Other than the appointing of committees, little business was discussed Tuesday.

We regret to learn of the misfortune of Reverend and Mrs. Mann. Upon returning home Sunday after the morning services at church they found seventy-five quarts of their fruit and vegetables, which they had canned broken and spread over the kitchen floor. ### HOME DEMONSTRATION CLUBS TO MEET IN BENJAMIN SATURDAY

The Home Demonstration Clubs of the county will hold their annual exhibit at Benjamin, in the Dr. Deavers building, on Saturday, September the 25th.

## Joins Red and White Chain

The Red and White plan is a union of independent manufacturers, whole salers, and retailers banded together in a co-operative way to market grocery products to the consumer. The plan is credited by economists as the most economical method of food distribution ever yet devised. It furthermore insures the permanence of the independent merchant. The plan is substantially a merger of purchasing power without and mirror of captial structure.

The Davis Grocery of Knox City has joined the Red and White Chain which fact is evident in the appearance of not only the sign over the door but also the color of the entire front of the Red and White, the arrangement of the store and the advertisement in this issue of the Herald. This advertisement covers an entire page and you will find it worth your time to read it all.

The Red and White store is a cooperative organization of packers, and manufactures, independent retailers and wholesale grocers which now extends from coast to coast in America. Full cooperation exists between the manufacturers, wholesaler, and retailer. Each one retains sole control and ownership of his own business.

In this cooperative buying, which membership into the Red and White chain gives a merchant, the Davis Grocery, now the Red and White Grocery, hopes to better serve its customers and at lower prices for them.

A \$20,000 school building was recently completed in the Graham district, seven miles south of Post, Texas.

A Lamb County dairyman, under test, produced butterfat for seven cents per pound during July by using sudan grass pasture and a concentrated ration on a one to five basis.

One million fish are to be distributed from the San Angelo fish hatchery to the lakes and rivers of West Texas.

### CHILDREN CRY FOR IT—

CHILDREN hate to take medicine as a rule, but every child loves the taste of Castoria. This pure vegetable preparation is just as good as it tastes; just as bland and just as harmless as the recipe reads.

When Baby's cry warns of colic, a few drops of Castoria have him soothed, sleep again in a jiffy. Nothing is more valuable in diarrhea. When coated tongue or bad breath tell of constipation, invoke its gentle aid to cleanse and regulate a child's bowels. In colds or children's diseases, you should use it to keep the system from clogging.

Castoria is sold in every drug store; the genuine always bears Chas. H. Fletcher's signature.

### GOOD CITIZENS

What constitutes a good citizen here in Knox City or elsewhere? Here are a few qualifications:

1. Faithful work on his job, helping the industry he serves to meet the needs of the people.
2. Care of his home place, so that spot of earth he controls helps make his home town more pleasing.
3. Intelligent interest in community affairs, so that his vote and voice count for good government and progress.
4. Membership and activity in a few good local organizations, so that he does something more than answer "Here" when the community roll is called.
5. A disposition to buy his supplies at home, so that his money contributes to home town prosperity.
6. A friendly spirit toward neighbors and newcomers, so that he helps people feel at home.

Folks of that type never complain for lack of friends. They gain support in their aims from unexpected sources.

The people who make their money in a town, but spent it somewhere else, do not seem to realize where their bread and butter comes from.

The poet who wrote about the flower that is born to blush unseen, may have been inspired by some store that failed to advertise.

The man who keeps a disorderly looking place, is not doing much to convince his townspeople that he could carry on any line of work in a systematic way.

This country needs more wheels turning in the factories and less of them in people's heads.

The politicians, instead of keeping their ears to the ground, should keep their nose in the air to smell out corruption.

The American people might find more money for aged widows, if there wasn't so much spent for alimony for blooming wives.

It is claimed that people are losing their interest in the principles of freedom and liberty, but anyway all the jail inmates believe in these grand ideas.

If we could sell more overalls in Knox City we shouldn't need to provide so many jail suits.

### SEPTEMBER'S BIG EVENT

What is September's biggest news story? Is it the most sensational crime, calamity, or act of statesmen or governments?

The most significant event in America is not probably any of these, but rather the nearly simultaneous opening of the schoolhouse doors for fall term. It is such familiar sight that the newspapers scarcely mention it. But there is an indescribable grandeur in this spectacle, of 25,000,000 children marching up to those open doors of opportunity. It would have been called a miracle 100 years ago, when education was limited to a few.

Our country says to the humblest most obscure child, to come in, without money and without price, and learn how to live and work in our free land. Schooling in many localities is meager and limited. Many communities can not afford well trained teachers. But there are few children who can not at least acquire the Three R's if they want to. Once they learn to read and write, the whole world of books and newspapers comes within their reach. Many of our leading men, and at least one of our greatest presidents, had no more schooling than that.

