Snow which began falling Saturday night and continued through Sunday, covered the ground to a depth of 20 inches Monday morning, according to Judge P. D. Sanders, official weather observer. This is the heaviest snow ever recorded here. Thirty years ago, in 1895, a 17-inch snow is recalled by the old timers. Then in 1905, a 15-inch snow was recorded here.

Opening of Grissom's new department store is scheduled this afternoon in Abilene. The store is owned by Hardy Grissom of Haskell and Ernest Grissom of Abilene, who also operate stores at Quannah and Stamford in addition to their Haskell store. County Tax Collector Charles M.

Your 1954 Income Tax

No 1
How to File Your 1954 Return Who Must File

Every citizen or resident of the United States, whether an adult or minor, who had \$600.00 (\$1200 if 65 years of age or over) or more of gross income in 1954 must file an income tax return on Form 1040 or 1040A.

Most of your tax is withheld from your wages every day or paid on Declaration of Estimated Tax every quarter. However, the law requires you to file an annual return to determine whether you owe more or you should get a refund.

When to File

Your income tax return should be filed between January 1 and April 15, 1955, and not later than April 15, 1955. Try to avoid the last minute-rush. Those few individuals who keep books on a fiscal year basis, must file by the 15th day of the fourth month after the close of their taxable years.

How to Pay

Any balance of tax to be due in Item 13, Page 1, of your return on Form 1040 must be paid in full with your return. You may pay by cash or check or money order. Checks or money orders should be made payable to "District Director, Internal Revenue Service."

How to Sign

You have not filed a legal return unless you sign it. If you and your wife are filing a joint return, both of you must sign the return. You do not need to have your return notarized since your signature has the same legal effect as swearing to the truthfulness of your return.

Where to Get Forms and Help

As far as practical, the District Director mails forms directly to taxpayers. If you need additional forms, you can get them from your District Director's office and also at most banks and post offices. Many employers also keep forms for the convenience of employees. The address of your District Director of Internal Revenue is 2101 Pacific Avenue, Dallas, Texas.

After reading the instructions, you should be able to prepare your own return, unless you have complicated problems. If you do need help, you can get it at your District Director's office. A more detailed publication entitled "Your Federal Income Tax" may be obtained for 25 cents from the Superintendent of Documents, Government Printing Office, Washington 25, D. C.

Billy Alton Dilbeck Promoted to Grade Of Corporal

Billy Alton Dilbeck of Camp Chaffee, Ark., in a recent letter to his parents, Mr. and Mrs. J. L. Dilbeck of this city, told of his promotion to the grade of Corporal.

He entered the Army in August, 1953, and took his basic training at Camp Chaffee.

Upon completion of eight weeks of training, he was assigned to the personnel center located at Camp Chaffee and served there as company clerk until July 1954. He then attended the personnel management specialist school at Fort Benjamin Harrison, Ind., for eight weeks before returning to Camp Chaffee where he has since been assigned to the Reception Station located there.

Cpl. Dilbeck's duties now involve the interviewing, testing and records of all new inductees, and re-enlistees being processed there. Billy Alton graduated from Haskell High School in 1950 and completed two years of college at West Texas State, Canyon, before his induction into the Army.

Mr. and Mrs. W. A. Holt had as guests in their home Monday, Mr. and Mrs. F. W. Sadler of Dexter, N. M., Mrs. Harley Sadler of Abilene, and Mr. and Mrs. R. T. Taylor of Avoca.

Firemen Given Drill in Use Of Masks

Several new members of the Haskell Fire Department were instructed in the use of masks in smoke or gas-filled rooms, at the regular drill practice of the department Monday night.

Other members took part in an interesting and informative question and answer session conducted by Floyd (Satch) Lusk. Factors to be considered in "sizing up" various types of fires and hazards involved when an alarm is received were outlined. These included life and property hazards, occupancy of building involved, and exposures which might contribute to spread of a fire.

Firemen were also given a refresher quiz on department equipment, including the type of hose lay used on the three trucks, the five different types of extinguishers used, and the type of extinguisher for best results on three classes of fires.

Medical School to Dedicate New Unit In Dallas

Dedication of a \$2,850,000 Basic Science Building for Southwestern Medical School at the University of Texas in Dallas has been set for Jan. 29.

Regents of the University of Texas, state officials, Foundation dignitaries and national medical dignitaries will participate in the opening ceremonies scheduled for 2:00 p. m. at 5323 Harry Hines Blvd., according to R. R. Gilbert, chairman of the Advisory Council of Southwestern Medical Foundation.

O. E. Patterson of Haskell, member of the Advisory Council of Southwestern Medical Foundation, has urged that "everyone interested in medical progress in the Southwest attend the dedication service."

