OPA or NO OPA

Lifting of government price controls will not cause Egenbacher Hardware to raise prices. Present established prices will remain. We will not take advantage of the opportunity to skyrocket prices during the unprecedented demand for hardware.

To sell merchandise at a price low as possible-at small margin of profit and fair dealing, has been and will be our policy.

In the event of advances of costs of merchandise coming in to this establishment, our only aim will be a fair and just margin of profit, commensurate with a "live and let live" policy. We believe common sense will prevail where other methods have failed.
