

### Superstition Plays In "Sure Cure" For Ills, Survey Shows

A complete list of superstitious ideas concerning the prevention or cure of disease, prevalent among ignorant people even to this day would be almost endless. In an address Dr. Joseph L. Miller, long a practicing physician among the hill folks of West Virginia, enumerated a few of them, including the following:

Soot or cobwebs stop bleeding; a bag of asafetida hung around the neck prevents measles, diphtheria and whooping-cough; amber necklaces prevent goiter; rubbing a greasy dish rag over a baby's face stops convulsions, piercing the ears aids weak eyes; nutmeg worn around the neck prevents indigestion and colic; blood from a black cat cures erysipelas; carrying horse chestnuts in the pocket prevents rheumatism; a coin held under the upper lip and a cold key dropped down the back will stop nosebleed.

## FUN with FACTS

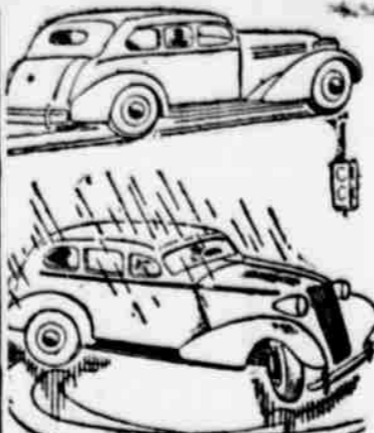

THE FUN

Place a clean, dry saucer or platter upon a table. Take a pencil, eraser end down, and hold it against the platter at an angle of about 45 degrees. Push firmly in an endeavor to move the pencil across the platter. You will find that the platter moves and may even push the table-covering or table itself.

Place a small quantity of water in the platter and repeat. You will find the pencil eraser now moves across the platter with very little effort. We might say that it "skids" across the platter. There will be no tendency to move the dish.

(Travelers Safety Service)

THE FACTS

On a clean, dry pavement, your tires exert a very strong push. It is this push which moves your car forward. When the pavement is wet, your tires have a tendency to repeat the eraser and wet platter performance. This may prove to be dangerous if you try to stop quickly or change your direction suddenly. Other conditions which tend to cause similar results are wet leaves, car tracks, oil, ice and snow. Under such circumstances, whenever you feel impatient, just remember the wet eraser.

(The following interesting article, written by Alvin Chamberlain of this city, deals with his experiences while serving with the U. S. Navy during the World War. Similar articles by other ex-service men will be printed from time to time—Editor)

#### MY FIRST SUNDAY IN THE FLEET

After being transferred from the Naval Station at Norfolk to the fleet the first Sunday made an indelible impression upon my mind. The fleet was anchored in Long Island Sound just off Port Jefferson. It was on Friday that we boarded the U. S. S. Michigan. That day and Saturday was spent in getting acquainted with our stations. The officers and the crew

assigned to train recruits were very nice and particular to the boys, despite this I soon learned that because of the crowded conditions that the ship was a madhouse. The Michigan being a first class battle ship regulations were the order day and night, plenty and strict, and recruits ran afoot of them every step made. This created a desire to be where there was more freedom. Sunday morning at muster they passed the word that all who wanted to go to Port Jefferson on a "Marching Party" in the afternoon to turn their names in to the yeoman. Practically all the recruits who were not on duty signed to participate in the fun and freedom. This being done we patiently awaited the time when we could go ashore and see the sights of Long Island. The boys were in high glee at the prospect of liberty from confinement. They would congregate and happily talk of how nice the officers were to allow them to spend the afternoon on land. The Texas boys had not had liberty since arriving at Norfolk.

They attended church service that morning and heard one of the ablest Chaplains of the navy preach. Then had Sunday dinner, which being in the fleet was a chicken dinner with ice cream served as desert. After this they walked around deck, watching other shops and seeing what land they could, anxiously awaiting to hear the bugler blow for the marching party. Well, at 2:30 sharply the bugler

gave the call for marching party to fall in on port quarter deck. The yeoman checked the list and then all were ordered to get in motor boats. One marine officer and several marines went with us. The balance of the party was composed of Texas recruits. The company all in boats we set sail for Port Jefferson, the distance being short we were soon there and had our feet on dirt. Some started to straggle off, but were told to fall in line. The roll was called, and then we were ordered to count off. Being placed in company formation, with the marines in front. The next was "squads right," "forward march." We walked about one hundred feet and the command, "line officers gave the order to "double time, march" just as we began to ascend a long sloping hill. The marines in the lead, working with clock-like precision. We had only gone some fifty yards when I overheard the marine captain say "give them a good lead out, faster". That immediately brought forth from the Naval officers "close in, close in". Every few steps the marine officer would say "lead out, faster", only to be answered by the naval order "close in". The summer day was hot, the hill a mile long. The recruits began to fall out or lag behind only to be met with the order "stay in line, close in". On reaching the top of the hill the road made a sharp turn, the marines disappeared. They had reached a farm house and were at the well drinking and laughing when I along with the straggling remnant reached the shaded spot. They allowed us to drink all the water we needed and lounge around for a few minutes and then had us walk about two miles through the residence section of the city. By this time we reached the edge of a beautiful park, the commanding officer looked at his watch, became all heated up with excitement and remarked that "we had only five minutes to get aboard the ship". Without a moment delay we heard all the familiar orders: "fall in, count off, attention, forward, march, double time, close in". Well, we were about one and one half miles from the boats, the ship was two miles out in the Sound, making all three and one half miles to go and five minutes to do it or go on report. What I mean is that the marines simply gave one grand lead out. They made a race track from there to the dock, while the recruits gave all they had, they "leather necked", soon we began to fall out of line, and when the marines reached the dock there was not over a half dozen recruits in line. The training they had simply did not enable them to compete with the efficiency of the marines. Well when the last remnant of the stragglers reached the dock, cold drinks and candy were in order. In about thirty minutes we reached the ship and learned that we had time to spare yet. That was my first and last Marching Party. From that day I never volunteered to do anything or go anywhere, I had learned my lesson. From that day I acted on the theory that if the officers needed something done and thought I was the proper one to do it they would call me. But, oh boy, that marching party, that night I overheard Ross (Red) Mangum, from San Angelo telling some of the boys who did not fall about his experience and giving them some free advice. Red said that he told him it was to be a marching party, but that he called it a running party, recounting to them his ranch, baseball and football experiences, but told them that that was the first time that he ever had to run until his tongue lapped the dirt from the ground. Red was a great talker, well educated and interesting. After supper when not on duty you could see a crowd of boys gathered around him listening with intense to every detail of some experience of his ranch life he was relating to them. He was a gifted story teller. The last time I saw him was in New York in 1917, the last words I heard him speak were "how would you like to go on a marching party?" That was my only volunteer party, from that day until the war closed where I went or what I did was in answer to a request or an order.

### CARD OF THANKS

We wish to express our heartfelt thanks to the many kind friends and neighbors for their acts of kindness and words of sympathy extended us in the recent loss of our beloved husband and father. May God ever bless each of you is our prayer. We deeply appreciate the beautiful floral offerings—Mrs. W. A. Edge and family; Mr. Matt Edge and wife; Mr. and Mrs. Andy Griffith; Mr. and Mrs. Ike Hudson and family; Mr. Haskell Parker and family; Mr. and Mrs. Will Edge and family; Mrs. Alice Gunnelis and family; Mr. and Mrs. Henry Edge and family; Mr. and Mrs. Jess Jackson and family.

