

## Red Cross Drive For War Relief Fund To Be Ended Next Week

### Voluntary Contributions To Fund Rise; Intensive Drive Planned

Voluntary contributions amounting to \$85.50 were reported on Thursday by the local Red Cross chapter in its drive to raise the \$500 quota set for the county for benefit of War Refugee relief. Contributions listed in this amount have been purely voluntary, according to Frank Turner, chairman of the county chapter.

Raising of the county's quota has been assigned to workers in all towns and communities of the county next week, with the drive closing June 29th, Mr. Turner said. Reports from all sections of the county indicate that the goal set for the county will be over-subscribed, but despite these advance reports, the drive will be carried out on an intensive basis which will afford every citizen of Haskell county an opportunity to contribute to the fund.

In addition to the town-and-community canvasses planned, several 'benefit' entertainment programs have been scheduled to conclude the drive, Mr. Turner said. These programs already arranged include a benefit motion picture show in Haskell and a Junk Car race on the Fair Park speedway here Sunday afternoon. Proceeds from both events will go to the Red Cross war refugee relief fund, it was announced.

Donors to the fund, all voluntary, during the past week were:

Mrs. J. R. Cooper	\$5.00
Mrs. H. S. Wilson	4.00
John A. Couch	5.00
R. L. Burton	5.00
R. F. Turner	5.00
Frank McCurley	1.00
Elmer Turner	1.00
Courtney Hunt	5.00
Burton-Dotson Chevrolet Company	10.00
A Friend	5.00
Ruth Nunnally	3.50
Paint Creek Lodge No. 241, O. D. H. S.	20.00
Weinert Study Club	2.50
W. K. Gerick	3.00
W. D. Hellums	5.00
H. F. Monke	1.50
Louise Brooks	2.00
Adolph Gerick	2.00
Mrs. Mary Peter	5.00
P. F. Weinert	1.00
Agnes Peter	1.00
H. Weinert	3.00

Final drive to raise the county's quota will end this week, Mr. Turner said, with last-minute contributions probably coming from church groups following announcement of the humanitarian purpose of the campaign made Sunday. Persons wishing to contribute who are not contacted in the county-wide campaign may send or hand their contributions to any newspaper in the county, or mail to the Haskell Chapter, American Red Cross, and proper acknowledgement will be given, Mr. Turner concluded.

## Mattress-Making Project Awaiting Arrival Material

All arrangements were completed this week for beginning work in the mattress-making project in this city, scheduled on a county-wide program when materials are available, it was announced Wednesday by Mrs. A. M. Bird, chairman of the local community committee. To date about 200 applicants have been certified as eligible to participate in the program through the local center, Mrs. Bird said. Nine other mattress-making centers will be set up in the county in the program sponsored jointly by the Commissioners Court, Extension Service and government agencies.

The Haskell project will be maintained in the East Ward school building, where scaffolds and other material equipment has been placed, with the needed sewing machines available when needed, Mrs. Bird said. Assisting her in planning for opening and operating the local community project are Mrs. W. E. Johnson, Mrs. C. D. Pennington, Alfred Pierson and W. E. Bland. Mrs. Bird said also that the Haskell Chamber of Commerce has rendered every assistance possible in setting up the local project, which is designed primarily to benefit low-income farm families of this immediate section.

Mrs. John A. Willoughby and Ann Taylor were in Abilene this past week visiting friends.

## FUNERAL SERVICE FOR A. NUSSBAUM HELD ON SATURDAY

### Well-Known Haskell Farmer Died Thursday in Local Hospital

Adolph Nussbaum, 63, prominent farmer and landowner and a resident of this section since 1913, died Thursday afternoon in the Haskell county hospital following a lengthy illness with a heart ailment.

Born Oct. 2, 1876 at Densburen, Switzerland, Mr. Nussbaum came to the United States with his parents at the age of four years, the family settling in Bell county to engage in farming. Mr. Nussbaum was married to Mrs. Albert Dahms August 1, 1912 at Temple, Texas, and a year later they moved to Haskell county. During their residence here, Mr. Nussbaum accumulated substantial farm holdings and was actively engaged in farming until his health failed several years ago.

Immediate survivors are his widow, Mrs. Johanna Nussbaum of this city; a step-daughter, Mrs. H. L. Brewer of Rosenberg, Texas; and two brothers, Gollieb Nussbaum of Wichita Falls and Otto Nussbaum of Haskell. Several nieces and nephews also survive.

