Farmers and Ranchers Make Field Tour Over County

A field trip for farmers and ranchers of Knox and Haskell Counties was conducted Friday, June 13, to show improved agricultural practices to farmers and ranchers of the two counties. The trip was sponsored by the Wichita-Brazos Soil Conservation District, the PMA and the Knox County Agent, with about twenty making the tour of 14 stops.

Included on the trip were fertilizer tests conducted by Russell Boyd and Sipe Griffith of Knox City. These plots showed the comparison of sudan with 100 pounds of 16-20-0 per acre to sudan with no fertilizer. Other plots showed cotton with 100 pounds of 16-20-0 per acre to cotton with no fertilizer. This demonstration was witnessed on the Ferris Glenn farm near Knox City. Another fertilizer demonstration was presented at the Jesse Gilpin home in Knox City, where castor beans were fertilized with 200 and 100 pounds of 16-20-0 per acre, and others were not fertilized.

A plot of 15 acres of sand love grass was inspected on the Geo. Stubbs farm near Knox City, and an alfalfa field was checked on the Arnold Wilde farm at Rhineland.

The C. J. Reese farm at Knox City was visited, and the demonstration included the stripping of guar and cotton, with one row of guar planted between two rows of cotton. A similar test was seen at the Earl Cox farm east of Benjamin, where two rows of castor beans were planted between four rows of cotton.

The E. G. Parkhill irrigated pasture was visited, and the group saw the combination of perennial rye, Kentucky 31 fescue, orchard grass, dallis grass and alfalfa. This plot consisted of three acres. The J. B. Renau, Jr. farm near Munday was also visited and blue panic and sudan grass plots were checked. The Renau farm is also irrigated, and has been seeded to grass the past year.

Stops on the League Ranch near Benjamin included mesquite which was sprayed in 1951 and 1952. The 1952 spraying has given almost 100 per cent top kill, and the 1951 spraying has given about 50 per cent kill at present, with a much better range resulting. Also visited on the League Ranch were old fields which have been seeded to KR blue-stem and blue panic grass, both of which look very successful. Another stop was at a pasture on the League Ranch, where the land was chiseled and seeded with KR. A good stand was obtained and a definite improvement in the grazing qualities is noted.

Plans are being made for another tour to be made later in the year to show results of fertilized plots.

Teachers to Seek Salary Increase

AUSTIN, June 7. — A minimum beginning salary of \$3,000 instead of the present \$2,403 for public school teachers will be asked of the next legislature by the Texas State Teachers Association.

"Texas annually must have nearly 5,000 new teachers either as replacements or to take care of the rapidly increasing enrollment," Charles H. Tennyson, executive secretary of the association, said in making the announcement here today.

"Despite an increase in the pay for teachers granted by the voters and legislature three years ago, the profession is not attractive to young people because the pay is less than the national average for all workers," Tennyson pointed out.

The average salary for all Texas professional public school personnel is \$3,185, but that of the average classroom teacher is only \$2,980. The first-year teacher who holds only a B. S. degree gets \$2,403.

Since 1939, Tennyson said, the average employed person has had an increase of 167 percent in his pay, while the Texas teachers have had a 124 percent hike. If teachers' salaries had increased as much as others, the present average would be up by \$615. That is approximately what the TSTA will ask for as a minimum salary increase.

Gasoline Plant Being Moved In

Charlie Schwartz of Longview began this week moving in equipment for a gasoline plant which will be located on the Ed Lewis tract 11 miles west of town.

The plant, which is being moved here from Oklahoma, is scheduled to be in operation by December 31. It will process the gas from oil wells in the Katz Field into casinghead gas, butane and propane.

Plans are for the beginners to meet every Monday and Wednesday morning and the first band, or those in last year's band, to meet every Tuesday and Thursday morning.

Present for Monday morning's meeting will be a representative of a Wichita Falls music company. He will have a number of instruments displayed, and parents may purchase them from him or elsewhere. Mr. Barnett said the instruments can be purchased on terms, and can also be rented.

EUBANK WITHDRAWS FROM RACE FOR COMMISSIONER

County Judge J. B. Eubank, Jr., announced Tuesday that he is withdrawing his candidacy for the office of commissioner of precinct No. 3, which includes the Gilliland and Truscott communities.

Earlier this spring, J. G. Adcock, who had announced as a candidate for the office, withdrew from the race, and Judge Eubank's withdrawal leaves the incumbent, C. A. Bullion, unopposed.