Mrs. Tommye B. Hawkins returned home Monday from a two weeks visit in Mineral Wells visiting with her sister Miss Beryl Boone who has been ill with influenza.

### BITES BURGLAR

Oelwein, Iowa.—Attempting to stifle her outcries a burglar put his hands over the mouth of Marceline Jardee. She set her teeth in one of his fingers and held on until her father, George Jardee, grabbed the intruder and held him until police arrived.

TAKES KIDDING SERIOUSLY Chicago.—After making several difficult shots with a rifle at a shooting gallery, Alex Storm Jr., 19, was kidded about his handling

### A Few Facts About Ice!

Ice refrigeration and only ice refrigeration preserves foods without loss of their natural flavor.

Only real ice banishes food odors in your refrigerator. Your butter, cheese, etc. retain their natural aroma.

Ice refrigeration supplies plenty of pure, clear, odorless ice for all household purposes. This is especially important in summer.

An ICE refrigerator is noiseless, safe, dependable and constant in operation. Steady, safe, even temperature assures proper care of foods.

### —You Need In Summer

More Than... When hot weather ensues the freshness of meats and vegetables you can keep them fresh of their natural... When hot weather calls for iced drinks iceman's ice never runs short. true economy of eating with ice!

## RUPTURE SHIELD EXPERT HERE

H. M. SHEVNAN, widely known expert of Chicago, will personally be at the Hilton Hotel, Ahlens, Saturday and Sunday only May 15 and 16, from 9 A. M. to 6 P. M.

Mr. Shevnan says: The Zoetie Shield is a tremendous improvement over all former methods, effecting immediate results. It will not only hold the rupture perfectly but increase the circulation, strengthens the weakened parts, thereby closes the opening in ten days on the average case, regardless of heavy lifting, straining or any position the body may assume no matter the size or location. A nationally known scientific method. No under straps or cumbersome arrangements and absolutely no medicine or medical treatments.

Mr. Shevnan will be glad to demonstrate without charge. Add. 6641 N. Richmond St. Chicago. For 15 years assistant to F. H. Seeley, famous rupture expert of Chicago.

## What is the "Low-price Field"

YOU hear a lot about "the low-price field" these days. A good many cars claim to be in it. So whenever the low-price field is mentioned, remember:

Until Ford came, no average American could own a car.

Today all Ford prices are still low — with the prices of the 60-horsepower Ford V-8 \$30 to \$60 lower than those of any other car of comparable size.

But with Ford, "low price" doesn't merely mean low figures on the price tag. It means much more than that. It means low prices and low costs all the car's long life. Low prices for service — for parts — and, above all, for operation.

Both Ford V-8 engine sizes are economical to operate. The 85 horsepower gives greater gasoline mileage this year than ever, and the "60" delivers the highest mileage in Ford history.

Private owners, cab companies, fleet operators all report that the "60" averages from 22 to 27 miles per gallon of gasoline.

Check and see how much Ford saves you.

Ford Founded the Low-price Field Ford Keeps That Field Low-priced Today

## Ford V-8 Prices Begin at \$529

AT DEARBORN FACTORY. TRANSPORTATION CHARGES, STATE AND FEDERAL TAXES EXTRA

This price is for the 60-hp. Coupe equipped with front and rear bumpers, spare tire, horn, windshield wiper, sun visor, glove compartment and ash tray. \$25 A MONTH... usual down payment, buys any Ford V-8 Car from any Ford dealer in the U. S. through Authorized Ford Finance Plan Universal Credit Co.

Jim Says

773,783 acres of legumes in 1934. The past year saw Texas farmers, in compliance with the Agricultural Conservation Program, plant 1,776,868 acres to legumes.

Pastures which contain a combination of legumes and grasses provide a longer period of grazing and a more balanced ration for livestock; tend to check erosion and soil losses; and build up the soil by adding humus and nitrogen.

The Agricultural Conservation Program contains provisions for carrying part of the financial burden of conservation practices, and offers aid to farmers in the task of improving and maintaining soil fertility.

Friendly Builders English Club The president called the house to order and the secretary read the minutes. Each committee gave a good report. The courtesy committee had charge of the program which follows:

7A News—Eloise Johnson, Bazonka Duet—Billy Kemp, and Jack Morris. Imaginations—Jack Morris. Song—Omega Lee, Zelma Adkins, Ella Mae Barnett, and Virginia Heath.

Story—Leta May Curry. Song—Natalie Brooks. Imagination of Englishmen—Alta Faye Larned and Christine Harris. This concluded our program.

EMERY WHEEL EXPLODES York, Pa.—When an emery wheel, 20 inches in diameter, exploded at a local iron factory, Kissler Stevens, 31, was instantly killed. The force of the explosion rocked the plant and endangered the lives of other workmen.

And Here Are Some More of T. C. U.'s Athletic Leaders

Sam Baugh and Walter Rosch must be great athletes when they can grab the newspaper headlines in competition with such lovely sports competitors as these four on the Horned Frog campus. Let the girl athletes of T. C. U. rule in sports for a day! And what rulers! Ready for a bit of tennis is Mrs. Kenneth Vaughan, junior, from Fort Worth. And who wouldn't relish a round of golf with Miss Betty Trammell, a Fort Worth freshman. Even the golf ball should enjoy its lowly role! Archery dates back to ancient times but Miss Billy Stocker supplies the modern touch. She is a sophomore from Pasadena, Calif. And a real "pip" is Miss Katherine Pipkin, Fort Worth junior, poised for a plunge in T. C. U.'s swimming pool.

Recipes Used In Free Press Cooking School

Following the request of numerous women who attended the Free Press cooking school last week, we are printing a series of recipes used by Miss Hogue in her three day's demonstration.

Plank Steak Broil or pan-broil a tender steak 7 minutes. Select a sirloin, porterhouse, tenderloin or club steak. Cut about 1 1/2 to 2 inches thick. Trim off excess fat and wipe with damp cloth. Broil under an electric grill. (In gas stove, have steady

2 or 3 inches below flame and leave door open). Sear quickly on one side, then turn. Reduce heat and turn occasionally until at desired stage. About 12 minutes if desired rare; 20 to 30 minutes for medium or well-done. Butter a plank and arrange close to edge a border of mashed or Duchess Potatoes, put through a pastry bag if desired. Brush with 1 egg yolk to which 1 tablespoon of water has been added. Place in oven and let brown. Place steak in center and garnish as desired. Suggested combinations for garnishing: Cauliflower, peas, and eggplant timbales or, glazed onions, butter carrots in Julienne strip, jarvis stuffed peppers, mushroom caps.

Sour Kraut and Pig Knuckles Place 1 can sour kraut in Thrift cooker, turn unit on high until steam comes through vat. Reduce heat to low and add 2 lbs. pig knuckles or a 2-pound pork roast. Let simmer 5 to 6 hours. Just before serving, place dumplings on top of meat and sour kraut in airtight container and steam 12 min.

K C Dumplings 2 cups Best Biscuit flour. 2 tspns. K C baking powder. 1/2 tspn salt. 1 cup milk. Milk and sift dry ingredients. Add milk gradually. Drop by spoonfuls and cook on top of pig knuckles and sourkraut.