## CHRISTIAN CHURCH REVIVAL CREATES GROWING INTEREST

### Minister J. T. McKissick is Being Assisted by Brown-wood Singers

The revival services at the Christian Church began this week with J. T. McKissick the minister of the local church doing the preaching and Mr. and Mrs. Curtis of Brownwood, directing the music. Attendance at the services which begin at 8:15 o'clock grows nightly.

Rev. McKissick is not only a minister of the gospel but is an educator, whose experience covers a wide field of endeavor over a period of many years. His sermons are Bible sermons, enriched by direct quotations from the Scriptures and illustrated by events and circumstances drawn from an active life in the ministry.

This is the third meeting held by this preacher in this community. Many of those who are mature and seasoned Christians in this congregation and others over the state were baptized by him in this town years ago when they were young.

Mr. Curtis, who leads the singing, and whose wife plays the piano, has the distinction of being one of the five who placed a memorial to Will Rogers and Wiley Post at the spot near Pt. Barrow Alaska, where those famous men met death. Their ten thousand mile cruise in the Pandora, a small 35 foot Diesel powered boat made history in 1938 when they sailed into the Artic, and built with their own hands a monument of concrete and stone fifteen feet high as a token of remembrance on behalf of all those in the whole world who loved and appreciated Will Rogers and Wiley Post. Mr. Curtis served as co-director of the expedition, being commissioned by Governor Allred for the task. He now serves as minister of the First Christian Church at Brownwood, Texas.

Mrs. Curtis' contribution as pianist and singer is being appreciated by the congregation each night. For the past several years she has served as organist for the Convention of the Christian Churches of Texas.

These services will continue through this week and next. Every person in the community is invited to attend the services, which are held only at the 8:15 hour.

## Section Receives Additional Rain During Past Week

Additional rains which fell Saturday and Sunday, followed by a hard shower Wednesday afternoon, amounting to a total of 1.64 inches, boosted total precipitation for the year to 13.15 inches. The harvesting of small grain in most sections of the county, and to some extent have halted farming operations, but the moisture has been welcomed as a boon to feed and cotton already up.

Heaviest rain during the past week fell Saturday, when more than one inch was gauged here. In other parts of the county, heavier rainfall was reported, more than two inches being received at Weinert with some estimates of the downpour in that section ranging as high as four inches. Farmers generally would appreciate several weeks of sunshine, in order to cultivate crops and clean weed-infested fields.

Immediate survivors are his widow and three children, Marie Piland of Amherst, Era Piland and Mrs. Motenbocker of Hobbs, N. M.; two brothers, George Piland of Haskell, Tom Piland of Kansas City, Kans., and three sisters, Mrs. J. R. Jeter and Mrs. W. H. Parsons of Haskell and Mrs. Will Collins of Lubbock.

## Former Residents of Bell County To Have Homecoming

All former residents of Bell county who now reside in this section of West Texas have been invited to meet at Buffalo Gap, in Taylor county, July 5th for an old-fashioned get-together and reunion, according to Joe Lee Ferguson of this city, himself a native son of Bell county.

Plans for the gathering at Buffalo Gap, a picturesque spot familiar to many pioneer West Texans, include an old-fashioned basket dinner at the noon hour and an impromptu program of talks by West Texas pioneers, Mr. Ferguson said. Politics and "the war" will be outlawed in all discussions insofar as possible, and the occasion will be devoted to a review of happenings in Bell county and their transcendent impact in the early settling of this section. The occasion is planned as a real old-time reunion of native Texans and their families. Mr. Ferguson explained in pointing out that a large number of Haskell families migrated here from Bell county in the period when this section's agricultural resources were being developed.

Miss Mary Lois Littlefield had as her guests this week Miss Beverly June Blackley and Betty Sue Stephens of Anson.

## GROUP HOSPITAL SERVICE IS MADE AVAILABLE HERE

Affiliation of the Haskell County Hospital with Group Hospital Service, Inc., was announced this week, making this hospitalization service available to the people of this section. The plan, widely adopted by leading hospitals in the nation, has the approval of the Texas Hospital Association, local physicians and medical groups.

