Three Olton People Hurt In Accident

Three Olton people were hurt in a two-car collision about noon Tuesday some 8 miles east of Olton on Highway 70.

Injured were identified by highway patrolmen as Mrs. Alline Light, her son Gene, 6 years old, and Mrs. Mattie Virginia Critchfield.

Officers said the injured were passengers in an automobile operated by Mrs. Light. Patrolmen said the Critchfield baby apparently was not injured in the mishap.

Driver of the other car was identified as Mrs. Rena Dell Cherry of Hale Center. She received emergency treatment at a Hale Center hospital and was dismissed.

The Olton people were taken to Plainview in a Parsons Funeral Home ambulance.

Officers said Mrs. Critchfield and the Light boy suffered what may have been serious head injuries. Mrs. Light may have suffered internal injuries but appeared to have been less seriously hurt. Extent of injuries was not immediately determined.

Officers said the Light car was traveling east on the highway and the Cherry car was going west when the accident occurred.

Cub Scouts Start Clean-Up Week Saturday

Olton Cub Scouts kicked off Clean-Up, Paint-Up, Fix-Up Week Saturday by cleaning up the hospital grounds.

Officials of Olton Chamber of Commerce and Agriculture stressed that trucks will make the rounds Friday afternoon to pick up all non-burnable trash piled along alleys.

Kelleys Have New Baby Boy

Mr. and Mrs. Bill Kelley are the parents of a baby boy born at 1:15 o'clock Tuesday afternoon.

The Kelleys have two other children, Gary and Vicki. The newest member of the family had not been named at Enterprise press time.

IN RECITAL

Students of Harold Dean Carson and Mrs. Iris Wilson will participate in a National Piano Guild Tournament to be held April 21 through 24 at First Baptist Church.

Equipment Moves This Thursday; Print Next Week In New Plant

An era will end in Olton this week as The Olton Enterprise moves from its Main Street location to a new brick and tile structure just across the street from Senior High School.

The Enterprise will be housed in its own building which is 25 by 70 feet. The new building is constructed of tile with a red brick front tied back to the tile.

It has two air conditioners with a refrigerated unit for the dark room.

Dennis Contracts

Contractor for the new building was H. L. Dennis, who, oddly enough, supplied the name for The Enterprise some 32 years ago when the paper was founded by L. L. Kyle and his son, F. L. Kyle.

The Enterprise is published by Troy and Korkye Martin. Martin is managing editor and Russell L. Grimes is advertising manager.

Sub-Contractors

Plumbing for the new building was done by Ed Truelock. Wiring was done by Slim Pinkerton and brick was laid by Clyde Truelock. Robert Dennis did the finish work.

Machinery will be moved Thursday by Luther Transfer & Storage Company of Lubbock.

Paper's History

The Olton Enterprise was established in February of 1926. The office was in a frame building at the present site of the J. C. Jones Company.

An office was maintained here but the paper was printed in Plainview until 1931.

The small office was moved to the present site of the newspaper and remodeled. In 1945 the present building was erected by W. B. Smith Jr.

Complete printing equipment was installed in 1931. That year Roy Kyle purchased The Enterprise and it was leased to W. R. Scott for a number of years.

W. B. Smith, Jr., purchased half interest in the paper in 1938. A large printing press and an automatic job press were added.

In 1950, Owen Norfleet came into possession of The Enterprise. Royce Vernon and F. L. Burrow purchased The Enterprise and then in 1952, Troy and Korkye Martin bought Mr. Burrow's interest. Two years later they bought out Mr. Vernon and have published the paper since.

The Martins sold their job printing equipment and liquidated their office supply stock early this year. The Enterprise now is solely engaged in newspaper publishing.

The Enterprise published two days early this week in order to allow time for moving the plant and still publish a paper next week.

Banquet Features Spring Theme; Royalty Crowned Saturday Night

In a rose garden, complete with a picket fence, wishing well, and lawn furniture, David Cole and Nell Smith were crowned Banquet King and Queen at the annual Junior-Senior Banquet Saturday night.

The couple were crowned by Junior Class sponsors, Mr. and Mrs. Harry Ford. Royalty was chosen by secret ballot of the Junior Class members.

Joe Harper, OHS superintendent, delivered the key speech. He spoke about the group of the three most important influences of a student's life: home, church and school. Harper admonished the students to use their heads as they went through life.

Setting for the Junior-Senior Banquet was the school cafeteria. Entrance into the room was over an rose-bedecked arch. The room was surrounded with a picket fence and setting for the entertainment was at the center back of the room. Here a rose and

greenery-covered wishing well, lawn furniture and an artificial tree were set upon an artificial lawn.

"Moonlight and Roses" was the banquet theme. Centerpieces were of blue cellophane and crepe paper upon which stood a silver moon with red roses intertwined on the moon. Nutcups matched the centerpieces with programs, place cards and napkins carrying out the theme. Glitter-decorated candles were placed along the tables and blue crepe paper ran down the center of all tables.

Blue and silver streamers decorated the ceiling. Stars and "clouds" were suspended from the ceiling.