Construction of the new building was begun in 1952 with funds appropriated by the state legislature for that purpose. Construction costs exceeded the appropriation, however, and Southwestern Medical Foundation supplied the difference with an emergency grant of \$100,000.

The land on which the building is located is part of the 86-acre grant for a medical center made by Karl Hobbeltzelle, Dallas philanthropist and president of the board of Southwestern Medical Foundation.

Utah, Colorado, Arizona and New Mexico join at one point.

The world in which we live is a world of schism—sorrow and sin. Men's hearts are failing them for fear—fear of the atom—fear of aggression and fear of anarchy.

This is an age of material light and spiritual darkness, of life wealth and soul poverty; of military giants and spiritual midgets. Standing above a divided, discontent and dis-impassioned humanity is the Person of the ever-loving and ever-saving Christ—He calls you—He commands you—He commissions you—if you hear His word, heed His message and help a lost world to be saved. His Church in Haskell invites you to belong to Him. — John Barry, Minister.

Plenty of Choice On February List Plentiful Foods

Thrift-wise homemakers will find a varied choice of plentiful foods at the grocer's in February.

Eggs head the column of abundant foods on the U. S. Department of Agriculture's February foods list.

Many seafoods, such as shrimp, frozen haddock fillets, frozen halibut and canned tuna, are on the list.

Holdings of heavy turkeys remain at record highs, making them a bargain.

Dried beans, mainly pinto and large and baby limas, are in good supply.

Only fruits scored as February plentiful are oranges and grapefruit, both fresh and processed.

Lettuce, carrots, canned green beans and canned corn are more plentiful now than in several months, says USDA.

Other foods in large supply include rice, raisins, almonds, lard, vegetable fats and oils.

Your 1954 Income Tax

No. 2 Which Form Should You Use The Three Types of Returns

In an effort to fit the tax returns to the needs of the more than 30,000,000 persons who must file them, three types of returns have been provided: Form 1040A, Short-Form 1040, and Long Form 1040.

The law expects you to pay your correct tax — no more, no less. It will pay you to think for a moment which is the best form in your case. To do this, you should consider the size of your income, the source of your income, and the amount of your non-business deductions such as medical expense, contributions, interest, taxes and child care expenses.

Income Less Than \$5,000

1. The Form 1040A is the simplest return of the three. If you file this return, you do not need file this return tax. Just fill in a few blanks, answer a few simple questions, sign it, and send it in to your local District Director of Internal Revenue...

2. Form 1040 may be used either as a short form or as a long form. The short form is simpler than the long form. It differs from Form 1040A in that (a) you must find your own tax...

3. Long Form 1040 — If your non-business deductions are more than 10 per cent of your income, you will ordinarily save money by itemizing your deductions on Long Form 1040.

Quarterback Club President Thos. B. Roberson presented Haskell Indian Center Don Dendy with the "Most Conscientious Player" award at the annual banquet honoring the football squads and coaching staff Friday night.

Steel Fence Being Installed Around Jail Premises

Infestation Count Of Grain Insects Aids in Control

When does it pay to spray for small grain insects? That's a common question among farmers now since many small grain pests—greenbugs, winter grain mites and brown wheat fleas—are on the move.

Control measures against greenbugs in fall-seeded grain are warranted when 100 or more are counted per linear foot, advises Dr. F. M. Fuller, extension entomologist.

An infestation count will give the insect population. A minimum of five counts consisting of one running foot each, should be made at random diagonally across the field, Fuller says.

In spring-seeded grain an average of 25 to 50 greenbugs may warrant chemical control.

Use one-fourth to one-half pound of actual parathion in emulsion form to the acre, he recommends. If the emulsion concentrate contains two pounds actual parathion per gallon, apply at a rate of one to two points per acre in at least two gallons of water.

Application should be made when the temperatures is above 50 degrees.

Winter grain mites—These pests are difficult to detect and usually first noticed when grain takes on a silvery appearance. The entomologist says infested plants are stunted but it's doubtful.

Knowing what soil needs in the way of plant food and organic matter is an important part of any soil-building program, and this is the reason soil testing is important. Now is the time to take and submit samples to the testing lab from fields on which next year's crops will be produced. Do it early and avoid delays later.

To Give Awards to 212 Employees

Twenty employees in the Haskell area of the East Texas Division of Service Pipe Line Company are among the 212 Texas men and women who have been employees of the company for ten years or more who will be given pins in recognition and appreciation of their continuous service with the company, F. M. Willenburg, East Texas division manager announced this week.

They are among 1472 employees in the company's 12-state operating area who this month are receiving service-award pins. Service Pipe Line has 2400 employees.