Jelly Pie 1 cup butter. 6 egg yolks. 1 cup sugar. 6 egg whites. 1 cup red jelly. 1/2 tspn K C baking powder. 1 tblspn lemon juice. 1/8 tspn salt. Cream butter, add 1/3 cup sugar. Beat egg yolks until thick and lemon colored, add 1/3 cup sugar and then add to butter. Beat egg Whites stiff, add 1/3 sugar, fold this into the butter and egg yolk mixture. Break up with fork, 1 cup of red jelly and fold into above mixture. Last, fold in 1/2 tspn K C baking powder and 1 tblspn lemon juice. Put in uncooked pastry shell and cook 10 minutes in bottom of hot oven then remove to middle shelf and reduce heat to 350 degrees and cook 30 to 40 minutes.

Silver Cake 1 1/3 cup Mrs. Tucker's shortening. 7/8 cup sugar. 1/2 cup milk. 3/4 cup Best Biscuit flour. 2 tspns K C baking powder. 1/4 tspn salt. 4 egg whites. 1/2 tspn almond extract. Beat egg whites until stiff, add 1/2 cup sugar and set aside. Cream butter, add 1/2 cup sugar gradually while beating constantly. Mix and sift dry ingredients and add alternately with milk. Fold in egg whites, and flavoring and bake 45 minutes; 350 degrees in loaf pan.

Plain Muffins 2 cups Best Biscuit flour. 4 tspns K C baking powder. 1/2 tspn salt. 2 tblspns sugar. 1 cup milk. 2 tblspns Mrs. Tucker's Shortening, melted. 1 egg, well beaten. Quick method: Combine dry ingredients, combine liquid ingredients and add to dry ingredients

as quickly as possible, mixing only enough to dampen flour. Cake method: Cream butter and add sugar gradually and egg. Sift dry ingredients and all alternately with milk. Drop by spoonfuls in butter muffin pans and bake 25 minutes in hot oven 400 degrees.

Cocoanut Coffee Frosting 1 cup sugar 1/2 cup brown sugar 1/2 cup Admiration coffee. 2 egg whites 3/4 cup cocoanut 1/2 tspn vanilla Few grains salt. Boil sugar and coffee until syrup will spin a thread when dropped from tip of spoon. Pour gradually on egg whites beaten until stiff, and continue until cool. Then add cocoanut, vanilla, and salt. Pour on cake and spread leaving a rough surface.

Orange Ice Cream 1 cup heavy cream 1 cup thin cream 2 cups orange juice Sugar 1/8 tspn salt Add light cream slowly to orange juice, sweeten to taste, freeze to a mush and fold in heavy cream whipped and freeze. Serve with canned strawberries or fresh fruit mashed and sweetened.

Milk Pudding 4 cups scalded milk 1/3 cup melted butter 1 1/4 cup staled sponge cake crumbs. 1 tspn nutmeg 1 cup sugar 1 tspn salt 4 eggs, slightly beaten. 1 1/2 cups seeded raisins. Pour milk over cake crumbs and let stand until cool. Add sugar, eggs, nutmeg, salt and butter. Par-boil raisins until soft and add to mixture. Turn into greased pudding dish and bake slowly 2 1/2 hours, stirring after first half

hour, to prevent raisins from setting. Serve with hard or liquid sauce.

Blackstone Salad Lettuce, apples, celery, orange, grapefruit, green pepper, pimientos, on 6 lettuce leaves (depending on size), place equal parts of chopped apples, grapefruit, celery and a very little chopped green pepper. Spread on top of lettuce and cover with mayonnaise. Decorate with 6 small strips of orange with 2 strips green pepper and 3 strips pimiento.

Luncheon Salad On 2 or 3 well bleached slices of lettuce, place a center slice or 1/2 of a peeled tomato. In the center of tomato, place some scrambled eggs and on top of eggs place 3 very thin slices of boiled ham cut with a 1 inch column cutter and then cut in half again making small horse-shoe cuts. Lay the ham on top of the egg in a row. French dressing.

Cabbage Salad Shred cabbage finely, salt and add french dressing. Allow to stand 2 to 3 hours. Mix in a little chili sauce and grated carrot, pimientos, and green peppers.

Return From Visit In Arkansas and Tennessee Mr. and Mrs. A. Vaughn have returned from a three weeks trip to Joiner, Ark., and Memphis, Tenn., where they visited friends and relatives whom they had not seen in 45 years. They report a most enjoyable trip.

Visitors From Brownwood Mr. and Mrs. Herbert Crump and Mr. and Mrs. V. H. Huckaby of Brownwood spent Saturday night with Mr. and Mrs. J. P. Trimmer of the Howard community. They returned to Abilene Sunday morning to attend a radio convention.

Small Gardens Found Profitable Northwest Texas

Many home demonstration club members and 4H club girls in Northwest Texas tell their county home demonstration agent that they have found small gardens which can be well watered and cared for produce more vegetable than larger ones which can not be well tended.

A hotbed 11 feet long and three feet wide will be used by Elizabeth Ann Walker, garden demonstrator of the Palo Duro 4 girls' club in Moore county to produce early vegetables for table use in addition to starting peppers, cabbage, and tomato plants. As the plants are set out in the larger garden, the space will be utilized for other vegetables.

Member of the Hackberry home demonstration club in Cottle county have planted small gardens protected by a frame or by canvas which will be protected from wind and sand and can be intensively watered, fertilized and care for. Vegetables such as lettuce, mustard, tender greens, carrots, radishes, beets and cucumbers have proved successful in such gardens.

A garden containing only 45 square feet, and protected on the sides with 12 inch boards and on the top by canvas, has been planted to radishes, lettuce, and beets by Mrs. C. C. Bristow, cooperator of the Comper home demonstration club in Jones county. Mrs. Bristow has found that the small garden will produce vegetables earlier and longer, but has also planted a larger garden to secure volume for canning.

Campers Should Take Precaution Against Typhoid

As the summer season approaches, a word of warning is timely to prospective campers. Boy Scouts, Girl Scouts, summer vacationists, fishermen, and others who enjoy getting out into the open, relative to the possible dangers that may be encountered from the standpoint of contracting infection under the changed environment. This is especially true of diseases that may be transmitted through food and water supplies.

Typhoid fever is a disease the amount of which is greatest, as a rule, where there is the least sanitation. It is an unnecessary and preventable disease. It is spread from person to person by water,

milk, fingers, flies and food. Every case is contracted by taking into the mouth some substance contaminated with typhoid organisms and those occur only in nature in the bowel and bladder discharges of persons sick with typhoid or from carriers, persons who have had typhoid and who after recovery still harbor the germs in their systems.

Persons planning a vacation or trip where sanitation may not be rigidly enforced or where food handlers are not regularly examined should protect themselves against this disease by being vaccinated. Three inoculations with typhoid vaccine, a week apart, are necessary to secure protection against this disease and the immunity established is good for two years. The purity of water or milk cannot be judged by looking at it. Play safe and have your doctor protect you.

# SOCIETY

Epistol W. M. S.

The W. M. S. met at the church Monday at 3 p. m.

Opening song, "Revive Us Again."

The Lord's Prayer was repeated in unison. Mrs. Scott brought the devotional on the parable of the Good Samaritan as recorded in the Book of Luke.

