# INTEREST GROWING

Many Attractions Planned For First Event on June 3rd

Patrons of Haskell business conerns are evidencing considerable interest in the forthcoming Trades Day to be held Wednesday June

Distribution of the Trades Day currency, started last week, has created wide interest in the coming event, and much of the currency has found its way to adjoining towns.

Inaugurated by the Trade Extension Committee of the local Chamber of Commerce, practically every business firm in Haskell is cooperating in making the

Trades Day possible.

Many Features Being Planned Many entertaining features are being planned for the first Trades Day, according to the committee

Main event will be the auction sale, in which merchandise will be sold to the highest bidder, using the "Haskell Currency" as a medium of exchange. Articles to be sold will include practically all lines of merchandise sold in Haskell.

In addition to the auction sale. many other events are being arranged, including soft ball games athletic contests, free prizes for winners in various stunts, and possibly some nature of free show or entertainment. Death Occured Saturday at

Public speaking will also be included in the program, according to present plans, with some out-standing candidate for state office Funeral service for W. L. Fra-

to be invited. The complete program for the entire day's events will probably since 1920 when he removed here be announced next week.

Testimony introduced was intended to show that the cafe was "common nuisance where liquor was sold." Bradley had previously plead guilty in county court to a complaint charging him with vio-

lation of the liquor laws. The injunction in effect means 'padlocking" the place, according to court officials, and is the second time this statute has been invoked in the county. A restraining order was granted early last year which closed the Black & White Inn, at that time operated

by George Proctor. Case of the State vs. Melvin Bearden, charged with driving an automobile while intoxicated, was continued until the Septem-

## **EXTENSIVE REPAIRS**

Outside Plant To Be Modern In Every Respect When Repairs Finished

Extensive repairs to the "outside" plant of the Haskell Telephone Company in this city, which have been under way for several weeks will soon be completed, according to Roy Killingsworth, local manager.

A crew of men under the direction of George Bruce, construc-tion foreman, have been engaged in replacing the open wire system with cable in a number of instances, with new poles being set practically throughout the city, and all lines routed through alleys wherever possible.

In the crew under Mr. Bruce, the following men have been engaged on the repairing program here: Roy Gregory, Roy Kidwell, D. D. Dane, Sam Ward, and O. F.

When the present repairs are complete, the local system will be in all respects pertaining to the outside plant, as modern as found in any city served by the local telephone company.

Although the local exchange operated on the old-style "magneto" system, the Haskell office accomodates approximately 400 patrons a larger number than several towns served by the company in which the modern common battery system has been installed.

Zahn was arrested in his automobile on the outskirts of Haskell by Highway Patrolmen O. A. Shands and E. K. Browning of Wichita Falls, late Sunday. The patrolmen were making a routine visit to Haskell, and became susto stop after they had signalled him for the purpose of cautioning him about defective lights on his

vehicle. He was overtaken after a brief chase and the patrolmen, searching his car, reported finding five west wing, adjoining the district quarts and ten pints of whiskey in the automobile, resulting in charges being preferred.

# **GRAND JURY BILLS**

Lewis Bruggeman Charged Assault To Murder In Indictment -

While in special session Wed-nesday, the Grand Jury returned an indictment charging Lewis (Shorty) Bruggeman, with assault and attempt to murder, in connection with the wounding of Herbert Kretschmer on the night of Wednesday May 6th.

Kretschmer, with a deep knife wound in his left side, and stabbed in the left shoulder, was rushed to the Stamford Sanitarium immediately after the altercation. Bruggeman was charged with the assaut and released under \$750 bond the next morning when arraigned before Justice of the Peace R. H. Davis.

Kretschmer is reported to be recovering from his wounds.

