Mrs. J. U. Fields was hostess Tuesday morning for a glass breakfast for a few intimate friends. Guests were invited to the home of Mrs. Harrow at 8:30 where they were served a delicious breakfast in glassware. The table was decorated with fruit in old time glass fruit stands. After breakfast they went with Mrs. Fields to her home where Mrs. Fields greeted them. Something very rare is a set of flip glasses of flint glass and each one has a quotation inscribed one of which reads "Make haste to live and consider each day a new life." Each glass has a different quotation. A blue stippled, and an amber gold swirl water pitcher, pressed glass coke stand, and many cut glass pieces, an early Mexican emerald green and gold vase and numbers of small odd pieces of tooth pick holders, cream and sugar bowls, were on display. Lone Star H. D. Club News

Club members answered roll call with "Something I Could Do To Improve Myself as a Homemaker" at the regular club meeting Wednesday September 22.

Miss Mildred Vaughan was with us and gave a very interesting discussion on "Homemaking a Profession." "Homemaking is a creative calling," stated Miss Vaughan. Order should be first law of homemaking, both physical and mental. Other qualifications for good homemaking, mentioned and discussed were: Alertness, creativeness, executive ability, idealism, and unbalanced zeal. "The ward drudgery does not mean a thing to the imaginative and creative women," continued Miss Vaughan.

Next meeting will be October 13 and we urge all club members and extend an invitation to non-club members to be present as we must turn in canning report and home food supply report at this meeting.

Members of the club regret very much having to lose our president Mrs. S. W. Adams who recently moved to Denton, Texas. Her vacancy will be filled by the vice president, Mrs. Clarence Cantrell. The meetings begin promptly at 2:30 p. m.

 The weather this week has been unusually cool for this time of year. The cool weather is coming earlier this season than usual.
 The gathering of the crops are going forward rapidly this fall. This is due to the favorable weather conditions the abundance of laborers.
 The mesquite trees have an unusually heavy crop of beans this year that are beginning to ripen. Mr. and Mrs. R. M. Butcher of Rule visited J. L. Brothers and family Sunday.
 A group of young people of the Mitchell community went kodaking Sunday afternoon. Those in the group were Misses Mozelle and Margie Corley, Olga, Alta and Emma Brothers, Nettie Lee Tibbs, Miss Fletcher, Mr. Joe Fletcher and Quada Bess Draper.
 Little Eva Ray Melton is very sick this week. She has a bad cold and severe case of asthma. The doctor recommended a higher altitude, so her parents left for Lubbock Sunday. We hope she improves rapidly.
 A large number of ravens are collecting at their old roosting place on the Bush and Burnet ranch again this fall.
 Mr. and Mrs. Charlie Hackney of Thorpe community visited Mr. and Mrs. J. O. Nickell Sunday night.
 Mr. and Mrs. Victor Brothers and Curtis Brothers have returned to Lamesa after visiting relatives in O'Brien, Rochester and Rule.
 Mr. Elvin Sorrells and family and Mr. Chester Cobb and family of Eldorado visited relatives in Rule Sunday.

Fire Prevention Week

ME TO CHECK OVER HEATING AND PLUMBING EQUIPMENT
 Fire Prevention Week is an ideal time to inspect heating and plumbing equipment in your home and office.
 During the coming winter months, an increase of home heating and plumbing equipment will be necessary, and in order to give maximum service, thorough inspection of all equipment should be made now.
 If repairs or additional installations are needed, we will find our services efficient and satisfactory.

WEINERT BOY SCOUT NOTICE
 Troop 52, Weinert, will meet regularly each Monday night at the Baptist Church in the future. We have tried other nights but that time has proved the best. Clay Griffith and Jay Marsh are our newest scouts. Bring your scout handbook and buddies to the meeting next Monday night, 7:30 p. m. Two scouts have recently transferred to another troop but we have a full troop left. Thirty-five boys have been registered at Weinert this year. Since one of our patrol leaders has moved and some scouts have advanced more rapidly than others, we need to reorganize our patrols and elect new leaders for the fall and winter. Come with a scout smile and a report of good turns to the meetings each Monday night.

