Telephone Company Expansion Project Almost Complete

The telephone system will be "cut in" on new equipment this week, according to F. A. Robinette, district manager of Southwestern Associated Telephone Co.

When all telephones have been switched over to the new equipment, the old equipment will be moved and other new equipment installed—enough to take care of Knox City's needs for a long time, Robinette said.

On the new equipment, 30 conversations can take place at the same time, compared to 16 on the old. Another new feature is that there will be a ring back on long distance calls.

There will be six circuits to Haskell, compared to five on the old equipment, and by June 15 the company will add three more.

The new equipment is a type that can be added to anytime it is deemed necessary.

Mr. Robinette added that construction crews and materials are in town to take care of all applications for new phones, and urged everyone wanting a phone to call the chief operator at Haskell immediately. Also anyone who has previously applied for a phone was asked to call Haskell and verify the order.

All new telephones should be installed and other work completed in four or five weeks, Robinette said. A supplementary directory will be printed for Knox City when the installations are complete, he added.

Plans are for the association, composed of Baylor, Knox and Haskell counties, to meet once each month for a program on some phase of agriculture.

It is hoped that outstanding speakers can be secured for each meeting. At a meeting recently, W. L. Broadhurst, Dist. Geologist, U. S. Geological Survey, Austin, was the speaker and gave an interesting discussion of the irrigation potentialities of this area.

Summer camps also were discussed, and a check on projects was made. Projects include beef cattle, dairy animals, sheep, horses, rabbits, chickens, turkeys, field crops, gardens, orchards, safety, farm electricity,

This is the entrance to the camp erected by Knox City Scout Troop 161 for the District Camporee held at Lake Kemp recently. The troop received many compliments on the neat-

ness and originality of the camp. The gateway, with its "161", was fashioned from boughs cut near the campsite, as were several tables and benches in the camp.

POLIO FOUNDATION TO DISTRIBUTE POLIO PLEDGE

AUSTIN. — The march into Texas homes of millions of polio "minute men", the Polio Pledge of 1952, will get underway this week with initial distribution scheduled through the state's 1,603,000 school children.

This widely read publication replaces the Polio Pointers of 1951, and is prepared by the National Foundation for Infantile Paralysis to combat fear of polio and to acquaint the public with the services of the National Foundation and its county chapters.

Under the leadership of Mrs. R. O. Pearson of Abilene, state advisor on women's activities, and local county chairmen of the March of Dimes organization, all avenues of distribution will be used in reaching every Texas home.

The brief card outlines the important polio symptoms and basic precautions that are recommended by medical and health authorities.

In simple language, the pledge gives such basic health advice as teaching children to scrub their hands before putting food in their mouths, to see

that they do not use other people's towels, dirty drinking cups and tableware.

The card recommends for signs of illness: fever, sore throat, stomach, tenderness of the neck, and advises calling a doctor once.

"Four consecutive epidemics underscore the danger of looking ahead to epidemics which must be prevented," Mrs. Pearson declared.

"The Texas picture is bleak with nearly 100,000 cases during the period in 1951. With polio infecting more people of all ages in more communities, the need to keep the nation alert, aware and unafraid is more compelling than ever before."

U.S. Mail Train—1952 Version

With Uncle Sam using motor transport for mail hauling up to distances of 500 miles or more, an entirely new type of rolling U.S. Post Office equipment as shown here is coming into use.

Recently the Salt Lake-Kanab Freight Line which has a large fleet of Fruehauf trailers, has been given a mail contract from Salt Lake City to Kanab, Utah, via Richfield and return, of a total of 662 miles per day.

This line with connecting carriers serves 70 post offices, 6 counties in Utah reaching a population of 25,000. The mail goes through 365 days a year carrying approximately 15,000 lbs. per day. This train consists of a mail car mounted on a tractor unit with the regular stainless steel Fruehauf semi-trailer mounted behind.

Every night at midnight it leaves Salt Lake City, regardless of weather, and is now giving the people in that section of Utah the best service they ever had. The new method eliminates two extra handlings and saves some three hours in delivering the mail.

Mobilgas Economy Run

New Ford Mileage Maker SIX Thriftiest in its Field

Again this year... as in the past two years... Ford was first in gas economy over all other cars in its price class in the Mobilgas Economy Run. In this toughest test, a stock model Ford Six equipped with Overdrive (optional at extra cost) averaged 53.855 ton-miles per gallon and 25.463 actual miles per gallon.

This was a very special triumph for Ford's All-New Mileage Maker high-compression Six. For now, with its new design providing 101-horsepower and free-turning overhead valves, Ford is definitely pound-for-pound the most economical low-priced car to run! Yes... Ford's thrift was clearly proved by the 1,415-mile grind from Los Angeles to San Valley. And a very important factor contributing to this victory is Ford's Automatic Power Pilot which squeezes the last ounce of power out of every drop of gas.

WEST TEXAS C. OF C. URGES PARTICIPATION IN PRECINCT CONVENTIONS

(Editor's Note: As a public service, the West Texas Chamber of Commerce has prepared a series of two articles that emphasize importance of individual participation in party precinct conventions in a presidential election year. Below is the first article.)

In the past a very small portion of Texas voters have had any direct influence — with their individual votes — upon the election of the President and Vice President of the United States.

They have voted in primary elections, and a few of them in general elections. But they voted for Presidential Electors —

STREAMS

in Desert Places

By Oselle Stephens

Abraham walked with God. This constant fellowship with the Lord, made possible the special occasion where God came down and talked with Abraham as one talketh face to face. (Gen., 18th chapter.)