Group Hospital Service provides hospital service at low cost for all members of a family, employee groups and other classifications under a plan successfully operated since 1929, it was explained.

This plan gives each member of the family 35 days hospital care each year with unlimited operating room service and other benefits, and Group Hospital Service also will pay one-half of the bill on all maternity cases. This plan of hospital care was made possible first in 1929—a group of 1,500 teachers participated in the beginning of this plan, started by Baylor University Hospital, Dallas. The plan worked so well that other groups were included and within a short time the idea became nation-wide. Today, approximately 5,000,000 people in the United States are participating in the non-profit service.

Detailed information concerning Group Hospital Service is contained in a folder free for the asking at the Haskell hospital, or from J. M. Littlefield, local representative.

History of War Suffering In 1914-18 Being Repeated, A. H. King, Red Cross Worker in the First World War Asserts

History of the World War of 1914-18 with respect to the horrors and suffering being inflicted on countless millions of refugees, aged men, women and children, is being repeated today in Europe on a scale that defies imagination, in the opinion of A. H. King of Throckmorton who vividly recalls the scenes of human suffering that he witnessed while in France as an active Red Cross Worker in 1917-18.

When the United States entered the war against Germany in 1917, Mr. King resigned as a member of the Texas Legislature from this district to volunteer his services in the militarized branch of the American Red Cross authorized by Secretary of War Newton D. Baker. Mr. King was the only Texan in a group of 26 commissioned by the Red Cross and sent to France to superintend Red Cross relief work in the spring of 1918.

Mr. King was first stationed in Paris, and there assisted in evacuating the hordes of refugees fleeing from the German drive to points in southern France. The tragic plight of the war victims was beyond description, the former Red Cross worker said, with starving children separated from their parents, aged men and women deprived of all their possessions, with no hope of regaining their homes. And the picture today, with France prostrate under the German military machine, must be even blacker, Mr. King believes.

Despite the present dark outlook for the democratic nations of Europe, Mr. King expressed his abiding faith in the triumph of righteousness, that eventually right will prevail and Christianity survive the dark ordeal. As for this country's future, Mr. King counseled: "In a world gone mad, we must stay sane, and keep up-ermost the knowledge that America has the strength and patriotism equal to any situation that the future may bring".

**CHURCH OF CHRIST**  
J. G. Malphurs, Minister

Because war clouds are so many and hanging so low over us, we plan to discuss at the eleven o'clock hour what Christians should do if our nation should declare war. This is highly important to everyone who believes the Bible, especially to those who are subject to enlistment. Does the teachings of Christ, the Prince of Peace, permit his subject to kill in a carnal war if the government in which they live draft them? If the followers of the Prince of Peace are forbidden to kill, what can they do to help their government, and thereby show their loyalty? We urge everybody to hear this subject, especially young Christian men. Before coming read Romans 12:14-21.

From eight to eight-thirty there will be a special song service. The sermon will follow the song worship, the subject of which will be "The Preeminence of Christ in All Things," from Col. 1:18.

On Wednesday evenings we have a helpful and interesting mid-week service. You will find the "Sweet Hour of Prayer" still sweet. Suppose you try it again.

**LAYMEN'S DAY PROGRAM AT FIRST METHODIST CHURCH**

Prof. Breedlove announces the following program:

## CHECK YOUR HOME AND REPAIR NOW

It's wise to remodel and make all necessary repairs on your home during the summer time. The weather is right, labor is plentiful, prices are lower, and it's the most convenient time to have workmen around the house.

It's a wise thing, too, to check the little things that have gone wrong. This is a real case of where a "stitch in time saves nine." If you let these little jobs go, they can develop into expensive and annoying replacements.

Take a little time out right now and give your home a thorough check-up. Decide what repairs or refinishing is needed and then call us for a FREE CONSULTATION and estimate.

The Enemies Within The Gates

Events in Europe have underlined and emphasized the urgent need for improving and expanding our national defenses, and making sure that the United States, its shores and its traditional ways of life, are rendered secure.

To do his most effectively, our military experts are of course studying very closely the methods of the "total war" that has overrun so many helpless countries abroad—the modern form of war that, as one observer has commented, is fought "with the moras of the cave and the weapons of an exquisite civilization."

You need to know the danger that faces your country before you can guard against it successfully.