### A MODEL FOR EVERY SIZE HOME

Frigidaire is a most complete line of modern electric refrigerators. There s a model and size to suit the needs of every home from the smallest to the largest. Every one of the beautiful new Frigidaires meets the Five Standards that you will want in your refrigerator. Come in and see the proof demonstrations and let it reveal to you Frigidaire's usability. It has much more shelf space in front, Full Width Sliding Shelves, Portable Utility Shelf, Double Range Cold Control and scores of work-saving advantages. Come in and see how much you will get for your money and how easy it is to own a genuine Frigidaire.

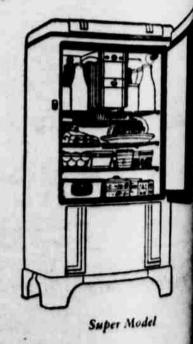

### ASSURANCE OF SAFE FOOD PRESERVATION

Government Bulletins and health authorities agree that perishable foods must be kept below 50 degrees and above 32 degrees. Meats, milk and other costly foods keep only a short time unless chilled below 50 degrees. Frigidaire is equipped with a remarkable cold making mechanism - the Meter-Miser. Safety Zone temperatures are automatically maintained, even in hot Spring and Summer weather of 110 degrees and over. This is your assurance that Frigidaire will safely protect your food - and the health of your family.

On Guard!

Frigidaire builds this Food-Safety Indicator right into the cabinet-visible proof that foods are kept at Safety-Zone Temperature, below 50 degrees and above 32 degrees.

H. D. Agent Gives Talk On Vegetable Cookery

A talk on preparing vegetables was given by Miss Peggy Taylor. Home Demonstration Agent, Tuesday, May 12th when the Josselet H. D. Club met in the home of Mrs. S. G. Perrin. Most people over cook vegetables and this destold the women.

Asparagus, egg plant, and Romaine are vegetables that grow well in this county according to Miss Taylor.

Some suggestions given were: (1) Cook vegetables as soon after gathering as possible. (2) Cook as soon as prepared,

Do not let them stand in water. (4) Serve vegetables as soon as them stand remove water.

Vegetables with skins should be baked in skins. Baked potatoes are more healthy because their vitamins are saved. (6) Scraped vegetables are bet-

ter than peeled ones. (7) Steaming is next to scraping them. (8) When boiling use only

small amount of water. (9) Leafy ones need no water but may be cooked in the water that clings to them when washed.

#### THREE CENTS AN HOUR!

Government research experts have just compiled in exhaustive report on wage scales in America. Shockingly enough, the study reveals that the lowest rate is three cents an hour. Fortunately, this rate isn't common. The United States is not a nation of three-cent-an-hour workers. Nevertheless, its traditionally high wage scales are not shared unanimously. The preponderance of the population, representing the great purchasing power of the country, manages to get along somehow on considerably less than \$2,000 a year. And even that wage, in view of the great wealth of the country, its unlimited resources and its gigantic needs, is certainly none

#### THE SCIENTIFIC COP

If you follow the crime news of the day, you may observe that the role of science in the solution of crime has become increasingly important. The Titterton murder in New York, just solved, is a case in point. There the murderer was traced through a single strand of twine. Science played a decided role, says Police Commissioner Lewis J. Valentine, And, in Washington, J. Edgar Hoover tells us that his laboratory is the best detective he has in his department. His files offer adequate proof of the part that chemistry and scientific approach general mean to law enforcement in America. is a broad hint to every police department and sheriff's office in the country to turn as much as ossible to the use of scientific deduction. The day of the "dumb cop" of familiar memory is over.

#### SELLING BAD STOCK

With utter disregard for blue sky laws, one citizen of New York is selling worthless stocks with mpunity, and has made a fortune doing it. But this vendor of bad securities is different from many others. He guarantees that the stocks he sells are absolutely without value, after buying them with the same understanding. This odd broker, R. M. Smythe, now 72 years old, has long been an authority on stocks, and has the history of about 300,-000 dead corporations. For forty-five years he has been consulted by persons holding securities, and when he convinces them that their handsome stock certificates have no value, he sometimes buys them at a nominal figure. Then he sells them to bankers for window displays, to colleges for study, or to fielddists who use them to paper their rooms. But always he gives his guarantee that they are no good from a financial standpoint.

