Medicare Enrollment Should Be Three Mos. Before Age 65

"Medicare enrollment will be a continuing process from now on," said R. R. Tuley, Jr., social security district manager for the Abilene area. The general enrollment period that ended May 31 was an all-out effort to enroll those persons who were already age 65 or older.

Persons not yet 65 will have 7 months in which to enroll for doctor bill insurance, Tuley continued. The individual's enrollment period for that part of Medicare will run from the third month before his 65th birthday month to the third month after it. Thus a person who will be 65 in October, 1966, may enroll from July 1, 1966, through January 31, 1967.

'There is no special enrollment period for the hospital insurance part," he went on, adding that a person past 65 could sign up for that even after he becomes an inpatient at a participating hospital There are no premium pay-ments involved for the hospital insurance half of Medicare.

Whether or not a person has retired or has ever worked under social security has no effect on Medicare coverage, but failure to enroll in the 3 month period before age 65 will result in a delay of from one to three months in acquiring the medi-cal or doctor bill part of Medicare coverage. A higher premium cost will apply for those who do not enroll at their first opportunity but decide to come in during a later October-December period in 1967, 1969, or other odd-numbered years. Persons nearing age 65 are urged to ask their social security office for the free booklet on Medicare, Tuley added.
