BRAVES COP LEAD IN PLAY-OFF WITH 6-2 WIN SUNDAY

Locals Pointing Toward Pennant for Third Straight Year

The Haskell Braves won 6-2 the first game of the five-game series for championship in the Wichita Valley League here Sunday afternoon.

The pennant-aspiring Braves broke loose in the fourth inning with four runs followed by two more in the eighth. O'Neil and L. Wildes made the two scores of the afternoon for Munday. Archie Pittman who won two games from the Hamlin Oilers to permit Haskell to meet Munday kept the Moguls at bay. He struck out ten men and allowed no bases on balls. Red Nichols of Wichita Falls, on the mound for Munday, received ragged support but was hit freely when men were on bases.

A triple in the fifth inning by O'Neil and a double by Nichols brought in the first run for the Braves and in the eighth a scratch by Couch who stole second and third and a single by Ratliff completed the scoring for Munday.

The Braves scored in the fourth on an error, base on balls, single by Sturdy, triple by Patterson and another single by Coady. In the eighth Haskell again went on the warpath on a three-bagger by Johnson, single by Chapman, base on balls, and another single by Patterson. Two hits in separate innings were all that the Moguls could get on Pittman.

GENTLEMAN FROM UVALDE

The widening endorsement of Vice-President John N. Garner for the 1940 nomination by the Democratic party is a tribute to the ability of the quiet gentleman from Uvalde as well as recognition of his tremendous powers for political "levelling." There is probably no other leading figure in the Senate who could command at this time the voluntary support of both sides to the recent court fight. Garner has wheel-horsed for the new deal in both houses, using his intimate knowledge and remaining powerful influence with his former colleagues in the lower chamber to put through necessary White House programs. When he could not go along with the new dealers, the Vice-President shut up like the well known clam and no vocal indiscretions can be charged against him by the most rabid of the bright spotties of the Roosevelt era.

Yet the fact remains that if he is nominated in 1940, John Garner would represent the conservative wing of the Democratic party. He holds the confidence of business and industry. He is himself a successful business man as well as an experienced national political leader. But above all he is a sound American who has studied our problems first hand, has viewed them in the light of the facts, not through the rosy glasses of impracticable idealism. The man who has gone so far himself might well take the country far with him.

The traditional Garner silence might have to be broken if he assumed the presidency. But the United States might fare well indeed under the direction of a man with a poker face who knows how to get the most out of his political poker hands.

PLANNED FLYING PAYOFFS

After two months of trial flights over the North Atlantic, for which four nations pooled data and resources, it is announced that trans-Atlantic airlines are feasible.

Simultaneously comes news that coast-to-coast American commercial air service is now 10 years old with more than 120 million miles of flying to its account. Trans-continental trip time has been lowered from 48 to 15 hours.

For such important accomplishments, these brief, terse announcements strike the observer as somewhat understated. Actually, they are in complete accord with the new attitude toward pioneering. And they recall the Bureau of Air Commerce suggestion that planned air progress is much more satisfactory, much more fruitful than any species of stunt flying.

In the light of these two latest accomplishments of aviation, it seems that the Bureau's advice was good. We are learning to blaze trails without ballyhoo.

STATE'S MINERALS

The reported discovery of valuable quicksilver and gold ores on State lands in the Big Bend may prove to be overoptimistic still it serves as a warning to the State to be not too quick to relinquish its title to lands that were never valued at more than \$2 an acre prior to discovery of oil on them. The State school system has lost some valuable land and the county school funds have lost much through premature sale of public domain.

The tentative provisions of the terms under which the State was to surrender public domain in the Big Bend to the United States Park Service called for reservation of mineral rights to public schools. Recently, however, the Federal Government has been demanding in some instances title to resources in areas covered by Federal projects. The Big Bend area in Brewster and Presidio Counties have already produced \$50,000,000 or more in silver and quicksilver. There may be enormously valuable minerals still lying hidden in this region. These rights should be held for the schools or at least sold at a price commensurate with the long-term possibilities of developing fully the resources of that region.—Dallas Morning News.

PLAYING SAFE WITH BEER

Two or more independent news items put together often add up into one great truth.

Last year, says one story, American beer drinkers consumed nearly 63 per cent more alcohol than did all the distilled liquor drinkers in the nation. Further, it is claimed, there is as much alcohol in a 12-ounce glass of 4 per cent beer as there is in an ounce glass of 90-proof whiskey.

From California comes the statement that of its 2838 fatal traffic accidents last year, at least 617, or 21 per cent, involved drivers and pedestrians who had been drinking intoxicants before the accident.

The simple conclusion then, is that a driver can't play safe by taking a glass of beer instead of a "shot" before he goes out in his car. For he still will be on the short end of the odds against death and tragedy.

EYE FOR EYE JUSTICE

An old paradox of justice bobbed up again when Boston police surgeons labored to save a wounded man's life so that he could be placed in jeopardy later in court as an accused slayer.

The situation poses the ancient puzzle of who has the right to kill a man, and whether the law is overstepping Biblical injunction when it executes a duly tried and convicted prisoner.

Offhand it is too complex a problem to be solved by a Solomon's wave of the hand. The answer, perhaps, can come only from the mature judgment of perfected civilization. But that answer deserves more immediate thought than it is getting. For even at this early stage of man's progress, the policy of an eye for an eye has little to recommend it except that it's just the easiest way out.

AN OUNCE OF PREVENTION

The easiest and surest way to enjoy the distinction of living to a ripe old age is to properly care for that God-given mechanism—your body. There are no spare parts for sale at bargain counters. When one of your vital organs fails prematurely, through neglect or hard use, you're finished. With the blessings of modern medical science that now exists, there is little excuse for this happening.

Recently a life insurance company, in its advertising, stressed the importance of taking the tuberculin test. This little test adequately proves the soundness of the old adage that "an ounce of prevention is worth a pound of cure." You should make it your business to investigate the tuberculin test and protect yourself and your children with it.