A girls quartet sang "Moonlight and Roses." Sue Witten, Joyce Curtis, Gayle Machen and Johnny Crawford comprised the quartet.

Following the coronation, Koenia Schenck sang "Shine On Harvest Moon" in the royal couple.

Welcome was given by Gerry George, Junior Class president, with Sonny Bryant, the Senior Class president, giving the response.

Invocation was said by Harry Ford and OHS principal, Don Waldrip, led the benediction.

Organ music was played throughout the dinner by Judy Price and Wynona Cox.

The Melody Aires, a group from Abernathy, entertained with several instrumental and vocal numbers.

Farewell speech was said by Elmer Moore, OHS school coordinator.

Approximately 165 persons attended the affair. Servers were sophomores Becky Hall, Sharon Smith, Lila Lee McFadden, Lonna May, Donna May, Kay Cherry, Nancy Critchfield, Kenneth Hooper, Ronald Fancher, Robert Priest, Wendell Scribner, Lester Hines, Nicky Redinger and Harvie Jordan.

THEIR ROYAL HIGHNESSES

Junior-Senior Banquet King and Queen, David Cole and Nell Smith take it easy as they sit on the lawn at the Junior-Senior Banquet Saturday night. The couple were crowned by Mr. and Mrs. Harry Ford, Junior Class sponsors.

 J. T. Gibson who ranches 10 miles north of Littlefield has recently reseeded an old field to a mixture of approximately 30

percent Switchgrass, 30 percent Indian grass, 20 percent sand lovegrass and 20 percent sideoats grama.
 The seeding was done on approximately 60 acres in a dead litter cover of drilled grain sorghums. The dead litter will offer protection for the young seedlings until they become established. Gibson also over seeded about 90 acres of rangeland to a mixture of about 40 percent sand love, 30 percent switch grass and 30 percent indian grass. This area will also receive brush control this year using a shredding machine to control sand sage brush. The pasture will be deferred during the growing season this year and grasses allowed to make maximum growth for seed increases. Gibson, overseeded a pasture last year and controlled brush by aerial spraying. This pasture made excellent recovery and now has a good stand of highly desirable grasses. Gibson is carrying out a complete conservation plan on his ranch which includes Range Seeding, Brush Control, Deferred Grazing, and proper use on Rangeland and a conservation crop rotation, crop residue utilization, cover cropping and irrigation water management on his cropland.
 The Great Plains Conservation Program is filling the bill in the Lamb Co. SCD, in providing Federal Cost Share for Carrying out needed Conservation Measures.
 Persons interested in obtaining more information with regards to how this program might be of benefit on their farm or ranch are urged to contact the local Soil Conservation service, offices located in the basement of the Court House, Littlefield.

5000-pound Maize, Using Ammonia

Dan W. Berger, prominent Oldham County farmer, says: "Even with what I consider a light injection of Phillips 66 Ammonia—80 pounds per acre—I averaged 5000 pounds per acre on my grain sorghum last year. On a De Kalb 5-acre contest plot, I harvested 6400 pounds per acre.
 "This experience sold me on Phillips 66 Ammonia. I plan to use 120 pounds of ammonia on my grain sorghum land this year; 100 pounds on my wheat."
 Other successful Southwestern farmers have discovered that they make more profit per acre, using Phillips 66 Ammonia. They get more cotton that classes higher at the gin . . . yields of sorghum grain and ensilage are increased . . . profits on wheat and small grains are increased through higher grain yields and improved forage . . . more marketable vegetables are harvested.
 Phillips 66 Ammonia can be easily applied either by you or your distributor. See us today about Phillips 66 Agricultural Ammonia . . . it gives you more nitrogen per dollar than any other form of fertilizer—a full 82%.

Seek High-Yield Combine Sesame

Research to develop a high yielding combine sesame at Texas Research Foundation has turned up a plant which is a natural self-feeder in providing birds with highly nutritious seed during the winter months.

"The new plant, Renner Combine Sesame No. 15, scatters its seed slowly during January and February, thereby benefitting all seed-eating birds, especially game birds such as dove and quail," Dr. C. L. Lundell, Director of the Foundation, said.

A product of the Foundation's plant breeding program at Renner the new sesame is a drouth variety which has been bred as a non-shattering type for machine harvesting.

In North Texas, sesame is planted with a vegetable planter or a grain drill in rows around June 15. The seed pods mature in October.

Dr. Lundell has observed dove and quail in sesame plantings over the past three years.

"We first noticed these game birds' preference for sesame in 1956 in the Foundation's South Texas plantings. Since then, we have observed this preference in Northwest, North and West Texas," he said.

"Doves in particular will even leave grain sorghum fields, heretofore one of their favorite feeding grounds, for sesame fields, and those birds which have fed on sesame prior to hunting seasons are butter balls of yellow fat."

Dr. Lundell recommended sesame planting to landowners and sportsmen as an effective measure in wildlife conservation.

"When planted as such measure, sesame will provide food during the dead of winter, that period of the year when all birds find it most difficult to survive," he advised.

"Through use of sesame plantings more birds can be brought through the lean months to aid the farmer in his spring and summer insect control programs."