A program was rendered from Our Home and Foreign Fields on the subject of "Kindness."

"A Beautiful Life" was told by Mrs. Quattlebaum.

Prayer by Mrs. Paxton.

"A Childless Widow"—Mrs. Jim Crawford.

The hour of meeting was changed from 3 to 4 o'clock.

The Modern Priscilla Club.

The Modern Priscilla Club met in the home of Mrs. Jerry Carmichael on Thursday May 6.

The meeting was called to order by the president, Mrs. Carmichael, and the business consisted chiefly of planning for the year's programs and work. The pattern for the club dress was selected and each member is to make and wear her dress to the next meeting.

The program consisted of two songs and the reading of two poems by Dale and Dean Bartlett.

Mrs. Buford Gholson sang, "Did Your Mother Come From Ireland?"

A lovely plate of sandwiches, pickles, smacks, cookies and tea was served to Mesdames Thurman Bynum, Clarence Trout, Skinny Tidwell, Taylor Sego, Nig Bartlett, Buford Gholson, and Misses Dale and Den Bartlett and the hostess.

The club will meet with Mrs. Buford Gholson Thursday May 20, 1937.

Guests in Home of Mr. and Mrs. Jesse Josselet.

Mr. and Mrs. Jesse Josselet had as noon guests Sunday May 9th, Mr. and Mrs. Clarence Norton, Mrs. W. L. Norton, Clovis, Mildred, Connie Joe and Jean Norton, Mr. and Mrs. J. L. Toliver, Mary Elaine, Margaret, Elsie, J. L. Jr., Bailey Lee and Lucille Toliver, T. C. Walker and V. P. Terrell.

The table was laid in white linen and decorated with pink roses. A beautiful lunch was served buffet style. Afterwards the Stamps Radio Mother's Day program was enjoyed.

In the afternoon the following guests called: Mr. and Mrs. Walter Rogers and son Gene, Mrs. F. W. Rogers, Grandmother Harden, Mr. and Mrs. A. J. Josselet, Alma and Herman Josselet.

## Lecturer Gives Hints On Use Baking Powder

Miss Jessie Hogue, who conducted the Free Press Cooking School, says that for best results in baking it is a good plan to follow these simple rules:

Use the amount of baking powder recommended on the can. Because of the high strength of K C Baking Powder which she used in the cooking school, only one level teaspoonful should be used to a cup of well sifted flour for most recipes. This is equivalent to one heaping teaspoonful to a quart of flour.

Careful measurement is very necessary as using more or less than a recipe calls for will not produce best results.

Another secret of good baking is to be sure that the baking powder is thoroughly mixed with the flour and other ingredients. The more thoroughly the baking powder and flour are mixed before you add moisture, the better your results are likely to be. Sift three or four times.

For biscuits, make a smooth dough that can be handled without sticking, and bake in a moderate oven. For cakes, have your oven slow to moderate at first, until the cake is fully risen; then, increase heat so as to just brown lightly.

Miss Hogue said that K C the brand she is using in cooking schools is manufactured by baking powder specialists who make nothing but baking powder—controlled by expert chemists of national reputation. It is always uniform in quality and can be relied upon to produce for you, the kind of bakings you will be proud to serve.

Try the following choice recipes:

**K C Everyday White Cake**  
1 1/2 cup butter (4 oz.)  
1 cup granulated sugar (8 oz.)  
1 1/2 cup milk  
2 cups flour (8 oz.)  
2 level teaspoonfuls K C Baking Powder.  
Whites 3 eggs.  
1 teaspoon vanilla extract.

**K C Baking Powder Biscuit**  
2 cups flour (8 oz.)  
2 level teaspoonfuls K C Baking Powder.  
4 level teaspoonfuls shortening (2 oz.)  
About 2 1/2 cup milk or water.  
1 1/2 teaspoonful salt.

**CHURCH OF CHRIST**

You are especially invited to attend our weekly Wednesday night Bible Class. We are beginning the study of the Book of Revelations, under the direction of a capable teacher, and you will get much out of these lessons. —A Member

James A. Greer, editor of the Rochester Reporter was a business visitor in our city Monday.

Mrs. J. A. Arbuckle who has been visiting in Ft. Worth for several months, return home with her son, T. J. Arbuckle, last Friday.

streets while the automatic signal light suspended there-over shows an illuminated red light.

SECTION 2. It shall be unlawful for anyone to make what is termed a "U" turn at the intersection of Clark and Walton streets in the town of Haskell, Texas, however nothing in this article shall be construed to prevent a left-hand turn at such intersection when such signal light shows an illuminated green light, also, nothing in this article shall be construed to prevent the making of a right-hand turn upon a red light after first coming to a halt. This article is applicable to all forms of traffic, and applies to pedestrians as well as operators of vehicles of whatsoever nature.

SECTION 3. Any person who violates any of the foregoing sections of such article shall be deemed guilty of a misdemeanor and on conviction shall be fined not less than one nor more than twenty five dollars.

The rule calling for a second and third reading of an ordinance shall be and is hereby waived and suspended and this ordinance shall become a law and be of force and effect from and after its passage.

Passed and adopted May 3, 1937.

F. G. ALEXANDER, Mayor.

Attest: R. A. Coburn, City Secretary.

## Reptiles 40 Feet Long Swan Texas Streams Hundred Million Years Ago

(By Gene Brock, in Houston Chronicle).

In the region now called Texas more than 100,000,000 years before our late ancestors inhabited this country, reptiles nearly 40 feet long swam in the warm waters and played on the banks of the then marshy swamps and lakes.

These reptiles, which may have been the ancestors of the alligator and crocodile, have been designated by modern man of scientific turn as phytosaurs (fite-o-sars). Their great prehistoric playground covered a large portion of the great plains, known as the Llano Estacado; the northern part of our state, and part of the land south of the caprock.

Millions of years ago, however, Texas was different from what it is now. The earth bears evidence of the fact that lush mosses as large as small trees grew in profusion. Many types of tender leaf trees, similar to palm trees in appearance, covered the moist places like our forests of today. The unusually warm climate of that period and the great amount of moisture made the ferns and mosses grow rapidly.

**Of Considerable Size**

As far as can be known the phytosaurs were all reptiles of considerable size. Fossils indicate they were as long as 38 feet. They somewhat resembled the crocodile in form and habit. As in the crocodile family, they were covered with a bony armor, though their armor plate was much thicker and different in design. They were fond of damp places and mud, used the water as their hunting grounds. Even though the characteristics of these species are the same in many respects, there is no implication that they actually are of the crocodile family.

About 100,000,000 years ago, our Gulf of Mexico covered the plains and continued to do so throughout the succeeding Cretaceous period. A great sea split our continent at this time. It reached through where Rocky Mountains are now, and extended on through Canada, and entered the Pacific at the present Alaskan coast line. Impossible as it may seem, Alaska had at one time a warm climate and a waterway connecting directly with what is now Texas. For millions of years this great sea covered the remains of the phytosaurs, thus preserving them by a chemical action in the water known as fossilization.

**Snout Like Gar**

If the laymen, with his average knowledge of technical terms of description, had seen a live phytosaur, he would have described him, as being shaped like a battleship with a snout or bill shaped like that of the alligator gar. The beauty of the armor plate and his possibly terrifying ugliness would have held his attention more than the other characteristics.

