choose this theme because the knowledge of this fact, and the appropriation of its benefits to one's self, are of supreme and eternal importance.

This importance is by virtue of the fact that man, in his natural state, is alienated from God, under His wrath and penalty of death (that is, eternal banishment from His presence), all because of original and actual sina. Since God is the home of the soul, man can not be happy while estranged from Him. There is no good except that which comes from God. The limited good which we enjoy in this life is a manifestation of His infinite mercy whereby He is wooing us unto Himself and Heaven where there is laid up for us infinte good throughout endless eternity. Physical blessings will not satisfy the deepest longings of man, he is restless until peace has been made and fellowship with his Creator re-established, and a home in heaven is assured.

This being man's condition and need, the next question is what will save him from this pitiable and and helpless condition and satisfy his longings? The answer is, the substitution of the Atoning Blood of Jesus Christ. The substitution is made by a personal accepta-tion of the Lord Jesus Christ as He is freely offered to us in the Gospels.

Light may be thrown on the principle of substitution by a study of the Jewish sacrifices and personal security in modern business.

I. Substitutionary Atonement Typified in the Jewish Sacrifices.

1. Definition of terms. (a) By substitution we mean the placing of one person or thing in a position where another is appointed or deserves to be. (b) By Atonement we mean "satisfaction offered in return for injury, or expiation of sin by suffering." So, by Substitutionary Atonement, we mean causing an innocent one to suffer the penalty for sin of a guilty one—thus satisfying the vindicatory justice of God, removing the guilt from the offender, and permitting him to go free. (c) By Jewish Sacriices we refer to that system of ceremonial worship which God gave to the Jews through Moses at Mount Sinai.

2. The Sacrifice with its typical meaning. In offering a burnt offering the individual would bring an animal without blemish to the Priest at the entrance of the Tabernacle, and lay his hands upon the head of the sacrificial animal. This typified the transfer of the individual's guilt upon the perfect and innocent animal. Then the animal, bearing the transferred guilt, was killed by the Priest "before the Lord". Thus the one who offered the sacrifice became ceremonally clean and in-

subject of salvation for it was divinely instituted. God gave the specific details of the ceremony. The immediate purpose of the ceremony was to help this primitive people exercise faith in the dimly revealed Savior. Its general purpose was to teach men of all ages the plan of salvation which was worked out in the life and death of Christ.

II. Substitution on Modern Business.

Substitution is a well known principle in modern business. In the days when one could borrow money it was customary for one to get one or more substantial and trustworthy citizens to go on his note before he could get the desired money. It was necessary that this surety be a citizen; otherwise the note would not have been legal, for he could not have been arrayed in the courts and caused to pay the obligation. Many are they who have gone on a note as surety for a friend just as a matter of red tape, but the friend defaulted and he had to meet the obligation. Some say that there is no justice in the matter. But when one signs a note he promises to be a substitute for the one who makes the note, if he de-

Haskell Churches Welcome You!

to help.

faults. So from a legal standpoint it is just. From a personal standpoint it is very beneficent of the surety to pay off the obligation of his friend.

III. Substitution of Christ for the Sinner. Substitutionary Atonement of Christ for the Death Penalty of Sinful Man.

Christ has been surety for man from the foundation of the world. But it was necessary that He qualify to stand in man's place. So He came to the world and took out naturalization papers at His birth—taking upon Himself the form of man. He lived the life of an ordinary man being tempted in every point as we are, yet without sin. Therefore He was eminently qualified to stand in the court in man's stead and pay the penalty. for, having met the demands of the law, He did not have the death penalty hanging over Him. Then the sins of the whole world were rolled upon Him and He paid it all to the satisfaction of God's vindicatory justice. The Surety paid off; the innocent and perfect Lamb of God died in our stead giving us His standing of justification and freedom and fellowship with God.

Our debit of sin was transferred to Christ's Yes, and much more than that, for His credit of righteousness was transferred to our account, so that before God we are accepted as righteous. And in addition to this we receive the Holy Spirit and are made partakers of the life of Christ to our present sanctification and eternal salvation.

In the Gospel invitation Christ has sent to us, as it were, a signed check whereby He has signed away, to us as individuals, as much of His infinite wealth of righteousness and power as our sense of need (repentance) and petition (faith) calls for. All that we have to do is to fill in the signed check and present it.

In recent months there has been an increasing demand by certain classes of people for the Government to pay all their debts and hand out money in wholesale fashion. This trend of thinking should make the Gospel invitation all the more acceptable. Christ offers His allsufficiency to pay our debt of sin, which we are indeed unable to pay, and also a surplus of grace to run on.

Therefore, my friends, accept Christ, be regenerated into a new person and live that abundant life.

me to Church This Sunday!

This is the third of a series of inspirational messages that will appear in this paper each week, bringing you the views of Haskell clergymen.