What a tremendous force these millions of young life constitute, as they march up to the schoolhouse door, dressed in the flying colors of their new school clothes, wearing bright faces and carrying high hopes into this battle against darkness and ignorance! These little soldiers of enlightenment must be given the best we can afford in Knox City of equipment and leadership.

And we must teach them something more than book learning. They need also to learn how to live so that our homes and labors shall be safe from crime and fraud, so that they can effectively carry on the democratic government which will soon be turned over to their eager young hands.

Little Jimmie Lou, daughter of Mr. and Mrs. C. Bohannon, is reported ill this week.

Mrs. Russel Boyd has as her guest this week Miss Carlye Wallace of Canton.

Mrs. Mary Chowning of Truscott spent Tuesday here with her mother, Mrs. Stoker.

Burke Cartwright of Terrell who planted only 100 out of 700 acres in cotton this year and the rest in corn, oats and hogari, is selling his hogari by turning 120 head of three and four old steers into the field and supplementing the grazing with one half pound of cake per day. He expects to feed more grain later to give a better finish.

Barnyard manure more than doubled the yield of hogari this year for Harry Sommers in a demonstration on a sloping field of sandy loam on his farm near Runge, Karnes county. The fertilized land made 2249 pounds of heads per acre and unfertilized land of the same type 1089 pounds.

"Why  
My Next Car  
will be  
A FORD"

WHEN you buy a Ford there are two things you never have to worry about. One is reliability. The other is long life. Here's an interesting letter from a Ford owner in North Carolina:

"My Ford was purchased May 8, 1928, and has been run 121,767 miles. It has never stopped on the road for repairs of any kind whatsoever except punctures.

"The brakes were relined at 101,000 miles. My gas mileage averaged 21 miles to the gallon, and on tires, 19,000 miles per tire. I travel over all kinds of road conditions—mountainous and flat.

"I consider this a wonderful record and I assure you my next car will also be a Ford."

This is just one of many tributes to the reliability and long life of the Ford. A Ford owner in Iowa tells of driving his Ford 73,000 miles in a single year. Another writes of 120,000 miles of good service.

Think ahead when you are considering the purchase of an automobile and consider what it will be like after thousands of miles of driving. Will you still be satisfied? Will you still say "it's a great car"?

If it's a Ford, you know everything will be O. K. It will be taking you there and back in good style, just as it has always done. And you will have saved many important, worthwhile dollars in cost of operation and up-keep and low yearly depreciation.

make it mean  
what it  
Says

It says "hot" . . . but is it? If the hot water faucet is backed by an automatic gas water heater—it certainly is hot! Piping hot!

It means hot water wherever you want it . . . instantly . . . for baths, dishwashing, housecleaning, laundering. (For the kiddies' clothes. For those odd stockings. For those "undies"). And no waiting for the water to get hot either! An automatic gas water heater makes your faucets tell the truth. It's easy to install—and reasonable.

Hot water always on tap . . . with an automatic gas water heater. Let us tell you about it.

FOR THE BEST ANSWERS EXPLAINING  
**MYSTERY of the "HIDDEN QUART"**  
AND TELLING HOW THIS QUART BENEFITS MOTORISTS

**Fact No. 1—**Thousands of motorists and service station men have observed that after a car has been given its first fill of Conoco Germ Processed Motor Oil and it drives 200 to 350 miles, a look at the crankcase gauge shows that about one quart of oil is apparently missing . . . but

**Fact No. 2—**These same people have noticed that on the second and later fillings with Conoco Germ Processed Motor Oil, scarcely a drop of oil will disappear during the first 350 miles, and practically none at 500 and up to 1,000 miles!

The above facts have been checked by actual tests with cars that use six quarts of oil for the crankcase, cars in good mechanical condition and driven at ordinary rates of speed. These facts will also prove true for your car, in proportion to the amount of oil your crankcase usually holds, your car's mechanical condition and the speeds at which you drive.

What becomes of the "hidden quart"? The answer is easy if you study the Facts given above and keep in mind the things Oil can do. The explanation of the whereabouts of the "hidden quart" is simple—no technical knowledge of motors or oil is necessary.

Remember—The "hidden quart" of Germ Processed Oil does not escape through leakage . . . does not burn up, wear out or evaporate. It is "present but unaccounted for." Fact No. 2, given above, proves all this.

After you've found where the "hidden

quart" goes, you can easily see the special benefits it gives a motorist—advantages that no other oil can give.

Ask at any Conoco Station or Conoco Dealer for the Blank which contains information about Conoco Germ Processed Motor Oil that may help you win. Conoco Station and Dealer employees will gladly answer your questions. Remember, you do not have to buy anything to enter this contest.
