When souls communicate — it's like prayer. There may never be a word spoken . . . just a sigh, a wish, a hope, a longing. A child trying to express some simple feeling to its Mother. Mother trying to express her devotion to her child.

All prayer is founded on the idea that God loves us and cares about the things that affect us. Jesus taught us to pray "Our Father . . ." He wanted men to see God's love on the parental level.

When you feel the need to pray, reach out with your heart to God. You may not be able to find words. Yet He hears, He understands those deep feelings we find hard to express.

In church our efforts to communicate with Him are strengthened by the fact that many others are praying with us. They need Him just as much as we do. And we need their longings, their hopes and wishes and feelings to help us express our own. Join us in prayer at your local church or synagogue.

# Spencer-"Boll Weevils Will Be Light"

Mild conditions prevailed this past winter favoring the overwintering of boll weevils, but in most of the area boll weevil numbers will be light. Boll weevil populations last fall were light because of the uniform planting of cotton last spring which was delayed in many cases into June by wet, cool weather conditions. Boll weevils

were not found in most fields until September. Then, dry weather conditions in September and October resulted in rapid maturity of the cotton and left the boll weevil short on squares and small bolls in which they feed and reproduce. The Fisher County Cotton Committee set May 19 and 26, 1980 as the dual

uniform planting dates. These dates will prevent boll weevils from deposit-

### Card of Thanks

We would like to express our appreciation to everyone who was so nice to us in the loss of our Mother. Your prayers, the food you brought, the beautiful flowers, your visits and kind words will always be remembered.

May God bless each of you.

ing eggs in 1/3 grown squares until the first or second week in July. The cotton plant produces the first 1/3 grown squares 40 to 45 days after plant emergence. Boll weevils cannot deposit eggs in squares that will survive until the squares are 1/3 grown.

Research has shown that boll weevils can live 10 to 22 days after emergence from overwintering habitat. Most of the boll weevils emerge in late

May and early June, and these boll weevils die before 1/3 grown squares are present. Only a very small percent of the overwintered boll weevils survive until mid-July and most fields that begin to produce 1/3 grown squares then, will not need early season boll weevil control.

A uniform planting date is an important part of an effective boll weevil management program in the Rolling Plains of Texas.

This cultural boll weevil control practice can reduce damage significantly during the entire growing season and result in an average county wide increase of fifteen pounds of lint per acre or more due to the reduction in boll weevil damage.

WTU digger-derrick truck

1972 cost \$37,000 1979 cost \$71,942

This digger-derrick truck is just one example of how rising prices are affecting the cost of producing electric energy. Of course everything else has gone up, too. Materials, equipment, labor - nothing has escaped the effects of inflation.

Which means that we at WTU are striving harder than ever to operate efficiently and economically as we meet the daily needs of our customers.

As always, WTU's goal is to provide a dependable supply of electric energy at the lowest practical cost. We hope you'll use it wisely.

### Correction

In an article in last week's paper concerning the arrest of four juveniles and one adult it listed Tommy Flores as driving a vehicle. Flores was not driving the vehicle at the time of the apprehension. Flores was arrested for unlawfully carrying a weapon. This newspaper regrets the error.

Traci Hull and Brandy Oliver handed out rice bags at the reception.

The groom's parents hosted the rehearsal dinner in Fellowship Hall of

the church.

Following a wedding trip to San Angelo the couple is making their home in Anson.

## MAY 15, 1980

### A BAD DAY FOR AMERICA...

**AN OPEN LETTER TO THE PRESIDENT OF THE UNITED STATES:**

The ten cent per gallon fee you intend to impose on gasoline on May 15 will result in disastrous economic repercussions for all Americans. The communities and among small businesses—that segment of Americans who can least afford it.

We believe the negative impacts of the program on all ports and energy conservation. Specifically, your ten-cent per gallon gasoline fee will:

- Result in supply shortages in rural America and in agricultural communities.
- Drastically affect 1980 farm crop output and raise food prices for American consumers.
- Add \$10.3 billion to the cost of gasoline during the first year of petroleum products.
- Place a disproportionate economic burden on low income families, rural areas and small businesses.
- Increase nationwide inflation the first year by at least 1%.
- Make it impossible for small businesses to assimilate the overnight increase of 8% in gasoline product cost.
- Bring about disastrous effects on American farms, businesses and consumers; no economic impact analysis of these effects has been prepared.
- Constitute taxation without Congressional representation.

For these reasons we ask you withdraw the Petroleum Import Adjustment Program and the Gasoline Conservation Fee prior to its scheduled implementation on May 15, 1980. Absent Presidential action we further request that the U.S. Congress take appropriate and swift action to spare all Americans by halting this inflationary program.

Respectfully,

**... IT'S NOT TOO LATE TO STOP IT!**

## Hustlin' Round Hobbs

By Joy Walker

Well are still waiting for that good rain; seems like every time there is a cloud it goes around us, but at least it's trying.

Mrs. Addie Scott is now out of the Fisher County Hospital, we are pleased to report, and we hope that she will continue to improve.

Mrs. Lealon Wilburn is now also home from the Rolling Plains Hospital, Mrs. J.W. Etheredge reports, and seems to be getting along just fine. We also hope that she will continue to improve.

Mrs. Neva Moffett is still in the Intensive Care Unit at West Texas Medical in Abilene. She has good days and bad days, so the reports say, and we hope to hear that she will soon begin to get very much better.

Mr. and Mrs. Jimmy Walker spent Tuesday and Wednesday nights with Greg and Evette Gruben. We stayed over at their house while their parents, Mr. and

Mrs. Wilber Gruben, went to Odessa. We ate dinner in Snyder on Wednesday with Mrs. Ola Ma. Myers, Jim's sister.

Joe Hardin and Marge Peters from Abilene visited with Bea Hardin on Sunday. Mary Grace Martinez visited with Lisa Hardin on Sunday evening.

Mr. and Mrs. Andrew Williams are in Tyler celebrating the birth of a new grandson. He was born Monday afternoon, weighed 5 lbs. 6 ozs. and they called him Aaron Lee. Congratulations to Randy and Sherry Williams and to both sets of proud grandparents.

News seems to be pretty scarce this week, maybe everyone is going to wait until next weekend and celebrate Mother's Day.

See you next week and am sorry if I missed anyone with their news. Don't forget you can call me if you want any news reported.

To use unit pricing effectively, compare different sizes of different brands, says a family resource management specialist with the Texas Agricultural Extension service.

**Grass. Stirrup-high and far as the eye could see. That's the way it was. That's the way it can be.**

When the first ranchers pioneered Texas and Oklahoma they were greeted by grassland. Ranging for miles and waving a welcome to the strong-spirited ranchers and their grazing herds.

When the land was all taken, it was not all taken care of. It was fenced and overgrazed. It was parched by the dry years, and invaded by deep-rooted and "drouthy" brush. Brush destined to invade nearly every ranch, and to cut in half the grazing potential of over 88 million acres.

But there's a new pioneer spirit among ranchers today. They want their land back from the brush... and back to its natural beauty and bounty.

And there's a new product that makes it practical. It's Graslan™ from Elanco. Graslan is a new approach to brush control. It's as revolutionary and unique as were three other Elanco products—Tylan® and Rumensin® for your cattle and Treflan® herbicide for soybeans and cotton.

To find out more about brush control with Graslan, talk to your local SCS, Extension Agent or Range Management Specialist. Or call the toll free Elanco hotline: 1-800-428-4441. It could be the most important call you'll make for years to come.