In West Texas, near Calgary Crosby county, some deposits have been found which have yielded excellently preserved parts and almost complete specimens of the smaller variety (known as the Rhytidon Carolinensis). Bones of the present coyote and cattle are mixed with the fossil bones of the prehistoric animals. W. J. Elliott of Spur, Texas, discoverer of the deposit, first saw it while riding for the Spur Ranch. He said that when he first looked upon the immense basin, it was literally covered with bones and complete specimens of prehistoric animals. They were carted off by wagon loads. Some were preserved, but many were destroyed after the curiosity of the matter had ceased. Parties of scientists came from the Eastern colleges and from Germany to collect specimens.

**Teeth Hard To Find**

Scant rainfall each year washes up but few of the bones. The only thing that is really noticeable now is the deep purple composition soil fading into the deep red so common in the Triassic period. The teeth and other such specimens are hard to find and require much hard walking on the part of the would-be collector. I have a quantity of different specimens found there that have not been assembled.

The small phytosaur was less than half as large as some of his kinfolks, but he was probably more agile.

The long slender jaws and the evidence of a very small spoon at the end of the jaw indicates that

they were fish eaters. The other species were strong of jaw and probably fed on animals caught near the water. The parts which I have found include the clavicle, a sort of armor plate section, and coprolite, or fossilized dung. Both are unusually well preserved.

The fossilized jaw I have of this specimen clearly shows the placement of the teeth and the size of the different kinds. The end of the jaw shows the position of the tusks which were used for grabbing their agile prey. After the several distorted tusks, there was a large number of smaller needle-like teeth. These teeth gradually grew wider until they assumed the form of the leaf teeth—so called because they resembled the form of a leaf. Each of these three distinct forms had their special task to perform when the prey was seized. An injury in this jaw clearly shows that the owner at one time grabbed some brute too large for comfortable handling. It shows a break which afterward became mended.

The present alligator and members of the crocodile family have less than half as many teeth as the phytosaur, which had well over 200 teeth.

## Chain Letters Used To Build "Club" Racket

Revival of the chain letter craze on a "clearing house" basis has been revealed in citations and fraud orders issued by the post office department in Washington.

Within the past month, Solicitor Karl A. Crowley has issued six citations and two fraud orders against organizations and individuals who allegedly operated chain letter enterprises in violation of postal fraud and lottery laws.

"The present chain letter enterprise is different from that in 1935 because it is operated from a central headquarters where the money is received and distributed in premiums in each case," a department spokesman said.

The previous craze which reached its peak in May, 1935, was dependent more upon individual initiative, it was pointed out.

**Club Affair Now**

A majority of the present chain letter enterprises are based upon a membership proposition.

"The membership idea is a device to hang the scheme on," a postoffice official said. "Persons in Maine and New Mexico are not interested in some local park or club."

The department decried the "something for nothing" idea, pointing out that the people on the end of the chain are the ones who pay the freight.

Under the membership enterprise, the postoffice department sends 25 cents to the organization, which later sends him five application blanks for distribution to other prospective members. The applicant's name is inserted as the sixth in the sequence on the five blanks.

**May Pay \$1,562 Total**

In the event the scheme is completed, a person may receive a total of \$1,562. The amount which the organization retains can run as high as 15 or 16 per cent, it was said.

"We are opposing chain letter enterprises that are reported by other persons."

The chain letter enterprise accounted for a \$1,100 increase in the number of letters received during that fiscal year. The total amount of money saved by the postoffice department was \$39,564.

### Short Course Denton

are expected to attend the Short Course for Women on Friday, May 21. The course is being held at the Denton Hotel. The course is being held at the Denton Hotel. The course is being held at the Denton Hotel.

of the Fine Arts department, "The Utilization of Inexpensive Household Equipment" by Miss Mary E. Goldman of the Home Economics department, and "What the Farm Woman Should Know about Electricity" by Mr. Coe.

At the Experiment Station, Substation No. 6, particular attention will be given to the work carried on with wheat, oats, barley, legumes, fertilizers, crop rotation, and soil rotation. Fred W. West, court, director of the department of Rural Arts, is in charge of arrangements.

### Personals

Miss Mary Couch who teaches in Munday spent Mother's Day with her parents, Mr. and Mrs. R. C. Couch.

Mrs. Marlin Wilson of Rule and Mrs. Roy Roudolf of Abilene visited Sunday afternoon with Mrs. Wilson's mother, Mrs. Mary Oates.

Mr. and Mrs. Leo Southern and sons of Seymour spent Mother's Day with Mrs. Southern's parents Mr. and Mrs. B. Cox.

Mr. and Mrs. Giles Kemp and family spent Sunday in Abilene with Mrs. Kemp's sister, Mr. and Mrs. George Cramer.

Mr. and Mrs. Manley Branch and Mrs. Mavis Laird and daughter Lena Carol and Myrta Bob Branch visited in San Angelo the past week end with friends.

### West Texas Delegate

Leading the Dallas Chamber of Commerce delegation to the Brownwood convention of the West Texas Chamber of Commerce convention is Miss Geraldine Robertson, star of "Cavalcade of the Americas," spectacle of the Pan American Exposition. Miss Robertson, a West Texan

from Lamesa, and her delegation will distribute invitations to West Texas as a whole to participate in the international fair in Dallas June 12 to October 31. Miss Robert on is seen here in the costume of Urrula de Veramandi, one of the roles she will portray in "Cavalcade."

### Rochester

A light rain fell here Sunday night, and garden stuff and flowers look almost perfect since the shower. We thought we donated all the flowers on Mother's Day but from the looks of the gardens this morning you wouldn't think so.

Mr. Charles Kay and family moved to Olney last week. We regret to lose these good people from our town.

Rev. Silas Triplett of A. C. C., Abilene, spent Sunday here with friends.

Mr. Homer Anderson and family of Rule spent Sunday here with Mr. Anderson's parents, Mr. and Mrs. R. L. Anderson. Their little son, who has been quite sick, is improving, we are happy to state.

Mrs. Dan Dunn of San Angelo are visiting her daughter and family, Mr. and Mrs. Earl Bracher this week.

Mrs. John McClendon returned to her home in Levelland last week, after visiting here with her parents, Mr. and Mrs. G. C. Cowan for a few days.

George Smith and family of Haskell were the house guests last week end of Mr. and Mrs. Paul Golden.

Mrs. Frank Johnson of Panhandle visited friends here last Friday.

Mr. and Mrs. Chance Mansell of O'Donnell visited relatives here Monday.

The Music School closed here Saturday night.

Bill Hudson, a student in St. Edwards College, Austin, spent last week end here with his parents, Mr. and Mrs. C. G. Hudson.

Mr. Will Mitchell and family of Munday spent Mother's Day in the home of his mother, Mrs. A. E. Mitchell in this city.

### Mitchell

The ravens are not so plentiful as they were. The extermination program seems to be getting results.

A good rain would be appreciated just now. There is considerable moisture in the soil yet for planting in most places but some light spots are too dry for planting.

Mr. and Mrs. Dewey Hewitt are the proud parents of a fine girl, Dewey and J. W. Hewitt were in Quanah on business last week.

A large group from this community attended the softball tournament at Jud Saturday. The Mitchell girls won the ball and bat given as prizes to the winners. The boys were defeated by Cliff in the second game.

