Mr. Skipworth said that a limited number of these loans would be made during the next fiscal year and urged that applications be made at once by those eligible for the loans. Application blanks may be had at his office in the courthouse.

"There are now 9 farmers in the county who are working their own farms which they bought with FSA loans," he said. These farmers were chosen from a group of applicants by the county Tenant-Purchase committee.

Loans are made repayable over a 40-year period and at three per cent interest. There are funds for only a few loans and preference is given to farmers who have adequate livestock and farming equipment.

Mr. Skipworth added that he had been informed that this form of farm tenant assistance would be extended to other counties in the state in addition to the 58 Texas counties in which it is already operating. He stated, however, no loans will be made unless land could be bought at its reasonable value for farming purposes.

Knowing that it was impossible for the small baker to make a loaf of bread to compete with larger bakeries we have discontinued baking bread and now offer for your approval Mrs. Baird's Bread. This move was made after careful consideration on our part both from our standpoint of living in Haskell and from the standpoint of the loyal citizens of Haskell who are justly entitled to the best. We could not give it to you with our equipment but we now offer you not one of the best but THE BEST loaf of bread in Texas, which has been proven in the largest markets of the State as it is the largest selling bread in Texas. It is wholly a Texas firm started by Mrs. Baird and still solely owned and operated by her and her sons. From a Haskell standpoint it is as near a home town loaf of bread as it is possible to have outside of locally baked bread, because the sale of it by us makes it possible for three married employees to live and spend their money in Haskell. We hope that you will give this bread a trial, and we make this offer, buy a loaf and if you are not entirely satisfied that it is THE BEST bread in Haskell your money will be refunded. Thanking you for your patronage in the past and we do hope you will try one of the many varieties of Mrs. Baird's Bread or Cakes at your grocers today.

Ideal Security Reviews Growth In Territory

To the People of Haskell Territory: We submit through The Haskell Free Press a large ad, giving you some information regarding the protection we give the people of this section. We have had a splendid growth, and our Cash Reserve is bigger than ever before. This means greater safety to our Policy-Holders. This Reserve has been created because we have tried to be careful in the selection of risks. We are trying harder than ever now to issue policies only to those who are insurable risks. We have no unpaid claims, and the service we render our policy-holders for their convenience is as good as you will find. Our salesmen will call on you soon, and if you don't already have the feeling of safety our Protection gives, we shall be glad for you to ask any questions you may desire to know regarding our Insurance. We are glad to refer you to the Banks named where you can make your payments. These Banks accept your money and save you postage and trouble of remitting direct. Bankers and Undertakers know when insurance companies pay promptly, and we are proud to refer you to those you know. We thank you in advance for every courtesy shown them, and assure you that these favors may be the means of satisfaction to you and those dependent upon you, perhaps, much earlier than you may now feel. We will be glad for you to fill out the coupon and mail to us, that our salesmen may not miss you, and you may mail to us or to any of them you may know, and if you are an insurable risk you may soon have the satisfaction Our Protection gives. By W. H. LITTLEFIELD
As Secretary-Treasurer of Ideal Security Life Insurance Company, it has been my desire to render to all the people who want protection, at a reasonable cost, such as each family desired.

We appreciate the confidence the people have shown in helping to build an Insurance Company with the greatest number of policy-holders of any other in West Texas for the time we have operated.

## Fifty-Six Immortals

Of the 56 members of the Continental Congress who signed the Declaration of Independence after its adoption on July 4, 1776, it has been said that "not one of the signers ever fell from the high estate to which that great act had elevated him."

Among the fifty-six were many of the notable figures of the early history of the United States. Two of them, Adams and Jefferson, reached the presidency. Benjamin Harrison became the father of one President and the great-grandfather of another. The bold signature of John Hancock, who signed first as President of the Congress, is the most conspicuous feature of the original document.

The signers included 34 lawyers, 13 farmers, nine merchants, five physicians, two mechanics, one clergyman, one mason, and one surveyor, some having more than one occupation. All except eight were born on American soil.

The eight born in the British Isles were Robert Morris and Button Gwinnett, in England; Francis Lewis, in Wales; John Witherspoon and James Wilson in Scotland, and James Smith, George Taylor and Matthew Thornton, in Ireland.

