Tax Man Sam Sez

Every year about one-third of the taxpayers in North Texas wait until the April 15 deadline to file their income tax return, Contrary to what many people believe a large part of these taxpayers don't owe money. They have a refund due them. Many of the taxpayers wait until the last minute to do what they consider an unpleasant task. If you haven't got your 1970 tax return ready you had better check your calendar.

Effect Of Proposed Farm Truck Driver Regulations Told By Knox County FB

Farm Bureau, to let the federal government know how proposed farm truck driver regulations would affect their operations. Letters should be addressed to John A. Volpe, Secretary, U. S. Dept. of Transportation, Wash-

ington, D. C., 20515. Proposed U. S. Dept. of Transportation regulations pertaining to farm truck driver qualifications will become effective on July 1 unless farmers and ranchers can convince the government that they should not be put into effect. The regulations were scheduled for last January 1, but were postponed to permit Farm Bureau and other organizations to study the regulations and file statements.

The regulations would affect drivers of all farm trucks including pickup trucks. Although the new regulations would be applicable to interstate commerce, recent court decisions indicate that the interstate commerce clause applies to anything and everything which might at some time enter interstate commerce.

Proposed regulations would include the following requirements for drivers of farm

(1) Be at least 21 years of

(2) Carry a certificate, executed by a physician during the preceding 24 months, evidencing fitness to drive a truck. (3) Pass a road test in truck operation.

(4) Take and pass an examination on the federal Motor Vehicle Safety Regulations.

(5) If driver is employee of farmer, he must supply the farmer with evidence of compliance with the four preceding requirements, plus an application for employment which shall disclose traffic violations and disposition thereof, plus an annual supplementary statement relating to traffic violations.

(6) A farmer who employs a driver would be required to 'verify" the driver's driving record - and to maintain for each driver a file containing items 1 to 5 above, plus a record of the employer's verification of the employee's driving

Letters to Secretary Volpe should include the farmer's personal appraisal of how his farm or ranch operation would be affected if the regulations

are adopted. The local farm leader urged each farmer in the farm hauling. county to request that present exempitons for farm truck date for six months more. drivers be retained.

Now there is one basic pre-emergent herbicide for both corn and soybeans . . . Lasso. One application controls most grasses and broadleaf weeds. Lasso, a selective herbicide, gets the job done with or without incorporation, without crop damage, without carry-over. Wet or hardly moist, Lasso cleans up corn and soybean fields

in soil types from sand to clay and does it conveniently. CFS recommends Lasso in liquid or granular form. Also, liquid Lasso can be used in label-approved

combinations with other herbicides. Lasso . . . takes the gamble out of weed control. Order Lasso today!

Streams In Desert Places BY OZELLE STEPHENS

"Jesus saith unto them, 'peace be unto you", John

The disciples had expertenced a trying week. The One whom they had trusted to be their leader and Master had been killed and buried. He had 4-22-lie left the tomb but they did not believe He had been killed and belive He had been resurrected by God's power, Their hearts were heavy and full of disbelief and fear. They did not know what to do.

Sometimes we find ourselves in such a situation, I dare say if you have a normal week, you have been upset, disturbed, depressed and have wondered what to do, Walt before the Lord, listen, and you can hear Him say "peace be unto you" For the resurrection brought this peace to you, Just believe in Him and see how wonderful

As the school term nears the end, so are the cat labe for the Advanced Biology students. The students had a lab over the respiratory system of the

cat this Wednesday. Studying the lungs, they found the thoracic cavity to be separated into three parts. First the pericardial cavity, into which the heart projects, the right pleural cavity, into which the right lung projects; and the left pleural cavity, into which the left lung projects,

Other parts they observed were the plears which is the lining of the cavity and the lung. The parietal pleura lines the cavity and the visceral pleura covers the lung. The left lung has three lobes and the right lung has four lobes.

The alveolo are small air sucs within the lung. The lung is attached along its dorsal surface by the pulmonary ligment, Between the two lungs the visceral plurae are in contact forming the mediastinal septum. The mediostical is the space between the two layers of the mediastinal septum.

The parts of the larnyx and traches observed were the bronchi, bronchioles, glottis, thyroid cartilage, arytenoid cartilages, cricold cartilage, and false vocal cords,