But there is one further step. The manner in which Norway and Poland and Belgium have been brought to their knees was not exclusively based upon military power. Before a blow was struck, security was undermined from within. The advice of Goethe—"Divide and command"—was heeded with telling and destructive effect.

The "fifth column" of traitors and imported agents did their destructive work before war even began.

The danger that those tactics will be repeated here also faces our own land. It is not enough to have military preparedness; we must also establish internal unity, internal security.

To achieve this aim, certain principles need to be kept in mind:

(1) We must guard—not in a mood of hysteria, but through sound common sense—against the misguided groups and individuals in our own country who do not believe in private enterprise, and would sacrifice it for some other way of life. It is they who, by word or deed, would fill the role of "fifth columnists" in America if the opportunity were ever offered.

(2) We must not let the erroneous thinking of a second group to muddle our thoughts on preparedness. This group does not recognize the inseparability of our various freedoms—freedom of speech, a government of representative democracy, and a business system of private enterprises—and its failure to appreciate this important truth is likely to be actually as dangerous as the attitude of the deliberate enemies of our way of life.

(3) We need, at a time when industrial efficiency is so vital to national defense, to guard against attempts to cripple and hobble our manufacturing enterprises. The La Follette bill recently introduced in Congress, a piece of legislation that

would prevent manufacturers from guarding effectively against sabotage and subversive activities within America's plants, is a dangerous example of this type.

With these principles in mind, and with the courageous maintenance of national unity and individual patriotism, America can guard against the "enemies within the gates." Without this stand, America invites disaster!

Millions May Not Serve

(Bloomington, Ill., Pantagraph)

With thoughts of war intensified in this country, the mind naturally turns to who and how many will be called on to fight if the United States enlists its full manpower.

Of the 20 million young men of military age in this country at least seven million need not worry about getting into the army or navy. Their physical disabilities will prevent.

The American Medical Society points out some of the causes of army rejection. There is hay fever for instance. If you have flat feet, or even are bothered with bad corns or bunions, you can't get into the army.

If you do not have good teeth, you don't stand a chance. A rupture is a sure cause for rejection. Of course some well known ailments bar admittance of the recruit—appendicitis, heart disease, high blood pressure, and such.

Tuberculosis and venereal diseases kept 12 percent of drafted men from acceptance in the world war, and defective vision another 5 percent.

In making up an army, it is largely the survival of the fittest—but the fittest may get killed first.

The Alabama Quilt

In the Alabama department of archives and history in Montgomery is one of the most famous quilts in the world, which finds there its permanent resting place after many wanderings.

It is the quilt made by Confederate women during the Civil War to be auctioned for the benefit of the fund for building of the warship Alabama, which caused the Federals a lot of trouble before she was finally sunk on June 19, 1864, by the Kearsarge off Chebourg, France.

After the quilt was made it was put up at auction, and time and again the lucky bidder would donate it back to be auctioned again. Thus it passed through many hands, and from it was realized much of the money for the purchase of the ship. It finally came into the possession of the family of Mrs. Mary Hutchinson Owens who presented it to the state as a memento of the Lost Cause.

The Alabama was commanded by the intrepid Rafael Semmes, and during her eventful career of two years captured one Federal steamer and no less than 67 sailing vessels, besides causing the transfer of 348 Federal ships to the British flag. Her destruction by the Kearsarge, commanded by Captain Winslow, was a great relief to the Federals.

The Alabama went to the bottom of the sea; the Kearsarge was destroyed long after by being wrecked on a Caribbean reef in 1894, but the Alabama's quilt, wrought by loving hands in what they considered a sacred cause, is preserved for posterity in the cradle of the Confederacy.

Fishermen Need Break

AUSTIN, Texas—Fishing has been fair, but only fair, since the opening of the general fishing season May 1, according to reports to the Executive Secretary of the Game Department, who said bad weather, including heavy winds that prevented much sport, was the principal reason for poor catches.

Tried This Yet

And speaking of fishing, have you joined the increasing number of anglers who have found that a lot of fun can be had fishing for gar with a fly rod?

The sport bids fair to become one of the leading pastimes of the Ike Watsons in Texas, due principally to an educational motion picture released by the Game Department recently which shows exactly how the long-nosed fellows can be caught in a baited wire noose.

Jack (McFish) Sparks of Waco, several times world's all-around bait casting champion, demonstrates in the movie exactly how the noose should be made and baited, and then proceeds to go gar fishing with excellent results.