The members of the girls teams

Others too are finding that it is economy to do their shopping here, and it's a lot easier. If you don't have time to come down just phone us—263.

### Douglas News

Health of our community is some better at this writing.

Mr. and Mrs. Lon Howard and little son Glenn, were visitors in Haskell Sunday.

Mr. and Mrs. Ocie Carruth visited his father and mother in Haskell Sunday.

Visitors in the home of Mr. and Mrs. Bill Brannon Sunday were: Mr. and Mrs. Pete Mercer, Mr. and Mrs. Ray Jacobs and son, Mr. and Mrs. Calvin Davis and children, Mrs. John Howard, and Mr. and Mrs. H. T. Brannon of Rockdale.

Mr. and Mrs. Lewis Bruggeman and children and Miss Helen Moeller of the Irby section were visitors in this community Sunday.

Mr. and Mrs. I. A. Leonard and Mrs. Jess Leonard and little daughter Francis visited in the home of Mr. and Mrs. Bill Brannon Monday.

Mr. and Mrs. Dude Gay visited in the home of his parents in Haskell Sunday night.

Mrs. John Howard spent several days last week with her brothers, Messrs. Sid, Lee and Jack Medford and families in the Howard community.

All the farmers in this section would like to see a good rain. Some have planted cotton, while others are waiting for rain.

Mrs. M. M. Pritchard of Graham spent Sunday in the home of her brother, Judge and Mrs. C. M. Conner and family. She was accompanied home by her mother, Mrs. H. B. Conner, for a visit.

### Don't put up with useless PAIN

Get rid of it  
When functional pains of menstruation are severe, take CARDUI. If it doesn't benefit you, consult a physician. Don't neglect such pains. They depress the tone of the nerves, cause sleeplessness, loss of appetite, wear out your resistance.  
Get a bottle of Cardui and see whether it will help you, as thousands of women have said it helped them.  
Besides easing certain pains, Cardui aids in building up the whole system by helping women to get more strength from the food they eat.

PASS THE MAVERICKS

Congressman Maury Maverick started something when he suggested recently that hors d'oeuvres—those oddments of the dinner table, which few Americans can pronounce and no one can predict—be renamed in simple form.

Mr. Maverick suggested "dingle doos." But now comes no less a gastronomic authority than George Rector, famous New York restaurateur, to urge that they be called "mavericks" in honor of the congressman.

This, says Mr. Rector, would be fitting for two reasons. First, as tribute to the congressman, second, because "maverick" is a good old American word meaning an unbranded stray horse or steer which has wandered off by himself and is any man's for the taking. This, he points out, is a perfect description of a tray full of anti-past, canapes, anchovies, and similar odds and ends.

We hope his campaign succeeds. Walter—a tray of mavericks, if you please

AGAINST THE LINDBERGH RACE

Between midnight, July 31, and midnight, Aug. 1, aviators of the world will have the opportunity of participating in the New York to Paris air race, sponsored by the French government and known as the Lindbergh Anniversary race.

Prizes totaling about \$142,000 have been set up but considerable criticism arises from the fact that experts including Lindbergh, himself, do not see where the race will advance the science of flight. They fear that one or more fliers will be killed unnecessarily in the spectacular race over the Atlantic.

Charles F. Horner, president of the National Aeronautical Association, plans to advise the French of the sentiment here but, in view of the enthusiasm which the event has aroused in France, there is little likelihood of the race being called off. If it ten weather ship stations should be established on provide adequate weather service for an event they do not approve. Meteorologists say that at least goes on, the Americans will do all that they can to the Atlantic days before the race begins.

Already a number of foreign fliers have indicated that they will make the race and there is some rivalry between the governments of Europe in the construction of planes for the event.

The fellow who is always stepping on the gas sooner or later gets his foot in it.

There may be less money in circulation than formerly, but it circulates a lot faster.

ONE WAY TO RUIN CHILDREN

One of the problems confronting American parents is deciding how much they will do for their children. Occasionally, one hears of stern and self-fish parents who fail to do enough but, more often the reverse is the case and fond fathers and mothers interfere with proper child development by doing too much for their offspring.

Dr. John A. Evans, of Baltimore, recently warned parents that it is "absolutely wrong" to give a child everything it wants because the time will come when the child will demand what it cannot get "and there will be an explosion of hysteria". This is good advice and should be borne in mind by all parents.

BAR ETIQUETTE

One of the weirdest court decisions we can recall offhand was recorded in New York the other day, when a magistrate held that a man who failed to remove his hat in a bar in the presence of ladies was guilty of disorderly conduct. This culprit in question, it seems, was taking his ease in a Second Avenue bar, hit his tilted comfortably back off his brow, when a feminine customer came in. The man failed to uncover, and when the proprietor requested him to do so, he got a bit tough about it. The police finally drew cards in the affair, the man was lugged off to court—and the pearl of judicial wisdom mentioned above was the result. Now we may be old-fashioned and woefully back-numberish, but we can't help feeling that a woman who insists that men uncover in her presence has one excellent recourse in such a situation. She can stay out of bars.

FATAL MIXTURE

The coroner of Cuyahoga County, most populous county in Ohio, has investigated all auto traffic deaths for the first quarter of 1937, and he announces that 58 per cent of the persons killed had been drinking. The ratio was about the same for drivers who were killed and for dead train victims. Now the point is that in most of these cases the victims were not what we call drunk. By no means. They had "just had a few drinks"—just enough to dull that hairline quickness of observation and reaction which is the price of safety in the modern big-city traffic stream. It's a hackneyed old saying, but it is still true—gasoline and alcohol are a fatal mixture, even when the proportion of alcohol is very small.

TIMELY ADVICE

Vacation time is near once more, when the ocean and inland lakes will lure throngs of pleasure-seekers. And, just as in previous years, there are thousands who will never return from these watering places. For drownings are a major cause of accidental deaths. And so the words of Dr. Bayard T. Horton, of Rochester, Minn., may well be heeded. According to him, recent studies have revealed that hypersensitivity to cold water has been responsible for many drownings, persons afflicted in this way being apt to collapse after entering the water. To determine whether you have the weakness, immerse one hand in ice water for five minutes. If you hand swells after removal, you are hypersensitive. Most persons, Dr. Horton advises, can be "desensitized" to cold by immersing one hand in ice water for a minute or two twice a day for three or four weeks. A simple procedure, certainly, if it means lessening the danger of losing one's life this summer.

Our idea of the hopeless pessimist is a fellow who can't enjoy a nice spring day for fear it's the forerunner of a long rainy spell.

Do You Remember

... these happenings of 10 and 15 years ago?

(Taken From the Files of the Haskell Free Press)

May 12, 1927

The Haskell Fair directors have made plans to hold a motorcycle race meet here on July 4th. Rural Murray, former Haskell boy who now holds the world championship title, has been signed for appearance.

Constable J. H. Ivey of this city and Constable Bell of Rochester captured a large still in a raid made by them last Wednesday. A quart of "corn" whiskey and 240 gallons of mash were confiscated and one man arrested by the officers.

Mays Dry Goods Company, Haskell's newest business concern, opened their doors for business last Saturday. Guy E. Mays, formerly connected with Grissom's Store of this city, is proprietor of the new store, and he states they have enjoyed a nice patronage since opening.

Cotton oil mills in Winters and Ballinger, which have done business for many years, are to be taken over June 1 by the Anderson-Clayton Company, with head office in Houston.