'WAY BACK WHEN
 by Jeanne

PRESIDENT WAS LAUNDRYMAN
 WORK is a habit, and to those who acquire it it becomes fun, relaxation coming through the kind of work done. In analyzing the lives of successful men and women, we usually find that they got the work habit early in life and never lost it.
 Herbert Hoover was a worker. He was born in 1874, in West Branch, Iowa, the son of a blacksmith. His father died when he was six years old, his mother when he was nine; and he went to live with an uncle who operated a Quaker academy in Oregon. Herbert earned his board by doing odd chores, feeding and currying the horses, milking cows, and tending the furnace. All of this was in addition to his regular school work and, as if this were not enough work for a young boy, he studied English literature and history outside of school hours. Later in Salem, Oregon, Herbert worked as an office boy for his uncle, and went to night school until he had enough credits to enter Leland Stanford university. He worked his way through by acting as clerk for the registrar, and handling and delivering the San Francisco News on the campus. Later he started a laundry agency, calling for the bags of soiled laundry and delivering the bundles himself.
 In 1893, Herbert Hoover got a job with the United States Geological society. He had natural ability at engineering. That together with the habit of work, gained rapid progress for him. He became nationally known as a successful engineer and a business man. In 1928 he became President of the United States.
 Herbert Hoover was born with no silver spoon. Orphaned early, he had to fight for every bit of knowledge, for every opportunity. But Herbert Hoover was born with the habit of work, and he had the good luck to keep that habit. His reward was success.

KNOX COUNTY 4-H CLUB BOYS FEED BEEF CALVES

Knox County 4-H club boys are showing a great interest in feeding beef calves to exhibit at live-stock shows and have a large

number of calves on feed at the present time.

Thirty calves are being fed out by 23 4-H club boys, and the county agricultural agent predicts a commendable showing at calf shows next year. Joe Dean Clought

of this county is feeding an Angus and a Hereford calf and reports a daily gain of 3 pounds for each calf during the past month in spite of the very hot weather. The Angus gained 110 pounds in 32 days and the Hereford gained an even

100 pounds for the same period.

This gain was possible, Joe Dean says, because the calves had a cool stall which is screened fly proof and is kept clean at all times. Fresh grain feed and clean water are kept before the calves at all

times, causing them to eat just a little more than is customary at this time of the year.

HITLER DOLLED UP

Dressed in a faultless uniform, Chancellor Adolph Hitler is greeted on his arrival at Nuremberg, Germany, to attend the National Socialist congress.

AGRICULTURAL PROGRAM FOR 1938 IS ANNOUNCED

The 1938 Agricultural Conservation Program will set up acreage goals for cash crops which are smaller than the established bases, according to Geo. Slaughter, chairman of the Texas Agricultural Conservation Committee.

The 1938 program is in most respects quite similar to the 1936 and 1937 program, Slaughter said. The range program, developed during 1937, will be continued.

Chief differences in the new program from previous plans is the provision for national goals for major soil-depleting crops to provide adequate supplies for consumption and export, but such as to keep down burdensome surpluses, according to Slaughter. He explained that each state will be given its share of the national goal, and each county will be given its share of the state goal. The county goal will be distributed among the farmers of the county.

In 1938, the maximum payment for each producer will be calculated at the beginning of the crop year and the attainments of soil depleting and soil building goals will be set as conditions for full payment.

The division of payments between landlords and tenants will be the same as the division of crops, Slaughter said. The new program was hailed by Slaughter as by far the most uniform in application to all regions that has yet been developed.

BUILDS BEDROOM IN ATTRACTIVE COLORS

"I placed the essentials of a good bedroom before me and set out to meet them," said Miss Bonnie Jean Sellers, bedroom demonstrator of the New Cook Home Demonstration Club.

In forming the background she used a light gay paper and did the woodwork in ivory, a shade darker than the wallpaper. To refinish the floor she use walnut enamel. For floor covering a linoleum figured in ivory, walnut and green was used. The bed that Bonnie Jean has is somewhere between seventy and eighty years old, that was refinished along with two chairs, a small table, a book shelf and dresser.

As a last personal touch Bonnie Jean added a friendly little "Scottie" door prop to guard the cleanliness, fresh air, sunshine and restful atmosphere of her gay little bedroom.

This bulletin, while of great value to fire chiefs, is also important to property owners because without adequate water pressure, the fire department is handicapped in extinguishing fires.

FIRE PREVENTION BULLETIN MAY SAVE YOUR LIFE

The National Board of Fire Underwriters, through its Committee on Fire Prevention and Engineering Standards has issued this month 3 new bulletins concerning oil fires, prevention of water damage and fire flow tests respectively.

The first bulletin, No. 40, deals with the fire which occurred at a combination oil storage and service station in Atlantic City in July. The second bulletin, No. 41, describes means and methods of preventing water damage and should be of particular interest to owners of all kinds of business property.