The pins include the Service Pipe Line Company emblem as part of the design. Pins for employees completing 10 years service will be set with a ruby; those for 20 years service with a sapphire, and for 30 years, a diamond. Service Pipe Line employees average 14 1-2 years of continuous service.

Another feature of the service award program, employees who have 30 years continuous service during the year in which they retire, will receive a watch. Wrist watches have been selected for women employees, and a choice of wrist or pocket watches for men.

"Making these service awards follows the company's policy of acknowledging the employee's part in the company's achievements," Willenburg said. "As a group of people working together we recognize each other's place on the team and this is a token of this recognition."

J. P. Office Made Convenient for Law Violators

Although there has been no demand for it, law violators can be given speedy service as the result of a change made last week in courthouse office locations.

The office of Justice of the Peace Eal Treadwell, formerly located on the second floor adjacent to the county judge's office has been moved to the sheriff's office on the first floor. The J. P. will occupy the small anteroom formerly used as a private conference room for the sheriff's department.

As a result of the two offices being located together, violators taken in custody by the sheriff's department can be quickly accommodated if they desire immediate arraignment before a court judge.

California Creek Soil Conservation News

Conservation pays; so why not have a conservative plan on every farm?

The answer depends on farm owner and operator. However, everyone has a stake in the fight to stop erosion. The businessman has a two fold interest as shown by the following examples:

There are approximately 100,000 acres of cultivated land in the Anson trade territory. One farmer by using conservations measures, increased his net profit by approximately \$9.00 per acre on one tract of cotton, over an adjoining tract. On a similar block he extended this increase to \$85 per acre more.

By conservation another farmer netted approximately \$40.00 per acre more on 40 acres of cotton, than on an adjoining 40 acre tract.

Maize following conservation treatment, produced in pounds per acre; exactly what it took 3 untreated acres to produce.

Shouldn't the businessman encourage his farmer friends to make a conservation plan with his district? Remember there are 100,000 acres cultivated land. Divide the \$40.00 per acre increase by 10 to be conservative. This still results in \$400,000 increased buying power.

Not one of the benefit examples happened by accident. They were planned conservation applied to the land. The way the land goes; so go the people.

Area Youngsters Have Opportunity To Appear on TV

Talented youngsters of the Haskell area are being offered the opportunity to appear on television in the new "Talent Time, U. S. A." show presented on KWFT-Television, Channel 6, in Wichita Falls.

This talent show is being conducted through House of Music, 721 10th, Wichita Falls.

"In our ever constant search for new talent," said Kenyon Brown, president of KWFT-Television, "we are urging all talented youngsters of our coverage area to participate in this new program."

Persons interested should get in touch with the music firm for application forms, Brown added. Dr. Max Kreutz, of House of Music, selects the talent to appear on the weekly show.

"Talent Time, U. S. A." is presented each Thursday at 5:30 p. m. with two youngsters of the area appearing on each program.

Former Haskell Student Earns Music Award

A former Haskell high school student and member of the HHS Indian Band, John Matthews, recently received recognition for his outstanding talent in Tatum, N. M., high school, where he is now a student.

Young Matthews made the all-state chorus and orchestra as a member of the Tatum High School Band in competition with other school bands in New Mexico. As a result of his selection for the all-state honors, he will be awarded a music scholarship.

Young Matthews was reared here in the home of his aunt and uncle, Mr. and Mrs. C. S. Gay. He has two brothers, Sam Matthews who is a student in New Mexico A&M College; and James Matthews, who is attending school here.

DOES YOUR HOME HAVE WARM FLOORS?

COMFORT DEMANDS IT. Your body should be evenly warmed from head to toe. Children should be able to play on the floor without added danger of catching colds. Drafts should never form!

Ever visit in a "toe-tucker's" home? These people can't enjoy true comfort heating. Cold floors keep their feet chilly. (Chances are, their cat sleeps up on the sofa.)

Automatic flue-vented perimeter gas heating systems actually put heat in the floors... maintain only a slight difference in room air temperature from floor to ceiling! You enjoy an environment comparable to a balmy, 72-degree summer morning!

IS YOUR HEATING SYSTEM FLUE-VENTED?

Flue-venting is standard with modern heating systems. Air from the combustion chamber is carried through a vent to out-of-doors. Indoor air stays fresh, more healthful, more pleasant. Window sweating is reduced. Be sure your system is flue-vented.

Legislative Budget Board members have presented their recommended general fund appropriations for the next two years.

University of Texas appropriations were set at \$15,358,946. The amount is \$5.7 million less than the University asked. It is \$2 million more than was appropriated in 1953-54.

Other recommendations called for \$7,515,000 boost over present expenditures for the state hospital board; a \$345,000 increase for Youth Development schools; \$2.2 million more for State Health Department; and \$440,000 more for the Texas Prison System.