Part of the merchandise stolen from the store of Baker-Campbell Company at Weintert several months ago was recovered Sunday by Sheriff J. C. Turnbow in a barn near Knox City, where it had been hidden in a maize bin. Sheriff Turnbow and District Attorney Clyde Grierson recently secured a confession from a man alleged to have been implicated in the burglary, who directed officers where the loot could be found.

Seventh Grade commencement exercises of the Midway school were held Friday. The graduating class included: Maree Huff, Sybil Scott, Mildred Wright, Cleo Burton, Melba Boies, Donnie Campbell, Calvin Frierson, Jim Keith, Lester Edwards, A. C. Blackstone, Fannie Boies.

May 13, 1922

Work of abandoning the Kouri well No. 1, which has been under way for the past few weeks, was halted last week when the bull wheel was broken in pulling a string of casing.

Pledges were secured this week from a number of business men for the support of a Concert Band in Haskell, and Prof. Lee Humphreys, principal of the Post school, has agreed to serve as instructor. Organization of the Band is expected to be perfected within a short time.

Candidates for office in Haskell county in 1922 were: For Representative, Jason C. Williams, B. M. Whiteker, Ewell D. Condron and C. L. Martin. For District Judge, Walter R. Chapman. For District Attorney, Tom Davis, E. V. Hardwick. For District Clerk, Miss Estelle Tennyson, Jim Odell. For County Judge, Jas. P. Kinard, Joe Allen, Jesse G. Foster, D. H. Perrin, R. E. Lee. For County Superintendent, Mr. Ed Robertson, J. W. Foster, Lee Humphreys, J. S. Hays. For Tax Assessor, Mike B. Watson, Jesse B. Smith, For Sheriff, Hardy Yarbrough, Crawford Allen, W. E. Welsh, Al Cousins. For County Treasurer, J. E. Walling. For County Attorney, Clyde Grissom, J. E. Wilfong.

YOUTHFUL CRIMINALS

Ossining, N. Y.—Of the 22 slayers in the death house in Sing Sing prison, nine are under 21 years of age. Two are 17 and four are 18, one is 19 and two others are 20.

GETS DONATION

North Platte, Neb.—While talking with a friend on a corner during a recent hot day, W. J. Hendy, garage owner, took his hat off and held it in his hand. A stranger passed dropped two quarters in the hat and hurried on, with the remark, "I never fail to help out the Salvation Army."

Weekly English Club

Our club met Friday, May 7, 1937. The minutes were read and approved. The social committee gave the following program:

Song—Vontress Brock. Imitate—Eva Rae Gay with the help of Marcia Bledsoe and Buna Faye Reynolds. Poem—Doris Hammer. Jokes—Edwin McElroy. Riddle—Bobbie Jean Bailey. Story—Billy Davis. Solo—Parramore Sellers. Imitate—Leon Newton. French Harp Solo—Linnie Brock. Duet—Gladys Davis and Margie Busby. This concluded our program.

BLIND, PUTS OUT FIRE

South Grafton, Mass.—Smelling smoke in her kitchen, Eva Contois a blind choir singer, filled a pail of water and made her way toward the fire. Feeling the heat on her hands and face, she doused the flames and screamed for help. When the fire department arrived they found no fire, only smoking embers.

KICK PROVES FATAL

Piqua, Ohio.—A kick in the throat inflicted by his son after a quarrel in their home, proved fatal to Harry Kiser, 49. The quarrel started when the youth, 20, refused to help his mother wash dishes.

State Wild Flowers Having Fine Season

This is a marvelous season for bluebonnets, Indian paint brush, and other Texas wild flowers, says the landscape division of the State Highway Department.

The proof can be obtained by a trip into the country in almost any section. The flowers are blooming along the highway and railroad rights of way, and often cover fields and whole hillsides of many acres.

Rain last fall and favorable temperature have not only brought out the flowers in unprecedented quantities, but also intensified their coloring. According to Jack Gubbels, landscape engineer, it is the first time in his memory that all the wildflowers have been blooming throughout the state.

In the Panhandle the growth is the best in years. The same is true of the Rio Grande Valley, North, East and South Texas. A motorist who recently traveled from Austin to Dallas by way of Georgetown, Temple and Waco returning through Rosebud, Cameron and Taylor, said the trip was almost like one through a flower garden.

The magnificent display, incidentally, is not an accident, or altogether a gift of Mother Nature. The State of Texas, through the highway department, as had a hand.

Last year it gathered and distributed 80 tons of wildflower seed, some of which sells commercially for from \$1 to \$16 a pound. Another method of distribution is to sow fields, with the owner's permission, gather the cut flowers on trucks and deposit them in areas needing seeding.

The bluebonnet, Texas state flower, is one of the mostly widely distributed. There are approximately 40 varieties growing in Texas. One type in West Texas is called "buffalo grass". Another in the Big Bend is four times as large as that commonly known.

Contrary to general belief, it is not a violation of law to pick the wild flowers growing along the highways, although the highway department discourages it. There is much misinformation on the subject.

The law passed in 1933 made it illegal to pick or injure flowers, shrubs or trees growing on inclosed lands of another person, without that person's permission, or in a state park or preserve.

It also was declared unlawful to transport on the public highway or to sell flowers, shrubs or other plants gathered in violation of the previous provision of the act. A fine of \$1 to \$10 was provided.

However, it was specifically

provided the law did not apply to a person under 17 years of age, or to necessary clearing of land for utilities right of way.

It is a defense if the flowers are grown under cultivation, taken from one's own land or lease land, or from the land of another with the owner's, or a representative of the owner's permission.

Oatmeal Is Food Chosen For Famous Dionne Quintuplets

One of the greatest achievements of modern science has been the splendid growth of the five charming little Dionne Misses. Although at birth they had but a feeble chance to survive they are today perfect pictures of good health—sturdy, robust and in action practically every moment. The best medical experts that the government of Ontario, Canada, could provide have guarded the health of these youngsters,

paying especial attention to their diet.

For example, they have chosen oatmeal for the Quins' cereal. Because in Oatmeal Nature has stored a rich supply of Vitamin B, that vitamin which is so essential for young and old alike. Vitamin B helps brace up nerves, digestion, and appetite when these are in poor condition due to lack of that vitamin. Oatmeal with milk is also a fine source of body-building minerals, muscle-building protein, and energy-making carbohydrates. So every day the Quins are given a big bowlful of Quaker Oats. And every day the Quins are building health.

HURT IN 4-FOOT FALL

Galveston, Texas—Although he had plunged thousands of feet time and time again in his daredevil parachute-jumping days without an injury, William B. Baker, 55, recently went to a hospital with his leg broken in two places, the result of a 4-foot fall.

KUENSTLER'S GROCERY

# These Add Up to Exactly \$\_\_\_\_\_.

... and thank you very much!

HOW MUCH DO YOU THINK THESE GROCERIES COST? STUDY THE PICTURE AND THEN WRITE YOUR ANSWER IN THE BLANK SPACE ABOVE.

Corn flakes, crackers, pickles and corn. Bread, eggs, bananas and grapefruit. And probably a bag of new potatoes already in the bag. An average list of groceries. What do you think they should cost? What should you pay for them? Try a guess. Your chances are you will be wrong!