To the wisdom, courage and patriotism of these immortal 56 signers, who declared our independence and made great sacrifices in its behalf, as well as to Washington and his heroic army, the existence of our nation is due. All will ever be held in grateful remembrance.

## Expectation of Life

How the average span of human life has been increased during the last three centuries is the subject of an interesting little table in Uncle Sam's Almanac for 1939. In the year 1600 it is stated that the expectation of life for a child at birth was only 20 years now it is over 60 years.

This almost incredible increase is naturally due to the advances of medical and surgical science, and to the many safeguards to health resulting from better sanitation. These have been most effective in reducing deaths during infancy which in former times were appalling.

Even at the present time in the United States the mortality rate is more than six times greater during the first year after birth than during the second year. Fewest deaths occur between the ages of 10 and 12. At practically all ages females have a life expectancy longer than males.

The increased expectation of life as present, as compared with the past, grows less with advancing age. A person of 60 today has little expectancy beyond what one of that age had 25 or 30 years ago, although the expectancy of a child at birth is now nearly 10 years greater than in 1910.

In other words, more people live to an old age nowadays, but the extreme limits of age have been extended comparatively little.

## A Pershing Badge

An initial order for 65,000 badges for members of the American Legion who will attend the 21st annual convention in Chicago next September has just been placed, to be followed by additional orders as plans for the great event are perfected.

The design of the new badge is a most attractive one, being a medallion of military bronze, with a bust portrait of General John J. Pershing as its most prominent feature, and bearing the Legion emblem in the lower center, accompanied by oak and laurel leaves. The top bar, from which the medallion is suspended by a ribbon shows the Chicago skyline.

John Doctoroff, a widely-known Chicago artist, designed the badge after suggestions by a committee of Chicago Legionnaires. The badges will be made with a slot in the top, so that they may be worn as watch fobs if desired after the convention.

General Pershing is expected to attend the national conventional for the first time in ten years, and will be given a tremendous ovation by what is expected to be the largest gathering of Legionnaires since the organization was founded 21 years ago.

Thieves stole a 600 pound safe from the Moose building, hauled it to the city limits of Normal, Ill., and blew the bottom out of it to obtain \$450.

Judgment of \$10,000 was awarded to Samuel Wenk in Chicago who testified that he went into a health club feeling "fine" but came out after a massage with a broken vertebra.

Mr. and Mrs. J. S. Boone visited their ranch in the northeast part of the county Monday.

B. B. Fowler was in Tuesday from the Hughes Ranch, and reports that grass is not as good as it ought to be. That more rains would do good.

Quite a number of citizens have spoken to us and expressed themselves as being in favor of the City Council suspending the stock ordinance until October. The whole town is growing up in grass and weeds and they think it best to allow stock to graze in the streets and alleys.

The Rock Island corps of engineers, who have been making the permanent survey of that road's extension from Graham to Stamford, have practically completed their work.

## LONE STAR GAS SYSTEM

- ★ 4,700 MILES OF TRANSPORTATION PIPELINES
- ★ 1,000 GAS WELLS IN 46 SEPARATE GAS FIELDS
- ★ 3,000 TRAINED AND EXPERIENCED EMPLOYEES

As we reach our thirtieth birthday, we are mindful of the responsibility that goes with our job. We renew our pledge to the policy that has guided us through the years—"First, find out what is the right thing to do... then, what is the right way to do it."

We know that homes must have heat and that many depend entirely upon our service. If we should fall down on the job, there would be inconvenience, discomfort, suffering in many

homes. We realize that, even though our customers seldom think about it, they have confidence in our ability to render dependable service and rely on it being available instantly and without interruption day or night, throughout the years, regardless of the weather. We know it is the responsibility of each of us of Lone Star never to fail that trust.

**Anniversary Dates**

With expositions being held this year both in New York and in San Francisco, history reminds us that the first World's Fair held in the United States opened 86 years ago—July 14, 1853. Doubtless the attractions and exhibits of that exposition seemed as wonderful to our great-grandfathers as do the miraculous sights to today's expositions to us.

Time brings many changes with few exceptions. One thing that has not changed however, is the assuredness of insurance in protecting you against loss of property by fire, storm, or other hazards. We represent strong, reliable companies and are always ready to help you with your insurance problems. See us today.