If you don't believe a gar will put up a fight, you should see this movie. Or better still, you should go catch some gar yourself, using the baited noose on a fly rod.

Aid To Game Fish

Fishing for gar not only will give the sportsman much fun, but will directly improve fishing conditions in Texas water because it will take much of the pressure off game fish such as bass, the Director of Inland Fisheries reports.

"Most fishermen in the past have thought they could have no fun at all on a fishing trip unless they caught a bass, a crappie, or some other game fish," he said.

"The result has been a heavy drain on the game fish supply, while gar multiplied unmolesied.

"Today the picture is changing. Hundreds of fishermen are absolutely deserting bass fishing in favor of gar fishing, because they have found out they can have worlds of fun at it.

"This will ease the strain on the game fish species, and we will have in time a more balanced condition among fishes in our waters."

Farmer Finds A Friend

Should armadillos be destroyed? The Game Warden for the Lamesa district reports that a farmer near Gail, in Borden County, is thoroughly opposed to harming a single one of the clumsy creatures.

In fact, the farmer imported over a dozen armadillos from East Texas and released them on his South Plains farm, hoping that they would thrive and multiply and assist him in controlling insects that damaged his crops.

It is a matter of record that the diet of an armadillo is made up of 94 per cent insects, such as cut worms, beetles and ants. Ants especially are heavily devoured.

Since ants are one of the greatest enemies to quail and turkeys, because they destroy the young birds at pipping time, the armadillo, in addition to being the farmer's friend, is also the friend of the sportsman because of his service in destroying quail predators.

The armadillo is not native to the plains region of Texas. One of the armadillos the farmer imported to Borden County was killed by a sportsman near Gail and this gave rise to the erroneous impression that these animals belonged to the South Plains as well as to the more eastern portions of Texas.

Turkey Hatch Excellent

The best turkey hatch in 15 years is reported in Gillespie County by the Game Warden stationed at Fredericksburg. Elsewhere in the Hill Country and South Texas came additional reports of good hatches. A good season is in prospect if the birds are not harassed by floods or otherwise molested, the Game Department reports.

Why America Has A Farm Problem

Another reason why America has a farm problem is that farmers' products bring them less than their usual share of the national income. In 1910, when farmers were on a parity basis, they were getting about 18 percent of the national income.

The smallest share farmers have received since 1910 was in 1932 when their share was about

6 percent of the nation's total. In 1939 farmers were still getting slightly less than 10 percent of the national income . . . even though they make up 24 percent of the nation's population.

Measures to increase the farm income include means for stabilizing supplies and prices of farm products, marketing quotas, crop loans, and crop insurance.

Who DO Advertise

Can you picture in your mind what kind of a community Haskell would be if it had no advertisers? Can you imagine what kind of stores this community would have and what people would be paying for merchandise if there were no advertisers? Advertisers build trade-centers and trade-centers make prosperity. The non-advertiser benefits from the advertising done by the aggressive merchant. The advertisers CREATE DESIRE; bring customers to the shopping center—they MAKE BUSINESS for themselves, but in doing so they cannot help but benefit every business in Haskell.

Haskell Is A Good Trade Center Because Haskell Has Good Advertisers!

And Haskell would be a better trade-center and a better and bigger Haskell if there were more aggressive advertisers—firms willing to put forth a special effort to win trade and to hold it—firms that realize GREATER VOLUME means LOWER PRICES to the consumer, yet MORE PROFIT to the merchant. The people of Haskell would then learn to try Haskell merchants FIRST before going elsewhere to shop.

The Advertiser Gets More For His Advertising Dollar In The Haskell Free Press Today Than Ever Before

This is because The Free Press goes into almost every home and prints the local news of this community. The Merchant desiring news in the advertising columns is important to readers of The Free Press because it saves them money.

So . . . . .

Again, we say, those who do not advertise owe a debt of gratitude to those who do advertise. We want to see more advertisers and more business men PULLING TOGETHER for the upbuilding of Haskell and for the good of all. We want even more people to depend upon The Free Press for their BUYING GUIDE. When you advertise your business, you advertise Haskell.