Your estimate will be at least 10 per cent too high unless you've been in the habit of doing your food shopping through the ads in the Free Press. Which is simply this! If you are not a Free Press advertiser you have been spending too much. Actually you are getting a dollar's worth of groceries for about ninety cents! And remember, this is your average savings over a long period of time. Individual savings on single purchases may and do vary much higher.

Item for item, prices on standard-quality foods advertised by Free Press advertisers are always lower than the prices asked for the same foods in less progressive stores. This is no guess... no wild statement or hokum... it has been proved and attested to many times by shoppers themselves—hundreds of them! They know it pays to read the ads.

But buying for less money is only half the story. You get better stuff for that money by shopping the Free Press. You are sure of fresher goods, higher quality. Free Press merchants know it doesn't pay to advertise an article for an article. It's too dangerous, it ruins good-will and hurts business.

Shop through the Free Press ads every day! It will pay your merchant to run them. It will pay you even more to read them.

## THE HASKELL FREE PRESS

When you use Mobilgas your stops are further apart because you need less gas to go further. It's as simple as that! Motorists who have used it for years claim it is the best you can buy for the money! Fill your tank today.

**Few Simple Rules Would Banish Majority of Automobile Accidents**

Persons with broad experience in the field of motor vehicle operations have come to the conclusion, after careful reflection, that only a few and relatively simple rules need be applied to banish 80 percent of the motor vehicle collisions and mishaps from our highways, according to Charles E. Simons, associate editor of Texas Parade, whose article "Safety—or Else?" appears in the May issue of that magazine.

"The application of these rules by the motoring public," says Mr. Simons, "would automatically decrease motor vehicle fatalities and combined with better engineering and enforcement of traffic regulations, would raise highway travel to the place it occupied in the early '20s, when the whole family looked forward with joy to the week-end automobile trip.

Mr. Simons quotes from an interview with J. B. Early, maintenance engineer of the Texas Highway Department, who has traveled thousands upon thousands of miles in Texas as part of his job.

"Passing cars on a sharp hill," Mr. Simons continued, "Mrs. Early found to be a chief cause of collisions. Records of the Highway Department disclose a terrific loss of life and property from mishaps of this nature which could, by the exercise of even a small amount of common sense be avoided.

"The Highway Department has made every effort to warn traffic against such collisions by installing at each hill of any consequence where sight distance is restricted, signs that advise drivers to stay in line until they reach the peak of the hill and see a clear road ahead.

"Driving fast on a road with wet shoulders, according to Mr. Early, is another common cause of collisions. The Highway Department

has found it impossible, due to the huge expense involved, to provide all weather shoulders on all state highways and is doing everything possible with the limited funds at hand to make the shoulders safe for the average motorist traveling at average speed.

"The practice of following too closely behind another car when the vehicles are traveling at a speed greater than 40 miles an hour is a collision breeder that has been widely condemned. Fast speeds on winding roads also can be very dangerous. Motorists who thoughtlessly park at the top of a hill also contribute to making the highway unsafe."

How much better it would be, according to Mr. Early, if speed were really necessary, to drive when fresh and the senses are attuned to any emergency, and by the same token the speed should be lessened as the driver tires because his reaction time has been lowered by the constant strain on his mental and physical resources.

"Finally," says Mr. Simons, "motorists should realize that signs cost money, when placed on 22,000 miles of state highways. The motorists are paying for these signs in the form of gasoline taxes and motor vehicle registration fees. They are placed at danger points because they are needed to warn traffic and are not installed willy-nilly at the whim or caprice of some engineer or some crack-pot who is a sign theorist. Signs are placed only at danger spots and it is a pretty safe bet that where a motorist sees a sign warning against a turn, narrow bridge, cross road or railroad grade crossing, that an actual, and not theoretical hazard exists. The motorist who travels with due regard for the signs will get to his destination safely."

**"Rural Trends In Depression Years" Tells of Social and Economic Changes**

Social and economic conditions and trends in the smaller cities of the United States during the depression period from 1930 to 1936 are the basis for an interesting volume recently received by the Haskell Library.

Haskell was one of the 140 towns in the nation included in the three surveys made by workers of the Bureau of Agricultural Economics of the U. S. Department of Agriculture, and Columbia University collaborating.

Background of the volume is taken from the prosperity years of 1923-24, when data was assembled from a cross section of rural America under the auspices of the Institute of Social and Religious Research.

The effect of the depression on rural America has for the most part been thought of and discussed from the economic viewpoint—farm income, AAA, etc. Like other sections of the country, however, our rural areas felt the strains and stresses of the depression in all parts of their social organization. That these social changes were as important as the economic changes seems apparent, yet the sociology of depression-ridden rural America has not been comprehensively studied outside of the present work.

Here is a broad, representative picture of all aspects of the social organism. Based on the careful field work of many investigators, the book has been made a vital synthesis of the rural American scene by the sympathetic treatment which the authors have given their material.

"Rural Trends in Depression Years" has two purposes. The first is to present the results of a study of changes in rural social life in the United States between the years 1930 and 1936. The second purpose is to trace the life story of 140 village centered agricultural communities through an other, or third, phase of their development and history, so that it may be studied in relation to the phases revealed by two earlier surveys of the same villages. The second purpose lends added value to the first.

This is the third time these same centers have been studied under the same director. The initial investigation, made in 1923-24 under the auspices of the Institute of Social and Religious Research, was the first national study of farmers' towns of less than 2,500 population. It was the beginning of a sociology of village life in the United States. It showed that rural America was becoming increasingly centered in villages and towns, rather than in the crossroads hamlets, it revealed the villages as interpreting the country to the city, and the city to the country. The second study of these places was begun in the late summer of 1929 by the Institute of Social and Religious Research. Shortly afterward it became the rural section of the study carried on by President Hoover's Research Committee on Social Trends. Field work was begun in December, 1929, and completed in the early summer of the following year. This study showed important changes, and also revealed that some phenomena noted in the first study seemed to be clear trends.

The present investigation was begun in January, 1935, and completed in the summer of the same year. The same 140 villages were surveyed, about one-fourth of them by the same field workers who had surveyed them in one or both of the earlier studies.

The report opens with a summary of the basic changes in and adjustments of agriculture from 1930 to 1935 as shown by the census and illustrated in the communities studied. There follows an analysis of changes in population and in communities as such and in the relations of village to changes in institutions, such as those of trade, industry, banking, education, religion and social life.

In connection with education, religion and social life. In connection with education, special attention is given to the rise of adult education during the depression years. Finally, consideration is given the question of relief, a phenomenon previously almost nonexistent in these communities.

So far as is known, this is the first time in rural social research that a nation wide sample of communities has been thrice visited and studied. The resulting body of data should make a real contribution to an understanding of rural social trends, of the development of agricultural villages and communities and of their importance in the national life.

Contents: Introduction; 1. Changing Agricultural Background; 2. Agricultural Adjustments in Rural Communities; 3. Population Changes; 4. Village, Country Relations; 5. Business and Industry; 6. Rural Banking; 7. Rural Schools in the Depression; 8. Adult Education; Agricultural Extension; 9. Adult Education; All Other Agencies; 10. Social Organizations; 11. Notes on Government and Health; 12. Rural Religion; 13. Relief in Rural Areas; 14. Some Implications; Appendix A: Acknowledgements; Appendix B: Methodology; Index.
