## SWEET N' SOUR

Suddenly it's spring - and about time, too. As we overheard in town - "longest bunch of Easter spells 'ever saw in my life." Maybe at long last the fear of frost and freeze is over, and the voice of the turtle can be heard in the long only in West Tevas to the further can be heard in the land, only in West Texas that turtle had better shout if he intends to be heard above the wind (that one commodity we have an abundance of.)

Maybe you like roses? Have we told you about the yellow ones that climb over the iron fence at the Vernon Townsend hom?? They make a picture of spring at it's colorful best. Mrs. Townsend, by the way, is doing substitute teacher work in the high school this week and (as is the history of this lovely lady) is quite sensational with the students - they love her.

Between the R. L. Smedley home and the Maxwell yard, there is a fence full of the Yellow Rose of Texas - a really fine bush. So deeply rooted in our state's history is that flower that we'd love it even if it were not the primitive beauty that it really is really is.

that we'd love it even if it were not the primitive beauty that it really is.

The Peace Roses at Dr. Carroll McGowen's home must be something for the horticultural journal if we judge by one which we saw this week - as large as a dinner plate and perfect in color and conformation.

Orchids are still in bloom at the Grady Davis hot house - one plant has six exquisite blossoms. Do you like wild flowers? We do. Perhaps because like Topsy, they "just grow" the road south of town is a garden in its own right and you'll enjoy a ride out that way to smell the Buffalo Clover and see the bluebonnets - big bright heavenly blue waves of them: Here in town we noticed wild flowers are taking places of honor in our yards and we're glad - primroses at the Trowbridge home are especially pretty.

We still owe a debt of thanks our alert 'undercover' (claims he's prettier this way) agent in Clyde who tells us that the plans for the 1911 class reunion are coming along fine and growing with each day. Mrs. S. E. Settle will address the ex-grads at their homecoming celebration. The late S. E. Settle was this group's teacher and well loved by all the members. Mrs. Clyde Yarbrough of Weslaco will be a guest speaker. Mr. Yarbrough was valedictorian in 1911. At this writing, every class member plans to attend this golden anniversary of their graduation.

The Cof C has gone on record recommending that the city purchase this equipment as soon as they are able. I am informed that this is their intent, due to the fact that city water approval by the state is a definite asset toward both business and rural growth. The remainder affects primarily, sanitation requirements in regard to water intake at the lake, the laboratory where testing is done, establishing an unbroken record of samples and reports for a minimum period of six months and continuing them thereafter, and having a licensed sanitation technician.

Governor Daniel urged compromise through a "package" bill. Ingredients for the package, he said, might be gotten from Rep. George Hinsons omnibus tax bill and Rep. Ben Atwell's selective sales tax measure.

Hinson's bill would hit in many areas - watches, jewelry, power tools and machinery, construction materials, natural gas, restuarant meals, non-essential beverages, etc.

Atwell's bill is akin to a general sales tax except that it names the hundreds of items it would tax rather than making a blanket provision.

## Why is the Ford Galaxie head and shoulders above all the imitators?

## Because it's beautifully built to take care of itself!

Frankly, we're tickled to see so many other cars trying to latch on to the styling trend started by Galaxie. But they can't copy that Thunderbird roofline—any more than they can match Galaxie's Thunderbird luxury and handling.

What's more, Galaxie is the fine car built to

cut your operating costs-by being beautifully built to take care of itself! For example, you can go 30,000 miles without a lubrication. And when you compare price, you find that Galaxie costs several hundred dollars less than some cars that give you less. Challenging statement? We're here to prove it-today. Here's how the '61 Ford takes care of itself Lubricates Itself—You go 30,000 miles between chassis Jubrications (which cost only about \$4,00 and take about 20 minutes).

Cleans its own oil—You go 4,000 miles between oil changes with Ford's Full-Flow oil filter (which filters better through fibers).

Adjusts Its own brakes—New Truck Size brakes adjust themselves—automatically.