Anthony Eden, youthful Brittish Foreign Secretary, speaking before the meeting of the Council this week, asserted. "The League must go on", How it is to do this remains uncertain.

We do not agree with many critics of the League who gladly proclaim its impotence. The economic sanctions levied against Italy have been oppressive in their weight and, possibly, if continued, might take from Italy most of the fruits of her military campaign.

The lesson to be drawn from the Italian venture into Haile Selaisse's kingdom is epitomized to the wise if they remember the famous saying attributed to Theodore Roosevelt-"Speak softly, but carry a big stick." The moral is that the League stick wasn't big enough.

#### ARE COTTON ROADS NEAR

An interesting experiment will be tried on a large scale when the United States Government makes available to various States 1,800,000 yards of large mesh cotton fabric to be used in road building or repair.

Cotton growers are interested in the possible development of a new market for the staple, but highway engineers are anxious to test claims that the fabric will prevent development of holes in

As we understand it, use of the fabric will be limited to so-called lateral roads, rather than main highways. The idea is—a tayer of tar, the fabric, and then another layer of tar on top.

If the experiments prove successful after being tested by time, the benefits will be two-fold, to the cotton growers who get a new market, and to those who use the roads, who will get cheaper and better highways.

#### ENCOURAGING RETURNS

At least 650 Americans who ordinarily would have been in their graves are still living today because of a marked reduction in motor vehicle accidents during the first three months of this year. Moreover, the National Safety Council makes the encouraging prediction that, if the present trend toward safer driving continues, its is likely that some 3300 lives will have been spared by the end of 1936. The council reports that 6850 presons have lost their lives in motor vehicle accidents so far this year. For the same period in 1935, 7500 were killed. One of the most encouraging figures in the whole compilation, however, is an 18 per cent reduction for March alone. It indicates that the American public can get down to sane, intelligent driving if it tries. So let's keep at this life-saving

GOOD LOSERS NEVER LOSE Edgar A. Guest

A merchant in small town ran for office and was overwhelmingly defeated. He polled so few otes that he appeared ridiculous in the eyes of is neighbors, and both his social and business standing were in danger. It's hard to be laughed at, and still hold your ground.

But this merchant was a good sport. What is more, he knew that the perils of becoming the town oke. So he beat the town to it! The morning after the election he put this sign in his window: "\$25 reward for the name of the man who cast that vote

Everybody saw it and everybody laughed. But they laughed with him, and not at him. People came into the store to shake hands and congratulate him on his sense of humor and sportsmanship. The story of the sign went the rounds of the country, and farmers began to drop into his store to trade. Thus the merchant turned defeat into a personal triumph by proving that he was the town's

smoothest EIGHT in the world

New peaks of performance, economy and distin in the new Pontiac Eight

WHAT do you look for in an eight? THE GREATEST POSSIBLE SMOOTHNESS! What's behind the fame of the Pontiac Eight? It's a miracle of smoothness! Put these two facts together and you'll know what eight to buy. You'll pick a Pontiac because the Pontiac engine has no vibration point at any speed!

You'll have to go to twice as many cylinders to match that performonce, and climb the price scale to approach Pontiac's quality. Moreover, in the famous Gilmore-Yosemite Economy run, under official supervision, this big car averaged 22 miles per gallon! Coach Richey was giving an informal talk on physiology. "Also," he remarked, "It has recently been found that the human body contains sulphur."

"Sulphur!" exclaimed Mary Eleanor. "And how much sulphur is there in a girl's body?" "Oh, the amount varies," said Coach.

"Ah!" returned Mary Eleanor, "and is that why some of us make better matches than others?"

Eugene Rose entered a grocery store and said to the clerk. "Take this order: ten pounds of coffee at twenty-five cents; eight pounds of tea at thirty cents. Add that up Junior Class to How much is it?'