The Lord appeared unto Abraham as he sat in his tent door. Had Abraham been as Lot, who was entangled with many things not pertaining to the Lord and His service, it would perhaps have been an impossible thing for God to have come to him in such a real way.

Again the Lord appeared to Abraham on the plains of Mamre. Mamre means "fatness." It is always a fat place where the Lord appears to us. The old song says, "A sweet perfume upon the breeze, is borne from ever-vernal trees." That is always so — it is a place of fatness and of fragrance when the Lord walks with us. Our winter is turned into summer, and our thorns into roses when He is there. The desert places turn into watered grounds.

The Lord appeared unto Abraham as a welcome Guest. This is the secret of happiness and success. So often we do not know that God is near. He is ever present, real, ready to bless and keep when He is recognized, honored and accepted. Are you always glad and ready to entertain the Lord? Do you accept His word as truth? Faith is His pleasure. Walk with Him daily and He will flood your soul with the great streams of His grace and power.

not the candidates themselves. Those candidates—the party nominees—had been selected three or four months before the general election itself.

And, even then, they had not been selected by ballots of individual voters, cast in an election.

Their nominations originated 'way back there in May at party precinct conventions.

Here is how it works: The precinct convention selects delegates to the county convention.

The county convention selects delegates to the state convention.

The state convention selects delegates to the national convention.

The national convention nominates the presidential and vice presidential candidates of the party.

It is, therefore, necessary that the individual voter take part in the precinct convention to most effectively make his own vote count in election of the President and Vice President.

Because such a relatively few voters usually attend Precinct conventions, the vast majority have had little moral right to complain about any administration's policies.

Here are some questions and answers to point up fundamental facts about the Presidential Precinct Convention:

Q. When will it be held?
A. On Saturday, May 3.
Q. At what hour?
A. The law requires that it

For the last two years the show has drawn the reigning champion in every major event, and with the prize money up from the 1951 figure, rodeo officials are confident the top-flight boys will be in the arena demonstrating their skill again this year.

Dates for the 1952 show are April 28-May 3, inclusive. Among the nationally-known

performers here last year, and expected back for this year's performance are Toots Mansfield, Royce Sewalt, Bill Linderman, Todd Whatley, Harry Tomkins, Jim Shoulders, Bill McGuire, Bud Spellman, Shoat Webster and Casey Tibbs.

There'll be a star-spangled group of specialty performers for this year's big show, also. Bobby Clark, Madison Square Garden performer, will be added to make a third clown this

year, working with two veteran funsters, Wilbur Plaugher and Zeke Bowery, who have made the customers laugh in the midst of dangerous thrills in years past.

Zeke has a new monkey this year—named Marie.

Other performers will include the world-famed Hendricks family, Wanda Lou McCush in a Roman hurdle, and Jay Sissler in a specialty act.

The grand entry Monday night will be the most fabulous grand entry in the tanbark circuit. Riding in the grand entry will be the world's champion cowboy for each event in rodeo, the sponsors and producers of the famed Santa Rosa Round-Up, the Hendricks Family, including Byron and Lee with the Flying Twins, and Ann Hendricks with King Richard. Music for the grand entry will be played by the Ruby Nance Rodeo Band, which through the years has become the most sought after rodeo band in America.

Mrs. George Kay and children of Imperial, Calif., are visiting her mother-in-law, Mrs. B. F. Kay.

Sunday guests of Mrs. A. J. Gore were Mr. and Mrs. Jack Gore of Jacksboro and Mrs. Leroy Melton of Benjamin.

KNOW YOUR INSECTICIDE, SPECIALIST ADVISES

COLLEGE STATION. — The problem of controlling insects may soon become a major job on a lot of Texas farms. Never before in history have agricultural producers been asked to plant and harvest crops as large as those asked for in 1952, and Allen C. Gunter, entomologist for the Texas Agricultural Extension Service, says the final production figures for the year will reflect just how well crop destroying insects were controlled.

He says there is a lot more involved in a good insect control program than buying an insecticide and applying it to the crop. First he suggests that farmers secure copies of bulletins and circulars from their local county agents that describe the insects and list the recommended control measures. The second suggestion is of prime importance. Know what insecticide is needed and then read the label on the container to make sure that it is the one recommended, says the specialist.

The great number of organic insecticides on the market today are offered in many different formulas and strengths, and poor insect control will result if correct materials are not used, says Gunter. He especially calls attention to the need for checking spray formula labels. In the case of cotton sprays he suggests that the recommendations listed in C-182.

"Guide for Controlling Cotton Insects in Texas—1952", be followed. Then to insure proper dosage, read the label and follow the manufacturer's instructions to the letter. A lot of failures have resulted, says Gunter, because the wrong formula was used or in other words, the material was not checked for strength—label was not studied—before it was applied to the cotton.

Gunter offers this word of advice regarding the mixing of spray materials. Use clean water and if necessary strain the water as well as the spray

material. This precaution will prevent nozzle clogging and result in a uniform spray job. He points out that a more uniform mixture—of spray material and water—will be obtained if only enough water is put in the sprayer tank to get a good mixing job done. After the solution is mixed, add enough water to fill the sprayer tank to the desired level and then thoroughly mix the solution before applying the spray to the crop.

Gunter says farmers should realize that all insecticides are poisons and all precautions given on the labels should be followed. Special precautions must be taken when handling TEPP and Parathion to avoid prolonged contact with the skin or breathing the vapors or drift from either spray or dust.

The specialist urges farmers to get their spraying and dusting equipment in top operating shape. Preparations made early may well be a determining factor in whether the insect control program on any given farm is a success or failure. It is good management, says Gunter, to be ready and waiting for the bugs.