This campaign is contributed to the spiritual welfare of the community by the generous co-operation of the individuals and names that appear

Washington.-The arrival of the best of the foreign missions bere for conferences Roosevelt provides some ink-

ling of how he is going about the job of seeking an answer to the world economic problems. Of course, the Washington conferences are said to be preliminary only to the world economic conference, but the methods which the President has adopted make it appear that he is about to capitalize the very thing about which foreigners-and many Americans, too-complained, namely, economic and political isolation

Authorities here characterize his move as a bold stroke. They see almost a transplanting of the main conference to the United States. But they see also many possible pitfalls in the President's plan. In calling the heads of the governments of Great Britain, France. Italy, Germany, Japan, China, Argentina, Brazil and Chile to the American capital, the President may be said to have caught opposition plans off first base, if one may refer to baseball for a parallel play. Information available in high quarters here is to the effact that few, if any, of them exsected such a more.

Any analysis of the policy on which the President has embarked must needs include reference to the certain benefits that come from knowing all of the facts. The President has set out to learn them. He believes the procedure in the inter world conference will be made

But, according to expressions being bandled about, one ought to look

rach one is going to give up so thing of importance is to expect an early arrival of a miliculum. behind the scenes. In such confer

Nevertheless, in the opinion of students of international affairs, the more by President Rosserelt to capitalise our hitherto econo and political isolation has some hance for success in that its very oldness may partially disarm the men who have been used to playing another sort of a game. The President thinks pretty fast, and it has been suggested here that he may foresee any trape and allow those who laid them to fall into their pits.

A backwash has set up from enactment of the emergency banking law. That statute Backwash From broadened the

Banking Law powers of the Federal Reserve banks and allowed them to discount certain types of commercial paper not heretofore eligible to be received for discounting.

Since that was done, Washington to hearing from all parts of the country to the effect that, if the Federal Reserve banks are to be allowed to discount practically all kinds of commercial paper, incorporated cities and towns ought to be allowed to discount tax warrants and other obligations of the municipalities. Nearly every day resolu-

congress from some municipality. From a local standpoint, the to deny. The answer is simple, howtional policy.

Two reasons stand out why this sert of discounting should not be done: 1. If unlimited powers were ded the Federal Reserve banks in this direction, soon the Federal teserve banks would be carrying the entire burden of municipal indebtedness. There would be no attempt to market their securities einewhere. 2. If the Federal Beserve banks were authorised to take such paper, many municipalities would be under no check or labilition against spending; they could run high, wide and hands enrying out local improvements or local schemes without having to recken their payment—at this time. So it becomes obvious that to per-mit such discounts, somer or inter those towns and cities which falled to live within their income would be compelled to burden their people with taxes far beyond the present burden. Or the Federal Reserve banks would have to lose and the currency issued against those war-rants and other obligations would e werthiese.

The condition growing out of the mergency banking act insofar as it hus developed the

Short-Sighted tuckwash of de-Leaders mands for addiflores discount-

ing privilege demonstrates probably now at hand as to the short-sighted policy so many alleged leaders have adopted. Here in congress, and elsewhere throughout the country there has been a continual outeropping of movements which seek to promote action by the Federal government without consideration for the fature. The bulk of them seem not to take into thought that ultimately the obligations thus created have to be paid at some time in the fe-

Of course, there always has been merit in the argument that the present conditions will eventually end and that what we know as prosperity will again prevail. In that event, it is explained, some of the borden ought to be shared. The same argument was presented many times in congress respecting the reduction of the war debt. It was held during the treasury administration of Secretary Mellon that be was paying off the debt too fast; that some of the burden ought to he passed on to future generations because they share the benefits of World war victory, and that is quite correct in the view of all observ ers here. Tet, no country and no people who have persisted in remaining evertustingly in debt have survived unless they had paid off their debts.

Right now the windom of the Mel-m defe-paying policy is evident, and not the national debt, which mounted roughly to \$50,000,000,000 from Secretary Mellon took charge, een rapidly reduced, the federal

A Still Finer Automobile

NOW BEING SHOWN FOR THE FIRST TIME IN HASKELL—SEE IT!

Walter P. Chrysler Presents the New De Luxe Plymouth . . . Even a Finer Car at \$60 Less Than Last Year

"Look at all three!" said Walter P. Chrysler last year . . .

"Look at all three!" he repeats today. For today he introduces the New De Luxe Plymouth . . . A De Luxe SIX with floating power . . . 112-inch wheel base . . . vibrationless . . . a BIG DE LUXE model designed to win FIRST PLACE IN THE LOW PRICED FIELD.

It's a Six with hydraulic four-wheel brakes so you can enjoy Free-Wheeling with security! And safety steel bodies to protect you and your family.

It's a ffix with that big-ear, smartly-tailored look! And with a new idea of what values ARE these days.

Will This Be America's Next "Number One" De Luxe Car? "Look at All Three" And Decide for Yourself.