Doves probably are the nation's most widespread game birds. They spend the winter in the southern half of the nation, and are present in great numbers during the hunting seasons. All members of the dove group are almost exclusively vegetarians, restricting their diet to seed, grain and fruit. They are ground feeders and their favorite feeding places are fields, orchards, open weedy areas and other similarly cleared spaces. They visit watering places frequently.

In Texas, favorite foods of the dove are doveweed, sunflower,

corn, croton, sorghum, hackberry, acacia, buckthorn, prickly pear, various grasses and wild fruits.

The bobwhite quail, favorite gamebird of Texas sportsmen, has returned from relative scarcity during the decline of agriculture in the 'twenties and 'thirties to fairly prosperous populations in recent years. Reappearance of quail in appreciable numbers has been concomitant with a rejuvenation of agriculture and with large scale artificial propagation.

Artificial propagation, however, is costly and somewhat impractical, particularly when thousands of birds are released into habitats which will not support them. The more sensible measure, and one far more economical, is improvement of habitat through such wildlife conservation measures as plantings of natural food supplies.

Young quail feed almost exclusively upon insects; but mature birds feed upon seed, tender leaves and fleshy fruit in addition to animal life. In Texas, the vegetable diet of quail consists of sorghum, doveweed, oak, panicgrass, ragweed, corn, sunflower, milkpea, lespedeza, wildbean and sumac, with occasional feedings upon wheat, thistle and various other wild seed.

Sesame fits nicely into both these menus. As a poultry feed—the category nearest the nutritional needs of game birds—sesame is a remarkably balanced food.

Dr. Lundell has suggested that landowners turn this quality of sesame to profit by planting seed in wildlife borders near water and woodlands, alongside lanes and hedges, in the short rows of terraced fields and in cultivated fields adjacent to cover and water.

"In small areas, the farmer can plant sesame in rows by hand, or he can broadcast the seed. One and one-half pounds of Renner Combine Sesame No. 15 seed will plant an acre in rows, or 5 pounds an acre broadcast," he advised.

"Although planting seed is limited, sufficient quantities are available for landowners and sportsmen to make field tests."

Through such provision for wildlife, the landowners easily can raise the winter per-acre ratio of game birds to a level which will assure abundant sport and game during the hunting season and to a level which in addition will leave plenty of birds with ample food supply to stock his land for future shooting.

Homestead May Be Seized For Delinquent Tax

Homestead May Be Sold For Taxes

Many Texans have the mistaken impression that their homestead cannot be seized and sold for delinquent taxes. In many cases, this idea has led to considerable grief and monetary loss which could have been avoided. A homestead should be rendered to tax assessors like any other property, and taxes assessed against it should be paid as faithfully as those on any other taxable property.

The deadline for rendering property for taxation is April 1, so far as most city taxing agencies are concerned. The last date for rendering real and personal property for state and county taxes is April 30. State taxes are collected by the County Tax Collector.

Under the Texas Constitution, each family is entitled to claim one piece of real property as their homestead. This claim must be established by an affidavit filed with the county tax assessor on or before April 30, each and every year. This affidavit must be filed by the owner himself. A lending agency cannot do so, even though it may actually pay the annual taxes thereon from a fund created by the owner's monthly installments.

When the homestead affidavit is properly filed, the owner becomes entitled to an exemption of State taxes up to the value of \$3,000 or 200-acres in the case of farm lands. This is an exemption from payment, not a complete exemption from rendition and assessment. There is no similar exemption with reference to city taxes, or to county taxes, except in certain counties levying a special 30 cent farm-to-market and lateral road tax.

The homestead claimed for tax purposes need not be the property which is actually occupied by the owner as his residence.

When the homestead affidavit is not filed by April 30, the taxpayer loses his right to the \$3,000 or 200-acre exemption, and consequently becomes liable for more taxes than he would otherwise be required to pay.

Property taxes are assessed against the person who is the record owner of each piece of real and personal property on the first day of January of each year. Individuals purchasing property during the year for all previous years have been paid. Otherwise, the purchaser may be forced to pay hundreds of dollars in delinquent taxes to protect his property. Unpaid taxes create a lien against the property which can be enforced regardless of change of ownership.

One should also keep in mind to make some arrangements for the previous owner to pay his pro-rata share of taxes for the current year. Otherwise, the buyer may find it necessary to pay the entire taxes for that year.

When taxes are not paid by the deadline prescribed for the particular taxing unit (city, county, state or district), monetary penalties and interest are added from month to month. In addition, the property becomes subject to seizure and sale to satisfy the tax lien. This lien applies to all property, whether homestead or not.

must have married when a mere child.

I have never seen Marguerite when she seemed a bit blue or discouraged. I asked her not long ago, for I have never seen her when she was not smiling, as if every thing in life was just one big bowl of Sunshine and happiness.

Marguerite and Laurence have three very attractive children and they, too, are always smiling. Perhaps she gets more of her happiness from having read the book of poems she once gave me. The title is "Poems With Power to Strengthen The Soul." The book is truly full of strength for the soul.

So many diseases are contagi-

ous, and if smiling as Marguerite does is a form of Disease, may we all catch it. Keep smiling and someone will feel better from just Seeing You Smile.