She had to raise her boy to be a soldier

In many lands today, mothers are forced to give up their children—even the youngest. Dictators demand them—and dictators are all-powerful. In peace as in war, they control business and industry, capital and labor, life itself. Men and women are told what work they must do. There is no prize for ambition, no hope for the man who would like to choose his own career.

How different it is in the United States! Here, governed by men responsible to the people, we choose our life-work for ourselves. This system of free enterprise makes the United States the world's greatest nation. Because men are free to dream and work as they see fit, scores of industries have grown great in America: the automobile, radio, telephone and electrical industries are just a few.

As typical Americans, the employees of your electric company are devoted to the American principle of working together, producing more of the good things of life and making them available to more people. Through their efforts electric service steadily improves; at the same time, its price steadily comes down.

What inspires the people of your electric company? The best answer is this: the employees of this company are proud of their part in keeping America great. They work as free men to bring better service and value to other free men. They are glad to create wealth instead of destroying it.

This company has been built by free Americans. It is built to serve other free Americans. It is free from political dictation. Like all industry, it will succeed as long as there are free Americans to work for it and free Americans for it to work for.

Goodyear Marks Quarter Century of Tire Making

"Celebrating its twenty fifth successive year during which, based on production and sales records, an accurate estimate is that more people have ridden on its tires than that of any other manufacturer.

Featuring the Marathon, introduced more than two years ago and successively proved by billions of service miles on the road, as well as the recently announced All-American tire, built to reach 70 per cent of the majority market.

It is true, as everyone in the great middle class group of car owners realizes, that tires ought to be replaced often, especially in the heat of summer driving when there are more cars moving on the roads and tire failures endanger a greater number of persons.

Gambusia, or mosquito fish, native of Texas, are live bearers, not hatches of eggs, and a half dozen to 60 may compose the brood of this diminutive fish.

Token of Early Haskell Life Is Found In Garden

Recalling the period when the village of Haskell was an outpost of old Fort Griffin in the decline of the buffalo hunting era of the 80's was the finding recently of a brass token bearing the wording "Good For 1 Drink at the Star Saloon, Haskell."

Finder of the token hinting at Haskell's long-distant past was E. H. Keneda, who found it while working in his garden. First thinking it a corroded 25c piece, Mr. Keneda polished the "trade coin" until the wording could be clearly distinguished.

During the period shortly after the organization of Haskell county in 1884, sale of liquor was permitted, and in 1891 the Star saloon was opened in a new frame building erected on the northeast corner of the public square.

Applications to receive cotton mattress making materials have passed the 100,000 mark with 119,079 filed in 203 Texas counties which are participating in the Department of Agriculture program for aiding low income farm families.

In announcing this response, Mildred Horton, vice-director and state home demonstration agent for the Texas A. and M. College Extension Service, reported that to date 10,069 mattresses have been made in the 46 counties to which cotton and ticking have been delivered.

To facilitate the program, 1,421 community centers have been set up where applicants may gather to work cooperatively on mattresses for themselves and their neighbors.

Commenting on the rapidity with which Texas communities have prepared for operation of centers, Miss Horton paid tribute to 4,999 women leaders and 2,258 men leaders who are volunteering their time and services to enable all eligible families to benefit from the program.

"These are not receiving any pay for their services," Miss Horton pointed out, "but they are everywhere being recognized as 'good neighbors' in their communities."

5000 Year Old Volcano Blast Is Described

Washington — A titanic volcano dust storm 5,000 years ago, which caused a more precipitate migration of Americans than any "black blizzard" yet to sweep the dust bowl was described recently to the National Academy of Sciences.

The storm, which sent thousands of Indians fleeing from 5000 square miles of what must have been one of their happiest hunting grounds, was caused by the eruption of Mount Mazama in the Cascade chain in southern Oregon.

In one of the last eruptions within the present boundaries of the United States, the volcano blew its top off and sent columns of fine dust thousands of feet into the air. The dust then was scattered by winds to a depth of six inches over the 5000 square mile area.

The awesome spectacle must have been seen and heard for hundreds of miles, he said, because molten lava poured down the mountainside into glaciers 1000 feet deep and more than 10 miles long, generating terrific clouds of steam. The lava also ran through canyons for a distance of 35 miles and burned forests in its path.

A. The average vote throughout the United States in 1936 was approximately 53 percent of the possible votes, whereas the average vote in the poll tax states through the nation was only 16 per cent.