Eubank said he will finish his term as county judge, which will end January 1, and will then enter private business.

CITY 'FOGGED' FOR INSECTS TUESDAY NIGHT

The county "fogging" machine gave Knox City streets and alleys a good dose of insecticide Tuesday night, but according to City Secretary Loyce Teague, the spraying is not expected to destroy many of the flies that have plagued local residents for the past several days.

Teague, who attended a meeting of the Lone Star Water & Sewer Assn. in Aspermont Tuesday night, reported that a representative of the State Department of Health, present at the meeting, discounted the effectiveness of spraying for flies at night. He advised spraying for mosquitoes at night and for flies in daytime, but added that even daytime spraying will do little good in controlling flies. Instead he advised a fly control program that would clean up the breeding places, and suggested that individual property owners begin immediately to clean up their own premises.

Knox Citizens Are Hot Under Collar

Knox City suffered, along with the rest of West Texas, under a beaming sun and hot winds the early part of this week.

According to Weather Observer Horace Finley, high Sunday was 105 degrees. Since Finley left on vacation Monday the Herald has no official reading for the balance of the week, but it is believed the temperature Monday and Tuesday was well over the hundred mark, with Wednesday possibly a bit cooler.

With the hot, dry wind removing moisture from the ground, local farmers say cotton will begin to suffer if relief does not come soon.

The heat wave boosted the use of water and resulted in low pressure throughout town. City officials reported that the wells were holding up good, but the inadequate storage facilities have been overtaxed.

The water tower is being kept full of water in case of fire, and the water being used is coming directly from the pumps, hence the low pressure. The new well is expected to be put into operation within the next few days, and is expected to help a great deal, but city officials say it would be of greater benefit if users would voluntarily conserve water by such means as watering their lawns and gardens in the early morning instead of in the afternoon, and by installing re-circulating pumps on air conditioners.

O'BRIEN FARMER PRODUCES CERTIFIED WHEAT

County Agent F. W. Martin of Haskell county reported last week that Willis Hines, who farms the Ed Hester place near O'Brien, is believed to be the first farmer in Haskell county to produce certified wheat.

Hines harvested a field of 22 acres on which the yield averaged 55 bushels per acre, Martin said.

The high yield was produced under dry land farming conditions despite the winter drought.

Ed Hester, owner of the farm operated by Hines, also has a field of 75 acres in wheat which he plans to have inspected for classification as certified, Martin reported.

He was born in Baylor County on March 15, 1885, and moved to the "Knox Prairie" in 1886 with his parents, the late Mr. and Mrs. T. P. Reeder, who were among this area's first settlers. His parents donated land for the first school here, known as the Reeder School. The deceased was buried on the old school site where the Knox City Cemetery is now located.

New Traffic Signals To Be Installed

The new signals have a yellow warning light, instead of changing directly from red to green as do the present lights.

Supporting poles will be extended so the lights will give trucks ample clearance, city officials said.

STREAMS in Desert Places
By Ozelle Stephens

"For our light afflictions, which is but for a moment, worketh for us a far more exceeding and eternal weight of glory." (II Cor. 4:17).

When you are tempted to be discouraged or complain think on these words. Think of Paul's life and the many things he faithfully and patiently endured. It will cause your heart to be filled with a deep desire to patiently endure the cross you are to bear. You will have a greater desire to stand true at any cost. Christ suffered untold anguish for us but there was not a murmur nor a complaint. We know there is coming a blessed day of deliverance, for we read, "Many are the afflictions of the righteous, but the Lord delivereth him out of them all (Ps. 34:19). If you are willing to suffer with Him then you shall soon reign with Him.

We are told to count it all joy when we fall into temptations. Where there are no battles there are no victories won. Most of us have not touched the brink of real suffering. There is a great difference between suffering for Christ's sake and suffering for our own faults. God help us to launch out into the deep that we might be counted worthy to suffer for his sake. We are as helpless as sheep in the midst of howling wolves. The helpless sheep offer no resistance. God is our protection as we depend on Him. He will be with us in every hard place.

Tarry before Him, until you get a fresh vision of what He suffered for you, and your trials which bitter to the flesh will be sweet to the soul. Be as clay in the potter's hands that he might make you according to his pattern and make of you a vessel unto honor, sanctified and meet for the Master's use. If you murmur you hinder God from working. He wants you to trust in the darkest places, lifting up Christ. He is able and will keep in the fiercest battles.
