REASON No. 3-

WHY ICE IS ALWAYS The Perfect Food Preservative

NO INTERCHANGE OF FOOD ODORS WHEN YOU USE ICE

Because there is a constant circulation of humidified air in the modern ice refrigerator, there is no interchange of food odors. There is no danger that everything in the refrigerator begins to smell like the sauerkraut that was in there also. You don't have to worry about tightly sealed dishes for every item. See us for more information.

ARLEDGE ICE COMPANY

Summertime BRINGS UP THE QUESTION OF Kitchen Comfort

1939 GAS RANGES ARE COOLER

Because of heavy oven insulation which keeps heat in the oven out of your kitchen the 1939 gas range is cooler-cooking. Accurate oven heat control, too, helps keep kitchen cooler because it eliminates opening oven door to watch progress of cooking. Then there's the new separate broiler compartment which does away with using oven burner for broiling. And most important are the new low-heat simmer burners which contribute much toward kitchen comfort. With these burners food is kept boiling with minimum heat, causing little vapor and steam to rise!

Don't go through another summer in an uncomfortable kitchen. Trade your old range for one of these cool-cooking modern gas ranges. Your meals will be easier prepared in a cooler kitchen at less cost.

J. M. EDWARDS Self Service Grocery KNOX CITY, TEXAS

REDDY KILOWATT believes Terraces Alone Do More Good on Farm and Ranch Than Soil and Water \$28,000,000 Marshall Ford Dam Conservation WITHOUT expenditure of tax money and through the voluntary work of farmers, ranchmen, and county agents, over 50,000 linear miles of terraces-twice the distance around the world-were built in this West Texas region last year. They alone impounded 554,000 acre-feet of water, the same amount as that held by Marshall Ford Dam, which will cost the taxpayers \$28,000,000. Terrares, along with a balanced program of contouring, strip-cropping, and earthen dams, stored moisture in the soil for crops, at the same time aiding flood control. Altogether they impounded over 1,000,000 acre-feet of water ... all without tax expense. Inasmuch as Marshall Ford and similar dams earned the reputation for being a "flood menace" during the same period, a lesson thereby is offered that the only effective curb on devastating floods must begin at the point where the rains fall. Believing that industrial and agricultural dething that benefits agriculture in the comr velopment go hand in hand, this company has ties we serve also is beneficial to every other type of business and industry. It is our hope that the land may be passed on to the next genera-tion in actually better condition than it is in this. lent its efforts to promotion of soil and water conservation and the successful culmination of