Senate chairmanships announced by Lt. Gov. Ben Ramsey include Sen. Crawford Martin of Hillsboro for Finance; Sen. Dorsey Hardeman of San Angelo for State Affairs; Sen. Johnnie B. Rogers of Austin for Insurance; and Sen. George Parkhouse of Dallas for Labor.

Smith Makes History Rep. Max Smith of San Marcos made history when House Speaker Jim Lindsey appointed him chairman of the House Appropriations Committee.

Rep. Smith is the second man in Texas history to be twice named head of the all-important committee and the only man to serve consecutive terms as a chairman.

Rep. Travis Henderson from Lamar County served as Finance Committee chairman (now called the Appropriations Committee) in 1893 and again in 1899.

State Jobs More than 60 appointments to state positions by Gov. Shivers, will soon be due.

Included is the naming of a new secretary of state, a highway commission member, two members to the State Board of Public Welfare, one member of the State Board of Control, three new University of Texas regents and 3 A&M College directors.

Shivers is expected to reappoint Major Gen. K. L. Berry as adjutant general and Mark Wentz as State Fire Insurance Commissioner.

Insurance Bills to give Texas insurance company policy holders and investors better protection are pouring into the House and Senate.

Primarily, they are asking for higher capital requirements for new companies, stricter examinations and licensing laws, and placement of insurance stock

sales under state regulations. Labor Control Bills Three labor control bills, all by Sen. Parkhouse of Dallas, have been introduced in the senate. One labor bill has been sponsored.

Parkhouse would: 1. Stop unemployment compensation payments to persons on strike or idle from a strike by a union that they belong to.

2. Ban picketing of an establishment if the union does not represent a majority of the firm's employees.

3. Assess fines from \$25 to \$500 and a 6-months jail sentence for violation of the law.

The House bill would set up state supervised elections to determine whether employees want union representation. It would also create a state Industrial Commission as a dispute mediator.

Whooping Cranes A permanent Texas winter home for rare whooping cranes would be provided by a House bill.

Sponsored by Rep. Chas. L. Sandahl, Jr. of Austin, the bill would provide islands and marshland areas on the Gulf Coast for the Audubon Society, which looks after the birds.

Land Board The Veterans Land Board has tightened up an approval of state loans for veterans wanting land.

Applications for loans showing relationship between the buyer and seller are being held up. Appraisers have been asked to submit full information on all applications submitted to the board.

Meanwhile, a Travis County grand jury investigation of land sales started. District Attorney Les Procter announced a list of 22 witnesses called for the investigation.

CHURCH OF CHRIST (Over 1900 Years Old) Fred Custis, Minister Bible School 9:45. Classes for all ages.

Worship 10:45. Sermon subject, "Footprints of Jesus." Evening worship 8:30. Sermon subject, "Coats of Skins."

Come to the Church of Christ, the one you read about in your New Testament and worship with the people who "Speak where the Bible speaks and remain silent where the Bible is silent." Christ prayed for a united following but that unity cannot be reached by compromise. Real unity that is pleasing to the Lord can be achieved by a return to the New Testament, by letting it be the sole source of authority in doctrine and worship. You are always welcome to worship with the people who add nothing to the doctrine of Christ or the worship of His Church.—Fred Custis.

4. The nation's consumers are showing no signs of let-up on their beef eating spree and apparently will continue to eat record amounts at current prices, a stabilizing factor for the months ahead.

5. Nearby needs for cattle and calves to graze grain fields which in many areas of the grain belt are coming along fast after recent moisture and open weather.

Stocker and feeders were strong to 50c higher Monday and some spots up more, the kind and quality considered. Lightweight calves topped at \$22 and numerous loads and smaller lots of medium to choice stocker calves and yearling cashed at \$16 to \$21.

Replacement cows also had strong demand and prices of \$8 to \$12 were seen, and light cows of choice quality were quotable above that figure.

Slaughter steers were fully steady to strong. Cows ranged at fully steady to strong prices with shippers and independent packers out-distancing the majors for the big end of the supply. Bulls held fully steady.

Slaughter calves and yearlings and heifers were slow and weak to 50c lower. Numerous shorted lots of yearlings and heifers again appeared in the days run.

Choice fed steers topped at \$24 but were quotable to \$25 and above. Plainer offerings sold around \$12 to \$18. Fat cows drew \$10 to \$13, and canners and cutters sold mostly from \$7 to \$10, a few shells below \$7.

Good and fat calves cleared mostly at \$16 to \$19, a few to \$20. Lower grades sold around \$10 to \$15.

Range feed in Texas hit a 20-year low — 61 per cent of normal Jan. 1 — the U. S. Department of Agriculture said at Austin.
